Copies of the report and accounts to 30 September 2022 may be obtained from the registered office of Columbia Threadneedle (Lux) III (the "Fund") at 49, Avenue J.F. Kennedy, L-1855 Luxembourg, Grand Duchy of Luxembourg and from foreign representatives and will be posted to shareholders on request. Notices to Shareholders are published in the *Recueil Electronique des Sociétés et Associations* (the "RESA") and in Luxembourg newspapers, to the extent required by Luxembourg law, and in such other newspapers as the Directors may decide. The articles of incorporation of the Fund (the "Articles") have been lodged at the *Registre de Commerce et des Sociétés* of Luxembourg where they are available for inspection and copies can be obtained upon request. The net asset value of each of the Fund's shares is published in accordance with the relevant appendices of the Fund's latest prospectus (the "Prospectus"). The issue and redemption prices are available from Columbia Threadneedle Management Limited, Exchange House, Primrose Street, London EC2A 2NY, United Kingdom, at the registered office of the Fund and will be published as further described in the Prospectus.

No subscription can be received on the basis of financial reports. Subscriptions are only valid if made on the basis of the current Prospectus, the latest key investor information documents and the latest annual and the most recent semi-annual report, if published thereafter.

The information contained in this report is historical and should not be taken as a guide to future performance. Statements contained in this report concerning future performance are the opinions of management and there can be no guarantee that such opinions will prove to be correct.

Columbia Threadneedle (Lux) III The Portfolios and their Objectives

CT (Lux) Diversified Growth

The investment objective of the Portfolio is to achieve capital appreciation over the medium to long-term through a broadly diversified mix of holdings into traditional and alternative assets including investments in: equities, bonds, indirect property and indirect commodities. The Portfolio intends to target a return of ESTR (Euro Short-Term Rate) (or the equivalent local currency SONIA (Sterling Overnight Index Average) rate per hedged share class) +4% over a rolling 3 year period. Portfolio efficiency is maximised, and costs minimised, by using the most efficient products in the market place, that provide liquid, low-cost exposure to the relevant asset class. A combination of cash, Exchange Traded Funds (ETF), financial derivative instruments, listed certificates issued by investment banks, as well as swap contracts and currency are used to structure the Portfolio.

CT (Lux) Euro Bond

The investment objective of the Portfolio is to ensure an adequate return of the invested capital while reducing risk due to an adequate investment diversification. The assets of the Portfolio are mainly invested, directly or through the use of financial derivative instruments, in debt securities having a fixed and variable income listed on a stock exchange or dealt in on another regulated market of an OECD-member state, whilst attempting to reduce the exchange risks. Without changing the specific investment policy of the Portfolio and as market conditions and investment opportunities prevail, the Portfolio may, on an ancillary basis, invest in securities listed on a stock exchange or dealt in on a regulated market of a non OECD-member state. Taking into account the principle of investment risk spreading, the Portfolio will invest, directly or indirectly through the use of financial derivative instruments, in investment grade (at the time of the purchase and as defined by recognised rating agents such as Moody's Services or Standard & Poor's) bonds and money market instruments. The Portfolio may invest in financial derivative instruments to achieve its investment objective. Such instruments may also be used for hedging purposes. These instruments may include, but are not limited to, futures, forwards, options, swaptions, interest rate swaps and inflation swaps.

CT (Lux) European Growth & Income

The investment objective of the Portfolio is to achieve long-term capital appreciation and an enhanced level of income by investing in companies listed on one of the European States Stock Exchanges or a regulated market. The Portfolio will invest at least 75% of its total assets in equity securities of companies that are incorporated under the laws of, and have their registered office in, a country in Europe. The Portfolio will invest more than 50% in equity securities in the sense of sec. 2 para. 8 of the German Investment Tax Reform Act ("GITA"). In addition to equity and equity-related securities, the Portfolio may also invest in warrants on equity and equity related securities.

CT (Lux) European Smaller Cap

The investment objective of the Portfolio is to make available to investors participation in a Portfolio consisting of securities of European domiciled companies listed on the various European States Stock Exchanges. The Investment policy is directed towards achieving long-term capital growth through investment in small and medium sized companies.

The Portfolio is actively managed. The Investment Manager believes that an appropriate comparator benchmark for reviewing fund performance is the EMIX Smaller European Companies NR Index, given the investment policy of the Portfolio and the approach taken by the Investment Manager. The Portfolio is not constrained by this benchmark and has significant freedom to invest in a portfolio that is materially different to the benchmark's own composition. The Portfolio will invest at least 75% of its total assets in equity securities of companies that are incorporated under the laws of, and have their registered office in Europe. In addition, the Portfolio will invest the majority (i.e., greater than 50%) of its total assets in European equities of companies that have a maximum capitalisation less than or equal to the highest capitalisation in the Index. The Portfolio will invest more than 50% in equity securities in the sense of sec. 2 para. 8 of the GITA.

CT (Lux) Global Absolute Return Bond

The investment objective of the Portfolio is to deliver a return through a combination of income and capital growth. The Portfolio seeks to deliver an absolute return irrespective of bond market direction. The Portfolio aims to achieve this objective through investing at least two thirds of its total assets in corporate bonds. In addition thereto, the Portfolio will invest in bonds issued by other entities including sovereign and supranational issuers. Investments in contingent convertible bonds will not exceed 10% of the Portfolio's net assets. Exposure to China through the Hong-Kong and Shanghai Bond Connect will normally not exceed 5% of the Portfolio's net assets. The Portfolio may also invest in other transferable securities, collective investment schemes, money market instruments, deposits, cash and cash equivalent, financial derivative instruments and forward transactions.

Columbia Threadneedle (Lux) III The Portfolios and their Objectives (continued)

CT (Lux) Global Convertible Bond

The investment objective of the Portfolio is to achieve high returns by investing its assets through a balanced portfolio consisting of convertible securities. The Portfolio will invest its assets in a balanced portfolio consisting of convertible debt securities and synthetic convertibles which offer the most attractive risk/reward characteristics in terms of upward participation and downward protection. The Portfolio will invest at least two thirds of its total assets in convertible debt securities issued by corporations located in Europe, the United States, Japan and Asia.

CT (Lux) Global Smaller Cap Equity

The investment objective of the Portfolio is to make available to investors participation in a Portfolio consisting of listed securities of companies on a worldwide basis. The investment policy is directed towards achieving long-term capital growth through investment in small and medium sized companies. The Portfolio will invest more than 50% in equity securities in the sense of sec. 2 para. 8 of the German Investment Tax Reform Act ("GITA"). The Portfolio will invest primarily in equity and equity-linked securities (excluding convertible bonds and bonds with warrants) issued by small and medium sized companies. Small and medium sized companies will generally be companies with a maximum stock exchange capitalisation of US\$ 10 billion or equivalent at the time of purchase. The Portfolio may hold and continue to invest its assets in companies with a higher capitalisation if the capitalisation of the relevant company subsequently reaches or exceeds US\$ 10 billion or equivalent after acquisition by the Portfolio. The Portfolio may also hold cash, exchange traded funds and fixed interest securities should this be considered to be appropriate at any particular time. In normal market conditions investment in liquid assets and debt instruments of any kind will not exceed 15% of the Portfolio's Net Asset Value.

CT (Lux) Global Total Return Bond

The investment objective of the Portfolio is to deliver a return through a combination of income and capital growth. The Portfolio aims to achieve this objective through investing at least two thirds of its total assets in corporate bonds. In addition thereto, the Portfolio will invest in bonds issued by other entities including sovereign and supranational issuers. Investments in contingent convertible bonds will not exceed 10% of the Portfolio's net assets. Exposure to China through the Hong-Kong and Shanghai Bond Connect will normally not exceed 5% of the Portfolio's net assets. The Portfolio may also invest in other transferable securities, collective investment schemes, money market instruments, deposits, cash and cash equivalent, financial derivative instruments and forward transactions.

CT (Lux) Plus II

The investment objective of the Portfolio is to achieve an above average rate of return over the long-term, measured in Euro, through investing in shares or units of other collective investment schemes that invest in global developed market equities and bonds or by investing in global developed equity and bond markets directly. Up to 5% of the Portfolio's total assets may be invested in shares or units of other collective investment schemes that invest in emerging market equities.

CT (Lux) Responsible Euro Corporate Bond

The investment objective of the Portfolio is to achieve an above average rate of return over the long-term, measured in Euro, through investing mainly in investment grade fixed income debt securities, floating rate and other debt securities, including asset backed securities and contingent convertible bonds, issued by companies. Investment grade securities are defined as securities that are rated Baa3/BBB- or higher by Moody's, Standard & Poor's or another recognised credit rating agency. The Portfolio may also invest up to 15% of its net assets in sub investment grade fixed income debt securities, floating rate and other debt securities. Investments in asset backed securities may not exceed 10% of the Portfolio's net assets. Investments in contingent convertible bonds will not exceed 10% of the Portfolio's net assets.

CT (Lux) Responsible Global Emerging Markets Equity

The purpose of the Portfolio is to provide a medium through which investors may participate in an actively managed portfolio, primarily invested in equity and equity-related securities of companies in emerging markets worldwide. The Portfolio may, as described below, invest in companies which are listed or traded on a recognised exchange in emerging market countries worldwide, which have, in the opinion of the Investment Manager, the potential for generating long term returns and contribute to or benefit from the sustainable economic development of the emerging market countries. The subscription proceeds relating to the different Classes of Shares in issue shall be invested in one common underlying portfolio of investments. Each Class of Shares will have a proportional entitlement to the assets (and liabilities) of the Portfolio (calculated according to the prevailing Net Asset Values of each Class). The Portfolio will invest at least two thirds of its total assets in equity and equity-linked securities (excluding convertible bonds and bonds with warrants), of companies that are incorporated under the laws of, and have their registered office in, an emerging market country, or that derive a predominant part of their economic activity from emerging market countries, even if listed elsewhere. The Portfolio will invest more than 50% in equity securities in the sense of sec. 2 para. 8 of the German Investment Tax Reform Act ("GITA").

Columbia Threadneedle (Lux) III The Portfolios and their Objectives (continued)

CT (Lux) Responsible Global Equity

The Portfolio focuses on long-term capital growth through investment in companies across the world. Its objective is to maximise returns through investment in an ethically screened and diverse universe of companies. The Portfolio will invest at least two thirds of its total assets in equity and equity-related securities (excluding convertible bonds and bonds with warrants) of companies, in any market, that meet the ethical and sustainable criteria. The Portfolio will invest a more than 50% in equity securities in the sense of sec. 2 para. 8 of the German Investment Tax Reform Act ("GITA").

CT (Lux) SDG Engagement Global Equity

The Portfolio aims to achieve long-term capital growth and support sustainable development. The Portfolio invests primarily in a diversified portfolio of equity and equity-related securities (excluding convertible bonds and bonds with warrants) of small- and mid-capitalisation companies, which may be anywhere in the world and be in any industry or sector. The Portfolio will hold more than 50% in equities securities in the sense of sec. 2 para. 8 of the German Investment Tax Reform Act ("GITA").

CT (Lux) Sustainable Multi-Asset Income

The investment objective of the Portfolio is to achieve capital appreciation and income through sustainable investments, while maintaining long-term value. The Portfolio will invest in a diversified mix of sustainable investments in traditional and alternative asset classes. The Portfolio will invest a majority of its assets in equity securities and debt securities, including investment grade, below investment grade debt securities and contingent convertible bonds. The Portfolio may invest in derivatives to enhance performance by gaining exposure to a number of alternative sources of return and controlling risk. Derivatives may be traded through recognised exchanges or over-the-counter ("OTC") and may include but are not limited to, options, futures, swaps (including, but not limited to, total return swaps on strategies, equity baskets, equity indices, property or commodity indices), contracts for difference and forward contracts. The Portfolio may invest up to 10% of its net assets in below investment grade debt securities. The Portfolio will not invest in security held by the Portfolio, the Investment Manager will take all reasonable efforts to keep this exposure below 5% of the Portfolio's net assets and to realise the distressed or defaulted securities as soon as reasonably practicable if this is tin the best interest of the Shareholders. Investments in contingent convertible bonds will not exceed 5% of the Portfolio's net assets. The Portfolio will invest a minimum of 26% in equity securities in the sense of sec. 2 para. 8 of the German Investment Tax Reform Act ("GITA").

CT (Lux) Sustainable Opportunities European Equity

The investment objective of the Portfolio is to achieve long-term capital appreciation through sustainable investments. The Portfolio invests in European companies listed on one of the European States Stock Exchanges or a regulated market. The Portfolio will invest at least 75% of its total assets in equity securities of companies that are incorporated under the laws of, and have their registered office in, a country in Europe. The Portfolio will invest more than 50% in equity securities in the sense of sec. 2 para. 8 of the German Investment Tax Reform Act ("GITA").

CT (Lux) US Smaller Companies

The investment objective of the Portfolio is to make available to investors participation in a Portfolio consisting of securities of United States companies listed on United States Stock Exchanges or NASDAQ. The investment policy is directed towards achieving long-term capital growth through investment in small and medium sized companies. The Portfolio will invest at least two thirds of its total assets in equity and equity-linked securities (excluding convertible bonds and bonds with warrants) of small capitalisation companies that are incorporated under the laws of, and have their registered office in the United States, or that derive a predominant part of their economic activity from the United States, even if listed elsewhere. The Portfolio will invest more than 50% in equity securities in the sense of sec. 2 para. 8 of the German Investment Tax Reform Act ("GITA"). The Portfolio will invest in companies with a maximum stock exchange capitalisation of US\$ 10 billion or equivalent at the time of purchase. The Portfolio may hold and continue to invest its assets in companies with a higher capitalisation if the capitalisation of the relevant company has reached or exceeded US\$ 10 billion or equivalent after acquisition by the Portfolio.

Columbia Threadneedle (Lux) III Board of Directors

Tina Watts - Director

(appointed 27th January 2022) Head of Operations EMEA, Columbia Threadneedle Investments Exchange House, Primrose Street London EC2A 2NY, United Kingdom

Columbia Threadneedle (Lux) III Chairman's Statement

Dear Shareholders

This statement provides a review of the conditions faced by the Portfolio in the financial year to 30 September 2022, and thoughts on the outlook for the coming year. Specific details of the Portfolio, together with the managers' comments, can be found later in this report.

During the year, the size of the Portfolio decreased by EUR 1,626 million to EUR 3,832 million (EUR 5,458 million as at 30 September 2021). The decrease was driven by the austere global economic downturn, combined with outflows from CT (Lux) Global Convertible Bond, CT (Lux) Responsible Global Equity, CT (Lux) Global Absolute Return Bond, CT (Lux) Plus II and CT (Lux) SDG Engagement Global Equity.

An extraordinary amount of economic changes have been compressed into 2022. We seem to have experienced almost the full range of an economic cycle inside a single year. There have been post-Covid bounce-backs in economic activity, bottle-necks in supply chains driving inflation, an energy crisis, the highest inflation in forty years for developed economies, and economic slow-downs. The fact that some countries, notably China, have persisted with Covid lock-downs further complicate the picture. Central banks have unsurprisingly struggled to keep up in this environment. The lingering risks of Covid meant they were late in responding to surging inflationary pressures. In July the expected interest rate for mid-2023 was still 3% in the UK, US and just 1% for the Eurozone. In the next two months, those expectations jumped by two percentage points or more. This unpredictability and instability has been reflected in huge volatility in asset markets.

Global government bond yields rose, with the US 10-year US Treasury yield jumping from 1.5% in October 2021 to 3.8% in September 2022. While both high yield and investment grade credit yield spreads widened, the shorter average duration of corporate bonds lessened the negative impact of rising interest rate expectations. The US Federal Reserve ended its quantitative easing programme at the beginning of March, reducing its bond holdings from June, and raising interest rates five times by the end of September to the 3.00%-3.25% range, the highest level since early 2008. Equities also fell in 2022, after rallying at the end of 2021 against a backdrop of accommodative monetary policy and fiscal support measures combined with the reopening of economies from Covid restrictions. But this bull market reversed in 2022, given worries over rising inflation, tighter monetary policy and the Russia-Ukraine war.

Risk assets have tumbled in 2022, but volatility is likely to persist as the anticipated recession finally arrives this winter. However disappointing earnings won't be a surprise to investors and we would expect buying opportunities to emerge in equities in 2023. Interest rate expectations now appear plausible, with the forecast peak high enough to tackle inflation. As a consequence, bond valuations appear increasingly attractive.

Patrick Johns

Chairman of the Board of Directors October 2022

Columbia Threadneedle (Lux) III CT (Lux) Diversified Growth

Performance

Over the twelve months to 30 September 2022, the Class X shares - EUR returned -10.2%. The Class A shares EUR returned -11.6%. By comparison the benchmark of ESTR rate, plus 4% per annum, returned -0.46% over the same period. Performance is net of fees and in euro terms.

While the Portfolio delivered negative returns over the period this was against the background of a very difficult period for asset markets, with equities and bonds both seeing losses. Losses in bonds were mitigated by a short duration position. However, as yields increased, we removed this long-held underweight position and by the end of the period, we had moved to a neutral stance. Being overweight equities was negative, though this was partially offset by the overweight in the UK equity market which proved relatively resilient. However, again, by the end of the period we had reversed this position and were under weight equities. A bright spot in the Portfolio was the performance of our alternatives strategies, which provided positive returns in the latter part of the period, when conventional assets markets came under severe pressure.

Market Review

Global government bond yields rose, with the US 10-year US Treasury yield jumping from 1.5% in October 2021 to 3.8% in September 2022. While both high yield and investment grade credit yield spreads widened, the shorter average duration of corporate bonds lessened the negative impact of rising interest rate expectations. The US Federal Reserve ended its quantitative easing programme at the beginning of March, reducing its bond holdings from June, and raising interest rates five times by the end of September to the 3.00%-3.25% range, the highest level since early 2008. Equities also fell in 2022, after rallying at the end of 2021 against a backdrop of accommodative monetary policy and fiscal support measures combined with the reopening of economies from Covid restrictions. But this bull market reversed in 2022, given worries over rising inflation, tighter monetary policy and the Russia-Ukraine war.

Outlook

As we move into the final quarter of 2022 we see the same two themes continuing to dominate market movements that we have had for most of the year: Inflation and the Ukraine/Russian conflict. There are signs that the story is beginning to turn on the first point and unfortunately no positive progress on the second. We believe that we are at, or close to, a turning point where the markets will stop focussing on inflation and start to focus on growth. As the growth outlook is fairly gloomy, the case for holding high-quality fixed income starts to look quite attractive. Having been underweight fixed income almost all of this year we think that most of the re-rating has already occurred and that future interest rate rises are already priced into the market. As such we have started to add government bonds back into the Portfolio. We do not think that equities have fully re-priced and therefore, if we do fall into a recession then we would expect equities to have further downside. As such we have been cutting our equity exposure for a little while now. There is clearly a significant amount of uncertainty in the markets, not least through the self-inflicted political suicide in the UK, which means that we would expect to see on-going higher levels of volatility from both fixed income and equity markets. But for now we are becoming more cautious with our portfolio positioning.

Multi-Asset Team November 2022

Columbia Threadneedle (Lux) III CT (Lux) Euro Bond

Performance

Over the twelve months to 30 September 2022, the I Acc EUR share class returned -15.9%. By comparison, the BBI Euro Aggregate Treasury Total Return Index returned -17.1%. Performance is total return and in euro terms.

Over the twelve-month period, the CT (Lux) Euro Bond Fund outperformed its benchmark. Underweight duration was beneficial as yields increased sharply. There was a positive contribution from underweights in Italian government bonds amid more hawkish pressure from the European Central Bank (ECB). This was partially offset by losses from overweights in government-related bonds and curve steepeners in Europe held earlier in the period.

Market Review

Eurozone government bonds saw yields rise sharply, with most of this move occurring in 2022; Yields soared in 2022 until mid-June, with the benchmark 10-year German bund yield jumping from -0.17% in December 2021 to 1.76% over the six months, before recovering in July to 0.83%. However, it then rose again, ending September at 2.12%. Bonds were pressured by surging inflation and the threat of interest rate increases amid rising energy costs. Russia's invasion of Ukraine accentuated the upward pressure on energy prices amid fears over tighter supply. Provisional estimates put eurozone inflation at 10.0% in September 2022, reaching double digits for the first time and up from 4.1% in October of the prior year. The eurozone grew by 2.3% in the third quarter of 2021, slowed to 0.4% in the fourth quarter of 2021 but increased to 0.5% in the first quarter of 2022, expanding to 0.8% in the second quarter. Growth was due to the removal of coronavirus restrictions and the summer tourism season. Unsurprisingly, business surveys generally showed faltering confidence, given the overall pessimistic macroeconomic backdrop. The S&P Global euro area composite PMI dipped to 48.1 in September, extending the downturn into a third consecutive month.

Outlook

Our bias remains for government bond yields to rise. However, given the sharp and significant increase in yields during mid-August and September, the outlook is more finely balanced, so we have moved to a more neutral view. We continue to believe that the high and potentially sticky inflation backdrop will ensure the ECB raises rates further in 2022. However, the market is already pricing in further moves into 2023, while we are more cautious given that the tightening in financial conditions will slow growth. Although a broadening fiscal response is welcome in preventing sharp squeezes to disposable incomes, given that Nordstream is now fully shut off, Europe is dependent on a warm winter to prevent gas rationing and further hits to growth. This could put pressure on the ECB to stop tightening monetary policy.

Columbia Threadneedle (Lux) III CT (Lux) European Growth & Income

Performance

In the twelve months to 30 September 2022, the Class A EUR shares returned -12.4%. By comparison the FTSE All-World Developed Europe NR Index return was -12.1%. All figures are net of fees and in euro terms.

The Portfolio performed in-line with volatile markets. A negative major factor was asset allocation, with the underweights in the oil sector detracting as energy prices soared. The most significant individual detractor over the period was online food delivery company Delivery Hero as its acquisition of Spanish online delivery platform Glovo raised financing concerns. A holding in Just Eat Takeaway.com likewise hurt relative performance as food delivery stocks were hit by the squeeze on consumer spending. The holding of TGS NOPEC Geophysical, was a positive contributor as demand for seismic surveys rebounded with higher energy prices. Positive contributors came from companies reporting strong profits and dividend increases, including AstraZeneca and Novo Nordisk. Deutsche Boerse also contributed to performance as market volatility drove higher trading activity on its exchanges.

Market Review

European equity markets were among the weakest globally as they were unavoidably hard-hit by the outbreak of the Russia-Ukraine war in the first quarter of 2022. The war brought an associated surge in energy prices and concerns about the security of energy supplies in the medium term, given the continent's heavy dependence on Russian gas. The eurozone economy grew by 2.2% in the third quarter of 2021 as economies reopened, slowed to 0.5% in the fourth quarter as restrictions were reimposed, rose to 0.7% in the first quarter of 2022 as restrictions were removed again and finally expanded to 0.8% in the second quarter of 2022 due to the summer tourist season in Southern Europe. In underlying terms, however, the eurozone economy has slowed. Unsurprisingly, given high inflation and the war in Ukraine, consumer confidence has plunged to record lows (a similar phenomenon has been observable in most developed countries). Business confidence weakened in the latter part of the period, and the EU Commission Economic Sentiment Indicator dropped to 93.7 in September, the lowest level since November 2020. Provisional estimates put eurozone inflation at 10.0% in August 2022, up from 4.1% in October of the prior year, driven by surging energy prices. "Core" inflation, excluding food and energy, was 4.8% in September 2022, illustrating that the passthrough from energy prices to other goods and services is still relatively limited. The European Central Bank (ECB) ended its pandemic and asset purchase programmes in the first half of 2022 and made its first rate hike in 11 years in July, bringing to a close the period of negative interest rates, followed by another in September. Moreover, the ECB will consider embarking on quantitative tightening in the autumn.

Outlook

Energy-intensive European businesses, many dependent on Russian gas, are nervous about the winter ahead. Our predominant focus on world-leading businesses, limits exposure to those with high energy needs and provides sound investment opportunities at a time when negativity on Europe is consensual. We are dedicated to investing in sustainable businesses with strong balance sheets and wide economic moats that provide resilience through business cycles. Valuations are becoming increasingly attractive and with several many quality growth companies remaining out of favour as interest rates rise, we seek opportunities over the coming months.

Columbia Threadneedle (Lux) III CT (Lux) European Smaller Cap

Performance

Over the twelve months to 30 September 2022, the Class A EUR share returned -35.0%. By comparison the EMIX Smaller European Companies Index (NR), returned -27.7%. Performance is net of fees and in euro terms.

With its quality growth bias it's disappointing, but not unsurprising, that the Portfolio underperformed in this period. We avoid exposure to commodity producers, where companies have limited control over their own destiny, but this detracted as energy prices rose. In terms of individual holdings, the main detractors were companies hard hit by the shift in the short-term economic outlook, with consumer and growth stocks out of favour. This included HelloFresh, the meal kit provider, which actually had positive results but cut guidance for the full year due a deteriorating outlook. MIPS, who design safety inlays for helmets that improve the injury outcomes following crashes, suffered from an expectation that sales will decline as less bicycles are bought. Concerns about the potential operating challenges of rationing energy this winter hit Sdiptech, despite reporting good first-half numbers and having diversified portfolios in terms of products and geographies. While we are clearly disappointed with our relative return, we can take some comfort in the fact that many of our holdings have delivered encouraging results. In fact, the Portfolio, in aggregate, is performing well in operational terms. Highlights include strong results from Karnov Group, the Nordic legal information provider; Lotus Bakeries, the Belgium biscuit maker; and Verallia, the French glass manufacturer. Positive contributions came from the financial sector, where there are beneficiaries of rising interest rates, including Ringkjoebing Landbobank, which announced continued strong loan growth and low loan losses, together with share repurchases. Nonetheless, while growth stocks remain out of favour, the portfolio will continue to struggle relatively. However, we are confident that our strategy will deliver the right results over the long term.

Market Review

Small cap equity markets in Europe fell over the period. European equity markets were among the weakest globally as they were unavoidably hard-hit by the outbreak of the Russia-Ukraine war in the first quarter of 2022. The war brought an associated surge in energy prices and concerns about the security of energy supplies in the medium term, given the continent's heavy dependence on Russian gas. The eurozone economy grew by 2.2% in the third quarter of 2021 as economies reopened, slowed to 0.5% in the fourth quarter as restrictions were reimposed, rose to 0.7% in the first quarter of 2022 as restrictions were removed again and finally expanded to 0.8% in the second quarter of 2022 due to the summer tourist season in Southern Europe. In underlying terms, however, the eurozone economy has slowed. Unsurprisingly, given high inflation and the war in Ukraine, consumer confidence has plunged to record lows (a similar phenomenon has been observable in most developed countries). Business confidence weakened in the latter part of the period, and the EU Commission Economic Sentiment Indicator dropped to 93.7 in September, the lowest level since November 2020. Provisional estimates put eurozone inflation at 10.0% in August 2022, up from 4.1% in October of the prior year, driven by surging energy prices to other goods and services is still relatively limited. The European Central Bank (ECB) ended its pandemic and asset purchase programmes in the first half of 2022 and made its first rate hike in 11 years in July, bringing to a close the period of negative interest rates, followed by another in September. Moreover, the ECB will consider embarking on quantitative tightening in the autumn.

Outlook

Energy-intensive European businesses, many dependent on Russian gas, are nervous about the winter ahead. However we do believe that valuations in Europe have reached a level of attractiveness that should appeal to long-term investors. Moreover, there are early indications that many input prices are rolling over, providing a potentially improving background for companies. We are certainly not trying to predict short-term market direction, but believe that when some excellent businesses are attractively priced, returns over the long term are likely to be good.

Columbia Threadneedle (Lux) III CT (Lux) Global Absolute Return Bond

Performance

Over the twelve months to 30 September 2022, the Class F GBP Hedged shares returned -6.6%. By comparison, the SONIA return was 0.7%. Performance is total return, net of fees and in sterling terms.

Rising interest rate expectations on the back of inflation hitting forty-year highs in the US and Europe drove a rise in yields. The prospect of tighter monetary policy was negative for credit yield spreads. As a consequence, there were significant negative returns on the core short-dated corporate bond portfolio. Positive contributors to performance included defensive risk management strategies, which saw us minimise interest rate and credit exposure within the fund. Relative value interest rate strategies also made a positive contribution to performance.

Market Review

Global government bond yields rose, with the US 10-year US Treasury yield jumping from 1.5% in October 2021 to 3.8% in September 2022. While both high yield and investment grade credit yield spreads widened, the shorter average duration of corporate bonds lessened the negative impact of rising interest rate expectations. The European Central Bank's (ECB) policy of pursuing a symmetric 2% inflation target over the medium term was overtaken by events as inflation rose well beyond the central bank targets. In 2022 the ECB first ended the pandemic emergency purchase programme in March and the older asset purchase programme in June before indicating it would consider quantitative tightening (letting bonds mature) in the autumn. It also raised its three key interest rates by 50 basis points in July, the first time in 11 years, and then by 75bp in September. The Federal Reserve moved earlier, ending its quantitative easing programme at the beginning of March, reducing its bond holdings from June, and raising interest rates five times by the end of September to the 3.00%-3.25% range, the highest level since early 2008.

Outlook

Our bias remains for government bond yields to rise. However, given the sharp and significant increase in yields during the back end of the third quarter, the asymmetry is unclear, and we have moved to a more neutral view. We still believe that the high and potentially sticky inflation backdrop will ensure central banks raise rates, yet we are cautious given that growth is showing some signs of weakening. If growth weakness persists, this may start to feed through into a weaker labour market, putting pressure on central banks to stop tightening monetary policy. Whilst inflation is expected to remain sticky, there is some low hanging fruit in the upcoming months, particularly in the US- headline inflation numbers may also recede further from the extremely high levels witnessed earlier in the year. The outlook for credit assets remains mixed. We remain in a highly volatile period as central banks continue to grapple with inflation by raising interest rates, resulting in consumers and businesses facing the increasing risk of an economic hard landing from rising bond yields. However, credit valuations are now looking cheap relative to longer-term averages, and periods of heightened volatility and challenged liquidity could represent good buying opportunities for investors. Whilst monetary policy conditions move from an accommodative to a restrictive stance and central banks globally are looking to reduce their holdings of fixed-income securities, the supply from new credit issuance is lighter year-on-year and corporate balance sheets and profitability are still strong.

Columbia Threadneedle (Lux) III CT (Lux) Global Convertible Bond

Performance

In the twelve months to 30 September 2022, the return on the A EUR shares was -11.1%, while the return for the Thomson Reuters Global Focus Customised TR Index was -15.1%. The A EUR Hedged share class returned -18.1% and the I EUR Hedged share class returned -17.9%. Performance is net of fees and in euro terms.

The Portfolio outperformed the benchmark, delivering a resilient performance in the face of a falling market hit by declining share prices and rising yields, which provided for soft bond floors. Convertible selection was the main performance driver. We largely refrained from investing into the previous surge of issuance, led by high-growth IT and consumer discretionary issuers, given demanding valuations. These sectors have proved vulnerable to rising inflation and interest rates. Detractor from performance include many ultra short-dated convertibles, which are akin to cash in a falling market. Our strategy will remain focussed on cautious repositioning to benefit from the favourable risk/reward that the asset class offers. Rising bond yields should make convertibles a more attractive financing alternative again vis-à-vis credits and may trigger new issuance.

Market Review

Convertibles continued to be hit by falling share prices and rising yields, which provided for soft bond floors. Global bond yields rose, with the US 10-year US Treasury yield jumping from 1.5% to 3.8% over the period. Both high yield and investment grade credit yield spreads widened, though the shorter average duration of corporate bonds lessened the negative impact of rising interest rate expectations. The US Federal Reserve end its quantitative easing programme at the beginning of March, reducing its bond holdings from June, and raising interest rates five times by the end of September to the 3.00%-3.25% range, the highest level since early 2008. Equities also fell in 2022, after rallying at the end of 2021 against a backdrop of accommodative monetary policy and fiscal support measures combined with the reopening of economies from Covid restrictions. But this bull market reversed in 2022, given worries over rising inflation, tighter monetary policy and the Russia-Ukraine war. Reflecting the disruption to the market, new convertible issuance stands at a mere US\$31bn in the first three quarters of 2022. New issues were priced at more attractive conditions with higher coupons.

Outlook

Inflation, recession fears and geopolitical risks continue to overhang capital markets. The US Federal Reserve has made it clear that controlling inflation is more important than avoiding an economic downturn. However, we expect that a pause of US rate hikes may be in sight after another two strong hikes. Convertibles have been under significant pressure. Higher bond yields have compressed equity valuations, whilst downside protection has been soft as bond floors suffered from rising yields and credit spreads. Despite global uncertainty, valuations have discounted a gloomy outlook and provide an attractive long-term risk/reward from both a spread tightening as well as share price potential perspective. Rising bond yields should make convertibles a more attractive financing alternative again vis-à-vis credits and may trigger new issuance.

Anja Eijking Portfolio Manager November 2022

Columbia Threadneedle (Lux) III CT (Lux) Global Smaller Cap Equity

Performance

Over the twelve months to 30 September 2022, the Class AAcc USD shares returned -29.7%. By comparison, the MSCI World Small Cap NR Index, returned -25.0%. Performance is net of fees and in US dollar terms.

The Portfolio underperformed over the period. The largest positive contributor was US specialty insurer, Alleghany, which leapt on a 29% premium takeover bid from Berkshire Hathaway. There were also strong contributions from the beneficiaries of rising commodity prices including Kirby, the US barge transportation company. Molina (a managed care company) delivered better than expected results because of lower costs and forecast an encouraging outlook for the coming financial year. In contrast, the main detractors were companies hit hard by the shift in economic outlook and growth stocks that de-rated amidst an environment of rising interest rates. Global Fashion Group suffered because of its large Russia exposure and as the backdrop for the consumer deteriorated. HelloFresh was another consumer stock that underperformed as new guidance from the company on customer growth was lower than expectations. Cognyte Software issued disappointing sales guidance as it unexpectedly saw government customers slow cyber intelligence purchases.

The fund remains underweight Japan and North America and overweight Europe and the UK. The largest sector overweights are in financials, cash and materials, the largest underweights are in industrials, real estate and energy.

Market Review

Global small cap equity markets fell over the period, underperforming large caps as the economic outlook deteriorated. Shares rallied between October and December 2021 with a backdrop of accommodative monetary policy and fiscal support measures combined with reopening of economies from Covid restrictions. However, the bull market reversed between January and June 2022, given worries over rising inflation, tighter monetary policy and the Russia-Ukraine war. The selloff was sharpest in the sectors that had increased the most over the last couple of years, chiefly technology, while energy and several defensive industries, such as healthcare and tobacco, outperformed. The index rebounded through July 2022 and into August, as investors took the view that central banks would slow down the pace of interest rate increases, these hopes were dashed towards the end of the period.

Outlook

Confidence amongst consumers (as measured by consumer confidence) appears to be waning because of a rise in the cost of living, driven by higher energy and food prices that have not yet been matched with higher wages. Sentiment amongst manufacturers (represented by ISM and PMI data) is softening in most regions. Corporate earnings reports have generally remained above expectations, but earnings forecasts are now falling because of prospective weaker demand and higher costs. Depressed investor sentiment has led to attractive valuations in certain pockets of the equity markets. However, corporate profits are likely to face numerous headwinds in the coming months. Accordingly, a cautious yet opportunistic investment approach seems appropriate in the current environment.

Catherine Stanley Portfolio Manager November 2022

Columbia Threadneedle (Lux) III CT (Lux) Global Total Return Bond

Performance

Over the twelve months to 30 September 2022, the Class I Acc EUR shares returned -11.4%. By comparison, its market reference, the Bloomberg Barclays Global Aggregate TR EUR Hedged Index returned –13.7%. Performance is total return, net of fees and in euro terms.

The strategy outperformed broader interest rate and credit markets. Positive contributors to performance included defensive risk management strategies, which saw us minimise interest rate and credit exposure within the fund. Relative value interest rate strategies also made a positive contribution to performance.

Market Review

Global government bond yields rose, with the US 10-year US Treasury yield jumping from 1.5% in October 2021 to 3.8% in September 2022. While both high yield and investment grade credit yield spreads widened, the shorter average duration of corporate bonds lessened the negative impact of rising interest rate expectations. The European Central Bank's (ECB) policy of pursuing a symmetric 2% inflation target over the medium term was overtaken by events as inflation rose well beyond the central bank targets. In 2022 the ECB first ended the pandemic emergency purchase programme in March and the older asset purchase programme in June before indicating it would consider quantitative tightening (letting bonds mature) in the autumn. It also raised its three key interest rates by 50 basis points in July, the first time in 11 years, and then by 75bp in September. The Federal Reserve moved earlier, ending its quantitative easing programme at the beginning of March, reducing its bond holdings from June, and raising interest rates five times by the end of September to the 3.00%-3.25% range, the highest level since early 2008.

Outlook

Our bias remains for government bond yields to rise. However, given the sharp and significant increase in yields during the back end of the third quarter, the asymmetry is unclear, and we have moved to a more neutral view. We still believe that the high and potentially sticky inflation backdrop will ensure central banks raise rates, yet we are cautious given that growth is showing some signs of weakening. If growth weakness persists, this may start to feed through into a weaker labour market, putting pressure on central banks to stop tightening monetary policy. Whilst inflation is expected to remain sticky, there is some low hanging fruit in the upcoming months, particularly in the US- headline inflation numbers may also recede further from the extremely high levels witnessed earlier in the year. The outlook for credit assets remains mixed. We remain in a highly volatile period as central banks continue to grapple with inflation by raising interest rates, resulting in consumers and businesses facing the increasing risk of an economic hard landing from rising bond yields. However, credit valuations are now looking cheap relative to longer-term averages, and periods of heightened volatility and challenged liquidity could represent good buying opportunities for investors. Whilst monetary policy conditions move from an accommodative to a restrictive stance and central banks globally are looking to reduce their holdings of fixed-income securities, the supply from new credit issuance is lighter year-on-year and corporate balance sheets and profitability are still strong.

Global Rates Team

November 2022

Columbia Threadneedle (Lux) III CT (Lux) Plus II

Performance

Over the twelve months to 30 September 2022, the Portfolio returned -6.1% (net of fees, in euro terms).

The Portfolio reduced risk in October 2021 and is now fully invested in short duration European government bonds and holds just a marginal cash position. Over the period the Portfolio was hurt by weak returns in the government bond market with yields rising as inflation pressures remained. Being fully invested, the Portfolio had little shelter from these rising yields.

Market Review

Global government bond yields rose, with the US 10-year US Treasury yield jumping from 1.5% in October 2021 to 3.8% in September 2022. While both high yield and investment grade credit yield spreads widened, the shorter average duration of corporate bonds lessened the negative impact of rising interest rate expectations. The US Federal Reserve ended its quantitative easing programme at the beginning of March, reducing its bond holdings from June, and raising interest rates five times by the end of September to the 3.00%-3.25% range, the highest level since early 2008. Equities also fell in 2022, after rallying at the end of 2021 against a backdrop of accommodative monetary policy and fiscal support measures combined with the reopening of economies from Covid restrictions. But this bull market reversed in 2022, given worries over rising inflation, tighter monetary policy and the Russia-Ukraine war.

Outlook

As we move into the final quarter of 2022, we see the same two themes continuing to dominate market movements that we have had for most of the year: Inflation and the Ukraine/Russian conflict. There are signs that the story is beginning to turn on the first point and unfortunately no positive progress on the second. We believe that we are at, or close to, a turning point where the markets will stop focussing on inflation and start to focus on growth. As the growth outlook is fairly gloomy, the case for holding high-quality fixed income starts to look quite attractive. We do not think that equities have fully re-priced and therefore, if we do fall into a recession then we would expect equities to have further downside. There is clearly a significant amount of uncertainty in the markets, which means that we would expect to see on-going higher levels of volatility from both fixed income and equity markets. But for now we are becoming more cautious with our portfolio positioning.

Performance

Over the twelve months to 30 September 2022, the Class F Inc EUR shares returned -15.3%. This compares to the BBI Euro Aggregate Corporate TR Index, which returned -15.1%. Performance is total return, net of fees and in euro terms.

The Portfolio performed in line with the index over the period. The Portfolio remained neutral to its benchmark throughout the period in terms of overall credit risk. Activity was focused on managing our overall credit risk position amidst market volatility. After the fall in the market in the first quarter of 2022, we reduced our underweight duration position to bring portfolio duration back to neutral versus the benchmark by the end of the period. We made use of the primary market, mainly in March, to invest in newly issued bonds at attractive levels following the market sell-off. That proved beneficial as markets rallied at the start of summer, but the Portfolio underperformed as markets fell to new lows through the remainder of the third quarter.

Market Review

European corporate bonds produced significant negative returns over the twelve months, exacerbated by losses in the second half of the period. August and September generally saw credit spreads widen as market conditions remained fragile and specific concerns over European gas shortages fuelled recessionary fears and heightened risk aversion. European high yield bonds outperformed in August but remained dislocated from a long-term perspective. While both high yield and investment grade spreads widened, the shorter average duration of corporate bonds lessened the negative impact of rising interest rate expectations. Official estimates put eurozone inflation at 10.0% in August, up from 4.1% a year earlier, driven by surging energy prices. The European Central Bank tightened monetary policy, following the lead from the US and other countries. It also ended all net asset purchases at the end of June, having already ended the pandemic purchase programme in March, and indicated it would be considering quantitative tightening (i.e., not reinvesting all proceeds of maturing bonds in its portfolio) in the autumn. Business survey data has pointed to a slowing economy in the last few months but not yet a recession. Previous buoyant activity in new issues changed radically in 2022 as increased volatility and rising interest rate deterred firms from issuing more debt. It was exacerbated by the war in Ukraine, the bond market sell-off and associated risk aversion.

Outlook

The outlook for European corporate bonds remains mixed. We remain in an extremely volatile period as the European Central Bank continues to grapple with inflation and consumers and businesses face an increasing risk of an economic hard landing from rising yields. Despite valuations looking relatively attractive in some areas of the market compared to longer term averages, we believe there will still be pressure on credit fundamentals because of these higher yields. While monetary policy conditions move from an accommodative to a restrictive stance, the supply from new credit issuance is lighter year-on-year and corporate balance sheets and profitability are starting to come under pressure.

Columbia Threadneedle (Lux) III CT (Lux) Responsible Global Emerging Markets Equity

Performance

Over the twelve months to 30 September 2022, the Class A Inc USD shares returned -31.3%. By comparison, the MSCI Emerging Markets NR Index, returned -28.11%. Performance is net of fees and in US dollar terms.

The Portfolio underperformed its benchmark over the period. China was the big underperformer and the Portfolio benefited from avoiding index heavyweights including Alibaba. South Korea and Taiwan also underperformed and here we suffered from our holding of Win Semiconductor in Taiwan, given concerns over its large exposure to China and the downturn in the semi-conductor cycle. Our position in NAVER corporation, the Korean internet conglomerate also detracted. Underweight exposure to energy plays detracted from performance, including the lack of exposure to Petrobras. Positions in Indonesia added value, with BK Central Asia gaining on the back of strong earnings and a recovering economy.

Market Review

Emerging market equities are closely linked to the strength of the global economy, so suffered from the fall-out from the energy crisis in Europe and rising interest rates in developed economies over the period. However, some markets were insulated from the worse impact, especially energy exporters who saw the benefit of higher oil prices. China however was a major drag on performance as it suffered from concerns over increased regulation and state control in China, a slowing Chinese economy and property market, and the continuing impact its zero Covid-19 policy. The Chinese government announced an economic stimulus package in May to boost the economy and has also signalled an easing of the regulatory crackdown on the technology sector. Moreover, the central bank cut a key lending rate from 3.85% in September 2021 to 3.65% in August 2022. Although these moves led to a rebound in Chinese stocks in the second quarter, China was still one of the weakest markets over the period.

Outlook

Emerging equity market conditions remain challenging given the highly uncertain global backdrop. Inflation persists at multi-year highs; central banks are tightening monetary policy and in China Covid-19 lockdowns continue to negatively affect supply chains. There are however, increasing opportunities in the developing world, notably in India where expected annual GDP is around 7% on the back of relatively low inflation. Moreover, the Indonesian economy is expanding due to higher commodity prices and growing demand. Long-term investors may benefit from the current volatility by selecting companies with strong fundamentals.

Performance

Over the twelve months to 30 September 2022, the Class A EUR shares returned -13.6%; by comparison the MSCI World NR Index returned -4.9%. Performance net of fees and in euro terms.

It was a period in which investors became increasing risk averse. And as central banks moved to tackle higher inflation by raising interest rates, there was a rotation towards 'value' as an investment style. Our portfolio has a bias towards 'growth' and 'quality' – two factors that have performed well in recent years but contributed to our underperformance relative to the benchmark over the period. Asset allocation was a neutral contributor in aggregate, with a significant sectoral headwind from our zero weight to oil & gas and utilities, mostly offset by positive regional allocation impacts from being overweight the UK. The main driver of the Portfolio's performance is stock selection. Heading the list of stock specific detractors was US diagnostics business, Illumina, on a number of setbacks, including the surprise departure of its CFO. We sold this holding as rising governance issues relating to their acquisition of Grail Inc. weakened the investment thesis and our confidence in the company. PayPal was weak as it cut full-year guidance on the slowdown in growth in gross merchandise volume sell-through on their networks and it was de-rated, though operating trends showed signs of stabilising at the end of the period. US apparel manufacturer, VF Corp also released some disappointing company guidance as a result of the squeeze discretionary spend of consumers and resultant build of inventory within the channel. On the positive side, US healthcare groups Humana and CVS Health, both gained following results, with notable strength in the pharmacy operations, leading to a full year guidance upgrade. Not owning a number of the US technology mega-stocks, including Meta Platforms which warned on profits, was a positive contributor as these underperformed.

Market Review

Global equity markets fell over the period. Shares had rallied between October and December 2021 against a backdrop of accommodative monetary policy and fiscal support measures combined with the reopening of economies from Covid restrictions. But the bull market reversed between January and June 2022, given worries over rising inflation, tighter monetary policy and the Russia-Ukraine war. The selloff was sharpest in the sectors that had increased the most during the bull market, chiefly technology, while energy and several defensive industries, such as healthcare and tobacco, outperformed. However, the index rebounded again through July and into August, as investors were buoyed by the demonstrated reluctance of central banks to raise interest rates as fast as expected. But the index reversed course as macroeconomic concerns grew, ending the twelve months in negative territory.

Outlook

Sentiment towards equities remains extremely bearish, with markets discounting further earnings downgrades, thus making valuations more attractive. Current monetary tightening around most of the globe to combat rising core inflation has coincided with several factors: an increase in long-dated gilt yields, continued US dollar strength, diminishing growth prospects in China, the ongoing gas crisis in Europe, and Japan's Ministry of Finance intervening to try and halt further currency depreciation. This is a reminder to investors that many obstacles need to be navigated as we wait for inflationary pressures and central bank monetary tightening to ease, explaining why the market is having a hard time making up its mind. As we enter the earnings season, expectations are lower, offering a degree of comfort, but market volatility is likely to continue in the short-term.

Columbia Threadneedle (Lux) III CT (Lux) SDG Engagement Global Equity

Performance

Over the twelve months to 30 September 2022, the Class AAcc USD shares returned -28.2%; by comparison the MSCI ACWI SMID Cap NR Index returned -24.4%. Performance is net of fees and in US dollar terms.

It was a period in which investors became increasing risk averse. And as central banks moved to tackle higher inflation by raising interest rates, there was a rotation towards 'value' as an investment style. Our portfolio has a bias towards 'growth' and 'quality' – two factors that have performed well in recent years but contributed to our underperformance relative to the benchmark over the period. While sector allocation was a slight drag, with a significant hit from our zero weight to energy, stock selection is the main driver of the Portfolio's performance. The largest detractor was Japanese tool manufacturer, Makita, with mixed results and heightened competition fears adding to the concerns that it would struggle as DIY demand faded as, almost simultaneously, lockdowns eased and then consumer spending came under pressure. Our holding of Win Semiconductors was weak on concerns over demand from the Chinese mobile handset market. We also saw both Cognex and Zebra Technologies underperformed as automation companies sold-off on the possible impact of global recession. The largest individual positive contributor was Indonesian financial, Bank Mandiri, which performed well on a pleasing set of results and expectations for a loan volume recovery as Indonesia reopens. Our holding in US insurer, Alleghany, outperformed on a 29% premium takeover bid from Berkshire Hathaway. We also saw a positive contribution from Waste Connections, which outperformed on the back of stable, reliable collection volumes and its strength in the solid waste market.

Market Review

Global equity markets fell over the period. Shares had rallied between October and December 2021 against a backdrop of accommodative monetary policy and fiscal support measures combined with the reopening of economies from Covid restrictions. But the bull market reversed between January and June 2022, given worries over rising inflation, tighter monetary policy and the Russia-Ukraine war. The selloff was sharpest in the sectors that had increased the most during the bull market, chiefly technology, while energy and several defensive industries, such as healthcare and tobacco, outperformed. However, the index rebounded again through July and into August, as investors were buoyed by the demonstrated reluctance of central banks to raise interest rates as fast as expected. But the index reversed course as macroeconomic concerns grew, ending the twelve months in negative territory.

Outlook

Sentiment towards equities remains extremely bearish, with markets discounting further earnings downgrades, thus making valuations more attractive. Current monetary tightening around most of the globe to combat rising core inflation has coincided with several factors: an increase in long-dated gilt yields, continued US dollar strength, diminishing growth prospects in China, the ongoing gas crisis in Europe, and Japan's Ministry of Finance intervening to try and halt further currency depreciation. This is a reminder to investors that many obstacles need to be navigated as we wait for inflationary pressures and central bank monetary tightening to ease, explaining why the market is having a hard time making up its mind. As we enter the earnings season, expectations are lower, offering a degree of comfort, but market volatility is likely to continue in the short-term.

Columbia Threadneedle (Lux) III CT (Lux) Sustainable Multi-Asset Income

Performance

Over the twelve months to 30 September 2022, the Class F EUR share returned -11.0%. Performance is net of fees and in euro terms.

Our portfolio positioning retains its bias towards higher quality, sustainable growth companies that can prosper despite near-term economic and policy-driven volatility, giving us a bias towards healthcare, information technology and industrials. Our integrated approach to Sustainable Investment prevents any allocation to companies that manufacture weapons or tobacco or that own fossil fuel reserves. We continue with our strategy of adding to positions where we see strong underlying quality and where the market allows us to add at more attractive levels. Equities and credit remain our largest allocations, with a smaller position in alternatives.

Market Review

Global government bond yields rose, with the US 10-year US Treasury yield jumping from 1.5% in October 2021 to 3.8% in September 2022. While both high yield and investment grade credit yield spreads widened, the shorter average duration of corporate bonds lessened the negative impact of rising interest rate expectations. The US Federal Reserve ended its quantitative easing programme at the beginning of March, reducing its bond holdings from June, and raising interest rates five times by the end of September to the 3.00%-3.25% range, the highest level since early 2008. Equities also fell in 2022, after rallying at the end of 2021, against a backdrop of accommodative monetary policy and fiscal support measures combined with the reopening of economies from Covid restrictions. But this bull market reversed in 2022, given worries over rising inflation, tighter monetary policy and the Russia-Ukraine war.

Outlook

As we move into the final quarter of 2022, we see the same two themes continuing to dominate market movements that we have had for most of the year: Inflation and the Ukraine/Russian conflict. There are signs that the story is beginning to turn on the first point and unfortunately no positive progress on the second. We believe that we are at, or close to, a turning point where the markets will stop focussing on inflation and start to focus on growth. As the growth outlook is fairly gloomy, the case for holding high-quality fixed income starts to look quite attractive. Having been underweight fixed income almost all of this year, we think that most of the re-rating has already occurred and that future interest rate rises are already priced into the market. As such, we have started to add government bonds back into the Portfolio. We do not think that equities have fully re-priced and therefore, if we do fall into a recession, then we would expect equities to have further downside. As such we have been cutting our equity exposure for a little while now. There is clearly a significant amount of uncertainty in the markets, ranging from geopolitical risk to prospects of higher interest rates and recession, which means that we would expect to see on-going higher levels of volatility from both fixed income and equity markets. But for now, we are becoming more cautious with our portfolio positioning.

Simon Holmes

Portfolio Manager November 2022

Columbia Threadneedle (Lux) III CT (Lux) Sustainable Opportunities European Equity

Performance

In the twelve months to 30 September 2022, the A share class returned -20.0%. By comparison the benchmark returned -11.0%. Performance is net of fees and in euro terms. The benchmark for this Portfolio was changed to MSCI Europe NR on 14/10/19, previously it was the FTSE All-World Developed Europe NR.

The Portfolio underperformed during the period with the major factor being a strong rotation from growth stocks to value, with areas such as oil and financials out-performing. These are areas to which we have very limited exposure due to a combination of poor quality and poorer sustainability characteristics. This rotation was driven by rising inflation and the accompanying increase of interest rates. In terms of individual stocks, our holding in Delivery Hero was hit by the Glovo purchase and concerns that the investment drive would undermine its balance sheet. Lenzing was under pressure from rising costs and a heavy investment programme and, despite cost-cutting, the deteriorating outlook prompted the company to withdraw its earnings guidance for the coming year. Positive contributors came from companies reporting strong profits and dividend increases, including UBS, Novo Nordisk and AstraZeneca. Deutsche Boerse also contributed to performance as market volatility drove higher trading activity on its exchanges.

Market Review

European equity markets were among the weakest globally as they were unavoidably hard-hit by the outbreak of the Russia-Ukraine war in the first quarter of 2022. The war brought an associated surge in energy prices and concerns about the security of energy supplies in the medium term, given the continent's heavy dependence on Russian gas. The eurozone economy grew by 2.2% in the third quarter of 2021 as economies reopened, slowed to 0.5% in the fourth quarter as restrictions were reimposed, rose to 0.7% in the first quarter of 2022 as restrictions were removed again and finally expanded to 0.8% in the second quarter of 2022 due to the summer tourist season in Southern Europe. In underlying terms, however, the eurozone economy has slowed. Unsurprisingly, given high inflation and the war in Ukraine, consumer confidence has plunged to record lows (a similar phenomenon has been observable in most developed countries). Business confidence weakened in the latter part of the period, and the EU Commission Economic Sentiment Indicator dropped to 93.7 in September, the lowest level since November 2020. Provisional estimates put eurozone inflation at 10.0% in August 2022, up from 4.1% in October of the prior year, driven by surging energy prices. "Core" inflation, excluding food and energy, was 4.8% in September 2022, illustrating that the passthrough from energy prices to other goods and services is still relatively limited. The European Central Bank (ECB) ended its pandemic and asset purchase programmes in the first half of 2022 and made its first rate hike in 11 years in July, bringing to a close the period of negative interest rates, followed by another in September. Moreover, the ECB will consider embarking on quantitative tightening in the autumn.

Outlook

Energy-intensive European businesses, many dependent on Russian gas, are nervous about the winter ahead. Our predominant focus on world-leading businesses, limits exposure to those with high energy needs and provides sound investment opportunities at a time when negativity on Europe is consensual. We are dedicated to investing in sustainable businesses with strong balance sheets and wide economic moats that provide resilience through business cycles. Valuations are becoming increasingly attractive and with several many quality growth companies remaining out of favour as interest rates rise, we seek opportunities over the coming months.

Sacha El Khoury Portfolio Manager November 2022

Columbia Threadneedle (Lux) III CT (Lux) US Smaller Companies

Performance

Over the twelve months to 30 September 2022, the CT (Lux) US Smaller Companies Fund returned -21.4%. By comparison, the benchmark (Russell 2000 Index) returned -23.8%. Returns are net of fees, in US dollar terms and on a total return basis.

The Portfolio, while posting negative absolute returns for the year, did outperform its benchmark, due to strong stock selection which was partially offset by a negative contribution from sector allocation. An underweight of the communications services sector and overweight of the industrials sector were most beneficial from a sector allocation perspective, while underweights of the energy and utilities sectors were the top detractors. Security selection was strongest within the industrials and information technology sectors, with selection within the energy and materials sectors detracting. Top contributors at the security level included Comstock Resources, and SM Energy Company, while CareDx Inc. and Phreesia Inc. were among the top detractors for the year.

Market Review

US equities had a volatile ride over the past year, largely due to the ongoing Covid-19 pandemic, geopolitical unrest in Ukraine, persistent inflation, and the efforts of the US Federal Reserve (Fed) and other global central banks to rein in inflation, much of it caused by generous fiscal policy in the U.S. and elsewhere during the depths of the pandemic. The Fed raised its federal funds rate by 200bp since March of 2022 to curb inflation, with additional tightening over the balance of 2022 expected and what should be slowing economic activity as a result. As such, more defensive sectors such as consumer staples and utilities continue to perform well on both an absolute and relative basis, although absolute returns overall were negative as measured by the Russell 2000 Index over the period. Despite some relief in energy prices since June 2022, other important components to inflation readings like rent and food prices remain stubbornly high, and likely suggest the Fed will remain vigilant in its efforts to slow the economy well into 2023.

Outlook

US GDP is likely to continue to trend lower as the Fed's interest rate moves work their way through the economy, and as such, we continue to pay close attention to valuation and quality metrics when evaluating holdings for the fund. We anticipate with valuation spreads still remaining somewhat wide, this positioning should serve shareholders well as we move into 2023. We also remain vigilant in assessing the end to the Fed's hawkish path and a return to a more "risk on" environment within equity markets, but as of now, do not anticipate an end to Fed tightening until sometime in 2023.

as at 30 September 2022

1. Columbia Threadneedle (Lux) III, (THE "FUND")

The Fund is a "Société d'Investissement à Capital Variable" and is qualified as a Luxembourg investment company. Under the laws of the Grand Duchy of Luxembourg, the Fund is registered as an undertaking for collective investment pursuant to Part I of the amended Law of 17 December 2010 relating to undertakings for collective investment (the "Law").

Carne Global Fund Managers (Luxembourg) S.A. has been designated by the directors of the Fund as management company (the "Management Company") by an agreement dated 1 October 2021. The list of the investment funds managed by the Management Company may be obtained, on request, at the registered office of the Management Company.

The Management Company is a Société Anonyme incorporated under the laws of Luxembourg with registered number B 148258 and approved to act as a Management Company for Luxembourg authorised collective investment schemes pursuant to Chapter 15 of the law of 17 December 2010. The Management Company acts as UCITS Management Company to a range of Luxembourg authorised UCITS collective investment schemes. It also acts as an Alternative Investment Fund Manager to alternative investment funds. The registered office of the Management Company is at 3, rue Jean Piret, L-2350 Luxembourg, Grand Duchy of Luxembourg.

The Fund's board of directors (the "Board" or "Directors" and each a "Director") has adopted the ALFI Code of Conduct, which sets out the principles of good governance, and considers that the Fund has been in compliance with it in all material respects throughout the financial year ended 30 September 2022.

2. SIGNIFICANT ACCOUNTING POLICIES

Presentation of financial statements

The financial statements have been presented in accordance with the reporting requirements of the Luxembourg supervisory authorities and Luxembourg generally accepted accounting principles ("GAAP").

Combined accounts

The combined financial statements have been presented in Euro, the functional currency of the Fund. Where a Portfolio is denominated in a currency other than Euro, the average exchange rate has been used for the Statement of Operations and Changes in Net Assets. The exchange rate ruling as at the reporting date has been used for the Statement of Net Assets.

Investments

As per the Prospectus and for the purpose of determining the Net Asset Value used for subscriptions and redemptions, the quoted investments and those traded in other regulated markets are valued on the basis of the last available price at 30 September 2022.

Securities which are not quoted on, or dealt, in an official or another regulated market, or securities which are so quoted or dealt in but in which the last sale price is not available, and securities for which the last sale price is not representative of the fair market value, the value of such securities will be determined based on an agreed pricing basis and the reasonably foreseeable sales price determined prudently and in good faith, upon the advice of the Investment Manager, by the Directors. Purchases and sales of investments are recognised on the trade date. Gains or losses on sales of investments are computed on the average cost basis and include transaction costs.

Investment income

Dividends are recognised in income, net of irrecoverable withholding tax, on the date upon which the relevant securities are declared "ex-dividend". Interest income, net of irrecoverable withholding tax, is accrued on a daily basis and includes the amortisation of premiums and accretion of discounts.

Translation of foreign currencies

Assets and liabilities denominated in currencies other than the Portfolios' reporting currencies have been translated at the rates of exchange ruling at 30 September 2022. Cost of investments and income and expenditure which are denominated in currencies other than the Portfolios' reporting currency have been translated at the exchange rates ruling on the day of transaction. The exchange gain or loss arising from the translation of these items is taken into account in the determination of the results of operations. The average USD/EUR exchange rate during the year was 0.924943. The USD/EUR exchange rate as at 30 September 2022 was 1.020773.

Cross portfolio investments

At 30 September 2022 there were no cross investments.

Futures contracts on securities and indices

Initial margin deposits are made upon entering into futures contracts and can be made either in cash or securities. During the year the futures contract is open, changes in the value of the contract are recognised as unrealised gains or losses by "marking-to-market" on a daily basis to reflect the market value of the contract at the end of each day's trading. Variation margin payments are made or received, depending upon whether unrealised losses or gains are incurred. When the contract is closed, the Fund records a realised gain or loss equal to the difference between the proceeds from (or cost of) the closing transaction and the Fund's basis in the contract.

as at 30 September 2022

Forward foreign exchange contracts

The unrealised gain or loss on open forward foreign exchange contracts is calculated as the difference between the contracted rate and the rate to close out the contract. Realised profit or loss includes net gains or losses on forward foreign exchange contracts which have been settled or offset by other contracts with the same counterparty.

Options Purchased and Options Written

The premium paid for options purchased is recorded as an investment and is subsequently adjusted to the current market value of the option. Premiums paid for the purchase of options which expire unexercised are treated as realised losses on the expiration date. If a purchased put option is exercised, the premium is subtracted from the proceeds of the sale of the underlying security, foreign currency or index, in determining whether the relevant Portfolio has realised a gain or a loss. If a purchased call option is exercised, the premium increases the cost basis of the security, foreign currency or index purchased by the Portfolio.

For a written option, an amount equal to the premium received by the relevant Portfolio is recorded as a liability and is subsequently adjusted to the current market value of the option written. Premiums received from written options which expire unexercised are treated by the relevant Portfolio as realised gains on the expiration date. If a written call option is exercised, the premium is added to the proceeds from the sale of the underlying security in determining whether the relevant Portfolio has realised a gain or a loss. If a written put option is exercised, the premium reduces the cost basis of the security purchased by the relevant Portfolio.

Future style options

In the case of options on futures, no premium margin is required as a daily profit and loss adjustment (variation margin) is made by the procedure known as "marking-to-market". The profit of one party to the contract is the loss of the other party. The resulting gains and losses are either debited or credited to the appropriate account on a daily basis via the mark-to-market process. The final valuation is made at the final settlement price of either the expiration date of the option or the day on which it was exercised.

Swap contracts

The Fund may enter into swap contracts in which the Fund and the counterparty agree to exchange payments (periodically throughout the life of the contract) where one or both parties pay the returns generated by a security, index commodities, or instruments on an agreed upon notional amount. The relevant indices include, but are not limited to, currencies, interest rates, prices and total return on interest rates indices, fixed income indices and stock indices. Swaps are valued at their fair value based on the underlying securities (at close of business or intraday) as well as on the characteristics of the underlying commitments.

Cash and cash equivalents

Cash and other liquid assets are valued at their face value, including interest accrued, where applicable. Interest is also accrued on bank overdrafts. All cash at bank is held either directly with a sub-depositary or by State Street Bank International GmbH, Luxembourg Branch, on overnight deposit with a third party institution which has been approved by the Board. The cash collateral in relations to the futures contracts, swaps, forward foreign exchange contracts and options are included in the statement of net assets respectively under "Cash held at brokers" and "Amounts due to brokers".

Income and receivable from securities lending

The Fund may lend its portfolio securities to specialised banks and credit institutions and other financial institutions of high standing and highly qualified registered brokers/dealers or through recognised clearing institutions such as Clearstream or Euroclear subject to complying with the provisions set forth in the CSSF Circular 08/356. Loans will be secured continuously by eligible collateral authorised from time to time by the CSSF. During the whole period of lending, collateral must be at least equal to the value of the global valuation of the securities lent. Each counterparty will possess an industry standard credit rating that is acceptable to the Investment Manager with reference to the market conditions prevailing at the relevant time.

Total amount of "Security lending income": 47,649 EUR

Total amount of "Security lending receivable": 2,112 EUR

As at 30 September, 2022, total amount of "Security lending receivable" is included in "Other assets".

Net amortization/Net accretion

Net amortization/Net accretion, includes the amortization and accretion of premiums / discounts from both, the long and short term fixed income securities. All components are netted and disclosed in the Statement of Operations and Changes in Net Assets as a positive sum under the income position "Net amortization/ Net accretion" and as a negative sum under the expense position "Net amortization / Net accretion are calculated on straight line basis.

as at 30 September 2022

3. EQUALISATION

The Fund follows the accounting practice known as "equalisation" by which a portion of the issue and redemption price representing, on a per share basis, accrued distributable investment income (excluding capital gains or losses), is credited or charged to distributable income. The amounts attributable to this income equalisation account are included in the proceeds from subscriptions to the Fund's shares or in the payment for the Fund's shares redeemed, and in the "Net equalisation", items of the Statement of Operations and Changes in Net Assets.

4. INVESTMENT MANAGEMENT FEES

The Fund entered into an agreement with the Management Company and Columbia Threadneedle Management Limited ("CTML") to act as investment manager to the following Portfolios for a monthly fee calculated on the average of the net asset value of each of the following Portfolios managed by it during the preceding month at the following rates:

Portfolio	Investment Management Fee rates per annum

*Refer to Appendix I.

CTML is a company incorporated in England and regulated by the Financial Conduct Authority ("FCA").

For the CT (Lux) Global Convertible Bond, CTML has delegated the portfolio management functions to Columbia Threadneedle Netherlands B.V.

For CT (Lux) US Smaller Companies, CTML has delegated the portfolio management functions to Columbia Management Investment Advisers, LLC.

There are no Investment Management Fees payable on Class X shares or Class L shares (if any).

The Investment Manager(s) have, at their discretion, capped expenses on some share classes. For these share classes, in instances where the expenses exceed the capped level, the Investment Manager(s) reimburses the Fund. The amounts reimbursed to the fund are disclosed in "Waiver of investment management fees" in the statement of net assets and in the statement of operations and changes in net assets.

5. ADMINISTRATION AND DEPOSITARY FEES

State Street Bank International GmbH, Luxembourg Branch ("the Depositary") is entitled to fees payable by the Fund, accruing daily and payable monthly in arrears, of up to 0.50% of the assets under custody plus a transaction charge with respect to its function as the Depositary of the Fund. The actual level of the fees and transaction charges payable for the custody services vary, depending on the different countries. In addition, for acting as Registrar, Transfer, Domiciliary, Administrative and Paying Agent to the Fund, State Street Bank International GmbH, Luxembourg Branch will be entitled to fees of up to 0.045% of the applicable Net Asset Value plus a transaction charge.

In addition State Street Bank International GmbH, Luxembourg Branch is entitled to pass on to the Fund fees charged by external price vendors where the cost of obtaining vendor prices is not contained within the standard State Street Bank International GmbH, Luxembourg Branch fund accounting fixed percentage fee.

6. DIRECTORS' FEES

Each of the Directors of the Fund is entitled to remuneration for their services at the rate determined by the Fund in general meeting from time to time. Those Directors of the Fund who are employees of Columbia Threadneedle Management Limited (parent of the Investment Managers), or any of its subsidiaries, waive their fees in carrying out their duties as Directors of the Fund. Directors' fees are paid to the remaining directors and allocated to the Portfolios based on average net assets. For the year to 30 September 2022, the Chairman Patrick Johns is entitled to a fee of EUR 27,000 per annum and directors Jacques Elvinger and Ailbhe Jennings are entitled to a fee of EUR 22,000 per annum. In addition, each Director may be paid reasonable expenses in connection with meetings of the Board or otherwise properly incurred in connection with the business of the Fund.

7. MANAGEMENT COMPANY FEE

The Fund pays to the Management Company an annual Management Company fee payable out of the assets of the Fund of up to a maximum of 0.02% of the net asset value (on a sliding scale dependant on the size of the Portfolio), with no minimum fee.

as at 30 September 2022

8. TAXATION

The Fund is not subject to taxation in Luxembourg on its income, profits or gains. However, the Fund is liable in Luxembourg to a subscription tax (*taxe d'abonnement*) of 0.05% per annum of its net assets, such tax being payable quarterly and calculated on the basis of the total net assets of the Fund at the end of the relevant quarter. The rate of the annual subscription tax is reduced to 0.01% per annum for the Portfolios which, in accordance with Article 174 of the Law, invest exclusively in money market instruments as defined in the Grand-Ducal Regulation of 14 April 2003 and in respect of classes of shares which are only sold to and held by Institutional Investors. No stamp duty or other tax will be payable in Luxembourg on the issue of Shares in the Fund.

Interest and dividend income received by the Fund may be subject to non-recoverable withholding tax in the source countries. The Fund may further be subject to tax on the realised or unrealised capital appreciation of its assets in the countries of origin.

Distributions made by the Fund are not subject to withholding tax in Luxembourg.

The Fund is not subject to net wealth tax.

Dividend and interest income are recognised in the Combined Statement of Operations and Changes in Net Assets on a net basis.

As from 1 April 2007, investment vehicles listed in article 44, 1, d) of the Luxembourg VAT law (SICAVs, SICAFs and management companies of FCPs) should be registered as taxable persons for VAT purposes. As taxable persons for VAT purposes these investment vehicles must comply with the standard obligations foreseen in the Luxembourg VAT law such as VAT registration, VAT compliance and payment of the VAT due on services subject to reverse charge.

Investors should be aware that a United Kingdom offshore funds regime was introduced applicable to United Kingdom investors into "offshore funds". The Board has obtained reporting fund status approval from HM Revenue & Customs for the classes of shares listed below.

The following share classes were included in the application (as at 30 September 2022):

CT (Lux) European Growth & Income - Class A Shares - Euro CT (Lux) European Growth & Income - Class A Shares - GBP CT (Lux) European Smaller Cap - Class A Shares - Euro CT (Lux) European Smaller Cap - Class A Acc Shares - Euro CT (Lux) European Smaller Cap - Class I Shares - Euro CT (Lux) European Smaller Cap - Class I Acc Shares - Euro CT (Lux) European Smaller Cap - Class R Acc Shares - Euro CT (Lux) Global Absolute Return Bond - Class F Acc Shares - GBP (Hedged) CT (Lux) Global Absolute Return Bond - Class I Acc Shares - GBP (Hedged) CT (Lux) Global Convertible Bond - Class A Shares - Euro CT (Lux) Global Convertible Bond - Class A Shares - Euro (Hedged) CT (Lux) Global Convertible Bond - Class A Shares - GBP CT (Lux) Global Convertible Bond - Class A Acc Shares - Euro (Hedged) CT (Lux) Global Convertible Bond - Class A Acc Shares - US\$ (Hedged) CT (Lux) Global Convertible Bond - Class Hong Kong A Shares - US\$ CT (Lux) Global Convertible Bond - Class I Shares - Euro CT (Lux) Global Convertible Bond - Class I Shares - Euro (Hedged) CT (Lux) Global Convertible Bond - Class P Shares - Euro (Hedged) CT (Lux) Global Convertible Bond - Class R Shares - Euro CT (Lux) Global Smaller Cap Equity - Class A Shares - US\$ CT (Lux) Global Smaller Cap Equity - Class A Acc Shares - Euro CT (Lux) Global Smaller Cap Equity - Class A Acc Shares - US\$ CT (Lux) Global Smaller Cap Equity - Class I Acc Shares - GBP CT (Lux) Global Total Return Bond - Class I Acc Shares - Euro CT (Lux) Responsible Euro Corporate Bond - Class X Shares - GBP (Hedged) CT (Lux) Responsible Global Emerging Markets Equity - Class A Shares - US\$ CT (Lux) Responsible Global Emerging Markets Equity - Class A Acc Shares - CHF CT (Lux) Responsible Global Emerging Markets Equity - Class I Acc Shares - US\$ CT (Lux) Responsible Global Emerging Markets Equity - Class P Acc Shares - CHF CT (Lux) Responsible Global Emerging Markets Equity - Class P Acc Shares - Euro CT (Lux) Responsible Global Emerging Markets Equity - Class P Acc Shares - US\$ CT (Lux) Responsible Global Emerging Markets Equity - Class R Acc Shares - CHF CT (Lux) Responsible Global Emerging Markets Equity - Class R Acc Shares - Euro

*Refer to Appendix I

The Directors intend to issue the annual investor report on or around 31 March each year via the <u>CT Website</u> (This information is unaudited).

9. RELATED PARTY TRANSACTIONS

For certain share classes, CTML may be entitled to a placing and/or introductory fee of not more than 5% of the subscription value of the Fund shares. Out of this fee, stockbrokers or other approved introducing agents may be paid a proportion.

Patrick Johns (Chairman) is a non-executive adviser to Columbia Threadneedle Investments.

Jacques Elvinger, a Director of the Fund, is a partner in the Luxembourg law firm Elvinger Hoss Prussen, société anonyme. Mr Elvinger has been an Avocat à la Cour, Luxembourg since 1984.

Hugh Moir, a Director of the Fund until 08 November 2021, was Head of Operations and IT at Columbia Threadneedle Management Limited until 08 November 2021.

as at 30 September 2022

Ailbhe Jennings, a Director of the Fund, is non-executive adviser to Columbia Threadneedle Investments, a subsidiary of Columbia Threadneedle Management Limited.

Rogier van Harten, a Director of the Fund, is Head of Institutional Distribution for Continental Europe, Columbia Threadneedle Netherlands B.V., a subsidiary of Columbia Threadneedle Investments.

Tina Watts, a Director of the Fund (since 27 January 2022), is Head of Operations EMEA, Columbia Threadneedle Investments.

The Fund has entered into an Agency Agreement for the lending of securities in return for a loan fee. During the year under review, State Street Bank International GmbH, London Branch earned EUR 9,530 as securities lending agent. The Investment Managers earned EUR 6,353 for monitoring and oversight of the securities lending program.

as at 30 September 2022

No marketing expenses or distribution fees were charged to the following Portfolios:

CT (Lux) Euro Bond CT (Lux) Plus II

Any costs incurred in relation to the distribution of these Portfolios/Share Classes (if any) will be borne by CTML.

During the period from 01 October 2021 to 30 September 2022, the CT (Lux) Diversified Growth had invested in the Columbia Threadneedle (Irl) III plc – CT Multi-Strategy Global Equity Fund, managed by the same investment manager. Investment management fees of EUR 28,003 for this portion of the net assets of this Portfolio is waived.

CTML may pass on to the Fund certain approved expenses incurred in the marketing of the Fund. The maximum chargeable during any accounting period is 0.025% of the net asset value of the Fund as the respective Portfolio(s).

CTML may also charge a fee to the Fund to cover the costs incurred in the distribution of the Fund in the various jurisdictions in which it is registered. The amount to be charged during any accounting year may not exceed 0.05% of the net asset value of the Fund or the respective Portfolio(s).

No marketing expenses or distribution fee will be charged to the Hong Kong Share Classes of any Portfolio. Any costs incurred in relation to the distribution of the Hong Kong Share Classes (if any) will be borne by CTML.

CTML is entitled to an annual service fee of 0.015% of the equity and bond investments of the Portfolios making use of its Responsible Engagement Overlay services as described in the Prospectus. This service is not charged to the Hong Kong Share Classes for any Portfolio.

10. STATEMENT OF CHANGES IN INVESTMENTS

A list, specifying for each Portfolio the total purchases and sales which occurred during the year under review, may be obtained, upon request, at the registered office of the Fund and the Fund's Registrar/Administrative Agent, Depositary, or Paying Agent in the relevant jurisdiction.

11. PERFORMANCE FEE

No performance fees were charged to any of the Portfolios during the year.

12. SOFT COMMISSIONS ARRANGEMENTS AND OTHER SIMILAR ARRANGEMENTS

Since the implementation of MiFID II, in January 2018, all third party investment research consumed by investment teams in EMEA, were paid for directly by Columbia Threadneedle Investments. The use of Commission Sharing Agreements ceased at the end of December 2017 and since then, Client Portfolios have only incurred execution-related commission costs.

13. SECURITIES LENDING

The volume of the securities lending transactions will be kept at an appropriate level. The Fund will be entitled to request the return of the securities lent in a manner that enables it, at all times, to meet its redemption obligations. It will be ensured that securities lending transactions do not jeopardise the management of the Fund's assets in accordance with the investment policy.

The income earned from the securities lending program is reflected net of fees in the Statement of Operations and Changes in Net Assets.

State Street Bank International GmbH, London Branch as the securities lending agent receives a 15% fee for their services. The Investment Manager as the Fund's securities lending co-ordinator receives an administration fee of 10% to cover operational costs. There is no hidden revenue. As a result, the Fund receives 75% of the gross revenue generated from securities lending. It is the Investment Manager's policy to return all revenue to the Fund less direct and indirect operational costs.

The table below shows the market value of securities on loan as well as the market value of collateral held as at 30 September 2022. The collateral held at this date provided coverage of 101.00%.

	Market Value of Securities on Loan	Market Value of Collateral held	Nature of Collateral held

International Plc. and Societe Generale S.A.

14. DIVIDENDS DISTRIBUTION

During the year, the CT (Lux) Sustainable Multi-Asset Income, which had an ex-dividend date of 13 December 2021, paid the following dividends to shareholders on 15 December 2021.

Share class Name	Share class Currency	Dividend per Share	Amount of Dividends paid out to Shareholders
CT (Lux) Sustainable Multi-Asset Income - Class A Shares - Euro	Euro	13.3200	1,177,028
CT (Lux) Sustainable Multi-Asset Income - Class F Shares - Euro	Euro	0.0700	7
CT (Lux) Sustainable Multi-Asset Income - Class I Shares - Euro	Euro	14.9600	5,281
CT (Lux) Sustainable Multi-Asset Income - Class R Shares - Euro	Euro	0.0700	91

During the year, the CT (Lux) Sustainable Multi-Asset Income, which had an ex-dividend date of 13 June 2022, paid the following dividends to shareholders on 15 June 2022.

Share class Name	Share class Currency	Dividend per Share	Amount of Dividends paid out to Shareholders
CT (Lux) Sustainable Multi-Asset Income - Class A Shares - Euro	Euro	13.8800	1,162,347
CT (Lux) Sustainable Multi-Asset Income - Class F Shares - Euro	Euro	0.1000	10
CT (Lux) Sustainable Multi-Asset Income - Class I Shares - Euro	Euro	15.7100	5,546
CT (Lux) Sustainable Multi-Asset Income - Class R Shares - Euro	Euro	0.1000	142

For all distributing classes of shares which have registered for United Kingdom Reporting Fund Status it is intended to distribute 100 percent of reportable income (computed in accordance with the definition of reportable income under the United Kingdom Offshore Funds (Tax) Regulations 2009 (as amended)) which accrues to the Portfolio or distributing class, however it should be noted that this cannot be guaranteed. It may be that the Directors consider in certain cases that the amounts available for distribution are so minimal that a distribution is not commercially viable. Where Share Classes have not been registered for UK Reporting Fund Status, the Directors will determine an alternative basis for determining the level of any dividend.

The Board may decide to make dividend payments to Shareholders once a year or more frequently provided that no payment will be made as a result of which the total net assets of the Fund would become less than the minimum required by Luxembourg law.

During the year ended to 30 September 2022, dividends with an ex-dividend date of 17 January 2022 were paid out to shareholders on 31 January 2022 as follows:

Share class Name	Share class Currency	Dividend per Share	Amount of Dividends paid out to Shareholders
CT (Lux) European Growth & Income - Class A Shares - Euro	Euro	0.1015	14,803
CT (Lux) European Growth & Income - Class A Shares - GBP	GBP	0.0998	131,967

CT (Lux) Sustainable Opportunities European Equity - Class A Shares - Euro	Euro	0.0442	12,569

15. SWING PRICING

Under certain circumstances (for example, large volumes of deals), investment and/or disinvestment costs may have an adverse effect on the Shareholders' interests in a Portfolio. In order to prevent this effect, called "dilution", the Board may determine that a "swing pricing" methodology applies so as to allow for the Net Asset Value per Share to be adjusted upwards or downwards by dealing and other costs and fiscal charges which would be payable on the effective acquisition or disposal of assets in the relevant Portfolio if the net capital activity exceeds, as a consequence of the aggregate transactions in that Portfolio on a given Valuation Date (as defined in the Prospectus), a threshold (the "Threshold") set by the Board from time to time.

Description of the swing pricing methodology:

If the net capital activity on a given Valuation Date leads to a net inflow/outflow of assets in excess of the Threshold in the relevant Portfolio, the Net Asset Value used to process all subscriptions, redemptions or conversions in that Portfolio is adjusted upwards/downwards by the swing factor set by the Board from time to time.

The swing factor shall not exceed 2% of the Net Asset Value per Share of the relevant Portfolio. Further, for the purpose of calculating the expenses of a Portfolio which are based on the Net Asset Value of the relevant Portfolio (including any applicable performance fee), the Administrative Agent will continue to use the un-swung Net Asset Value.

The swing pricing mechanism was in place for all sub funds during the financial year.

16. TRANSACTION COSTS

For the year ended 30 September 2022, the following Sub-Funds of the Columbia Threadneedle (Lux) III incurred transaction costs related to purchases and sales of transferable securities as follows:

Portfolio	Portfolios Currency	Transaction Costs
CT (Lux) Diversified Growth	EUR	11,395
CT (Lux) European Growth & Income	EUR	28,550
CT (Lux) European Smaller Cap	EUR	8,392
CT (Lux) Global Convertible Bond	EUR	7
CT (Lux) Global Smaller Cap Equity	USD	2,325
CT (Lux) Plus II	EUR	110,781
CT (Lux) Responsible Global Emerging Markets Equity	USD	507,110
CT (Lux) Responsible Global Equity	EUR	627,550
CT (Lux) SDG Engagement Global Equity	USD	1,008,671

as at 30 September 2022

Portfolio	Portfolios Currency	Transaction Costs
CT (Lux) Sustainable Multi-Asset Income	EUR	15,487
CT (Lux) Sustainable Opportunities European Equity	EUR	38,455
CT (Lux) US Smaller Companies	USD	10,030

These transaction costs are corresponding to broker fees and are included in the caption "Investments at cost" in the Statement of Net Assets of the report, and respectively in the captions "Net realised gain / (loss) on sales of investments" and "Net change in net unrealised appreciation / (depreciation) on investments" in the Statement of Operations and Changes in Net Assets.

17. EVENTS WHICH OCCURED DURING THE YEAR

Following the announcement on 12 April 2021 regarding Ameriprise Financial's proposed acquisition of BMO's EMEA Asset Management business, including BMO GAM Asia Limited (BMO GAM (EMEA)), Columbia Threadneedle confirmed that this acquisition completed on the 8th November 2021. BMO GAM (EMEA) is now part of Columbia Threadneedle Investments, the global asset management business of Ameriprise Financial. Following the acquisition, the Fund was renamed from BMO Investments (Lux) I Fund to Columbia Threadneedle (Lux) III and all the Portfolios were renamed on 4th July 2022 as follows:

Previous name	New name
BMO Diversified Growth Fund	CT (Lux) Diversified Growth
BMO Euro Bond Fund	CT (Lux) Euro Bond
BMO European Growth & Income Fund	CT (Lux) European Growth & Income
BMO European Smaller Companies Fund	CT (Lux) European Smaller Cap
BMO Global Absolute Return Bond Fund	CT (Lux) Global Absolute Return Bond
BMO Global Convertible Bond Fund	CT (Lux) Global Convertible Bond
BMO Global Smaller Companies Equity Fund	CT (Lux) Global Smaller Cap Equity
BMO Global Total Return Bond Fund	CT (Lux) Global Total Return Bond
BMO Plus II Fund	CT (Lux) Plus II
BMO Responsible Euro Corporate Bond Fund	CT (Lux) Responsible Euro Corporate Bond
BMO Responsible Global Emerging Markets Equity Fund	CT (Lux) Responsible Global Emerging Markets Equity
BMO Responsible Global Equity Fund	CT (Lux) Responsible Global Equity
BMO SDG Engagement Global Equity Fund	CT (Lux) SDG Engagement Global Equity
BMO Sustainable Multi-Asset Income Fund	CT (Lux) Sustainable Multi-Asset Income
BMO Sustainable Opportunities European Equity Fund	CT (Lux) Sustainable Opportunities European Equity
BMO US Smaller Companies Fund	CT (Lux) US Smaller Companies

Carne Global Fund Managers (Luxembourg) S.A. replaced FundRock Management Company S.A. as Management Company to the Fund with effect from 1 October 2021.

Columbia Management Investment Advisers, LLC became the sub-investment manager of CT (Lux) US Smaller Companies with effect from 16 December 2021.

18. SIGNIFICANT EVENT

The outbreak of Coronavirus (COVID-19), declared by the World Health Organisation as a global pandemic in 2020, has impacted many aspects of daily life and the global economy. Travel movements and operational restrictions were implemented by many countries throughout 2019-2021.

During 2022, most economies globally have fully reopened and their workforces have successfully adapted to living and working in this pandemic environment. The pace of recovery has varied from country to country.

The Directors together with the Manager will continue to monitor business continuity and resilience processes with the objective of mitigating any potential for ongoing impact of COVID-19.

Impact of Russia-Ukraine Conflict

The events arising in Ukraine during Q1 2022 has impacted securities related to companies domiciled in, or linked to, Russia and/or listed on exchanges located in Russia, including the Moscow Exchange ('Russian Securities').

CT (Lux) Responsible Global Emerging Markets Equity holds one investment, Moscow Exchange MICEX-RTS PJSC, with exposure to Russia. This security accounted for 0.63% of CT (Lux) Responsible Global Emerging Markets Equity prior to being written down to Nil in March 2022. This security continues to be valued at Nil as at 30 September 2022.

as at 30 September 2022

Sectoral financial and investment restrictions are in place in the Russia sanctions regime which restrict specified activities. These include restrictions on dealing with transferable securities or money-market instruments. The Directors have appointed State Street as Administrator to monitor the sanctions activity globally to ensure the portfolios are in adherence. The Administrator continues to monitor the investor base with respect to sanctions. If any sanctioned investors are identified, the Administrator will inform the Directors, the Company's MLRO, the Manager, and the Investment Manager and will remediate following appropriate policies and procedures.

19. SUBSEQUENT EVENTS

On 13th December 2022, sub fund CT (Lux) Plus II Fund was liquidated. As such, the financial statements for this sub-fund has been prepared on a non-going concern basis. The application of the non-going concern basis of accounting has not led adjustments to the sub-fund's published net asset value.

20. SOCIALLY RESPONSIBLE INVESTMENT

CTML is convinced that investors increasingly care about environmental, social and corporate governance (ESG) issues and that these may have a material impact on the companies in which we invest. Therefore the Fund has appointed CTML to engage with companies held by the portfolios in order to improve the ESG performance and safeguard investor value. The Responsible Engagement Overlay service, known as reo®, aims to encourage companies to behave more responsibly with regard to social, environmental and corporate issues, in ways that are consistent with shareholder values. The objective of reo® is to encourage investee companies to enhance their business performance by adopting better corporate governance, social and environmental practices. reo® does not entail taking a view of acceptability of what investee companies do nor does it lead to exercising a significant influence over the management of such companies. reo® is about using CTML ability, as manager of the Fund's equity and bond Portfolios, to encourage investee companies, through a constructive dialogue, to behave more responsibly with regard to corporate governance, social and environmental practices. In CTML's view, reo® may contribute towards business success and therefore increase the value of the investee companies' shares and consequently the value of the Fund's investments. More information on reo® and the specific companies engaged via the reo® service is available on www.columbiathreadneedle.com.

21. APPROVAL OF THE FINANCIAL STATEMENTS

The Board approved the financial statements on 20 December 2022.

Columbia Threadneedle (Lux) III Risk Management, Remuneration and PEA Eligible Assets (unaudited)

RISK MANAGEMENT Global exposure calculation method

The commitment approach

The following Portfolios use the commitment approach in order to monitor and measure their global exposure:

CT (Lux) European Growth & Income

- CT (Lux) European Smaller Cap
- CT (Lux) Global Convertible Bond
- CT (Lux) Global Smaller Cap Equity
- CT (Lux) Plus II
- CT (Lux) Responsible Euro Corporate Bond
- CT (Lux) Responsible Global Emerging Markets Equity
- CT (Lux) Responsible Global Equity
- CT (Lux) SDG Engagement Global Equity
- CT (Lux) Sustainable Opportunities European Equity
- CT (Lux) US Smaller Companies

The VaR approach

The following portfolios use an Absolute Value-at-Risk ("VaR") approach in order to monitor and measure their global exposure:

- CT (Lux) Diversified Growth
- CT (Lux) Global Absolute Return Bond
- CT (Lux) Global Total Return Bond
- CT (Lux) Sustainable Multi-Asset Income

The VaR figures have been calculated based on the following input data and confidence interval:

Confidence interval	99%
Analysis time horizon	One month (20 days)
Time series extension	1 Year
Methodology	Absolute VaR
VaR method	Historical Simulation
CSSF Limit	20%

The utilisation of the VaR from 01 October 2021 to 30 September 2022 was as follows:

CT (Lux) Diversified Growth	VaR Amounts	Utilisation of the VaR Limit
Minimum	1.28%	6.40%
Maximum	6.66%	33.30%
Average	4.30%	21.50%

The average leverage used, computed with sum of notionals, was 172.04%.

CT (Lux) Global Absolute Return Bond	VaR Amounts	Utilisation of the VaR Limit
Minimum	0.61%	3.05%
Maximum	4.32%	21.60%
Average	2.18%	10.88%

The average leverage used, computed with sum of notionals, was 270.61%.

CT (Lux) Global Total Return Bond	VaR Amounts	Utilisation of the VaR Limit
Minimum	0.69%	3.45%
Maximum	4.66%	23.30%
Average	2.32%	11.58%

Columbia Threadneedle (Lux) III Risk Management, Remuneration and PEA Eligible Assets (unaudited) (continued)

The average leverage used, computed with sum of notionals, was 217.02%.

CT (Lux) Sustainable Multi-Asset Income	VaR Amounts	Utilisation of the VaR Limit
Minimum	2.97%	14.85%
Maximum	5.84%	29.20%
Average	4.28%	21.40%

The average leverage used, computed with sum of notionals, was 108.13%.

The following portfolio use a Relative Value-at-Risk ("VaR") approach in order to monitor and measure their global exposure:

CT (Lux) Euro Bond

The VaR figures have been calculated based on the following input data and confidence interval:

Confidence interval	99%
Analysis time horizon	One month (20 days)
Time series extension	1 Year
Methodology	Relative VaR
VaR method	Historical Simulation
CSSF Limit	200%

The utilisation of the VaR from 01 October 2021 to 30 September 2022 was as follows:

CT (Lux) Euro Bond	VaR Amounts	Utilisation of the VaR Limit
Minimum	76.61%	38.31%
Maximum	147.17%	73.59%
Average	99.15%	49.58%

The average leverage used, computed with sum of notionals, was 24.91%

Columbia Threadneedle (Lux) III **Remuneration (unaudited)**

REMUNERATION POLICY

Carne Global Fund Managers (Luxembourg) S.A.

The Management Company has designed and implemented a remuneration policy (the "Remuneration Policy") in line with the provisions on remuneration as set out by the European Directive 2009/65/EC ("UCITS Directive"), as amended by Directive 2014/91/EU ("UCITS V Directive") as implemented into Luxembourg in the Law of 10 May 2016 (the "2016 Law").

The Management Company has developed and implemented remuneration policies and practices that are consistent with and promote a sound and effective risk management of the Fund, do not encourage risk-taking which is inconsistent with the risk profiles/rules governing the Fund, and do not impair compliance with the Management Company's duty to act in the best interest of the Fund and ultimately its investors.

The Board of Directors of the Management Company is responsible for the design, implementation and regular review of the Remuneration Policy. In reviewing the Remuneration Policy, the Board of Directors of the Management Company will consider whether the remuneration framework operates as intended and ensure that the risk profile, long-term objectives and goals of the Fund are adequately reflected. No material amendments were made to the Remuneration Policy and no irregularities were uncovered during the period under review. The current version of the Remuneration Policy is available on the Management Company's website.

Proportion of the total remuneration of the staff of the UCITS attributable to COLUMBIA THREADNEEDLE (LUX) III as of December 31, 2021¹.

The proportion of the total remuneration attributable to COLUMBIA THREADNEEDLE (LUX) III has been calculated on a pro rata basis and on the basis of the number of Funds managed by the Management Company.

CT Group Company	Number of beneficiaries	Total remuneration (EUR) ²	Fixed remuneration in percentage of total	Variable remuneration in percentage of total
Total remuneration paid to Identified Staff ³ by the Management Company during the financial year	18	2,045,841	0.92	0.32

¹31 December is the financial year end of the Management Company

²Total remuneration = sum of fixed remuneration and variable remuneration paid during the Management Company 's financial year

year ³Identified Staff comprises = Chief Executive Officer and Country Head of Luxembourg, Conducting Officers and Head of Legal, Head of Compliance, Directors of the Company and Members of the Investment Committee.

CT Group (below note refers to CT Group only)

In accordance with the UCITS V Directive, the Investment Managers to the Fund have adopted a remuneration policy which is consistent with the remuneration principles applicable to UCITS management companies and aligned with the Columbia Threadneedle Investments (EMEA) Remuneration Policy. The size of the CT Group (the "Group") and the size of the funds it manages, the internal organisation and the nature, the scope and the complexity of their activities have been taken into consideration in this disclosure.

Report on Remuneration

This section of the annual report has been prepared in accordance with Article 14a(4) of Directive 2009/65/EC, as amended by Directive 2014/91/EU ("UCITS V Directive") and the Financial Conduct Authority's Handbook (SYSC 19E: UCITS Remuneration Code).

In accordance with the UCITS V Directive, Columbia Threadneedle Fund Management Limited (formerly BMO Fund Management Limited), the Authorised Corporate Director (ACD) for Columbia Threadneedle (UK) ICVC V has adopted a remuneration policy which is consistent with the remuneration principles applicable to UCITS management companies and aligned with the Columbia Threadneedle Investments (EMEA) Remuneration Policy. The size of the Company and the size of the funds it manages, the internal organisation and the nature, the scope and the complexity of their activities have been taken into consideration in this disclosure.

Remuneration policy

The purpose of the Group's remuneration policy is to describe the remuneration principles and practices within the Group and for such principles and practices:

(a) to be consistent with, and promote, sound and effective risk management;

(b) to be in line with the business strategy, objectives, values and interests of the Group;

(c) not to encourage excessive risk-taking as compared to the investment policy of the relevant sub-funds of the Group;

(d) to provide a framework for remuneration to attract, motivate and retain staff (including directors) to which the policy applies in order to achieve the objectives of the Group; and

(e) to ensure that any relevant conflicts of interest can be managed appropriately at all times.

Columbia Threadneedle (Lux) III Remuneration (unaudited) (continued)

Decision making and governance

The board of directors (the Group's Board) is responsible for the remuneration policy of the Group and for determining the remuneration of the directors of the Group and other staff who undertake professional activities for the Group. The Group's Board has delegated to the Risk and Remuneration Committee (the "Committee") of Columbia Threadneedle Investments (formerly BMO Asset Management (Holdings) plc) responsibility for maintaining a compliant remuneration policy. The Committee solely comprises non-executive directors of Columbia Threadneedle Investments. The Group's Board has adopted the remuneration policy applicable to all members of the Group ("Columbia Threadneedle Investments (EMEA)") for this financial year as reviewed and approved by the Committee periodically (at least annually). The Committee is responsible for, and oversees, the implementation of the remuneration policy in line with the UCITS Regulations. The Group's Board considers that the members of the Committee have appropriate expertise in risk management and remuneration to perform this review.

Applicability

The remuneration policy, which incorporates compliance with UCITS V requirements, applies to staff whose professional activities have a material impact on the risk profile of the Group or of the funds it manages ("Identified Staff") and so covers:

- a) senior management;
- b) risk takers;
- c) control functions; and

d) employees receiving total remuneration that takes them into the same remuneration bracket as senior management and risk takers, whose professional activities have a material impact on the risk profile of the Company.

The Identified Staff list and the selection criteria above are subject to regular review (at least annually) by the Committee as well as formally reviewed in the event of significant organisation changes and changes in remuneration regulations the Group is subject to.

Linking remuneration with performance

The Company's remuneration policy is part of the Columbia Threadneedle Investments (EMEA) framework for promoting sound remuneration management, with the objective of providing total compensation to its employees that is warranted by corporate, business unit/function and individual performance and is comparable to market competitors, whilst being consistent with and promoting sound and effective risk management and the achievement of fair outcomes for all customers. Its purpose is to facilitate achievement of the business objectives and corporate values of the Company, with the primary focus on clients, whilst ensuring that Columbia Threadneedle Investments (EMEA) is able to attract, retain and motivate the key talent required to achieve these business objectives and corporate values or inappropriate risk.

When setting remuneration levels, the following components and principles form part of the remuneration management framework:

- Fixed remuneration is determined taking into account factors including the requirements of the particular role and the staff
 member's experience, expertise, contribution level and the fixed pay for comparable roles. Fixed remuneration is set, with
 reference to market data, at a level that is sufficient to attract high calibre staff as well as to permit the operation of a fully-flexible
 remuneration policy (including the possibility of a staff member receiving reduced or no variable remuneration in a particular year).
 The Committee keeps the balance between fixed and variable remuneration under review.
- Variable remuneration is determined annually by reference to both financial and non-financial company performance
 considerations. External competitor practices are included in the funding review to ensure compensation opportunities in the
 markets within which the Group operates are given due consideration and retention risks are effectively managed. Incentive
 funding is developed in view of current and projected economics and risks, supported by Columbia Threadneedle Investments
 (EMEA) Audit and Compliance Committee inputs, ensuring risk-adjustments and qualitative and quantitative considerations, such
 as the cost and quantity of capital and liquidity are actively considered as funding adjustments. The Committee ensures that all
 incentive awards are not paid through vehicles or methods that facilitate the avoidance of the requirements with regard to
 remuneration imposed by applicable law and/or regulations.
- Variable remuneration is allocated to respective business functions by reference to:
 - · contribution of the respective business function or unit to corporate performance;
 - business function performance relative to pre-determined targets and objectives, including adherence to risk management obligations; and
 - competitive market pay data.

Individual award allocations are referenced to the individual achievement during the performance year relative to pre-agreed objectives and assessment of market comparability. Performance is assessed in relation to pre-agreed objectives, which include financial and non-financial goals (including the achievement of fair customer outcomes), compliance with the CT Group's policies and procedures, adherence to risk management and compliance requirements and the CT Code of Conduct. The assessment of performance for Identified Staff reflects multi-year performance in a manner appropriate to the life-cycle of the funds that are managed by the Group.

 Application of Financial Conduct Authority's Handbook (SYSC 19E: UCITS Remuneration Code) pay-out process rules, save for disapplication at individual or Group level, which is determined by an annual proportionality assessment.

Columbia Threadneedle (Lux) III Remuneration (unaudited) (continued)

Quantitative remuneration disclosure

The total remuneration paid by Columbia Threadneedle Management Limited to its staff is zero, as all UCITS staff are employed by other companies in Columbia Threadneedle Investments (EMEA).

The table below provides an overview of aggregate total remuneration paid to UCITS Identified Staff in respect of the proportion of their pay aligned to their UCITS responsibilities. It is not possible to apportion remuneration by individual Identified Staff working a specific UCITS fund, therefore figures are provided in aggregate on a UCITS management company basis.

Columbia Threadneedle Management Limited	Headcount	Fixed Remuneration (£m)	Variable Remuneration (£m)	Total Remuneration (£m)
Remuneration of UCITS Identified Staff of which:	55	0.53	1.45	1.98
Senior Management	14	0.12	0.39	0.51
Other Code Staff	41	0.41	1.06	1.47

Notes on the quantitative remuneration disclosure

Total remuneration reported is the sum of salary, cash bonus, any deferred annual bonus, value of any long-term incentive awards granted in respect of performance in the reportable financial year, plus the value of any applicable cash allowances.

"Senior Management" are defined in this table as the UCITS Directors, Executive and Non-Executive Directors and Group Management Team members of Columbia Threadneedle Investments. "Other Code Staff" includes all other identified Code staff in business areas, internal control functions and corporate functions.

The Identified Staff disclosure represents total compensation of those staff who are fully or partly involved in the activities of the UCITS funds, apportioned to the estimated time relevant to the UCITS or to the amount attributable to the UCITS allocated on an AUM basis.

Columbia Threadneedle (Lux) III Portfolio Turnover Ratio (unaudited)

The Portfolio Turnover Ratio have been calculated for the year ended 30 September 2022 based on the following formula:

PTR=	(Total purchases + Total sales) - (Total subscriptions + Total redemptions)	x 100
1 111-	Average net assets of the Portfolio	X 100

Portfolio	Portfolio Currency	Total Net Assets, average during the year	Portfolio Turnover Ratio as of 30 September 2022 (annualised) %
CT (Lux) Diversified Growth	Euro	124,652,845	28.81%
CT (Lux) Euro Bond	Euro	220,480,068	285.87%
CT (Lux) European Growth & Income	Euro	37,981,755	29.04%
CT (Lux) European Smaller Cap	Euro	12,996,980	26.87%
CT (Lux) Global Absolute Return Bond	Euro	584,399,839	14.49%
CT (Lux) Global Convertible Bond	Euro	129,913,063	47.32%

* Refer to Appendix I.

Performance fees are not applicable and therefore not included within the TER.

For share class launched during the year (refer to Appendix I), the operating expenses incurred up until the year end have been annualised to provide a more comparable estimate of the TER for the share class.

Additional Information:

Investors in Switzerland can obtain the documents of the Fund, such as the Prospectus, the KIIDS, the Articles of Incorporation and the semi-annual and annual reports, the list of purchases and sales during the accounting period, and further information free of charge from the Swiss representative.

The Total Expense Ratio and Portfolio Turnover Ratio have been calculated in accordance with Swiss Funds & Asset Management Association's guidelines 16 May 2008.

Columbia Threadneedle (Lux) III Performance Data (unaudited)

The performance data is calculated based on the movement of the net asset value per share during the period. Performance figures shown in the Investment Managers reports are based on total return figures, inclusive of distributions, and may differ from the below.

Past performance is no indication of current or future performance. The performance data does not take account of the commissions and costs incurred on the issue and redemption of share.

Global data

The following table details the market value of securities lent as a proportion of the relevant Portfolio's total lendable assets and Net Assets, and the value of Total Return Swaps ("TRS") as a proportion of the Portfolio's Net Assets, as at 30 September 2022. Total lendable assets represents the total market value of the securities portfolio excluding derivatives as at the reporting date. The value of TRS is based on the Unrealised Gain/(Loss) on an absolute basis.

			TRS			
Portfolio	Portfolio currency	Market value of securities lent	% of lendable assets	% of Net Assets	Unrealised profit/loss	% of Net Assets
CT (Lux) Diversified Growth	EUR	2,676,178	2.65%	2.55%	407,047	0.39%

The above maturity tenor analysis has been based on the contractual maturity date of the securities lent, and of the relevant TRS transaction.

The following table provides an analysis of the non cash collateral received for the securities lending transactions and OTC by clearing mechanism indicating as well the triparty agent and the bilateral, as at 30 September 2022:

	Security lent non cash collateral received	OTC non cash collateral received
Triparty		
JP Morgan Chase Bank	2,152,800	-
Bank of New York	1,354,019	-
Total	3,506,819	-
bilateral	3,659,166	-

Data on reuse of collateral

As at 30 September 2022, none of the cash collateral received in respect of OTC derivative transactions (including TRS) was re-invested. In respect of securities lending transactions, the Fund does not accept cash collateral in the securities lending program.

Non-cash collateral received by way of title transfer collateral arrangement in relation to securities lending transactions and OTC derivative transactions, cannot be sold, re-invested or pledged.

Safekeeping of collateral

The following table provides an analysis of the amounts of non-cash collateral received by the Portfolios in respect of securities lending transactions and OTC derivatives transactions (including TRS) and held by the Funds' Depositary (or through its delegates) or through a third party Depositary, as at 30 September 2022:

Data on return and cost

For the securities lending transactions the breakdown of return and cost by portfolio is disclosed in the Notes. Please refer to the note "Securities lending".

All returns from OTC derivative transactions (including TRS) will accrue to the Portfolio and are not subject to any returns sharing agreement with the Portfolio's manager or any other third parties.

For TRS transactions costs are not separately identifiable. For these investments, transaction costs are included in the purchase and sales price and are part of the gross investment performance of each Portfolio. Returns are identified as the realised gains and change in unrealised appreciations on swaps contract during the reporting period.

Annex III

ANNEX IV

Template periodic disclosure for financial products referred to in *Article 8(1) of Regulation (EU)* 2019/2088 and Article 6 of Regulation (EU) 2020/852

Product name: CT (Lux) Responsible Euro Corporate Bond Legal entity identifier: 2138007PU8621E722925

Did this financial product have a sustainable investment objective?

Environmental and/or social characteristics

•• Yes	•• 🗶 No
 It made sustainable investments with an environmental objective:% in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	 It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 83.79% of sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective
It made sustainable investments with a social objective:%	It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The overarching philosophy of the Portfolio is to:

- Avoid companies with environmentally or socially damaging products, or unsustainable business or governance practices
- Additionally invest in companies that make a positive contribution to society and/or the environment
- Improve management of ESG issues, using our influence as an investor to encourage best practice through engagement

The fund, while it does not have a sustainable objective, aims to hold a minimum of 25% of the fund in sustainable investments.

an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Sustainable

investment means

The EU Taxonomy is a classification system, establishing a list of environmentally sustainable economic activities. For the time being, it does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Over the period, screens were applied to all fund assets other than Cash, Forward FX, Exchange Traded Futures, OTC Derivatives with the result that companies who fail to meet minimum environmental, or socials standards were excluded from the fund. Over the year, there have been no changes to the screening criteria applied by the fund and no companies held have subsequently failed the screening criteria (for example, owing to new controversies). The fund invests in companies providing sustainability solutions and/or companies making a positive contribution to society and/or the environment. This investment is primarily achieved through investment in green, sustainable or sustainability-linked bonds issued by companies (so called "Labelled bonds"). All Labelled bonds must be individually assessed by the Investment Manager's Responsible Investment team, which considers the impact to society and/or the environment or the materiality of the sustainability target before they are Approved for investment. Over the period, the fund increased the percentage it holds Labelled bonds from 28% of NAV to 35% of NAV.

The fund continued to engage with investee companies over the period. A breakdown of engagement activity is presented as a sustainability indicator below.

How did the sustainability indicators perform?

The Investment Manager uses the following indicators to measure the attainment of the environmental and social characteristics promoted by the Portfolio:

1. The number of companies determined to be in breach of the Portfolio's exclusion criteria and/or global norms

The fund did not invest in bonds which breached its standards. Pre-investment each holding was screened by the Responsible Investment team and approved for purchase with ongoing monitoring.

2. Held companies' revenue alignment with the targets which underpin the Sustainable Development Goals (SDGs)

As at 30/09/2022, 48.51% of the portfolio was invested in companies with greater than 50% of net revenues positively aligned with the Sustainable Development Goals¹.

3. The percentage of the Portfolio which constitutes labelled bonds, including Sustainability-Linked Bonds and Green Bonds

As at 30/09/2022, 35.27% of the portfolio was invested in labelled bonds.

4. The number of environmental- and social-linked engagement objectives and/or milestones that are achieved

During the year 144 engagements were undertaken with 53 companies. This resulted in 16 milestones, meaning a company made a tangible improvement in its policies and practices in alignment with our engagement objective(s).

ility

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

¹ This figure excludes investments made in labelled bonds to avoid double counting.

² Measured as holdings where revenue is greater than 50% positively aligned to the SDGs – excluding any labelled bonds

…and compared to previous periods?

Indicator	2022	2021
The number of companies determined to be in breach of the Portfolio's exclusion criteria and/or global norms	0	2
Held companies' revenue alignment with the targets which underpin the Sustainable Development Goals (SDGs) ²	48.51%	n/a
The percentage of the Portfolio which constitutes labelled bonds, including Sustainability-Linked Bonds and Green Bonds	35.27%	28%
The number of environmental- and social-linked engagement objectives and/or milestones achieved	16	36

Principal adverse

impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

As at 30/09/2022 the fund had 34.42% of holdings invested in labelled bonds that substantially contributes to sustainable objectives. We require the proceeds to be used in key environmental project categories such as:

- 1. Renewable energy and transmission
- 2. Alternative fuels
- 3. Energy efficiency
- 4. Clean transport
- 5. Biodiversity conservation
- 6. Sustainable waste management
- 7. Water
- 8. Green buildings
- 9. Sustainable land use (forestry and agriculture)

The bond should also comply with IMCA's Green Bond Principles (GBP), Social Bond Principles (SBP), Sustainability Bond Guidelines (SBG) or Sustainability-Linked Bond Principles.

A further 49.37% of the portfolio was in bond's issued by companies which generate greater than net 50% of their revenue positively aligned to the Sustainable Development Goals.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Portfolio's investment approach assesses that the sustainable investments made by the Portfolio do not significantly harm other sustainable investment objectives in the following ways:

- The Portfolio screens out investments that are contrary to the goals of making positive contributions to the environment and/or society. These criteria are product- and conduct-based, covering topics such as fossil fuels and weapons, and United Nations Global Compact breaches.
- Through the Investment Manager's investment research, Sustainability Risks and ESG factors are considered throughout the investment cycle, which serves to mitigate the risks of significant harm. Companies are identified which the Investment Manager thinks could benefit from active engagement to address material ESG issues which exist but are not considered significantly harmful.

• For labelled bonds, each bond is reviewed and approved by the responsible investment team to ensure it does not significantly harm sustainability objectives.

We exclude labelled bonds with:

- Very poor overall ESG management that presents a serious risk to the integrity of the Portfolio
- Severe environmental or financial management issues that undermine our confidence in the issuer's ability to fulfil its Green Bond commitments (e.g. major controversies related to the management of environmental projects such as renewables; major controversies in environmental lending means we are not confident in their green projects abilities).

How were the indicators for adverse impacts on sustainability factors taken into account?

Investments which are reported as sustainable investments have been assessed to ensure they do not significantly harm (DNSH) sustainability objectives using an inhouse data driven model and investment team due diligence. The Investment Manager identifies harm by using quantitative thresholds against a selection of principal adverse impact indicators, including all mandatory indicators from Table 1 and certain indicators from Tables 2 and 3 of Annex I of the The Investment Manager identifies harm by using quantitative thresholds against a selection of principal adverse impact indicators, including all mandatory indicators from Table 1 and certain indicators from Tables 2 and 3 of Annex I of the The Investment Standards (RTS)³.

Issuers which fall below these thresholds are flagged as potentially harmful and a review is then undertaken to determine whether significant harm is being caused by the issuer. Where quantitative data is not available, the investment teams endeavour to satisfy that no significant harm has taken place through desk-based qualitative research or issuer engagement. Depending on the materiality of the principal adverse impact indicator, the investment manager will either exclude the issuer or, in limited cases, seek to engage with the issuer to address the harmful practices by taking appropriate action

During 2022 the investment team reviewed all portfolio holdings against the model and discussed the outcomes with the responsible investment team. It was agreed that no significant adverse impacts were identified for the fund.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

³ The Regulatory Technical Standards set out three tables detailing principal adverse indicators which have been defined by the European Commission. The tables cover a range of harmful activities across environmental, social and governance areas.

Yes. The Fund explicitly prohibits investment in companies which breach UN Global Compact (UNGC) principles. In addition, the sustainable investments are assessed under the DNSH due diligence against factors which align with UNGC and OECD guidelines to identify any significant harmful practices.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The fund considered PAIs in several ways:

- 1) Through alignment with the fund exclusion policy and screening criteria which relate to the PAIs, including: fossil fuels, biodiversity, deforestation, human rights, global norms, hazardous waste and controversial weapons.
- 2) Utilising the PAI framework to review issuers against PAIs as per Table 1 in the RTS. This allows us to monitor harmful practices which may arise. No instances of significant harmful practices were identified for the positions held in the portfolio.
- 3) PAIs align with stewardship activities undertaken by the fund. For example, more than a quarter of engagements undertaken by the fund related to climate change topics. For further details please see question 9.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The sustainable investments with an environmental objective made by the fund do not have a commitment to align with the EU criteria for environmentally sustainable economic activities as defined by the EU Taxonomy Regulation.

Based on reliable data that has made available to date, the fund is reporting 0% of its investments are in economic activities that qualify as environmentally sustainable under the EU Taxonomy Regulation.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds^{*}, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consists of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

0% of the investments made by the fund are in transitional and enabling activities as defined by the EU Taxonomy Regulation.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The fund has not reported there being any alignment of its investments with the EU criteria for environmentally sustainable economic activities as defined by the EU Taxonomy Regulation to date

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are

activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

sustainable

investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

38.14% of the portfolio was invested in sustainable investments which predominantly contribute to an environmental objective. These holdings have not been assessed for taxonomy alignment.

What was the share of socially sustainable investments?

45.65% of the portfolio was invested in sustainable investments which predominantly contribute to a social objective.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Holdings classified as other refer to investments which contribute to the E/S characteristics of the fund, but are not considered sustainable investments. All investments must contribute to the E/S characteristics of the fund and comply with the fund level exclusions and screening criteria, including good governance. It also includes investment in bonds which do not constitute sustainable investments, cash or cash equivalents. We do not apply minimum safeguards to cash positions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

In Q4 2021, we committed to aligning the fund with net zero emissions by 2050 or sooner. This builds on the existing climate change commitments for the fund, which include the exclusions of companies with fossil fuel reserves and engagement on climate opportunities and risks.

During the year there were 144 engagements with companies held in the portfolio. These covered 53 companies across 11 countries across a range of themes.

One example of engagement in 2022 is with the company Mondelez regarding their net zero strategy. As part of our participation in FAIRR we spoke with senior executives in the sustainability, procurement, and nutrition departments jointly with other investors on the company's progress on protein diversification, sustainability, and strategy. Its net-zero roadmap is being developed with a new emissions baseline for science-based targets and maintaining focus on cocoa and wheat as those are responsible for the majority of emissions. However, as dairy still makes up a significant part of emissions it is reviewing mitigation technologies for feed, animal-generated methane, and manure management. The product transition remains consumer-driven but the company recognises that it would support its broader sustainability agenda. While this recognition is positive, we would prefer that both perspectives are represented in the corporate strategy and board oversight for the protein transition. We sought more details on sales figures for the plant-based products, but this is not yet tracked. We emphasised the need for more detailed metrics on products and climate impact, especially for dairy.

Our engagements are structured in line with the firm's engagement themes which align with the PAIs. Below we provide a breakdown of the engagements undertaken and which PAI categories these typically address. We are updating our engagement tracking and reporting to enable PAI reporting at indicator level. We note that an engagement may correlate with a number of PAI indicators.

Engagements by Theme	Alignment with PAIs ⁵	Proportion of engagements	Milestones Achieved by Theme
Climate Change	GHG Emissions and Energy Performance	28.00%	31.25%
Environmental Stewardship	Biodiversity, Water, Waste	16.40%	12.50%
Business Conduct	Social and	4.40%	0.00%
Human Rights	Employee	7.20%	0.00%
Labour Standards	Matters	21.60%	37.50%
Public Health		6.80%	6.25%
Corporate Governance		15.60%	12.50%

How did this financial product perform compared to the reference benchmark?

Not applicable

How does the reference benchmark differ from a broad market index? Not Applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted? Not Applicable

How did this financial product perform compared with the reference benchmark? Not Applicable

How did this financial product perform compared with the broad market index? Not Applicable

⁵ Note that themes may align with multiple PAIs. We will update engagement tracking and reporting capabilities to break down engagements by PAIs from 2023

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

ANNEX IV

Template periodic disclosure for financial products referred to in *Article 8(1) of Regulation (EU)* 2019/2088 and Article 6 of Regulation (EU) 2020/852

Product name: CT (Lux) Responsible Global Emerging Markets Equity

Legal entity identifier: 213800BICB11V5TYV922

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

•• Yes	• X No
 It made sustainable investments with an environmental objective:% in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 77.03% of sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
It made sustainable investments with a social objective:%	with a social objective It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The overarching philosophy of the Portfolio is to:

- Avoid companies with environmentally or socially damaging products, or unsustainable business or governance practices
- Invest in companies that make a positive contribution to society and/or the environment

investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Sustainable

The EU Taxonomy is a classification system, establishing a list of environmentally sustainable economic activities. For the time being, it does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained. Improve management of ESG issues, using our influence as an investor to encourage best practice through engagement and voting

The fund, while it does not have a sustainable objective, aims to hold a minimum of 75% of the fund in sustainable investments.

• How did the sustainability indicators perform?

The Investment Manager uses the following indicators to measure the attainment of the environmental and social characteristics promoted by the Portfolio:

1. The number of companies determined to be in breach of the Portfolio's exclusion criteria and/or global norms.

The fund did not invest in companies which breached its standards. Pre-investment each holding was screened by the Responsible Investment team and approved for purchase with ongoing monitoring.

2. The percentage of the Portfolio which aligns to its key sustainability themes

Theme:	Portfolio Weight as at 30/09/22:
Food and nutrition	7.67%
Health and well-being	20.09%
Responsible finance	18.33%
Sustainable infrastructure	5.08%
Technological innovation	46.08%
Total:	97.24%

3. Held companies' revenue alignment with the targets which underpin the Sustainable Development Goals (SDGs)

77.03% of the portfolio as at 30/09/2022 was invested in companies with greater than 50% of net revenues positively aligned with the Sustainable Development Goals.

4. The number of environmental- and social-linked engagement objectives and/or milestones achieved

During the year 58 engagements were undertaken with 21 companies. This resulted in 12 milestones, meaning a company made a tangible improvement in its policies and practices in alignment with our engagement objective.

…and compared to previous periods?

Indicator	2022	2021
The number of companies determined to be in breach of the Portfolio's exclusion criteria and/or global norms	0	1
The percentage of the Portfolio which aligns to its key sustainability themes	97.24%	97%
Held companies' revenue alignment with the targets which underpin the Sustainable Development Goals (SDGs) ¹	77.03%	n/a
The number of environmental- and social-linked engagement objectives and/or milestones achieved	12	22

¹ Measured as holdings where revenue is greater than 50% net positively aligned to the SDGs

Principal adverse

impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

As at 30/09/2022, the fund had 77.03% of holdings invested in companies which align to the Sustainable Development Goals, and are considered sustainable investments.

These investments contribute to a sustainable objective through their contribution to key sustainability themes which have an environmental or social focus, most notably:

- 1. Health and well-being Supporting the provision of services to improve personal long-term well-being, e.g. education, health and sanitation
- 2. Food and nutrition Helping advance sustainable production and consumption patterns
- 3. Technological innovation Delivering technological and connectivity solutions to advance sustainable development
- 4. Energy transition Fueling the economy with efficient and affordable energy from both conventional and alternative sources
- 5. Sustainable infrastructure Helping build resilient infrastructure in transport, energy, water, communications and other sectors
- Responsible finance Providing financial services to advance financial inclusion, small and medium-sized enterprise (SME) development, green finance and sustainable financial markets

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Portfolio's investment approach assesses that the sustainable investments made by the Portfolio do not significantly harm other sustainable investment objectives in the _following ways:

- The Portfolio screens out investments that are contrary to the goals of making positive contributions to the environment and/or society. These criteria are product- and conduct-based, covering topics such as fossil fuels and weapons, and
 United Nations Global Compact breaches.
- Through the Investment Manager's investment research, Sustainability Risks and ESG factors are considered throughout the investment cycle, which serves to mitigate the risks of significant harm. Companies are identified which the Investment Manager thinks could benefit from active engagement to address material ESG issues which exist but are not considered significantly harmful.

How were the indicators for adverse impacts on sustainability factors taken into account?

Investments which are reported as sustainable investments have been assessed to ensure they do not significantly harm (DNSH) sustainability objectives using an in-house data driven model and investment team due diligence.

The Investment Manager identifies harm by using quantitative thresholds against a selection of principal adverse impact indicators, including all mandatory indicators from Table 1 and certain indicators from Tables 2 and 3 of Annex I of the Regulatory Technical Standards (RTS)². Issuers which fall below these thresholds are flagged as potentially harmful and a review is then undertaken to determine whether significant harm is being caused by the issuer. Where quantitative data is not available, the investment teams endeavor to satisfy that no significant harm has taken place through desk-based qualitative research or issuer engagement.

Depending on the materiality of the principal adverse impact indicator, the investment manager will either exclude the issuer or, in limited cases, seek to engage with the issuer to address the harmful practices by taking appropriate action

During 2022 the investment team reviewed all portfolio holdings against the model and discussed the outcomes with the Responsible Investment team. It was agreed that no significant adverse impacts were identified for the fund.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes. The Fund explicitly prohibits investment in companies which breach UN Global Compact (UNGC) principles. In addition, the sustainable investments are assessed under the DNSH due diligence against factors which align with UNGC and OECD guidelines to identify any significant harmful practices.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

² The Regulatory Technical Standards set out three tables detailing principal adverse indicators which have been defined by the European Commission. The tables cover a range of harmful activities across environmental, social and governance areas.

How did this financial product consider principal adverse impacts on sustainability factors?

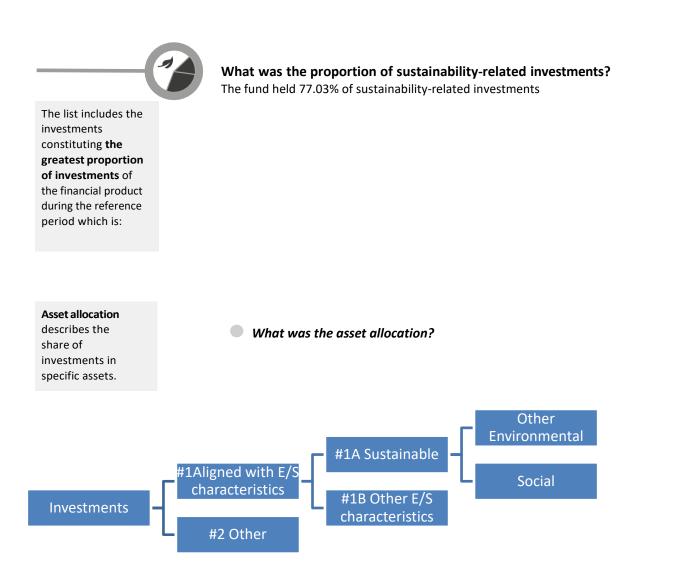

The fund considered PAIs in three ways:

- 1) Through alignment with the fund's exclusion policy and screening criteria which relate to the PAIs, including: fossil fuels, biodiversity, deforestation, human rights, global norms, hazardous waste and controversial weapons.
- 2) Utilising the PAI framework to review issuers against PAIs as per Table 1 in the RTS. This allows us to monitor harmful practices which may arise. No instances of significant harmful practices were identified for the positions held in the portfolio.
- 3) PAIs align with stewardship activities undertaken by the fund. For example, the fund took voting action against management at six AGMs during the year due to issues related to diversity. Nearly a quarter of engagements undertaken by the fund related to labour standards, and more than 35% related to climate change or environmental stewardship topics. For further details please see question 9.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The sustainable investments with an environmental objective made by the fund do not have a commitment to align with the EU criteria for environmentally sustainable economic activities as defined by the EU Taxonomy Regulation.

Based on reliable data that has made available to date, the fund is reporting 0% of its investments are in economic activities that qualify as environmentally sustainable under the EU Taxonomy Regulation.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds^{*}, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

Note that for this period no investments have been assessed against the taxonomy.

* For the purpose of these graphs, 'sovereign bonds' consists of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

0% of the investments made by the fund are in transitional and enabling activities as defined by the EU Taxonomy Regulation.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The fund has not reported there being any alignment of its investments with the EU criteria for environmentally sustainable economic activities as defined by the EU Taxonomy Regulation to date

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective.

Transitional

activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

are

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

9.85% of the portfolio was invested in sustainable investments which predominantly contribute to an environmental objective.

What was the share of socially sustainable investments?

67.18% of the portfolio was invested in sustainable investments which predominantly contribute to a social objective

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Holdings classified as other refer to investments which do not constitute sustainable investments but contribute to E/S characteristics, cash or cash equivalents. We do not apply minimum safeguards to cash positions. All other investments must contribute to the E/S characteristics of the fund and comply with the fund-level exclusions and screening criteria, including good governance.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

In Q4 2021, we committed to align the fund with net zero emissions by 2050 or sooner. This builds on the existing climate change commitments for the fund, which include the exclusion of companies with fossil fuel reserves and engagement on climate opportunities and risks reinforced by our voting policy.

During the year there were 58 engagements with companies held in the portfolio. These covered 21 companies in 11 countries across a range of themes.

Our engagements are structured in line with the firm's engagement themes which align with the PAIs. Below we provide a breakdown of the engagements undertaken and which PAI categories are typically addressed. We are updating our engagement tracking and reporting to enable PAI reporting at the indicator-level. We note that an engagement may correlate with a number of PAI indicators.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Engagements by Theme	Alignment with PAIs ³	Proportion of engagements	Milestones Achieved by Theme
	GHG Emissions		
Climate Change	and Energy Performance	20.74%	33.33%
Environmental Stewardship	Biodiversity, Water, Waste	15.56%	16.67%
Business Conduct		5.19%	8.33%
Human Rights		8.15%	0.00%
Labour Standards	Social and	24.44%	8.33%
Public Health	Employee Matters	3.70%	0.00%
Corporate Governance	-	22.22%	33.33%
Diversity – Voting Action		Took voting action against management at two AGMs due to poor board gender diversity	

How did this financial product perform compared to the reference benchmark?

Not applicable

How does the reference benchmark differ from a broad market index? Not Applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted? Not Applicable

How did this financial product perform compared with the reference benchmark? Not Applicable

How did this financial product perform compared with the broad market index? Not Applicable

³ Note that themes may align with multiple PAIs. We will update engagement tracking and reporting capabilities to break down engagements by PAIs from 2023.

The overarching philosophy of the Portfolio is to:

- Avoid companies with environmentally or socially damaging products, or unsustainable ٠ business or governance practices
- Invest in companies that make a positive contribution to society and/or the environment
- Improve management of ESG issues, using our influence as an investor to encourage best • practice through engagement and voting

The fund, while it does not have a sustainable objective, aims to hold a minimum of 75% of the fund in sustainable investments.

economic activity that contributes to an environmental or

investments with an environmental objective might be aligned with the Taxonomy or not.

an investment in an

Sustainable investment means The CT (Lux) Responsible Global Equity Fund allocated to companies in line with its investment policy during the period. The Fund focuses on 7 sustainability themes, which in turn link well to the UN's Sustainable Development Goals. During the period, the Fund comfortably held more than the minimum 75% in sustainable investments, according to our definition of sustainable investment (see question 4 for further details), as at 30/09/2022 92.54% was held in sustainable investments.

During Q4 2021, we made some amendments to our Responsible Funds' criteria – the exclusionary thresholds that are applied to the Fund. This included enhanced criteria for fossil fuels, electricity generation, nuclear energy, tobacco and weapons.

How did the sustainability indicators perform?

The Investment Manager uses the following indicators to measure the attainment of the environmental and social characteristics promoted by the Portfolio:

1) The number of companies determined to be in breach of the Portfolio's exclusion criteria and/or global norms.

The fund did not invest in companies which breached its standards. Pre-investment each holding was screened by the Responsible Investment team and approved for purchase with ongoing monitoring.

2) The percentage of the Portfolio which aligns to its key sustainability themes

97.8% of the portfolio was aligned to its key sustainability themes as at 30/09.2022:

Sustainability theme	% of portfolio aligned
Energy Transition	11.4%
Resource Efficiency	7.2%
Sustainable Cities	8.2%
Health & Wellbeing	23.9%
Connect & Protect	15.9%
Digital Empowerment	17.4%
Sustainable Finance	13.8%
No Theme / Cash	2.2%
Total	100.0%

3) Held companies' revenue alignment with the targets which underpin the Sustainable Development Goals (SDGs)

92.54%, as at 30/09/2022, of the portfolio was invested in companies with greater than 50% of net revenues positively aligned with the Sustainable Development Goals.

4) The number of environmental- and social-linked engagement objectives and/or milestones achieved

During the year 80 engagements were undertaken with 33 companies. This resulted

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained. in 16 milestones, meaning a company made a tangible improvement in its policies and practices in alignment with our engagement objective.

…and compared to previous periods?

Indicator	2022	2021
The number of companies determined to be in breach of the Portfolio's exclusion criteria and/or global norms	0	0
The percentage of the Portfolio which aligns to its key sustainability themes	97.8%	98.1%
Held companies' revenue alignment with the targets which underpin the Sustainable Development Goals (SDGs)	92.54%	73%
The number of environmental- and social-linked engagement objectives and/or milestones achieved	16	23

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

As a result of the Portfolio's sustainability philosophy, the Portfolio will invest a minimum proportion of 75% (excluding cash, cash equivalents or hedging instruments) in sustainable investments. As at 30/09/2022, the fund had 92.54% of holdings invested in companies with greater than 50% net revenue positively contributing to the Sustainable Development Goals, and which are considered sustainable investments. These investments also align with the fund's sustainable themes as described below.

These investments contribute to a sustainable objective through their contribution to key sustainability themes which have an environmental or social focus, including: energy transition, health and well-being and resource efficiency.

The Investment Manager uses a proprietary framework to assess the extent to which companies prioritise sustainability:

- Additionality: Is the company a leader in its industry, making a real difference to the positive direction of the industry? Here the Investment Manager focuses on and evidences the Portfolio's exposure through our view of high quality, wide most businesses.
- Intentionality: How core is sustainability to the company's strategy and overall raison d'être? Here the Investment Manager leverages our extensive engagement capability to assess the company's transparency and communication around strategic goals, which will evidence the management team's and Board's intentions in prioritising these issues/opportunities.
- Materiality: How material are sustainability opportunities for the company? In addition to assessing revenue alignment to the Sustainable Development Goals, the Investment Manager makes an assessment of the company's revenue alignment to seven sustainability themes: Environmental Stewardship, Climate Change, Human Rights, Labour Standards, Public Health, Business Ethics and Corporate Governance.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Portfolio's investment approach assesses that the sustainable investments made by _the Portfolio do not significantly harm other sustainable investment objectives in the following ways:

The Portfolio screens out investments that are contrary to the goals of making positive contributions to the environment and/or society through the fund's
 exclusion policy. These criteria are product- and conduct-based, covering topics such as fossil fuels and weapons, and United Nations Global Compact breaches.

 Through the Investment Manager's investment research, Sustainability Risks and ESG factors are considered throughout the investment cycle, which serves to mitigate the risks of significant harm. Companies are identified which the Investment Manager thinks could benefit from active engagement to address material ESG issues which exist but are not considered significantly harmful.

How were the indicators for adverse impacts on sustainability factors taken into account?

Investments which are reported as sustainable investments have been assessed to ensure they do not significantly harm (DNSH) sustainability objectives using an inhouse data driven model and investment team due diligence.

The Investment Manager identifies harm by using quantitative thresholds against a selection of principal adverse impact indicators, including all mandatory indicators from Table 1 and certain indicators from Tables 2 and 3 of Annex I of the Regulatory Technical Standards (RTS)¹.

Issuers which fall below these thresholds are flagged as potentially harmful and a review is then undertaken to determine whether significant harm is being caused by the issuer. Where quantitative data is not available, the investment teams endeavour to satisfy that no significant harm has taken place through desk-based qualitative research or issuer engagement.

Depending on the materiality of the principal adverse impact indicator, the investment manager will either exclude the issuer or, in limited cases, seek to engage with the issuer to address the harmful practices by taking appropriate action

During 2022 the investment team reviewed all portfolio holdings against the model and discussed the outcomes with the responsible investment team. It was agreed that no significant adverse impacts were identified for the fund. Details of PAI engagement are detailed later in this report.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes. The Fund explicitly prohibits investment in companies which breach UN Global Compact (UNGC) principles. In addition, the sustainable investments are assessed under the DNSH due diligence against factors which align with UNGC and OECD guidelines to identify any significant harmful practices.

¹ The Regulatory Technical Standards set out three tables detailing principal adverse indicators which have been defined by the European Commission. The tables cover a range of harmful activities across environmental, social and governance areas.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The fund considered PAIs in several ways:

- Through alignment with the fund's exclusion policy and screening criteria which relate to the PAIs, including: fossil fuels, biodiversity, deforestation, human rights, global norms, hazardous waste and controversial weapons.
- Utilising the PAI framework to review issuers against PAIs as per Table 1 in the RTS. This allows us to monitor harmful practices which may arise. No instances of significant harmful practices were identified for the positions held in the portfolio.
- PAIs align with stewardship activities undertaken by the fund. For example, the fund took voting action against management at six AGMs during the year due to issues related to diversity. More than a quarter of engagements undertaken by the fund related to labour standards, and more than 35% related to climate change or environmental stewardship topics. For further details please see question 9.

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is:

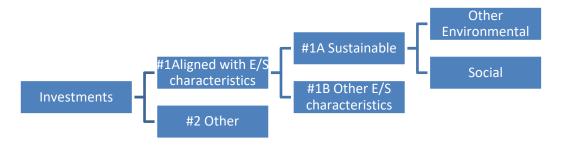

Company	Sector	% of portfolio	Country

Taxonomy-aligned activities are expressed as a share of:

 turnover reflects investee companies today.

 capital expenditure

the "greenness" of (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.

- operational expenditure (OpEx) reflects the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The sustainable investments with an environmental objective made by the fund do not have a commitment to align with the EU criteria for environmentally sustainable economic activities as defined by the EU Taxonomy Regulation.

Based on reliable data that has made available to date, the fund is reporting 0% of its investments are in economic activities that qualify as environmentally sustainable under the EU Taxonomy Regulation.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds^{*}, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

Note that for this period no investments have been assessed against the taxonomy.

* For the purpose of these graphs, 'sovereign bonds' consists of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

0% of the investments made by the fund are in transitional and enabling activities as defined by the EU Taxonomy Regulation.

Enabling activities directly enable

other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The fund has not reported there being any alignment of its investments with the EU criteria for environmentally sustainable economic activities as defined by the EU Taxonomy Regulation to date

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

19.35% of the portfolio was invested in sustainable investments which predominantly contribute to an environmental objective and have not been assessed against the taxonomy.

What was the share of socially sustainable investments?

73.19% of the portfolio was invested in sustainable investments which predominantly contribute to a social objective.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Holdings classified as other refer to investments which do not constitute sustainable investments but contribute to E/S characteristics, cash or cash equivalents. We do not apply minimum safeguards to cash positions. All other investments must contribute to the E/S characteristics of the fund and comply with the fund-level exclusions and screening criteria, including good governance.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

In Q4 2021, we committed to align the fund with net zero emissions by 2050 or sooner. This builds on the existing climate change commitments for the fund, which include the exclusion of companies with fossil fuel reserves and engagement on climate opportunities and risks reinforced by our voting policy. During the year there were 80 engagements with companies held in the portfolio. These covered 33 companies in 10 countries across a range of themes.

Our engagements are structured in line with the firm's engagement themes which align with the PAIs. Below we provide a breakdown of the engagements undertaken and which PAI categories are typically addressed. We are updating our engagement tracking and reporting to enable PAI reporting at the indicator-level. We note that an engagement may correlate with a number of PAI indicators.

		management at six AGMs due to poor board gender diversity or failure to implement appropriate workforce diversity audits	

During the period, we sold a name from the Fund on the basis of ESG concerns. While the company did not breach the Fund's ESG criteria, we had sufficient concerns about the standard of their overseas operations that we ultimately disinvested. We engaged with the company several times (in June 2021, February 2022 and April 2022) but could not gain sufficient comfort on this topic. We referred the issue up to our Responsible Investment Advisory Council, and they decided the best thing to do was to exit the position unless the company was prepared to commit to exit the country in question. The company was

² Note that themes may align with multiple PAIs. We will update engagement tracking and reporting capabilities to break down engagements by PAIs from 2023.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

Not Applicable

- How does the reference benchmark differ from a broad market index? Not Appliable
- How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted? Not Appliable

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

Sustainable

Taxonomy

investment means an investment in an economic activity

that contributes to an environmental or social objective,

To what extent was the sustainable investment objective of this financial product met?

The CT (Lux) SDG Engagement Global Equity Fund allocated to companies in line with its investment policy, over the period. The Fund looks to demonstrate positive progress towards achieving the underlying targets of the UN's Sustainable Development Goals. Every investment made by the Fund was deemed sustainable, as per our definition of sustainable investments (see question 4 for further details). In the event an investment subsequently became non-sustainable post investment, for reasons such as changes in data or Fund investment policy, then the Fund would divest from the name.

How did the sustainability indicators perform?

The Portfolio exclusively invests in sustainable investments using the investment manager's 'avoid, invest, improve' framework. The Portfolio adheres to a set of exclusions, targets investment exclusively in sustainable investment. The fund aims to undertake targeted, impact-focused, active engagement with companies, using the Sustainable Development Goals ("SDGs") framework.

The Portfolio utilises several indicators to assess performance against this framework. During the period under review the Portfolio;

- 1. Invested exclusively in Sustainable Investments with 87.58% of holdings demonstrating a positive revenue contribution to SDG objectives
- 2. Over the previous year the Portfolio had 125 investee company engagements, representing 42 companies engaged across 17 countries
- 3. 19 milestones achieved, meaning the company made a tangible improvement in their policies and practices in alignment with our SDG engagement objective

…and compared to previous periods?

Indicator	2022	2021
Proportion of the fund with >50% net revenue positively aligned with Sustainable Development Goals (SDGs ¹)	87.58%	81.95%
The number of SDG-linked engagements conducted	125	90
The number of SDG-linked engagement milestones achieved	19	33

Principal adverse

impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

¹ Calculated as the Proportion of fund held in issuers which have greater than 50% of their Net Revenue aligned with the SDGs

How did the sustainable investments not cause significant harm to any sustainable investment objective?

The Portfolio's investment approach assesses that the sustainable investments made by the Portfolio do not significantly harm other sustainable investment objectives in several ways:

The Portfolio screens out investments that are contrary to the goals of making positive contributions to the environment and/or society. These criteria are product- and conduct-based, covering topics such as fossil fuels and weapons, and United Nations Global Compact breaches.

Through the Investment Manager's investment research, Sustainability Risks and ESG factors are considered throughout the investment cycle, which serves to mitigate the risks of significant harm. Companies are identified which the Investment Manager thinks could benefit from active engagement to address material ESG issues which exist but are not considered significantly harmful.

How were the indicators for adverse impacts on sustainability factors taken into account?

Investments which are reported as sustainable investments have been assessed to ensure they do not significantly harm (DNSH) sustainability objectives using an inhouse data driven model and investment team due diligence.

The Investment Manager identifies harm by using quantitative thresholds against a selection of principal adverse impact indicators, including all mandatory indicators from Table 1 and certain indicators from Tables 2 and 3 of Annex I of the Regulatory Technical Standards (RTS)². Issuers which fall below these thresholds are flagged as potentially harmful and a review is then undertaken to determine whether significant harm is being caused by the issuer. Where quantitative data is not available, the investment teams endeavour to satisfy that no significant harm has taken place through desk-based qualitative research or issuer engagement.

Depending on the materiality of the principal adverse impact indicator, the investment manager will either exclude the issuer or, in limited cases, seek to engage with the issuer to address the harmful practices by taking appropriate action.

During 2022 the investment team reviewed all portfolio holdings against the model and discussed the outcomes with the responsible investment team. It was agreed that no significant adverse impacts were identified for the fund.

² The Regulatory Technical Standards set out three tables detailing principal adverse indicators which have been defined by the European Commission. The tables cover a range of harmful activities across environmental, social and governance areas.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes. The Fund explicitly prohibits investment in companies which breach UN Global Compact (UNGC) principles. In addition, the sustainable investments are assessed under the DNSH due diligence against factors which align with UNGC and OECD guidelines to identify any significant harmful practices.

How did this financial product consider principal adverse impacts on sustainability factors?

The fund considered PAIs in three ways:

- 1) Through alignment with the fund exclusion policy which covers four of the PAIs:
 - i. Exposure to companies active in the fossil fuel sector

The fund did not invest in companies:

- With ownership of geological reserves of coal/oil/gas. In line with the Net Zero Investment Framework, we avoid mining companies which are planning or constructing new thermal coal projects.
- That derive >0% of their revenue from exploration or production in areas of high environmental sensitivity, including the Arctic.
- That derive >5% of their revenue from:
 - Coal-related activities, including exploration, extraction, transportation, distribution and refining^{*3}.
 - Activities related to the exploration or extraction of unconventional oil & gas.
 - Conventional oil & gas-related activities, including exploration, extraction, refining and transportation
- That derive >50% of their revenue from equipment or services for coal- and/or conventional/ unconventional oil & gas-related activities.
- ii. Share of non-renewable energy consumption and production
 - Electricity utilities with coal in their electricity generation mix must commit to the objective of phasing out unabated coal-fired power by 2030 for OECD countries and 2040 for non- OECD countries.
 Electricity utilities that are structurally increasing coal-based power generation are excluded.
 - In addition, the fund excluded electricity utilities*:
 - With a carbon intensity >374 gCO2/kWh.
 - Where >30% of the power production is based on oil & gas.
 - Excluded electricity utilities where >5% of the power production is based on nuclear sources.

*Unless they have a Science Based Targets initiative (SBTi) target set at well-below 2°C or have a SBTi "Business Ambition or 1.5°C" commitment. NB. Companies' involvement in coal-related and/or oil & gas-related activities should not be increasing.

- Exclude electricity utilities constructing new nuclear power stations.
- Exclude companies that derive >5% of their revenue from selling products or services to the nuclear power industry3, except those that provide standard, non-customised or safety-related products/services.
- Exclude companies that own or operate active uranium mines.
- iii. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises

The fund did not invest in companies which are actively breaching the UN Global Compact Principles

iv. Exposure to controversial weapons

The fund did not make investments in companies that generate revenues from developing, manufacturing, or trading controversial weapons, including cluster munitions and anti-personnel landmines.

- 2) Utilising the PAI framework to review issuers against PAIs as per Table 1 in the RTS. This allows us to monitor harmful practices which may arise. No instances of significant harmful practices were identified for the positions held in the portfolio.
- 3) PAIs align with stewardship activities undertaken by the fund. For example, the fund took voting action at eight AGMs during the year due to issues related to diversity, more than a quarter of engagements related to employee matters, and more than 20% related to climate change topics. Further details of our engagement activity are described in this report.

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is:

What were the top investments of this financial product?

Company	Sector	% of portfolio	Country
Waste Connections	Industrials	3.80	Canada
Alleghany Corp	Financials	3.69	United States
Bank Mandiri	Financials	3.56	Indonesia
Acuity Brands	Industrials	2.96	United States
ICON	Health Care	2.85	Ireland
Tecan Group	Health Care	2.84	Switzerland
Steris Corp	Health Care	2.72	United States

Water	1.65%
Software	1.61%
Forest Products & Paper	1.59%
Building Materials	1.22%
Agriculture	1.14%

Asset allocation describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects investee
- companies today. - capital

expenditure

the "greenness" of (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.

operational
 expenditure

(OpEx) reflects the green operational activities of investee companies.

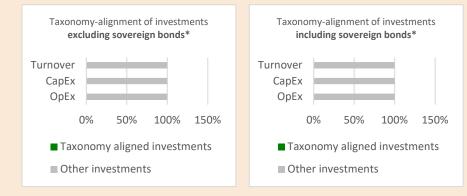

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The sustainable investments with an environmental objective made by the fund do not have a commitment to align with the EU criteria for environmentally sustainable economic activities as defined by the EU Taxonomy Regulation.

Based on reliable data that has made available to date, the fund is reporting 0% of its investments are in economic activities that qualify as environmentally sustainable under the EU Taxonomy Regulation.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds^{*}, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

Note that for this period no investments have been assessed against the taxonomy.

* For the purpose of these graphs, 'sovereign bonds' consists of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

0% of the investments made by the fund are in transitional and enabling activities as defined by the EU Taxonomy Regulation.

How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

The fund has not reported there being any alignment of its investments with the EU criteria for environmentally sustainable economic activities as defined by the EU Taxonomy Regulation to date

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective.

Transitional

activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

28.39% of the portfolio was invested in sustainable investments which predominantly contribute to an environmental objective.

What was the share of socially sustainable investments?

70.30% of the portfolio was invested in sustainable investments which predominantly contribute to a social objective.

(B)

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

Holdings classified as not sustainable refer to cash positions only. Cash positions comprised 1.31% of the fund. We do not apply minimum safeguards to cash positions.

What actions have been taken to attain the sustainable investment objective during the reference period?

In Q4 2021, we committed to aligning the fund with net zero emissions by 2050 or sooner. This builds on the existing climate change commitments for the fund, which include the exclusions of companies with fossil fuel reserves and engagement on climate opportunities and risks reinforced by our voting policy.

While the fund does not invest in companies which have significant adverse impacts, we believe we should still engage with companies to further support the fund's sustainable objective.

During the year there were 125 engagements with companies held in the portfolio. These covered 42 companies across 17 countries across a range of themes.

Given the explicit engagement mandate of this Fund, where a company has resisted engagement for two years and/or where engagement has not led to any momentum towards tangible positive change, the Global Equities team and Responsible Investment team would consider divesting. During the period, we sold out of several holdings on this basis. For example, in January 2022, we exited a name largely on grounds of illiquidity, but we also noted that while there had been some progress in board independence, (for which we had logged a Milestone) that engagement traction had generally been challenging. As such, we sold the name from the portfolio. Our engagements are structured in line with the firm's engagement themes which align with the PAIs. Below we provide a breakdown of the engagements undertaken and which PAI categories these typically address. We are updating our engagement tracking and reporting to enable PAI reporting at indicator level. We note that an engagement may correlate with a number of PAI indicators.

Engagements by Theme	Alignment with PAIs⁴	Proportion of engagements	Milestones Achieved by Theme	
Climate Change	GHG Emissions and Energy Performance	22.41%	26.32%	
Environmental Stewardship	Biodiversity, Water, Waste	17.59%	31.58%	
Business Conduct		1.72%	5.26%	
Human Rights	Social and Employee Matters	5.86%	0.00%	
Labour Standards		27.93%	10.53%	
Public Health		5.86%	5.26%	
Corporate Governance		18.62%	21.05%	
Diversity – Voting Action		Took voting action at eight AGMs due to poor board gender diversity or failure to implement appropriate workforce diversity targets .

Annex IV

ANNEX V

Template periodic disclosure for financial products referred to in Article 9(1), (2) and (3) of Regulation (EU) 2019/2088 and Article 5 of Regulation (EU) 2020/852

Product name: CT (Lux) Sustainable Multi-Asset Income

Legal entity identifier: 213800VPOORXSZ9R2T24

Sustainable investment objective

Did this financial product have a sustainable investment objective? × Yes No It promoted Environmental/Social (E/S) It made sustainable investments with an characteristics and while it did not have as its objective a environmental objective: 29.58% sustainable investment, it had a proportion of in economic activities that % of sustainable investments qualify as environmentally with an environmental objective in economic sustainable under the EU activities that qualify as environmentally Taxonomy sustainable under the EU Taxonomy in economic activities that do with an environmental objective in not qualify as environmentally economic activities that do not qualify as sustainable under the EU environmentally sustainable under the EU Taxonomy Taxonomy with a social objective It made sustainable investments with a social objective: <u>64.08</u>% It promoted E/S characteristics, but did not make any sustainable investments

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

To what extent was the sustainable investment objective of this financial product met?

The CT (Lux) Sustainable Multi Asset Income Fund allocated across sustainable equity, sustainable credit, sustainable government bonds and sustainable alternatives, in line with its investment policy, over the period. The Fund invests around a number of themes, which in turn link well to the UN Sustainable Development Goals. These themes include Health

an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Sustainable

investment means

The EU Taxonomy is a classification system, establishing a list of environmentally sustainable economic activities. For the time being, it does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

and Well-being, linking to SDG 2 and SDG 3, and Energy Transition, linking to SDG 7 and SDG 13, among others. Every investment made by the Fund was deemed sustainable, as per our definition of sustainable investment (see question 4 for further details). In the event an investment subsequently became non-sustainable post investment, for reasons such as changes in data or Fund investment policy, then the Fund would divest from the name.

How did the sustainability indicators perform?

The Portfolio exclusively invests in sustainable investments using the investment manager's 'avoid, invest, improve' framework. The Portfolio adheres to a set of exclusions and targets investment exclusively in sustainable investments. The fund aims to undertake targeted, impact-focused, active engagement with companies, using the Sustainable Development Goals ("SDGs") framework.

The Portfolio utilises several indicators to assess performance against this framework. During the period under review the Portfolio;

- 1. Did not invest in companies which breached the portfolio's exclusion criteria and/or global norms
- 2. Invested exclusively in Sustainable Investments with 93.67% of holdings (as at 30/9/2022) demonstrating a positive revenue alignment with or dedicated use of proceeds that contributes to the SDGs
- 3. As at 30/9/2022 held 17.9% of the portfolio in Green Bonds
- 4. Over the previous year the Portfolio had 238 investee company engagements, representing 91 companies engaged across 16 countries.

Indicator	2022	2021
Divestment due to breach of fund criteria	0	3*
Proportion of the fund aligned with Sustainable Development Goals (SDGs ¹) including Green Bonds (ex cash and currency positions)	93.67%	-
Green or Labelled Bonds	17.9%	-
Engagement		
Companies Engaged	91	67
Engagement Milestones	33	62

…and compared to previous periods?

* During the period 01/10/2020 to 30/09/2021 there were 3 instances of nonadherence to the investment policy resulting in divestment from holdings. These names were sold within the 6-month timeframe permitted under the policy hence would not be referred to as 'breaches' of the policy.

¹ Calculated as the Proportion of fund held in issuers which have greater than 50% of their Net Revenue aligned with the SDGs

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

- E.ON INTERNATIONAL FINANCE BV COMPANY GUAR REGS 08/21 6.5 was a historic holding and subsequently found to not adhere to exclusions related to nuclear power during a methodology change. Following investigation by the RI team to ensure this was valid, it was sold with a deal date of 30/12/2020
- AROUNDTOWN SA SR UNSECURED REGS 07/26 0.0000 was bought in December 2020 (deal date 09/12/20) and subsequently found to not adhere due to a poor internal ESG score. Following investigation by the RI team to ensure this was valid, it was sold with a deal date of 28/01/2021
- Mexico Government International 2.25% 12/08/36 was bought in July 2021 (Deal date 06/07/2021) in error for the Fund. Following investigation, it was sold with a deal date of 26/08/2021

How did the sustainable investments not cause significant harm to any sustainable investment objective?

The Portfolio's investment approach assesses that the sustainable investments made by the Portfolio do not significantly harm other sustainable investment objectives in several ways:

The Portfolio screens out investments that are contrary to the goals of making positive contributions to the environment and/or society. These criteria are product- and conduct-based, covering topics such as fossil fuels and weapons, and United Nations Global Compact breaches.

Through the Investment Manager's investment research, Sustainability Risks and ESG factors are considered throughout the investment cycle, which serves to mitigate the risks of significant harm. Companies are identified which the Investment Manager thinks could benefit from active engagement to address material ESG issues which exist, but are not considered significantly harmful.

How were the indicators for adverse impacts on sustainability factors taken into account?

Investments which are reported as sustainable investments have been assessed to ensure they do not significantly harm (DNSH) sustainability objectives using an inhouse data driven model and investment team due diligence.

The Investment Manager identifies harm by using quantitative thresholds against a selection of principal adverse impact indicators, including all mandatory indicators from Table 1 and certain indicators from Tables 2 and 3 of Annex I of the Regulatory Technical Standards (RTS)¹. Issuers which fall below these thresholds are flagged as potentially harmful and a review is then undertaken to determine whether significant harm is being caused by the issuer. Where quantitative data is not available, the investment teams endeavour to satisfy that no significant harm has taken place through desk-based qualitative research or issuer engagement.

Depending on the materiality of the principal adverse impact indicator, the

¹ The Regulatory Technical Standards set out three tables detailing principal adverse indicators which have been defined by the European Commission. The tables cover a range of harmful activities across environmental, social and governance areas.

investment manager will either exclude the issuer or, in limited cases, seek to engage with the issuer to address the harmful practices by taking appropriate action

During 2022, the investment team reviewed all portfolio holdings against the model and discussed the outcomes with the responsible investment team. It was agreed that no significant adverse impacts were identified for the fund

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes. The Fund explicitly prohibits investment in companies which breach UN Global Compact (UNGC) principles. In addition, the sustainable investments are assessed under the DNSH due diligence against factors which align with UNGC and OECD guidelines, to identify any significant harmful practices

How did this financial product consider principal adverse impacts on sustainability factors?

The fund considered PAIs in three ways:

- 1) Through alignment with the fund exclusion policy which covers four of the PAIs:
 - i. Exposure to companies active in the fossil fuel sector
 - The fund did not invest in companies:
 - With ownership of geological reserves of coal/oil/gas. In line with the Net Zero Investment Framework, we avoid mining companies which are planning or constructing new thermal coal projects.
 - That derive >0% of their revenue from exploration or production in areas of high environmental sensitivity, including the Arctic.
 - That derive >5% of their revenue from:
 - Coal-related activities, including exploration, extraction, transportation, distribution and refining*².
 - Activities related to the exploration or extraction of unconventional oil & gas.
 - Conventional oil & gas-related activities, including exploration, extraction, refining and transportation*.
 - That derive >50% of their revenue from equipment or services for coal- and/or conventional/ unconventional oil & gas-related activities.
 - ii. Share of non-renewable energy consumption and production
 - Electricity utilities with coal in their electricity generation mix must commit to the objective of phasing out unabated coal-fired power by 2030 for OECD countries and 2040 for non- OECD countries. Electricity utilities that are structurally increasing coal-based power generation are excluded.
 - In addition, the fund excluded electricity utilities*:
 - With a carbon intensity >374 gCO2/kWh.
 - Where >30% of the power production is based on oil & gas.
 - Excluded electricity utilities where >5% of the power production is based on nuclear sources.
 - Exclude electricity utilities constructing new nuclear power stations.
 - Exclude companies that derive >5% of their revenue from selling products or services to the nuclear power industry, except those that provide standard, non-customised or safety-related products/services.
 - Exclude companies that own or operate active uranium mines.
 - Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises

The fund did not invest in companies which are actively breaching the UN Global Compact Principles or that demonstrate poor ESG performance.

• Exposure to controversial weapons

The fund did not make investments in companies that generate revenues from developing, manufacturing, or trading controversial weapons, including cluster munitions and anti-personnel landmines.

- Utilising the PAI framework to review issuers against PAIs as per Table 1 in the RTS. This allows us to monitor harmful practices which may arise. No instances of significant harmful practices were identified for the positions held in the portfolio.
- PAIs align with stewardship activities undertaken by the fund. For example, the fund took voting action at nine AGMs during the year due to issues related to diversity and more than 20% of engagements related to climate change topics. Further details of our engagements are described in this report.

^{*}Unless they have a Science Based Targets initiative (SBTi) target set at well-below 2°C or have a SBTi "Business Ambition or 1.5°C" commitment. NB. Companies' involvement in coal-related and/or oil & gas-related activities should not be increasing.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is:

Largest investments	Sector	% Assets	Country	
Germany 0.0% 15-AUG- 2031	Financials 2.97		Germany

What was the proportion of sustainability-related investments?

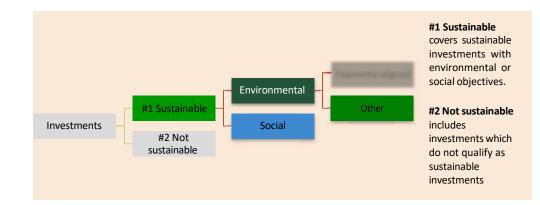

As at 30/09/2022 the fund held 93.67% in investments which are deemed to be sustainable investments.

What was the asset allocation?

As at 30/09/2022 the fund held 93.67% in investments which are deemed to be sustainable investments. The remaining 6.33% is in cash and currency positions.

We consider a sustainable investment to be a specific use of proceeds bonds such as green bonds, or bonds which we believe fund a sustainable objective. We also consider sustainable investments to be an issuer which has greater than 50% of its revenue positively aligned to the SDGs, or is contributing to a sustainable objective by embedding sustainability into the economic purpose of the business (e.g. growing the proportion of revenue aligned with sustainability objectives, or delivering the business in a way which contributes to a sustainable outcome.

Note an investment may contribute to one of more environmental or social objectives. Investments have been split based on a quantitative review of revenue exposure and with additional context provided from the investment and responsible investment teams.

Asset allocation describes the share of investments in specific assets.

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities

are activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The sustainable investments with an environmental objective made by the fund do not have a commitment to align with the EU criteria for environmentally sustainable economic activities as defined by the EU Taxonomy Regulation.

Based on reliable data that has made available to date, the fund is reporting 0% of its investments are in economic activities that qualify as environmentally sustainable under the EU Taxonomy Regulation.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds^{*}, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consists of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

0% of the investments made by the fund are in transitional and enabling activities as defined by the EU Taxonomy Regulation.

How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods

The fund has not reported there being any alignment of its investments with the EU criteria for environmentally sustainable economic activities as defined by the EU Taxonomy Regulation to date

sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

are

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The Fund had 29.58% (as at 30/09/2022) in sustainable investments with an environmental objective which have not been assessed with respect to the EU Taxonomy.

What was the share of socially sustainable investments?

The Fund had 64.08% (as at 30/09/2022) in sustainable investments with a social objective.

[0]

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

Holdings classified as not sustainable refer to cash and currency positions only. We do not apply minimum safeguards to cash or currency positions.

What actions have been taken to attain the sustainable investment objective during the reference period?

In Q4 2021, we committed to aligning the Sustainable Multi Asset Income Fund with net zero emissions by 2050 or sooner. This builds on the existing climate change commitments for the fund, which include the exclusions of companies with fossil fuel reserves, engagement on climate opportunities and risks reinforced by our voting policy, and investment in solution providers.

Whilst the fund does not invest in companies which have significant adverse impacts, we believe we should still engage with companies to further support the fund's sustainable objective.

During the year there were 238 engagements with companies held in the portfolio. These covered 91 companies across 16 countries across a range of themes.

Our engagements are structured in line with the firm's engagement themes, which align with the PAIs. Below we provide a breakdown of the engagements undertaken and which PAI categories these typically address. We are updating our engagement tracking and reporting to enable PAI reporting at indicator level. We note that an engagement may correlate with a number of PAI indicators.

Engagements by Theme	Alignment with PAIs ³	Proportion of engagements	Milestones Achieved by Theme
Climate Change	GHG Emissions and Energy Performance	23.45%	33.33%
Environmental Stewardship	Biodiversity, Water, Waste	15.49%	15.15%
Business Conduct		4.65%	3.03%
Human Rights		8.19%	0.00%
Labour Standards	Social and	21.90%	21.21%
Public Health	Employee Matters	9.07%	12.12%
Corporate Governance		17.26%	15.15%
Diversity – Voting Action		Took voting action at nine AGMs due to poor board gender diversity or failure to implement appropriate workforce diversity targets.	

How did this financial product perform compared to the reference sustainable benchmark?

Not applicable.

How did the reference benchmark differ from a broad market index? Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?

Not applicable.

How did this financial product perform compared with the reference benchmark? Not applicable.

How did this financial product perform compared with the broad market index? Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

³ Note that themes may align with multiple PAIs. We will update engagement tracking and reporting capabilities to break down engagements by PAIs from 2023

Annex IV

ANNEX V

Template periodic disclosure for financial products referred to in Article 9(1), (2) and (3) of Regulation (EU) 2019/2088 and Article 5 of Regulation (EU) 2020/852

Sustainable

investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system, establishing a list of environmentally sustainable economic activities. For the time being, it does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainable investment objective

Sustainability indicators measure how the sustainable objectives of this financial product are attained. To what extent was the sustainable investment objective of this financial product met?

The product invests in European Equities where we have identified six key themes that we believe are integral to greater sustainability such as Health and Well-being or Sustainable cities. We link these themes to UN SDG's and every investment is expected to contribute positively to the UN Sustainable Development goals as per our definition of a Sustainable investment.

How did the sustainability indicators perform?

The Portfolio exclusively invests in sustainable investments using the investment manager's 'avoid, invest, improve' framework. The Portfolio adheres to a set of exclusions, targets investment exclusively in sustainable investment aligned with the Portfolio's themes and engages with issuers on ESG factors.

The Portfolio utilises several indicators to assess performance against this framework. During the period under review the Portfolio;

- 1. Did not invest in companies which breached the Portfolio exclusions
- 2. Invested as below against the Portfolio's investment themes:

Connect & Protect	5.75%
Digital Empowerment	14.53%
Energy Transition	6.50%
Health & Well-being	31.88%
Resource efficiency	12.68%
Sustainable Cities	11.17%
Sustainable Finance	14.85%

- 3. Invested 94.03% ¹of the portfolio in companies with a net positive revenue contribution to the targets of the Sustainable Development Goals.
- 4. Held 65 investee company engagements during the year, representing:
 - 19 companies engaged across 8 countries
 - 4 milestones achieved, meaning the company made a tangible improvement in their policies and practices in alignment with our engagement objective

…and compared to previous periods?

Indicator	2022	2021	Comment
Exclusions breached	0	0	
Sustainable Investments held (excluding cash or liquidity positions)	100%	86%	Note in previous periods the fund was categorised as an article 8 fund
Sustainable Theme Breakdown			
Connect & protect	5.75%	4.57%	
Digital empowerment	14.53%	16.04%	
Energy transition	6.50%	0.70%	
Health and well-being	31.88%	32.25%	
Resource efficiency	12.68%	10.04%	
Sustainable cities	11.17%	11.13%	
Sustainable finance	14.85%	9.37%	
Proportion of the fund aligned with Sustainable Development Goals (SDGs ²)	94.03%	n/a	
Engagement			
Companies Engaged	19	22	
Engagement Milestones	4	16	

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

How did the sustainable investments not cause significant harm to any sustainable investment objective

The Portfolio's investment approach assesses that the sustainable investments made by the Portfolio do not significantly harm other sustainable investment objectives in several ways:

The Portfolio screens out investments that are contrary to the goals of making positive contributions to the environment and/or society. These criteria are product- and conduct-based, covering topics such as tobacco and weapons, and United Nations Global Compact breaches.

Through the Investment Manager's investment research, Sustainability Risks and ESG factors are considered throughout the investment cycle, which serves to mitigate the risks of significant harm. Companies are identified which the Investment Manager thinks could benefit from active engagement to address material ESG issues which exist but are not considered significantly harmful.

² Calculated as the Proportion of fund held in issuers which have greater than 50% of their Net Revenue aligned with the SDGs

How were the indicators for adverse impacts on sustainability factors taken into account?

Investments which are reported as sustainable investments have been assessed to ensure they do not significantly harm (DNSH) sustainability objectives using an inhouse data driven model and investment team due diligence.

The Investment Manager identifies harm by using quantitative thresholds against a selection of principal adverse impact indicators, including all mandatory indicators from Table 1 and certain indicators from Tables 2 and 3 of Annex I of the Regulatory Technical Standards (RTS)³. Issuers which fall below these thresholds are flagged as potentially harmful and a review is then undertaken to determine whether significant harm is being caused by the issuer. Where quantitative data is not available, the investment teams endeavour to satisfy that no significant harm has taken place through desk-based qualitative research or issuer engagement.

Depending on the materiality of the principal adverse impact indicator, the investment manager will either exclude the issuer or, in limited cases, seek to engage with the issuer to address the harmful practices by taking appropriate action.

During 2022 the investment team reviewed all portfolio holdings against the model and discussed the outcomes with the responsible investment team. It was agreed that no significant adverse impacts were identified for the fund.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes. The Fund explicitly prohibits investment in companies which breach UN Global Compact (UNGC) principles. In addition, the sustainable investments are assessed under the DNSH due diligence against factors which align with UNGC and OECD guidelines to identify any significant harmful practices.

How did this financial product consider principal adverse impacts on sustainability factors?

The fund considered PAIs in three ways:

- 1) Through alignment with the fund exclusion policy which covers four of the PAIs:
 - i. Exposure to companies active in the fossil fuel sector
 - The fund did not invest in companies:
 - With ownership of geological reserves of coal/oil/gas
 - That derive >0% of their revenue from Arctic oil and/or gas production
 - That derive >50% of their revenue from oil and gas refining
 - That derive >50% of their revenue from other oil and gas-related activities, including distribution/ retail,
 - equipment and services, and transportation

³ The Regulatory Technical Standards set out three tables detailing principal adverse indicators which have been defined by the European Commission. The tables cover a range of harmful activities across environmental, social and governance areas.

- ii. Share of non-renewable energy consumption and production The fund did not invest in electricity utilities:
 - Where >10% of the power production is based on coal
 - Where >30% of the power production is based on oil and gas
 - Where >5% of the power production is based on nuclear sources
 - Exclude companies that derive >5% of their revenue from the supply of essential products/services to the nuclear power industry
 - Exclude companies operating active uranium mines
- iii. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises

The fund did not invest in companies which are actively breaching the UN Global Compact Principles or have weak ESG performance

iv. Exposure to controversial weapons

The fund did not make investments in companies that generate revenues from developing, manufacturing, or trading controversial weapons, including cluster munitions and anti-personnel landmines.

- 2) Utilising the PAI framework to review issuers against PAIs as per Table 1 in the RTS. This allows us to monitor harmful practices which may arise. No instances of significant harmful practices were identified for the positions held in the portfolio.
- 3) PAIs align with stewardship activities undertaken by the fund. For example, the fund took voting action at three AGMs during the year due to issues related to diversity and more than 30% of engagements related to climate change topics. Further details of our engagement activity are described in this report.

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is:

What were the top investments of this financial product?

Largest investments	Sector	% Assets	Country
AstraZeneca PLC	Health Care	4.82%	United Kingdom
Novo Nordisk A/S Class B	Health Care	4.71%	Denmark
Roche Holding Ltd			Switzerland
Dividend Right Cert.	Health Care	4.39%	
ASML Holding NV	Information Technology	4.27%	Netherlands
Deutsche Boerse AG	Financials	3.86%	Germany
UBS Group AG	Financials	3.84%	Switzerland
Schneider Electric SE	Industrials	3.61%	France
Brenntag Societas			Germany
Europaea	Industrials	3.40%	
Partners Group Holding			Switzerland
AG	Financials	3.38%	
Kerry Group Plc Class A	Consumer Staples	3.35%	Ireland
Air Liquide SA	Materials	3.24%	France
SAP SE	Information Technology	3.21%	Germany
Legal & General Group			United Kingdom
Plc	Financials	2.95%	
Wolters Kluwer NV	Industrials	2.95%	Netherlands
Compagnie de Saint-			France
Gobain SA	Industrials	2.90%	

What was the proportion of sustainability-related investments?

As at 30/09/2022 the fund held 97.36% in investments which are deemed to be sustainable investments.

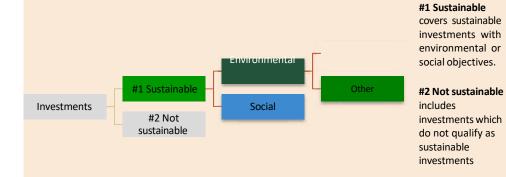

What was the asset allocation?

As at 30/09/2022 the fund held 2.64% in cash positions and the remaining 97.36% in investments which are deemed to be sustainable investments.

We consider a sustainable investment to be an issuer as a company which has greater than 50% of its revenue positively aligned to the SDGs, or is contributing to a sustainable objective by embedding sustainability into the economic purpose of the business (e.g. growing the proportion of revenue aligned with sustainability objectives, or delivering the business in a way which contributes to a sustainable outcome).

Note an investment may contribute to one of more environmental or social objectives. Investments have been split based on a quantitative review of revenue exposure and with additional context provided from the investment and responsible investment teams.

Asset allocation describes the share of investments in specific assets.

In which economic sectors were the investments made?

Sector	% of Net Assets
Pharmaceuticals	16.57
Financial Services	16.18
Chemicals	12.55
Insurance	8.39
Food & Beverages	6.93
Semiconductors	6.19
Commercial Services	4.40
Electrical Component & Equipment	3.61
Software	3.21
Media	2.95
Building Materials	2.91
Forest Products & Paper	2.78
Electrical Equipment	2.50
Home Builders	2.37
Healthcare	2.21
Transportation	2.21
Internet	1.28

Taxonomy-aligned activities are expressed as a share of:

- turnover reflecting the share of revenue from green activities of investee companies
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities

are activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The sustainable investments with an environmental objective made by the fund do not have a commitment to align with the EU criteria for environmentally sustainable economic activities as defined by the EU Taxonomy Regulation.

Based on reliable data that has made available to date, the fund is reporting 0% of its investments are in economic activities that qualify as environmentally sustainable under the EU Taxonomy Regulation.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds^{*}, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consists of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

0% of the investments made by the fund are in transitional and enabling activities as defined by the EU Taxonomy Regulation.

How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

The fund has not reported there being any alignment of its investments with the EU criteria for environmentally sustainable economic activities as defined by the EU Taxonomy Regulation to date.

sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

are

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The Fund had 27.98% (as at 30/09/2022) in sustainable investments with an environmental objective which have not been assessed with respect to the EU Taxonomy.

What was the share of socially sustainable investments?

The Fund had 69.47% (as at 30/09/2022) in sustainable investments with a social objective.

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

Holdings classified as not sustainable refer to cash positions only. Cash comprised 2.64% of the fund as at 30/09/2022. We do not apply minimum safeguards to cash positions.

What actions have been taken to attain the sustainable investment objective during the reference period?

In November 2021, we committed to aligning the Sustainable Opportunities European Equity Strategy with net zero emissions by 2050 or sooner. This builds on the existing climate change commitments for the fund, which include the exclusions of companies with fossil fuel reserves, engagement on climate opportunities and risks reinforced by our voting policy, and investment in solution providers.

While the fund does not invest in companies which have significant adverse impacts, we believe we should still engage with companies to further support the fund's sustainable objective.

During the year there were 65 engagements with companies held in the portfolio. These covered 19 companies across 8 countries across a range of themes.

Our engagements are structured in line with the firm's engagement themes which align with the PAIs. Below we provide a breakdown of the engagements undertaken and which PAI categories these typically address. We are updating our engagement tracking and reporting to enable PAI reporting at indicator level. We note that an engagement may correlate with a number of PAI indicators.

Engagements by Theme	Alignment with PAIs ⁴	Proportion of engagements	Milestones achieved by theme
Climate Change	GHG Emissions and Energy Performance	31.45%	
Environmental Stewardship	Biodiversity, Water, Waste	19.35%	
Business Conduct		1.61%	25%
Human Rights		4.03%	
Labour Standards		16.94%	25%
Public Health	Social and	8.06%	25%
Corporate Governance	Employee Matters	18.55%	25%
Diversity – Voting Action		Voted against directors at three AGMs due to poor board gender diversity or failure to implement appropriate workforce diversity targets	

⁴ Note that themes may align with multiple PAIs. We will update engagement tracking and reporting capabilities to break down engagements by PAIs from 2023

How did this financial product perform compared to the reference sustainable benchmark?

Not applicable.

• How did the reference benchmark differ from a broad market index? Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?

Not applicable.

How did this financial product perform compared with the reference benchmark? Not applicable.

How did this financial product perform compared with the broad market index? Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

EU Taxonomy Regulation Disclosures

Regulation (EU) 2020/852 on the establishment of a framework to facilitate sustainable investment (the "EU Taxonomy Regulation") establishes criteria for determining whether an economic activity qualifies as environmentally sustainable across six environmental objectives. The EU Taxonomy Regulation requires that certain disclosure be made in this Report.

Article 6 Portfolios

The investments underlying the Portfolios listed below (the "Article 6 Portfolios") do not take into account the EU criteria for environmentally sustainable economic activities under the EU Taxonomy Regulation. The Article 6 Portfolios include:

- CT (Lux) Diversified Growth
- CT (Lux) European Growth & Income
- CT (Lux) European Smaller Cap
- CT (Lux) Global Convertible Bond
- CT (Lux) Global Smaller Cap Equity
- CT (Lux) Global Total Return Bond
- CT (Lux) US Smaller Companies
- CT (Lux) Global Absolute Return Bond
- CT (Lux) Plus II
- CT (Lux) Euro Bond

Article 8 and 9 Portfolios

The investments underlying the Portfolios listed below (the "Article 8 and 9 Portfolios") do not have a commitment to take into account the EU criteria for environmentally sustainable economic activities as defined in the EU Taxonomy Regulation and so the "do no significant harm" principle under the EU Taxonomy Regulation does not apply to them. Based on reliable data that has made available at the date of this Report, 0% of the investments in the Portfolios are in economic activities that qualify as environmentally sustainable under the EU Taxonomy Regulation. The Article 8 and 9 Portfolios include:

- CT (Lux) Responsible Global Emerging Markets Equity
- CT (Lux) Responsible Global Equity
- CT (Lux) Responsible Euro Corporate Bond
- CT (Lux) SDG Engagement Global Equity
- CT (Lux) Sustainable Opportunities European Equity
- CT (Lux) Sustainable Multi-Asset Income
