

Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Osmosis Resource Efficient European Equities Fund

a sub-Fund of PRESCIENT GLOBAL FUNDS ICAV (THE "ICAV")

(ISIN: IE00BTDZK04, Share Class: I)

This Fund is managed by Prescient Fund Services (Ireland) Limited (the "Manager")

Objectives and Investment Policy

The Fund's goal is to achieve growth of the Fund's value in the medium to long term.

The Fund invests in shares of large companies, which may be located in developed countries worldwide.

The Investment Manager selects stocks of companies using the Osmosis Model of Resource Efficiency (the "MoRE Model"). The MoRE Model has been developed by Osmosis Investment Management UK Limited (the "Investment Manager") to rate companies on resource efficiency by compiling information on energy, waste and water. The Fund has a global investment strategy, with no particular target in relation to any industrial, geographic or other market sectors. The Fund's base currency is US dollars.

Portfolio transaction costs may have an impact on the Fund's performance. Portfolio transaction costs are paid out of the assets of the Fund, in addition to the charges set out below.

This Fund is actively managed in reference to the MSCI Europe Index (the "Benchmark") by virtue of the fact that the investment objective of the Fund is to outperform the Benchmark. The Investment Manager has limited discretion to invest in securities not included in the Benchmark. The investment strategy may result in deviation from the Benchmark.

This deviation may be significant.

In relation to investment in equity securities, typically 90% of the net asset value will be listed on developed market exchanges as categorised by the Benchmark. All companies in which the Fund may gain exposure to must be constituents of the Benchmark for inclusion in the strategy.

The Fund may also use derivatives for investment and efficient portfolio management purposes including for hedging purposes. The only techniques and instruments which may be used by the Fund are exchange traded futures.

Any income arising from the Fund will be reinvested and it is not intended that the Fund will pay dividends.

Unless otherwise defined in this document, all words and expressions defined in the current Prospectus of the ICAV shall have the same meaning herein.

You may buy and sell shares in the Fund on each Business Day.

Please refer to the "Investment Objectives and Policies" section of the Prospectus for further information.

Risk and Reward Profile of the Fund

The indicator above is not a measure of the risk of capital loss, but a measure of the Fund's price movement over time.

- It is based on historical data and thus may not be a reliable indication for the future. The risk category was calculated using historical performance data related to the previous global strategy and it may not be a reliable indicator of the fund's future risk profile.

- The indicated risk category is not guaranteed and may shift over time.

- The indicator is designed to help investors understand the uncertainties both for loss and for growth that may affect their investment. In this context, the lowest category does not mean "risk free".

- The Fund is classified in the category indicated above due to its past behaviour, and its target asset mix.

- The Fund does not provide its investors with any guarantee on performance, nor on the monies invested in it.

In addition to the risk captured by the indicator, the overall Fund value may be considerably affected by:

- The Fund invests in shares of companies, and the value of these shares can be negatively affected by changes in the company or its industry or the economy in which it operates.

- Changes in exchange rates between the currencies of investments held by the Fund and the Fund's base currency may negatively affect the value of an investment.

- Operational Risk - the Fund is subject to the risk of loss resulting from inadequate or failed internal processes, people or systems or those of third parties such as those responsible for the custody of its assets.

- Liquidity Risk - the risk stemming from the lack of marketability of an investment that cannot be bought or sold quickly enough to prevent or minimise a loss.

Please refer to the "Risk Factors" section of the Prospectus for further information - see under "Practical Information" for how to obtain a copy.

Charges for the Fund

These charges are used to pay the costs of running the Fund, including the costs of marketing and distribution. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	5.00%
Exit charge	3.00%

This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.

Charges taken from the Fund over a year

Ongoing charges	0.61%
-----------------	-------

Charges taken from the Fund under certain specific conditions

Performance Fee	0.00%
-----------------	-------

The Exit and Entry charges shown are maximum figures. It is possible that you will pay substantially less, or there will be no charges at all. You can find out the actual entry and exit charges from your financial advisor or the Manager.

There is no charge for switching between sub-funds of the ICAV up to a maximum of four times per annum.

The ongoing charges figure is based on the expenses of the year ending 31 December 2021. This figure may vary from year to year. It excludes portfolio transaction costs, except in the case of an entry or exit charge paid by the UCITS when buying or selling units in another UCITS or collective investment undertaking.

You can find more details about the charges in the section of the Fund's Prospectus entitled Fees and Expenses.
