The objective of the Sub-fund is to achieve capital growth over the medium term through the active management of a diversified portfolio with a balanced profile made up of international transferable securities, and to outperform its benchmark index.

### Benchmark index

The benchmark index of the Sub-fund is made up of 80% MSCI AC World Free Index (without dividends) expressed in Euro (basic equity index), 10% JP Morgan Global Government Bond EMU LC, expressed in Euro (basic bond index denominated in the reference currency) and 10% Euribor, 1 month (basic money market index). ### Investment policy

The net assets of the Sub-fund are primarily invested, via UCIs or other eligible investment funds, in equities and listed debt securities, as well as in money market instruments from around the world, with no restrictions or limitations regarding geographical, industrial or sectoral diversification. In normal market circumstances, investments in debt securities will be predominantly indirect.

In order to protect its assets and/or achieve its management objective, the Sub-fund may use derivative financial instruments traded on regulated markets or over-the-counter markets.

The Sub-fund may therefore be exposed to currency risk up to 100% of its net assets.

On an ancillary basis, the Sub-fund may be exposed to indices of precious metals and commodities by means of financial instruments and units or shares of UCIs or AIFs.

Under exceptional circumstances and/or where financial market conditions so require, the Sub-fund may invest all of its assets in term deposits or money market instruments in order to protect its shareholders' interests.

The investments underlying this financial product do not take into account the European Union criteria for environmentally sustainable economic activities.
