

Fisher Investments Institutional Global Small Cap Equity Fund, USD ¹

Investment Objective: The investment objective of the Fisher Investments Institutional Global Small Cap Equity Fund (the "Fund") is to outperform the Benchmark. There is no guarantee that the investment objective will be achieved.

Benchmark: MSCI World Small Cap Index. The Benchmark is a free float-adjusted market capitalisation weighted index that is designed to measure small cap equity market performance across developed markets.

Investment Policy: The Fund invests primarily in equities and equity-related securities of, or linked to, small market capitalisation issuers included in countries represented within the Benchmark, but may invest up to 30% of its total assets in equities and equity-related securities of, or linked to, issuers established in countries not represented within the Benchmark. The Fund is actively managed by the Investment Manager, meaning that investment decisions are made on a fully discretionary basis. Accordingly, the portfolio holdings may significantly deviate from the Benchmark. Prior to investing in the Fund, you should take into account all characteristics and objectives of the Fund as described in the Fund's prospectus and supplement.

RISKS

Investing in securities involves the risk of loss and there is no guarantee that all or any capital invested will be repaid. Past performance is never a guarantee of future returns. Investing in shares of the Fund does not grant an investor any ownership interests in the assets held by the Fund. Before investing in the Fund, the Fund's investment objectives, risk, charges and expenses should be carefully considered, including:

Currency Risk: The base currency of the Fund is USD. The non-USD share classes may be affected unfavourably by fluctuations in currency rates.

Liquidity Risk: Some of the Fund's investments may be difficult to buy or sell. This might affect the price at which the investments can be sold, which would affect the Fund's value.

Counterparty Risk: There is a risk that counterparties to some of the Fund's investments may not perform their obligations and that transactions may not settle.

Market Capitalisation Risk: The Fund will generally invest in small market capitalisation companies for which effective sales of securities may be more difficult and there may be greater price volatility.

As further described in the Fund's UCITS KIID or PRIIPs KID (as appropriate), this Fund has the following risk classification scores (scores may be different due to slightly different risk calculation methodologies for UCITS KIIDs and PRIIPs KIDs) due to its exposure to equity markets, which means the Fund may experience significant volatility:

UCITS KIID Risk Classification: 7

PRIIPs KID Risk Classification: 5
