The risk indicator SRI rates this fund on a scale of 1 to 7. This indicator is used to assess the level of risk of this product in comparison to other funds and a category 1 rating does not mean that the investment is risk free. In addition, it indicates the likelihood that this product will incur losses in the event of market movements or our inability to pay you. This indicator assumes that you hold the product until the end of the recommended holding period of this fund. The actual risk may be very different if you choose to exit before the end of the recommended holding period of this Fund.

Fund Managers

Michael NIZARD, Laurent BENAROCHE

Risks

The main risks of this UCITS are:

- Equity risk
- Credit risk
- Risk linked to derivatives
- Capital risk
- Currency risk

GENERAL INFORMATION

Investment objective

The Product aims to outperform its benchmark index over a recommended investment period of more than five (5) years via the discretionary and opportunistic management of a diversified portfolio across multiple asset classes (including equities, interest rates and currencies), with no restrictions as to sector or geographic region. In order to achieve the management objective, the Product may use derivatives for the purposes of hedging, engaging in arbitrage and/or exposing the portfolio to these multiple asset classes. This portfolio will be constructed through the implementation of directional strategies and relative values (arbitrage strategies). The Product is managed actively, which means that the Manager makes investment decisions in line with the Product's investment policy with a view to achieving the Product's objectives. This active-management process entails taking decisions regarding the selection of assets, regional allocations, sectoral views and overall market exposure. The Manager is in no way limited by the composition of the benchmark index in the positioning of the portfolio, and the Product may not hold all the components of the benchmark index, or even any of the components in question at all. The fund may diverge wholly or significantly from the benchmark index or, occasionally, very little.

PERFORMANCES

Performance (Basis 100 - Net of fees)

Benchmark (Index) : ESTR Capitalisé +3% (EUR)

Past performances and volatility are not a reliable indicator of future performance and volatility. They may vary over time. The performances shown do not take into account the fees and expenses borne at the time of issue and redemption of units but include ongoing charges, brokerage fees and any performance fees taken.

GLOSSARY

The VOLATILITY of a security is the difference between performance and average performance and therefore makes it possible to gauge the consistency of performance obtained. It comprises a measure of risk. If this is zero, the individual performances are identical. The higher it is, the greater the difference between individual performances.

The TRACKING ERROR shows the volatility of a fund's relative performance against that of its benchmark. It shows the difference between performances and their average and so makes it possible to gauge the consistency of relative performance. The lower the tracking error, the closer the fund's performance is to that of its benchmark.

The ALPHA corresponds to the fund's average performance. More specifically, it measures the fund managers' added value while cancelling out market influence, which cannot be controlled. This measure is expressed as a percentage.

The SHARPE RATIO shows the fund's outperformance against a zero-risk interest rate, adjusted for fund volatility.

Other definitions and methodologies are available at www.edmond-de-rothschild.com under the "Fund Center" tab in the fund's downloadable factsheet documentation.
