This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

## M&G (Lux) Global Enhanced Equity Premia Fund

a sub-fund of M&G (Lux) Investment Funds 1  
EUR Class C – Distribution shares ISIN no. LU2065172129  
Managed by M&G Luxembourg S.A.

### Objective and investment policy

The fund aims to provide a combination of capital growth and income that is higher than the global equities market over any five-year period.

**Core investment:** At least 80% of the fund is invested in the shares of companies, across any sector and of any size, from anywhere in the world, including emerging markets. The fund may invest in China A-Shares via the Shanghai-Hong Kong Stock Connect and the Shenzhen-Hong Kong Stock Connect.

**Other investments:** The fund may invest in other funds (including funds managed by M&G) and cash or assets that can be turned quickly into cash.

**Derivatives Usage:** To reduce risk and costs.

**Strategy in brief:** The fund applies a systematic approach to the selection of stocks. Stocks are ranked on five key criteria or 'Factors': Value, Quality, Momentum, Volatility and Size. These rankings are then combined to provide a single 'score' for each stock. The weighting of each factor in the single score is determined by the investment manager. Historically, stocks exhibiting these characteristics (or Factors) have tended to deliver above-market returns (or equity premia). In constructing the portfolio, differences between the fund's characteristics and those of its benchmark (such as sector, country or risk factor weightings) may be constrained. Managing the fund in this way limits the degree by which the fund's performance is expected to deviate from the benchmark.

**Benchmark:** MSCI ACWI Net Return Index

The benchmark is a comparator against which the fund's performance can be measured. It is a net return index which includes dividends after the deduction of withholding taxes.

The benchmark has been chosen as the fund's performance comparator as it best reflects the scope of the fund's investment policy. The benchmark also acts as a constraint on the fund's portfolio construction, as certain limits, such as constraints on sector or geographic exposure, may apply at any given time.

The fund is actively managed. Within the given constraints, the investment manager has freedom in choosing which investments to buy, hold and sell in the fund within the constraints defined. The fund's portfolio holdings may deviate significantly from the benchmark's constituents.

For unhedged and currency hedged share classes, the benchmark is shown in the share class currency.

#### Other information

You can buy and sell shares in the fund on any business day. Instructions received before 13:00 Luxembourg time will be dealt at that day's price.

Any income from the fund may be paid out to you annually.

In addition to the charges set out in the charges section, the fund will incur portfolio transaction costs which are paid from the assets of the fund. These can be higher when investing outside Europe.

Recommendation: This fund may not be appropriate for investors who plan to withdraw their money within 5 years.

### Risk and reward profile

■ The above risk and reward indicator is based on simulated historical data and may not be a reliable indication of the future risk profile of this share class. This Share Class is categorised in risk class 6 because its simulated Net Asset Value has shown high rises and falls in value historically.

■ The risk number shown is not guaranteed and may change over time.

■ The lowest risk number does not mean risk free.

#### The main risks that could affect performance are set out below:

■ The value and income from the fund's assets will go down as well as up. This will cause the value of your investment to fall as well as rise. There is no guarantee that the fund will achieve its objective and you may get back less than you originally invested.

■ The fund can be exposed to different currencies. Movements in currency exchange rates may adversely affect the value of your investment.

■ Investing in emerging markets involves a greater risk of loss due to greater political, tax, economic, foreign exchange, liquidity and regulatory risks, among other factors. There may be difficulties in buying, selling, safekeeping or valuing investments in such countries.

■ The fund may invest in China A shares. Investments in assets from China are subject to changeable political, regulatory and economic conditions, which may cause difficulties when selling or collecting income from these investments. In addition, such investment is made via the Stock Connect system, which may be more susceptible to clearing, settlement and counterparty risk. These factors could cause the fund to incur a loss.

■ In exceptional circumstances where assets cannot be fairly valued, or have to be sold at a large discount to raise cash, we may temporarily suspend the fund in the best interest of all investors.

■ The fund could lose money if a counterparty with which it does business becomes unwilling or unable to repay money owed to the fund.

■ Operational risks arising from errors in transactions, valuation, accounting, and financial reporting, among other things, may also affect the value of your investments.

Further details of the risks that apply to the fund can be found in the fund's Prospectus at [www.mandg.co.uk/literature](http://www.mandg.co.uk/literature)

## Charges

The charges shown in the table are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	1.25%
Exit charge	0.00%
This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.	
Charges taken from the fund over a year	
Ongoing charge	0.39%
Charges taken from the fund under certain specific conditions	
Performance fee	None

The entry and exit charges shown are the maximum figures and, in some cases, you may pay less. You can find out the exact charges which apply to your investment by contacting your financial adviser or distributor or, if you have invested directly with us, you can contact us using the details given in the practical information section.

The ongoing charge is based on expenses for the period/year ending 30 September 2022. This figure may change from year to year. It excludes portfolio transaction costs. This figure includes extraordinary expenses and underlying charges for closed-ended-funds, such as investment trusts and Real Estate investment trusts.

For Distribution shares, the ongoing charge is taken from investments held in the fund's portfolio and not from the income these investments produce. The deduction of this charge will reduce the potential growth of your investment.

**For more information on charges, please see the relevant sections of the Prospectus at [www.mandg.co.uk/literature](http://www.mandg.co.uk/literature)**
