**BM Alternativos (the "Fund"), Share class : I EUR (LU2041049300) is a sub-fund of iMGP (the "SICAV") managed by iM Global Partner Asset Management S.A. (the "Management Company") and whose sub-management has been delegated to SYZ Capital AG.**

## Objectives and investment policy

The objective of this Sub-fund is to provide its investors with capital growth, mainly by investing in units of UCITS and/or UCIs offering different strategies and the philosophy of which is to achieve an absolute performance, without prejudice to the restrictions laid down in article 41 (1) e) of the Law. At least two thirds of the assets, excluding cash, will be invested at all times in UCITS and/or UCIs having notably the following styles: "Equity Hedge", "Event Driven", "Macro", "Relative" and "Protection". The Sub-fund's assets must be invested in at least three of these styles without any one of them accounting for more than 70% of the Sub-fund's net assets. The portfolio management involves a four-step investment approach. The sourcing of the underlying UCITS and UCI is based on managers views, team's network and external sources. The selection relies on quantitative and qualitative analysis and evaluations, including review of operational risk from the risk team.

Portfolio construction is based on defined constraints and a mixture of top-down and bottom-up approaches. The Fund may invest up to 30% of assets in units of other UCIs. The Fund may invest derivatives, such as in particular FX forwards (over-the-counter), for the purpose of efficient portfolio management and protection of assets from exposure to currencies other than the base currency (hedging). Under normal market circumstances and/or in the ordinary course of business, the use of derivatives is not expected to result in leverage. The Fund is actively managed, with no reference to an index.

The manager may use techniques to partially or fully protect the Fund from its exposure to currencies other than the base currency. You may sell your shares in the Fund upon request, on a weekly basis.

Profits are not distributed but are accumulated by the Fund.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money in less than 5 years.

## Risk and reward profile

The Synthetic Risk & Reward Indicator (SRRI) is assigned due to the past or expected share class price variations resulting from its currency and the nature of the Fund's investments and strategy.

The Fund may be exposed to the following risks which are not satisfactorily captured by the SRRI and may negatively impact its assets:

**Operational risk:** Human or technical issues or errors during the processing of the transactions and/or the calculation of the NAV of the Fund may result in losses.

**Liquidity risk:** selling securities in low volume markets may imply a negative impact on the valuation which result in losses.

**Financial Derivatives risk:** Derivative transactions generate leverage which may emphasize losses whether the strategy (such as hedging, exposure, efficient portfolio management) does not react as expected under certain market conditions.

**Counterparty risk:** When a counterparty does not respect its obligation related to contracts such as term deposits or over-the-counter derivatives losses may occur.
