Credicorp Capital Latin American Equity Fund

Class A (LU1774130899)

a Sub-Fund of Credicorp Capital Asset Management Fund

This Fund is managed by Waystone Management Company (Lux) S.A.

OBJECTIVES AND INVESTMENT POLICY

Investment Objective

The objective of the Sub-Fund is to invest principally in securities of Latin American issuers. The aim of the Sub-Fund is to provide investors with long-term capital growth from a diversified and actively managed portfolio of Latin American securities.

Investment Policy

The Sub-Fund will invest principally (at least 70% in value) in equities in the markets and sectors in the Latin American region and in companies established outside those markets but which derive a significant proportion of their earnings from those markets.

The Sub-Fund will start investing in Mexico, Colombia, Chile, Peru, Brasil, Argentina, the United States of America, Canada and the United-Kingdom. In the future, it could invest in other Latin American countries.

Benchmark

The Sub-Fund is managed actively and uses the MSCI EM Latin American Index for performance comparison reason only. The deviation of the portfolio composition of the Sub-Fund compared to the benchmark is significant.

Sub-Fund Currency

The reference currency of the Sub-Fund is USD.

Investment Horizon

This Sub-Fund is suitable for investors who are planning to hold their investments for at least 3 years.

Income

All income received by the Share-Class will be reinvested.

Subscription and Redemption

Investors may buy, switch and redeem shares of the Sub-Fund on a daily basis.

RISK AND REWARD PROFILE

The risk and reward indicator illustrates where the Sub-Fund is positioned in terms of its possible risks relative to its potential rewards. The higher the Sub-Fund's position on this scale, the greater the possible reward, but also the greater risk of losing money. This risk indicator is calculated using historical data, which cannot be used as a prediction for the future. Therefore the risk classification may change over time. Even if the Sub-Fund is in the lowest risk class you can lose money, as no investments are entirely risk free.

Why is this Sub-Fund in this category?

The Sub-Fund is subject to a high level of risk being linked to typical risks of securities markets, such as the macro-economic trends at global level. At this time, the level of the risk and reward profile is equal to 7.

Not all risks affecting the Sub-Fund are adequately captured by the synthetic risk indicator. The following risks may affect the Sub-Fund:

Operational risk: which may occur due to technical issues for example natural disasters, misunderstandings and fraud.

Currency risk: when the Sub-Fund invests in assets denominated in a different currency. A devaluation of the asset's currency relative to the currency of the Sub-Fund will lead to a reduction in the value of the Sub-Fund.

Emerging market risk: investing in emerging markets and less developed markets securities poses risks different from and/or greater than, risks of investing in the securities of developed countries. In emerging markets the legal, judicial and regulatory frameworks are still developing so there is, for local market participants and their counterparties, a high degree of uncertainty. In addition, there is a tendency for low market capitalisation which is inherently volatile and illiquid.

For full details of the risks the Sub-Fund may be exposed to, please refer to the Fund's Prospectus.
