This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Sustainable Multi-Asset Growth, a subfund of the SICAV BNP Paribas Funds, short named as BNP Paribas

Class "I Capitalisation" - ISIN code LU1956156910

This Fund is managed by BNP PARIBAS ASSET MANAGEMENT Luxembourg, part of the BNP Paribas Group.

Objectives and investment policy

This Product is actively managed. The composite benchmark 75% MSCI AC World (EUR) index + 25% Bloomberg Euro Aggregate index is used for performance comparison only. The Product is not benchmark constrained and its performance may deviate significantly from that of the composite benchmark.

The Product seeks to increase the value of its assets over the medium term by investing indirectly (through funds) in bonds, or shares of issuers chosen given their practices in terms of sustainable development (social responsibility and/or environmental responsibility and/or corporate governance). The Product will be managed against the model portfolio (75% equities, 25% bonds).

The investment manager can change the actual asset class weightings based on market conditions and forecasts.

The investment manager applies also BNP PARIBAS ASSET MANAGEMENT's sustainable Investment Policy, which takes into account Environmental, Social and Governance (ESG) criteria such as but not limited to reduction of emissions of greenhouse gas, respect of human rights, respect of minority shareholders rights, at each step of the investment process of the Product.

In order to meet its environmental and social characteristics and objectives, the investment manager selects, for at least 90% of its assets (excluding ancillary liquid assets), funds which comply with either a selectivity approach or a rating upgrade approach.

An extra-financial strategy may comprise methodological limitations such as the ESG Investment Risk as defined by the investment manager.

Incomes are systematically reinvested.

Investors are able to redeem on a daily basis (on Luxembourg bank business days) as described in the prospectus.

Risk and reward profile

1	2	3	4	5	6	7
---	---	---	---	---	---	---

- Historical data may not be reliable indication for the future.
- The risk category of a Fund is an indicator but not a target or a guarantee and may shift over time.
- The lowest category does not mean a risk-free investment.
- Why is the Fund in this specific category?
The risk category is justified by the investment in different asset classes with a standard asset mix that is a high proportion of risky assets and a lower proportion of less risky assets.
- The higher the risk, the longer the recommended investment horizon.

Other risks materially relevant to the Fund which are not adequately captured by the indicator are described below:

- **Credit Risk:** This risk relates to the ability of an issuer to honour its commitments: downgrades of an issue or issuer rating may lead to a drop in the value of associated bonds.
- **Operational and Custody Risk:** Some markets are less regulated than most of the international markets; hence, the services related to custody and liquidation for the subfund on such markets could be more risky.

For more information on risks, please see the risks section of the Fund's prospectus, which is available at <http://www.bnpparibas-am.com>.
