Objectives and Investment Policy

Objective

The objective of the Sub-Fund is to outperform its benchmark over a recommended investment period of five years by investing mainly indirectly in global equities involved in the environmental transition, technological disruption or societal transformation.

Benchmark index

The benchmark index of the sub-fund is the MSCI World Index. The Sub-Fund is actively managed. The benchmark index is used for performance comparison purposes only.

Investment policy

The Investment Manager implements a long-term discretionary management and aims to invest between 70% and 110% of the Sub-Fund's net assets in international capital markets. To achieve this objective, the Sub-Fund will invest, directly and mainly indirectly in equities without restriction or limitation as to geographic, industrial or sector diversification.

The allocation within each of the 3 trends mentioned above (environmental transition, technological disruption and societal transformation) is made dynamically between a core, a satellite and an opportunistic pillar, each pillar reflecting the investment manager's convictions on a different time horizon.

The Sub-Fund may also invest up to 25% of its net assets in units or shares of UCITS and other UCIs investing in transferable debt securities and Money Market Instruments from public or private issuers. The Sub-Fund may use financial derivative instruments to achieve its investment objective.

The investments underlying this financial product do not take into account the EU criteria for environmentally sustainable economic activities

For the avoidance of doubt, the Sub-Fund may be exposed, but only through UCITS, other UCIs or financial derivative instruments to Emerging Countries including China.

---	---	---	---	---	---	---

The definition of the risk and reward category is based on the historical performance data and/or the risk limit indicated in the Sub-Fund's investment policy. It may not be a reliable indication of the future risk profile of the Sub-Fund. The risk and reward category shown may change over time. Category 1 does not mean that an investment is risk-free. Investors should note that the Sub-Fund is not guaranteed or capital protected.

The Sub-Fund is rated in category 6, in line with the type of securities and geographic regions detailed under the heading "Objectives and investment policy", as well as the currency of the unit.

Significant risks not taken into account in this indicator:

Credit risk : When a significant level of investment is made in debt securities.

Liquidity risk : The markets for some securities and instruments may have limited liquidity. This limited liquidity could be a disadvantage to the Sub-Fund, both in the realisation of the prices quoted and the execution of orders at desired prices.

Impact of techniques such as derivative contracts : The use of derivatives instruments can infer a decrease of the asset more significant than the decrease of the invested underlying assets or markets.

Counterparty risk : Where a Fund is backed by collateral or has significant investment exposure through contracts with a third party.

Operational risk : The Sub-Fund may suffer losses due to the failure of operational processes, including those related to the safekeeping of assets.

The occurrence of any of these risks may negatively impact the net asset value.
