

KEY INVESTOR INFORMATION

This document provides you with key investor information about this sub-fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this sub-fund. You are advised to read it so you can make an informed decision about whether to invest.

Mercer Low Volatility Equity Fund (the "Sub-Fund")

A sub-fund of MGI Funds plc (the "Umbrella")

Mercer Global Investments Management Limited (the "Manager"), Marsh McLennan Companies, Inc. group

A10-0.2000-USD (IE00BKBDRG26) (the "Share Class")

This Sub-Fund is authorised in Ireland and regulated by the Central Bank of Ireland.

The Manager is authorised in Ireland and is regulated by the Central Bank of Ireland as a UCITS Management Company.

OBJECTIVE AND INVESTMENT POLICY

The investment objective of the Sub-Fund is to seek long-term growth of capital and income.

The Sub-Fund is actively managed and will primarily invest in a diversified range of global equities and equity-related securities and seeks to perform similarly to a typical equity fund over the medium to long term but is intended to achieve around 20% lower volatility over the same period. Volatility is the range of change which the Sub-Fund's share price may experience over a certain period of time. As a low volatility fund, the aim is to invest in stocks that deliver comparatively stable returns over the longer term. The Sub-Fund will seek to perform similarly to a typical equity fund, as measured by the MSCI World Net Total Return Index (the "Index"), over the medium to long term but is intended to achieve 20% lower volatility than the Index over the same period. The Sub-Fund is in no way constrained by reference to the Index.

The Sub-Fund promotes environmental and social characteristics within the meaning of Article 8 of the Sustainable Finance Disclosure Regulation ("SFDR").

The Sub-Fund will promote environmental characteristics by seeking to mitigate the impact of climate change through decarbonisation on a relative basis versus the Index. The Sub-Fund will be managed such that the weighted average carbon intensity (the "WACI") of its portfolio is 20% lower than the WACI of the Index over a rolling three-year period. WACI is a measure of the Sub-Fund's exposure to carbon-intensive companies expressed in tonnes CO₂e / \$m revenue. Also, the Sub-Fund will seek to avoid investment in companies that generate more than 1% of revenue from thermal coal extraction, arctic drilling, or oil tar sand mining.

The Sub-Fund will seek to promote social characteristics by excluding investment in companies which are involved in the manufacture, distribution or sales of controversial weapons, or which manufacture tobacco products or generate more than 50% of their revenue from

tobacco distribution or sales. Further, the Sub-Fund will invest at least 20% in sustainable investments, being investments which, according to the Investment Manager's framework: (a) contribute positively to UN Sustainable Development Goals ("SDGs"); (b) do no significant harm to any environmental or social objective; and (c) follow good governance practices.

The Sub-Fund follows good governance standards in the selection of securities for investment and seeks to engage with any companies identified as violating UN Global Compact Principles ("UNGC") to remediate where possible. UNGC is a set of globally accepted standards on human rights, labour, the environment and anti-corruption.

Up to 40% of the Sub-Fund's assets may be invested in government and corporate bonds, but no more than 30% of the Sub-Fund may be invested in bonds that are rated below investment grade (rating of below BBB-, Baa3 or equivalent as described in the Supplement).

The Sub-Fund may invest no more than 30% of its assets in instruments issued in emerging markets.

Certain indices may also be used in the management of the Sub-Fund, including for investment purposes, as detailed in the Supplement.

The securities within the Sub-Fund primarily will be in listed in developed markets and from time to time in emerging markets, and will include common stocks, convertible bonds, warrants and REITs.

The Sub-Fund may use financial derivative instruments (instruments for which the price is dependent on one or more underlying asset, "FDI") for hedging, efficient portfolio management and/or investment purposes.

The Share Class will not distribute dividends. Income and capital gains from the Sub-Fund are reinvested.

You can buy and sell shares in the Sub-Fund on demand each day which is a bank business day in Ireland or the United Kingdom.

RISK AND REWARD PROFILE

Lower risk
Potentially lower reward

Higher risk
Potentially higher reward

The risk and reward indicator value is calculated using historical data and may not be a reliable indicator of the Sub-Fund's future risk profile.

The risk category shown is not guaranteed and may change over time.

The lowest category, 1, does not mean risk free.

The value of investments and income from them can go down as well as up and you may not get back the full amount you invested.

The Share Class is rated 6 due to the nature of its investments which include the risks listed below:

Emerging markets: Emerging markets or less developed countries may face more political, economic or structural challenges than developed countries do. This means your money is at greater risk if it is invested in emerging markets.

Equities: The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political and economic news, company earnings and significant corporate events.

Fixed income: Investing in fixed income securities offers the chance to gain returns through growing capital and generating income. However, there is a risk that the institution that issues the security could fail to pay out on the bond, causing the Sub-Fund to lose its initial investment and expected income from the security.

Fixed income values are likely to fall if interest rates rise. If interest rates change considerably, as bonds mature, there is no guarantee that bonds of a similar type and yield will be available to replace them.

Liquidity risk: Lower liquidity means there are insufficient buyers or sellers to allow the Sub-Fund to sell or buy investments readily.

Operational risk: All funds are subject to the risk that something could go wrong in the day-to-day running of an organisation.

Sector specific: Investment risk is concentrated in specific sectors, countries, currencies or companies. This means that the Sub-Fund is more sensitive to any localised economic, market, political or regulatory events.

Sovereign debt: Investment in sovereign debt securities might involve special risks. The issuer of the debt or the governmental authority that controls the repayment of the debt might be unable or unwilling to repay principal or interest when due. Economic uncertainty might increase the volatility of market prices of sovereign debt.

For more information on risks please refer to the "Special Considerations and Risk Factors" section in the prospectus and in the supplement for the Sub-Fund.

CHARGES

The charges you pay are used to pay the cost of running the Sub-Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	none
Exit charge	none

This is the maximum that might be taken out of your money before it is invested and before the proceeds of your investment are paid out.

Charges taken from the fund over a year
