The Performance Fee is 15% a year of any returns the Fund achieves above an applicable High Water Mark. Please see the "Performance Fees" disclosure in the Important Information section. The charges are the fees the fund charges to investors to cover the costs of running the Fund. Additional costs, including transaction fees, will also be incurred. These costs are paid out by the Fund, which will impact on the overall return of the Fund.

Fund charges will be incurred in multiple currencies, meaning that payments may increase or decrease as a result of currency exchange fluctuations.

What Are the Key Risks?

The value of shares in the Fund and income received from it can go down as well as up and investors may not get back the full amount invested. Performance may also be affected by currency fluctuations. Currency fluctuations may affect the value of overseas investments. The Fund seeks to achieve its investment objective by investing primarily in equity and equity-related securities of companies that derive a major portion of revenues or anticipated revenues from the information technology, communication services, and consumer discretionary sectors worldwide. The Fund utilises financial derivative instruments for hedging, efficient portfolio management and/or investment purposes. Such securities and investment instruments have historically been subject to price movements that may occur due to market or issue-specific factors. As a result, the performance of the Fund can fluctuate considerably over time. Other significant risks include: counterparty risk, foreign currency risk, derivative instruments risk and concentration risk. For full details of all of the risks applicable to this Fund, please refer to the "Risk Considerations" section of the Fund in the current prospectus of Franklin Templeton Alternatives Funds.

Portfolio Exposure:

Gross Exposure: Gross exposure is the sum of the absolute value of all exposures, directly or through derivatives, as a percentage of total assets. The sum of the percentage of long positions and short (in absolute terms) positions.

Net Exposure: Net exposure is the sum of the total value of all exposures, directly or through derivatives, as a percentage of total assets. The percentage value of the long positions less the percentage value of the short positions.

Long Exposure: Sum of the long exposures, directly or through derivatives, as a percentage of total assets.

Short Exposure: Sum of the short exposures, directly or through derivatives, as a percentage of total assets.

Performance Benchmarks: Benchmarks provided for additional performance comparison are for informational purposes only; the fund manager does not intend for the portfolio to track them. The HFRX Equity Hedge Index represents a measure of a broad universe of long short equity hedge fund strategies. The MSCI World Information Technology Index includes securities that are classified in the Information Technology sector as per the Global Industry Classification Standard.

For Professional Client Use Only. Not for distribution to Retail Clients.**Important Information (continued)**

Performance Fee: 15% a year of any returns the Fund achieves above an applicable High Water Mark. The Performance Fee becomes due in the event of outperformance, that is, if the increase in the NAV during the relevant Performance Period (after deduction of any subscription and/or redemption fees levied) exceeds the applicable High Water Mark point. For more information, please see the Fund's prospectus.

Performance: References to indices are made for comparative purposes only and are provided to represent the investment environment existing during the time periods shown. When performance for either the portfolio or its benchmark has been converted, different foreign exchange closing rates may be used between the portfolio and its benchmark.

Top Exposures: The Top Long Exposures represent the largest long equity issuer exposures of Franklin K2 Wellington Technology Long Short UCITS Fund as of the date indicated. Issuer exposures include actual security holdings and single security exposures obtained through the use of derivatives. Direct security holdings and derivatives exposures are combined for calculation purposes. These direct holdings and derivatives do not represent all of the securities purchased, sold or recommended for advisory clients, and the reader should not assume that investment in securities of the issuers listed was or will be profitable.

Value-at-Risk (VAR): The expected maximum potential one-month loss at a 95% confidence level, calculated based on the Fund's holdings as of the report date using a historical simulation methodology.
