

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Neuberger Berman Strategic Income Fund ("Fund")

a sub-fund of Neuberger Berman Investment Funds plc

AUD Z Monthly Distributing Class (IE00BH3W6Z85)

This Fund is managed by Neuberger Berman Europe Limited

OBJECTIVES AND INVESTMENT POLICY

The Neuberger Berman Strategic Income Fund ("Fund") aims to increase the value of your shares through a combination of growth and income from investments in sovereign and corporate bonds (debt securities).

Investments may be made in investment grade, high yield or unrated debt securities.

Investment grade securities are highly rated securities, generally those rated Baa3, BBB- or above by one or more recognised rating agencies. High yield bonds have a lower credit rating because they carry a greater risk of not being paid back. High yield bonds typically offer a higher income to make them attractive to investors.

Investment selections result from a framework of inputs including the investment manager's view on the economy, fundamental research on sector valuations and analysis to identify issuers that are believed to be undervalued and have strong credit quality.

The Fund may hold a broad range of investments including:

- Government or corporate bonds, money market instruments including bank deposits and commercial paper, and asset backed securities (financial instruments which are backed by loans, leases etc.).
- Financial Derivative Instruments ("FDI") that exaggerate the potential returns or potential losses to achieve more growth, reduce risk or increase operational efficiencies.

- Other investment funds.

- Up to one third of the portfolio may be invested in debt securities in non-US government, agencies or corporations.

The Fund does not track a benchmark. However, its performance may be compared against Bloomberg Barclays U.S. Aggregate Index (Total Return).

This Fund may not be appropriate for short-term investment and is more suitable as part of a diversified portfolio.

You may sell your shares on any day when the financial markets in London and New York are open for business.

As your shares are in Australian dollars and the Fund is in US dollars, currency exchange contracts are used to reduce the effect of changes in the currency exchange rate.

Your shares pay you a dividend on a monthly basis.

Monthly distributing classes will distribute out of income and may also pay out of capital which will be eroded; investors in these classes should be aware that the payment out of capital may have different tax implications to distributions of income and should seek tax advice.

Transaction costs will reduce the Fund's return.

RISK AND REWARD PROFILE

This Fund is in category 3 due to its level of historical volatility. As the share class has less than 5 years of returns history, the historical volatility includes benchmark/representative portfolio returns. The Fund invests in a variety of investments, some of which can vary significantly in price from day to day due to a number of factors.

The main risks facing the Fund are:

- **Market Risk:** The risk of a change in the value of a position as a result of underlying market factors, including among other things, the overall performance of companies and the market perception of the global economy. In addition, as the Fund invests in businesses that are connected with less advanced countries and economies, certain risks exist. The market for investments in such countries may be less developed making it difficult for the Fund to sell its investments in such markets and political and social instability may lead to a reduction in the value of the investments in such countries. Accounting and auditing standards and availability of financial information may vary across the markets in which the Fund invests.
- **Liquidity Risk:** The risk that the Fund may be unable to sell an investment readily at its fair market value. This may affect the value of the Fund and in extreme market conditions its ability to meet redemption requests upon demand. To counter this risk the Fund actively monitors the liquidity of its investments. Furthermore, certain segments of global fixed income markets may experience periods of lower liquidity caused by market events or large sales and raise the risk that securities or other fixed-income instruments cannot be sold during those periods or sold at reduced prices. Those events may challenge the Fund to meet significant volumes of redemption requests and may also influence the value of the Fund as the lower liquidity may be reflected in a reduction in the value of the Funds' assets.
- **Counterparty Risk:** The risk that a counterparty will not fulfil its payment obligation for a trade, contract or other transaction, on the due date. The insolvency of any institution providing services such as the safekeeping of assets or acting as counterparty in respect of derivatives or other instruments may expose the Fund to financial loss.

- **Derivatives Risk:** The Fund is permitted to use certain types of derivative instruments (including certain complex instruments) to obtain or increase exposure to its underlying assets, or to achieve 'short' positions where the Fund may benefit from a fall in the value of an underlying asset, or to seek to protect its assets against some of the risks outlined in this section. This may increase the Fund's leverage significantly. Leverage is an investment technique which gives an investor a larger exposure to an asset than the amount it invested, which can cause large variations (both positive and negative) in the value of your shares. As a result of its use of derivatives, the Fund may have an exposure of over 100% of its Net Asset Value, which may result in a significant loss to the Portfolio. Please refer to the Prospectus for a full list of the types of derivative that the Fund may utilise.

- **Operational Risk:** The risk of direct or indirect loss resulting from inadequate or failed processes, people and systems including those relating to the safekeeping of assets or from external events.

- **Interest Rate Risk:** The risk of interest rate movements affecting the value of fixed-rate bonds. Longer maturity bonds are more sensitive to changes in interest rates with the risk usually decreasing for bonds of lower rating and shorter duration.

- **Credit Risk:** The risk that bond issuers may fail to meet their interest repayments, or repay debt, resulting in temporary or permanent losses to the Fund. This risk is greater than average for investments with a lower credit rating.

- **Currency Risk:** Investors who subscribe in a currency other than the base currency of the Fund are exposed to currency risk. Fluctuations in exchange rates may affect the return on investment. If the currency of this share class is different from your local currency, then you should be aware that due to exchange rate fluctuations the performance shown may increase or decrease if converted into your local currency.

For a more detailed explanation of risks, please refer to the "Investment Restrictions" and "Investment Risks" section of the Prospectus.

A category 1 fund is not a risk free investment - the risk of losing money is smaller than that of a category 7 fund, but the likelihood of making gains is also lower. The seven-category scale is complex: for example, a category 2 fund is not twice as risky as a category 1 fund.

The category is calculated using past data, which cannot be used as a prediction for the future. Therefore the risk classification may change over time.

CHARGES

ONE-OFF CHARGES TAKEN BEFORE OR AFTER YOU INVEST	
Entry charge	None
Exit charge	None
This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out	
CHARGES TAKEN FROM THE FUND OVER A YEAR	
Ongoing charge	0.15%
CHARGES TAKEN FROM THE FUND UNDER SPECIFIC CONDITIONS	
Performance fee	None

These charges are used to pay the costs of running the Fund, including the costs of marketing and distributing it.

These charges reduce the potential growth of your investment.

The one-off charges shown are the maximum figures. In some cases they may be less. You can find out your actual charges from your financial adviser.

The ongoing charge shown is an estimate. This figure may vary from year to year.

You can find more details on these charges in the Fees and Expenses section of the prospectus and supplement.

PAST PERFORMANCE

There is insufficient data to provide a useful indication of past performance to investors.

Past performance is not a reliable indicator of future results.

The past performance takes account of all charges and costs.

The value of this class is calculated in Australian dollars.

The Fund launched on 26 April 2013.

This class launched on 01 July 2019.
