In respect of the Shares distributed in and from Switzerland, the place of performance and jurisdiction is at the registered office of the representative.

## **Audit report**

To the Shareholders of Cape Capital SICAV-UCITS

## Our opinion

In our opinion, the accompanying financial statements give a true and fair view of the financial position of Cape Capital SICAV-UCITS (the "Fund") and of each of its sub-funds as at 31 December 2023, and of the results of their operations and changes in their net assets for the year then ended in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements.

What we have audited

The Fund's financial statements comprise:

- the combined statement of net assets for the Fund and the statement of net assets for each of the sub-funds as at 31 December 2023;
- the combined statement of operations / changes in net assets for the Fund and the statement of operations / changes in net assets for each of the sub-funds for the year then ended;
- the statement of investments in securities for each of the sub-funds as at 31 December 2023; and
- the notes to the financial statements, which include a summary of significant accounting policies.

## **Basis for opinion**

We conducted our audit in accordance with the Law of 23 July 2016 on the audit profession (Law of 23 July 2016) and with International Standards on Auditing (ISAs) as adopted for Luxembourg by the "Commission de Surveillance du Secteur Financier" (CSSF). Our responsibilities under the Law of 23 July 2016 and ISAs as adopted for Luxembourg by the CSSF are further described in the "Responsibilities of the "Réviseur d'entreprises agréé" for the audit of the financial statements" section of our report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

We are independent of the Fund in accordance with the International Code of Ethics for Professional Accountants, including International Independence Standards, issued by the International Ethics Standards Board for Accountants (IESBA Code) as adopted for Luxembourg by the CSSF together with the ethical requirements that are relevant to our audit of the financial statements. We have fulfilled our other ethical responsibilities under those ethical requirements.

## Other information

The Board of Directors of the Fund is responsible for the other information. The other information comprises the information stated in the annual report but does not include the financial statements and our audit report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information identified above and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

## Responsibilities of the Board of Directors of the Fund for the financial statements

The Board of Directors of the Fund is responsible for the preparation and fair presentation of the financial statements in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements, and for such internal control as the Board of Directors of the Fund determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors of the Fund is responsible for assessing the Fund's and each of its sub-funds' ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors of the Fund either intends to liquidate the Fund or close any of its sub-funds or to cease operations, or has no realistic alternative but to do so.

## Responsibilities of the "Réviseur d'entreprises agréé" for the audit of the financial statements

The objectives of our audit are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an audit report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- identify and assess the risks of material misstatement of the financial statements, whether due to
  fraud or error, design and perform audit procedures responsive to those risks, and obtain audit
  evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting
  a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may
  involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal
  control;
- obtain an understanding of internal control relevant to the audit in order to design audit procedures
  that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the
  effectiveness of the Fund's internal control;
- evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors of the Fund;

- conclude on the appropriateness of the Board of Directors of the Fund's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's or any of its sub-funds' ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our audit report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our audit report. However, future events or conditions may cause the Fund or any of its sub-funds to cease to continue as a going concern;
- evaluate the overall presentation, structure and content of the financial statements, including the
  disclosures, and whether the financial statements represent the underlying transactions and events
  in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

PricewaterhouseCoopers, Société coopérative Represented by

Luxembourg, 16 April 2024

#### General

Cape Capital SICAV-UCITS (hereinafter, the "Company") is an undertaking collective investment in transferable securities organized as a public limited company (société anonyme) in the legal form of an investment company with variable capital (société d'investissement à capital variable, SICAV) subject to Part I of the amended Luxembourg law of December 2010 on undertakings for collective investment (the "Law of 17.12.2010").

The Company was initially created as a specialised investment fund in accordance with the law of 13.02.2007 relating to specialised investment funds and was converted into a company subject to Part I of the Law of 17.12.2010 on July 2017. The Company has an umbrella structure and as such may operate separate Subfunds.

As of 31.12.2023 the Company had 3 Subfunds.

## Summary of significant accounting policies

## a) Presentation of financial statements

The financial statements are presented in accordance with the requirements of the Luxembourg regulation.

The financial statements are prepared in accordance with Luxembourg legal and regulatory requirements relating to investment funds under the going concern of accounting.

## b) Computation of the net asset value of each Subfund

The Net Asset Value per Share is determined as of each Business Day (a "Valuation Day") on which banks are open for business in Luxembourg, Switzerland and the Canton of Zurich.

For the Subfund Cape Capital SICAV-UCITS - Cape Fixed Income Fund the investment manager needs to undertake transactions in order to maintain the desired asset allocation as a result of subscriptions or redemptions, which may generate additional costs for the Company and its shareholders. As a consequence, in order to protect the existing investors' interest, from these capital movements, when net capital movements exceed a threshold pre-defined by the Board of Directors, an adjustment of the NAV per share used is applied. This adjustment reflects the estimated tax and dealing costs that may be incurred by the Company as a result of these transactions, and the estimated bid-offer spread of the assets in which the Company invests. A periodical review is undertaken in order to verify the appropriateness of the swing factor being applied.

The Net Asset Value calculated will be increased by up to a maximum of 0.25% per share in the event of a net surplus of subscription applications exceeding 3.0% of the Net Asset Value on the respective Valuation Day.

In the case of net redemptions exceeding more than 2.0% of the Net Asset Value on a Business Day, the Net Asset Value will be decreased by 0.30% in order to achieve a fair sharing of transactions costs between redeeming and remaining investors.

In case net redemptions exceed 5% of the Net Asset Value, the Company may, in the interest of shareholders, decide to increase the maximum swing factor up to 2%.

As per 31.12.2023, no swing pricing was applied.

## c) Valuation of investment securities of each Subfund

Securities which are listed on a stock exchange shall be valued at the closing midprice (the mean of the closing bid and ask prices). If such a price is not available for a particular trading day, the last available traded price or alternatively, the closing bid price, may be taken as a basis for the valuation. If a security is traded on several stock exchanges, the valuation shall be made by reference to the exchange on which it is primarily traded.

In the case of securities for which trading on a stock exchange is not significant although a secondary market with regulated trading among securities dealers does exist, the valuation may be based on this secondary market.

Securities traded on a regulated market shall be valued in the same way as securities listed on a stock exchange.

Securities that are not listed on a stock exchange and are not traded on a regulated market shall be valued at their last available market price. If no such price is available, the Board of Directors shall value these securities in accordance with other criteria to be established by the Board of Directors and on the basis of the probable sales price, the value of which shall be estimated with due care and in good faith.

Shares and units in UCIs shall be valued on the basis of their most recently calculated net asset value, taking due account of applicable redemption fees. Where no net asset value and only buy and sell prices are available, the shares or units in such UCIs may be valued at the mean of such buy and sell prices.

Derivatives shall be treated in accordance with the above.

Fixed-term deposits and similar assets shall be valued at their respective nominal value plus accrued interest.

The valuation price of a money-market investment, based on the net acquisition price, shall be progressively adjusted to the redemption price whilst keeping the resulting investment return constant. In the event of a significant change in market conditions, the basis for the valuation of different investments shall be brought in line with the new market yields.

### d) Net realised gain/loss on sales of investments of each Subfund

The realised gains or losses on the sales of securities are calculated on the basis of the average acquisition cost.

#### e) Foreign exchange conversion

The financial statements are kept in the reference currency of each Subfund and the combined financial statements are kept in EUR.

Cash at banks, other net assets and the value of portfolio securities in currencies other than the reference currency of each Subfund are converted into the reference currency at the foreign exchange rate prevailing on the date of valuation.

Income and expenses in currencies other than the reference currency of each Subfund are converted into the reference currency at the foreign exchange rate applicable at the date they accrue to the Subfund.

Realised gains or losses on foreign currencies are accounted for in the statement of operations / changes in net assets.

The acquisition cost of securities in currencies other than the reference currency of each Subfund is converted into the reference currency at the foreign exchange rate valid at the date of acquisition.

## f) Formation expenses of each Subfund

Formation expenses are amortised over a period of five years.

g) Transactions on investments in securities of each Subfund
The transactions on investments in securities are booked on a trade date basis.

## h) Valuation of financial futures contracts of each Subfund

Unmatured financial future contracts are valued at valuation date at market prices prevailing at this date and resulting unrealised gains or losses are posted to the statement of operations and are shown under "Net unrealised gain/loss on financial futures contracts" in the statement of net assets. Realised gains or losses are also posted to the statement of operations /changes in net assets under "Net realised gain (loss) on financial futures contracts".

## i) Valuation of forward foreign exchange contracts of each Subfund

Unmatured forward foreign exchange contracts are valued at valuation date at forward exchange rates prevailing at this date and resulting unrealised gains or losses are posted to the statement of operations and are shown under "Net unrealised gain/loss on forward foreign exchange contracts" in the statement of net assets. Realised gains or losses are also posted to the statement of operations / changes in net assets under "Net realised gain (loss) on forward foreign exchange contracts".

## j) Valuation of options of each Subfund

Unmatured options are valued at valuation date at market rates prevailing at this date and resulting changes in unrealised gains or losses are posted to the statement of operations. Realised and unrealised gains or losses are recorded in the statement of operations / changes in net assets.

## k) Valuation of swaps

On each valuation day, swap agreements are valued at the net present value of the future cash flows, using the relevant interest rate yield curve on valuation day. Asset swaps and the securities linked to the asset swaps are not revaluated as the security and the asset swap are considered for the purpose of the valuation as a single instrument.

The resulting unrealised gains or losses are shown under "Net unrealised gain/loss on swap contracts" in the statement of net assets. Realised gains or losses are also posted to the statement of operations / changes in net assets under "Net realised gain (loss) on swap contracts".

Notes Page 10

#### I) Allocation of accrued expenses

Accrued expenses which can be allocated directly to a Subfund are charged to this Subfund. Accrued expenses which cannot be allocated directly are divided among the Subfunds in proportion to the net assets of each Subfund.

#### m) Income recognition

Dividends are recorded on ex-dividend date, net of withholding tax. Interests are accrued on a daily basis.

#### Fees and Expenses

(see detail at Subfund level)

- For its investment management services, the Investment Manager receives an investment management fee depending on the specific share class.

For the Subfund Cape Capital SICAV-UCITS - Cape Fixed Income Fund the rates are as follows:

- Institutional A: 0.30% p.a
- Institutional B: 0.50% p.a.
- Limited A: 0.10% p.a.
- Internal A: 0.30 % p.a.
- Retail A: 0.80% p.a.

For the Subfund Cape Capital SICAV-UCITS - Cape Equity Fund the rates are as follows:

- Institutional A: 0.50% p.a.
- Institutional B: 1.00% p.a.
- Limited A: 0.10% p.a.
- Internal A: 0.50% p.a.
- Retail A: 1.50% p.a.

For the Subfund Cape Capital SICAV-UCITS - Cape Select Bond Fund the rates are as follows:

- Institutional A: 0.20% p.a.
- Institutional B: 0.25% p.a.
- Internal A: 0.25% p.a.
- Retail A: 0.35% p.a.

For its services the Management Company shall receive a Management fee. The Investment Management fee shall be paid out of the Management fee.

The Management fee shall consist of the Investment Management fee for the respective share classes plus a maximum of 0.05% p.a. and a fixed ESG fee of up to EUR 15'000 p.a. for services rendered by the Management Company, except for the Subfund Cape Capital SICAV-UCITS - Cape Equity Fund a maximum of 0.04% p.a. for services rendered by the Management Company.

The Management fee and Investment Management fee shall be calculated monthly on the basis of the average net asset value of the respective Class and paid monthly in arrears during the month following the end of the relevant month.

- The fee for the accounting services of the Central Administration paid out of the assets of the Subfund shall not exceed 0.04% p.a., except for the Subfund Cape Capital SICAV-UCITS - Cape Select Bond Fund the rate should not exceed 0.05% p.a., calculated on the basis of the average monthly net asset value of the respective Class.

- The fee payable to the Depositary Bank paid out of the assets of the Subfund shall in principle not exceed 0.04% p.a., except for the Subfund Cape Capital SICAV-UCITS - Cape Fixed Income Fund the rate should not exceed 0.07% p.a., calculated on the basis of the average monthly net asset value of the respective Class.

## "Taxe d'abonnement"

Under the prevailing laws and regulations, the Company is subject in Luxembourg, on the basis of its investments, to a "taxe d'abonnement" at the annual rate of 0.05%, payable quarterly and calculated on the basis of the net assets of each Subfund at the end of each quarter.

The rate is however of 0.01% per annum for:

- individual Subfunds the exclusive object of which is the collective investment in money market instruments and the placing of deposits with credit institutions;
- individual Subfunds the exclusive object of which is the collective investment in deposits with credit institutions; and,
- individual Subfunds as well as for individual Classes, provided that the Shares of such Subfund or Class are reserved to one or more institutional investors.

#### Changes in the composition of the security portfolio

Changes in the composition of the security portfolio during the reporting year are available to Shareholders free of charge at the registered office of the Company or the local representatives in the countries where the Company is registered.

#### Total Expense Ratio (TER)

(see detail at Subfund level)

The TER expresses the sum of all costs and commissions charged on an ongoing basis to the Subfund's assets, taken retrospectively as a percentage of these assets.

The Total Expense Ratio (TER) was calculated based on the version currently applicable of the "Guidelines on the calculation and disclosure of the Total Expense Ratio (TER) of collective investment schemes" of the "Asset Management Association Switzerland" (AMAS).

The TER is calculated for the last 12 months.

#### Fund performance

(see detail at Subfund level)

The performance is based on the net asset values as calculated on the last business day of the year. Those net asset values reflect the market prices of the investments as of the last business day of the year.

The YTD (Year-To-Date) Performance includes the year from 01.01.2023 until 31.12.2023.

Historical performance is no indicator of current or future performance.

The performance data given does not take into account commissions and costs incurred in the purchase or redemption of Subfund shares.

For shares launched more than 3 years ago no performance since inception is disclosed.

Performance of distributing shares includes reinvestments of dividends.

## Transaction costs

Transactions costs include brokerage fees, stamp duty, local taxes and other foreign charges if incurred during the year. Transaction costs are included in the cost of securities purchased and sold.

For the year ended on 31.12.2023, the Company incurred transaction costs relating to purchase or sale of investments in securities and similar transactions, (including derivatives instruments or other eligible assets) as follows:

Subfund	Ссу	Transaction cost
Cape Capital SICAV-UCITS - Cape Equity Fund	EUR	751,066.48
Cape Capital SICAV-UCITS - Cape Fixed Income Fund	EUR	165.00
Cape Capital SICAV-UCITS - Cape Select Bond Fund	FUR	_

Not all transaction costs are separately identifiable. For fixed income investments, forward foreign exchange contracts and for some other derivative contracts, transaction costs will be included in the purchase and sales price of the investment. Whilst not separately identifiable these transaction costs will be captured within the performance of each Subfund.

Notes Page 11

## **Financial Derivative Instruments**

The Subfunds may engage in derivative transactions for the purpose of efficient portfolio management. Details of the derivatives are displayed in the Notes pages.

Depending on the type of derivatives held, collateral might be received from the different counterparts to reduce the counterparty exposure. For other type of derivatives, margin accounts might be used.

As at 31.12.2023, the following Subfund received the following assets as collateral from the following counterparties for an amount of:

Cape Capital SICAV-UCITS - Cape Fixed Income Fund:

Type	Counterparty	Ссу	Amount
Cash	Goldman Sachs International London	USD	100,000.00
Cash	UBS	EUR	2,850,000.00
Cash	Citigroup Global Markets Limited London	EUR	1,780,000.00
Cash	JP Morgan Securities PLC London	EUR	20,000.00

Cape Capital SICAV-UCITS - Cape Select Bond Fund:

Type	Counterparty	Ссу	Amount
Cash	Credit Suisse (Schweiz) AG	FLIR	630,000,00

## Transparency of the promotion of environmental or social characteristics and of sustainable investments

Information on environmental and/or social characteristics and/or sustainable investments is available in the relevant annexes under the (unaudited) Transparency of the promotion of environmental or social characteristics and of sustainable investments section.

## Significant events during the year

On 12 June 2023, Credit Suisse Group AG was merged into UBS Group AG and the combined entity now operates as a consolidated banking group (the "Merger"). The Fund receives various services and has banking relationships with consolidated subsidiaries of Credit Suisse Group AG, and as such these relationships and service providers may change in the future as a result of the Merger.

A new prospectus came into force in December 2023.

## War in Ukraine

During late February 2022, the eastern part of Europe has entered into a phase of instability following the military action taken by Russia against Ukraine (the "Situation"). As a result, a list of global leading countries, not limited to Canada, the European Union, Japan, New Zealand, Taiwan, the United Kingdom, and the United States unveiled a series of sanctions against Russia to cripple the economy targeting banks, oil refineries, and military exports, etc. On the other aspect and amid the worsening situations in Ukraine due to the prevalent military situation, the economy deterioration and volatility in Ukraine seems imperative. In addition to the direct impact on the concerned economies and parties, Ukraine and Russia, the impact on other economies is inevitable. More specifically, the link between the economies of Europe and Russia is considerable enough for its effects to an extent that may hit the western economy even harder, also with effects on the US economy.

The Board of Directors is closely monitoring the effects of the Situation on the investors, investments and other stakeholders and have assessed that the Situation does not impact the financial statements as at 31.12.2023 and the ability of the Company and its Sub-Funds to continue as going concern.

## Subsequent events

No significant event occurred after the year end.

## Cape Capital SICAV-UCITS - Cape Equity Fund

#### Development of the relevant market and market environment

2023 marked a staggering comeback from a dismal 2022, bolstered by the combination of a solid economy, better-than-expected corporate earnings, and an end to the Federal Reserve's hiking cycle. Technology and growth stocks were top performers in 2023 as appetite for risk assets returned, along with the emerging boom in artificial intelligence technologies. After a summer Iull, falling bond yields triggered an end-of-year rally which sent markets to near all-time highs. The outperformance of cyclical stocks, small caps and extreme rallies in highly speculative assets suggests that risk appetite is back - even outpacing the underlying economic and corporate fundamentals.

#### **Fund Developments**

While tech-heavy indices performed remarkably well in 2023, the Cape Equity Fund (and global equity funds more broadly) fared less well. The underperformance can be attributed to three key factors. First, a large driver of returns was the rapid rise of generative Al, where the fund lacked exposure early in the year and this hindered relative performance. This was rectified by the end-of-year rally with the introduction of MSFT, TSMC, Alphabet, and SK Hynix. Second, since its inception, the Fund has had a structural underweight in US equities versus global indices, which implies an overweight in Europe and China - two regions which performed poorly and detracted from performance. Last, idiosyncratic weakness in select names such as Albemarle, Darling, DSM, and Lonza have further led to underperformance.

## Cape Capital SICAV-UCITS - Cape Fixed Income Fund

#### Development of the relevant market and market environment

2023 was a positive year for global interest rates and credit markets as falling inflation rates fueled hopes for looser financial conditions and economic resilience. The falling inflation rates and strong wage growth were among the most important drivers for a strong consumer and benign financial markets. Default rates remained low as the refinancing need of companies remained subdued, so the debt-servicing capacity stayed at a comfortable level. However, this level of comfort relies heavily on hope that Central Banks will significantly cut rates in 2024 to ensure that the upcoming heightened refinancing need in 2025 is manageable.

## **Fund Developments**

The Fund delivered performance of around 6% in EUR, broadly in line with relevant ETFs and benchmarks, after the fund had experienced a clearly smaller drawdown relative to those benchmarks in 2022. Hence, we view the downside vs. upside participation as favorable for investors. The market remains characterized by relatively good fundamentals on a company level, which is in stark contrast to the heightened level of macro uncertainty. Hence, we have run an underweight to what can be called "macro-proxies," especially the banking sector, while we are overweight the insurance, utility, and telecom sectors. Given the relatively elevated (real) interest rate levels, we have opted to moderately increase the interest rate duration in the Fund (3.3y as per end-2023) to increase the return potential in a scenario of falling rates.

## Cape Capital SICAV-UCITS - Cape Select Bond Fund

## Development of the relevant market and market environment

2023 was a positive year for global interest rates and credit markets as falling inflation rates fueled hopes for looser financial conditions and economic resilience. The falling inflation rates and strong wage growth were among the most important drivers for a strong consumer and benign financial markets. Default rates remained low as the refinancing need of companies remained subdued, so the debt-servicing capacity stayed at a comfortable level. However, this level of comfort relies heavily on hope that Central Banks will significantly cut rates in 2024 to ensure that the upcoming heightened refinancing need in 2025 is manageable.

#### Fund Developments

As per its mandate, the Cape Select Bond Fund invests solely in short-term bonds in line with its profile of an enhanced cash-replacer strategy. The Fund managed to moderately outperform short-term money market proxies in 2023 (i.e. T-Bills). Apart from a short phase around the escalation of the U.S. regional banking crisis, as well as the UBS/CS takeover - where systemic risks became more prominent - the Fund did not experience any noticeable volatility, confirming its nature as a reliable strategic cash building block.

#### Risk management

The global exposure of the Subfunds is calculated and monitored under the absolute VaR approach, except for the Subfund Cape Capital SICAV-UCITS – Cape Equity Fund which is calculated and monitored under the commitment approach.

#### VaR information

The Subfunds listed in the table below follow the Absolute VaR approach for calculation of global exposure. The VaR levels reached during the period and VaR limits are shown in the below table:

Fund Name	Lowest VaR	Average VaR	Highest VaR	Market Risk Internal limit	Regulatory limit
Cape Capital SICAV- UCITS - Cape Fixed	1.66%	2.31%	4.32%	6.50%	20.00%
Income Fund					
Cape Capital SICAV-	0.22%	0.41%	0.88%	5.00%	20.00%
UCITS - Cape Select Bond Fund					

#### Applied calculation standards

The following calculation standards are used in daily calculation of the VaR:

Confidence interval: 99.00%Holding period: 20 Days

■ Effective observation period: 250 days

■ Calculation frequency: daily

■ Model: Monte Historical Simulation

The average level of leverage reached during the period is 0.5156 for Cape Capital SICAV-UCITS - Cape Fixed Income Fund and 0.3307 for Cape Capital SICAV-UCITS - Cape Select Bond Fund.

## Remuneration

This disclosure should be read in conjunction with the Credit Suisse Compensation Policy (available on the Group's website – https://www.creditsuisse.com/media/assets/corporate/docs/about-

us/governance/compensation/compensation\_policy.pdf), which provides more information on the remuneration principles and policies.

The total remuneration disclosed is related to the activities of the AIFM regarding its monitoring of delegated functions and risk management activities and does not include any remuneration for delegated investment managers.

The remuneration information represents a proportion of the total remuneration to staff of the AIFM function as attributable to all the funds it manages taking into consideration non-UCITS and UCITS alike, in relation to the total net assets of the Company.

The AIFM has implemented a series of safeguards that refrain staff from taking undue risks compared to the activity profile.

The aggregate remuneration for these individuals in relation to Cape Capital SICAV-UCITS was 67,787.99 CHF out of which 54,575.13 CHF are fixed and 13,212.86 CHF are variable for the financial year.

Under the methodology the number of staff considered is 9 and 5 persons are registered as Conducting Officer.

## **Securities Financing Transaction Regulation**

Securities Financing Transaction Regulation ("SFTR") introduces reporting requirements for securities financing transactions ("SFTs") and total return swaps.

A Security Financing Transaction ("SFT") is defined as per Article 3 (11) of the SFTR as:

- a repurchase/reverse repurchase agreement,
- securities or commodities lending and securities or commodities borrowing,
- a buy-sell back transaction or sell-buy back transaction, or
- a margin lending transaction.

The Company did not hold any total return swaps or enter in security financing transactions during the period ended 31.12.2023.

## Transparency of the promotion of environmental or social characteristics and of sustainable investments

As requested in Art. 11(1) of Regulation (EU) 2019/2088 (SFDR), Subfunds as referred to in Art. 8 of that Regulation, shall describe the extent to which environmental or social characteristics are met. Products as referred to in SFDR Art. 9 shall describe the overall sustainability-related impact of the Subfund by means of relevant sustainability indicators.

For Subfunds falling under Art. 8 or 9 of SFDR the respective information are disclosed on Subfund level below.

Subfunds not falling under Art. 8 or 9 of SFDR are not listed below. The investments underlying those Subfunds do not take into account the EU criteria for environmentally sustainable economic activities.

## ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product name:** Cape Capital SICAV-UCITS – Cape Equity Fund (the "Subfund")

Legal entity identifier: 549300N0CO9RLAMMGR86

## Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?						
Yes	• No					
It made sustainable investments with an environmental objective:%  in economic activities that qualify as environmentally sustainable under the EU Taxonomy  in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 13.7% of sustainable investments  with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy  with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy  with a social objective					
It made sustainable investments with a social objective:%	It promoted E/S characteristics, but <b>did not</b> make any sustainable investments					

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Subfund invested in companies exhibiting favourable ESG profiles based on the assessment of MSCI's ESG rating. In addition, the Subfund did not invest in certain sectors or companies on the basis of binding rating-based, norm-based and value-based exclusions. No reference benchmark was designated for the purpose of attaining the environmental and social ("E&S") characteristics promoted.

Sustainable
investment means
an investment in an
economic activity
that contributes to
an environmental or
social objective,
provided that the
investment does not
significantly harm
any environmental or

social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation

does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

## How did the sustainability indicators perform?

The sustainability indicators that were used to measure the attainment of the E&S characteristics promoted were the following:

- Number of companies with a MSCI ESG rating of CCC, with no investments in CCC-rated companies: 0
- Number of companies with an MSCI ESG rating of B, with the maximum % of AUM in B-rated companies not exceeding 5%: 1 (2.63% of AUM)
- Number of companies with revenues >0% from activities in cluster munitions, landmines, nuclear weapons, non-detectable fragments, depleted uranium, white phosphorus, blinding laser, or bio / chemical weapons: 0
- Number of companies with revenues of >5% from activities in tobacco, adult entertainment, direct gambling, or coal: 0

## ...and compared to previous periods?

Number of companies which has a MSCI ESG rating of CCC, with no investments in CCC-rated companies: **0** 

- Number of companies which had an MSCI ESG rating of B, with the maximum % of AUM in B-rated companies which did not exceed 5%: 1 (4.22% of AUM)
- Number of companies which had revenues >0% from activities in cluster munitions, landmines, nuclear weapons, non-detectable fragments, depleted uranium, white phosphorus, blinding laser, or bio / chemical weapons: 0
- Number of companies which had revenues of >5% from activities in tobacco, adult entertainment, direct gambling, or coal: **0**

## What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Investment Manager defined sustainable investments as companies that fulfilled the below criteria, taking into account the SDG product alignment score from MSCI.

- SDG product alignment score could not be negative for any of the 17 SDGs
- SDG product alignment score had to be at least 5 (i.e. aligned according to MSCI) for at least one of the 17 SDGs

Overall 23% of the AUM of the Subfund met the two criteria mentioned above. However, when taking into account Adverse impact indicators, the proportion of investments that met sustainability criteria decreased to 13.7%.

# How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

To protect the Subfund's investments against causing significant harm, the Investment Manager applied indicators for adverse impact defined in the final RTS related to SFDR and as further described below. The sustainability profile of issuers' economic activities was considered in order to exclude those with material exposure to economic activities that cause significant harm as per the approach further described below. The calculation of these indicators was subject to disclosures of the investee companies.

— How were the indicators for adverse impacts on sustainability factors taken into account?

The Investment Manager selected indicators for adverse impacts on sustainability factors from the final RTS related to SFDR and defined three main approaches to take them into account: (i) the Investment Manager excluded companies that had no science-based carbon reduction targets; (ii) the Investment Manager completely excludeded from the Subfund's portfolio certain investment positions that had exposure to certain controversial activities or that violated certain principles in line with the investment strategy of the Subfund and (iii) the Investment Manager took exposure to investment positions depending on how they positioned themselves compared to MSCI ACWI Index.

The table below outlines for each indicator for adverse impacts on sustainability factors how the Investment Manager took them into account in his investment decisions.

1.	GHG emissions	The manager excluded companies that were deemed to have a significant negative contribution to climate change (i.e., companies that were considered to be the biggest emitters of greenhouse gas globally) and had no science-based carbon reduction targets (approved by the Science-Based Targets Initiative)
2.	Carbon footprint	The manager excluded companies that were deemed to have a significant negative contribution to climate change (i.e., companies that were considered to be the biggest emitters of greenhouse gas globally) and had no science-based carbon reduction targets (approved by the Science-Based Targets Initiative)
3.	GHG intensity	The manager excluded companies that were deemed to have a significant negative contribution to climate change (i.e., companies that were considered to be the biggest emitters of greenhouse gas

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

globally) and had no science-based carbon reduction targets (approved by the Science-Based Targets Initiative)

		,
4.	Exposure to companies active in the fossil fuel sector	The manager excluded companies exposed to fossil fuel related activities, including extraction, processing, storage and transportation of petroleum products, natural gas, and thermal and metallurgical coal.
7.	Activities negatively affecting biodiversity- sensitive areas	The manager excluded companies with activities that negatively affected biodiversity-sensitive areas.
10.	Violations of UN Global compact principles	The manager excluded companies that were not aligned with the United Nations Global Compact principles
13.	Board diveristy	Comparable or higher percentage of female board members compared to MSCI ACWI Index (32.9%). Any company with a level above 30 was considered comparable.
14.	Exposure to controversial weapons	The manager excluded companies with exposure to controversial weapons

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Subfund used the MSCI UN Global Compact screen to assess alignment with the following global standards:

- UN Global Compact Principles
- UN Guiding Principles for Business and Human Rights
- International Labour Organization

Alignment with the OECD Guidelines was assessed through these global standards as they covered the majority of the OECD principles. Such principles were further covered by the MSCI ESG Controversies framework. A company that failed to comply with either of the three standards could not be considered for investment. Failure was defined as a company being implicated in one or more controversy cases where there were credible allegations that the company or its management inflicted serious large-scale harm in violation of global norms.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

# How did this financial product consider principal adverse impacts on sustainability factors?

☑ Yes, the E&S impacts of the activities of the securities held by the Subfund were assessed by the Investment Manager as set out in the table below. The consideration of the indicators for principal adverse impacts provided additional input to the E&S pillar of the ESG evaluation of issuers and may have, in some cases and under certain conditions, led to exclusions or conditional inclusions of securities. The Investment Manager monitored and evaluated a range of indicators for principal adverse impacts. However, as the reporting of many of these metrics by investee entities were at the time voluntary, the availability of data on some indicators was limited. As such, the integration of indicators for principal adverse impacts was conducted on a best-efforts basis, and reflected the availability of such information.

1. GHG emissions	No companies were deemed to have a significant negative contribution to climate change (i.e., companies that were considered to be the biggest emitters of greenhouse gas globally)  62.9% of Fund AUM had science-based carbon reduction targets (approved by the ScienceBased Targets Initiative)
2. Carbon footprint	No companies were deemed to have a significant negative contribution to climate

	change (i.e., companies that were considered to be the biggest emitters of greenhouse gas globally)
	<b>62.9%</b> of Fund AUM had science-based carbon reduction targets (approved by the ScienceBased Targets Initiative)
3. GHG intensity	Exclusion of companies that were deemed to have a significant negative contribution to climate change (i.e., companies that were considered to be the biggest emitters of greenhouse gas globally)
	<b>62.9%</b> of Fund AUM had science-based carbon reduction targets (approved by the ScienceBased Targets Initiative)
Exposure to companies active in the fossil fuel sector	No companies were active in the fossil fuel sector
10. Violations of UN Global Compact principles	All companies were aligned with the United Nations Global Compact principles
14. Exposure to controversial weapons	No companies had exposure to controversial weapons

## What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 31.12.2023

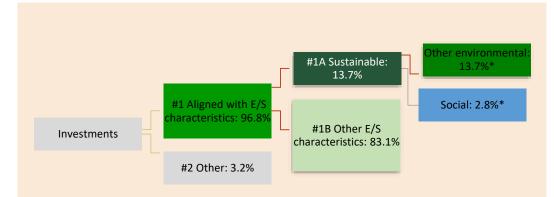

Largest investments	Sector	% Assets	Country
Caterpillar	Manufacturing	5.26	USA
SK Hynix	Manufacturing	5.25	South Korea
Microsoft	Information And Communication	5.21	USA
Trimble	Information And Communication	5.12	USA
Ball	Manufacturing	5.09	USA
Qualcomm	Manufacturing	5.00	USA
Sony	Manufacturing	4.94	Japan
Thermo Fisher	Manufacturing	4.78	USA
TSMC	Manufacturing	4.78	South Korea
Corning	Manufacturing	4.78	USA
Alphabet	Information And Communication	4.70	USA
LSE	Financial And Insurance Activities	4.65	UK

Hitachi	Information And Communication	4.56	Japan
Visa	Financial And Insurance Activities	4.53	USA
Schneider	Manufacturing	2.96	France

## What was the proportion of sustainability-related investments?

## What was the asset allocation?

**#1** Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#20ther** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

\*Overlap due to the fact that socially sustainable investments ("Social") were also assessed to be contributing to the enviromental objective not aligned with the EU Taxonomy ("Other enviromental")

The proportion of investments aligned with environmental or social characteristics promoted by this Subfund (category #1 above) was 96.8% of its total net assets. Within this category the Subfund held a proportion of 13.7% of its total net assets in sustainable investments (category #1A above), and 83.1% of its assets were promoting other E/S characteristis (category #1B).

## In which economic sectors were the investments made?

Sector	Weight (%)
Technology	34.1
Consumer Discretionary	13.7
Healthcare	13.7

# Asset allocation describes the share of investments in specific assets.

Industrials	13.2
Financials	9.5
Materials	8.1
Communication Services	4.9
Utilities	2.8

### **Fund Exposure to Fossil Fuel Sub-Sectors**

NACE Sector code	ACE Sector code Nace Name	
B5.1.0	Mining of hard coal	0%
B5.2.0	Mining of lignite	0%
B6.1.0	Extraction of crude petroleum	0%
B6.2.0	Extraction of natural gas	0%
B9.1.0	Support activities for petroleum and natural gas extraction	0%
C19.2.0	Manufacture of refined petroleum products	0%
D35.2.1	Manufacture of gas	0%
D35.2.2	Distribution of gaseous fuels through mains	0%
D35.2.3	Trade of gas through mains	0%
G46.7.1	Wholesale of solid, liquid and gaseous fuels and related products	0%

safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental

objective.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund did not make sustainable investments with an environmental objective aligned with the EU Taxonomy (0%).

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:

In fossil gas

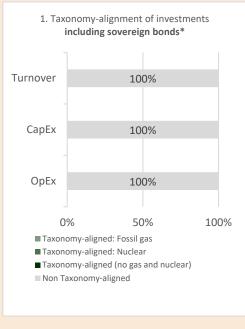

In nuclear energy

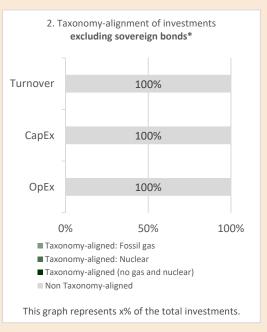

No

Taxonomy-aligned activities are expressed as a share of:

- turnover
   reflecting the
   share of revenue
   from green
   activities of
   investee
   companies.
- expenditure
  (CapEx) showing
  the green
  investments made
  by investee
  companies, e.g. for
  a transition to a
  green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- \* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.
- What was the share of investments made in transitional and enabling activities?

The Sub-Fund did not make investments in transitional and enabling economic activities (0%).

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The percentage of investments that were aligned with the EU Taxonomy remained the same, 0%.

<sup>&</sup>lt;sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

### What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Subfund made 13.7% of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy.

#### What was the share of socially sustainable investments?

The Subfund made 2.8% of socially sustainable investments.

### What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Investments included under "#2 Other" were made up of cash, fixed-term deposits, and derivatives on currency. Additionally, investments 'Non-Rated' by data providers also fell under "#2 Other". These investments did not have any minimum E&S safeguards.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Prior to a new investment, the investment manager assessed whether the investment was SDG aligned as outlined above and in the prospectus. Since a company's operations and its alignment with the SDG goals rarely changed, they were monitored on a yearly basis and updated with the revenues of the latest financial year.

On a quarterly basis, the Investment Manager checked whether the Subfund still met the minimum threshold in sustainable investments with an environmental and social objective factors mentioned previously.

#### How did this financial product perform compared to the reference benchmark?

The Subfund did not use a reference benchmark for the purpose of attaining the environmental and/or social characteristics.

- How does the reference benchmark differ from a broad market index?
  N/A
- How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

N/A

### Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- How did this financial product perform compared with the reference benchmark?
  N/A
- How did this financial product perform compared with the broad market index?`
  N/A

#### ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product name:** Cape Capital SICAV-UCITS – Cape Fixed Income Fund (the "Subfund") **Legal entity identifier:** 5493005NDTKEGCERHE89

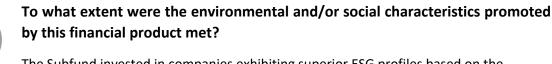

### Environmental and/or social characteristics

Did this financial product have a sustainable investment objective? Yes No It promoted Environmental/Social (E/S) It made **sustainable** characteristics and investments with an while it did not have as its objective a environmental objective: % sustainable investment, it had a proportion of in economic activities that 4.4% of sustainable investments qualify as environmentally with an environmental objective in economic sustainable under the EU activities that qualify as environmentally Taxonomy sustainable under the EU Taxonomy in economic activities that do with an environmental objective in not qualify as environmentally economic activities that do not qualify as sustainable under the EU environmentally sustainable under the EU Taxonomy Taxonomy with a social objective It made sustainable investments It promoted E/S characteristics, but did not make any sustainable investments with a social objective: %

Sustainable **investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a

That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

The Subfund invested in companies exhibiting superior ESG profiles based on the internal assessment via a proprietary ESG rating. The overreaching Cape Capital Sustainable Investing Policy was implemtend across the investment process with preand post trading compliance checks based upon an exclusion list which did not allow room for interpretation.

The Subfund solely targeted issuers with an MSCI ESG rating of at minimum B or better, and did not invest in companies with revenues larger than 5% coming from activities in tobacco, adult entertainment, direct gambling or coal.

### How did the sustainability indicators perform?

The Sustainability indicators used to measure the attainment of the E&S characteristics promoted were the following:

- Number of companies with an MSCI ESG rating of B: 0
- Number of companies with revenues >0% from activities in cluster munitions, landmines, nuclear weapons, non-detectable fragments, depleted uranium, white phosphorus, blinding laser, or bio/chemical weapons: 2 (0.03% of AuM)
- Number of companies with revenues of >5% from activities in tobacco, adult entertainment, direct gambling, or coal: 1 (0.2% of AuM)

#### ...and compared to previous periods?

Compared to last year the Subfund gained exposure to **2 Companies** tied to the manufacturing of weapon parts and to **1 Company** which had revenues larger than 5% from activities in tobacco, adult entertainment, direct gambling or coal.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Investment Manager defined sustainable assets as companies that fulfil at least one of the below criteria. Below indicators were self-defined and customized to the characteristics of the asset class.

- Alternative energy: minimum 15% of revenue generated from renewable energy from solar, wind, hydro, geothermal, biomass, biofuel, fuel cells, waste-to-energy, wave tidal and alternative energy storage.
- Energy efficiency: minimum 15% of revenue generated from energy-efficient automation and optimization services and infrastructure.
- Green building: minimum 10% of revenue generated from the design, construction, redevelopment, retrofitting, or acquisition of green certified properties to raise capacity for effective climate change mitigation and adaptation.
- Pollution control: minimum 10% of revenue generated from the reduction of the volume of waste materials through recycling, minimizes introduction of toxic substances, and offers remediation of existing contaminants to significantly address pollution in all levels and its negative effects.
- Sustainable water: minimum 15% of revenue generated from resolving water scarcity and water quality issues, improving the quality and availability of water supply to improve resource management in both domestic and industrial use.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

4.4% of the Subfund's total portfolio was made into sustainable investments. These investments demonstrated a meaningful revenue exposure to sustainable objectives described above, notably in the area of Alternative Energy, Energy Efficiency, Green Building and Pollution Control.

When exluding holdings which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments such as cash, cash equivalents and non-rated securities such as CLOs and ETFs, the Subfund had 7.95% of its assets invested in financial products promoting environmental or social objectives.

# How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

To protect the Subfund's investments against causing significant harm, the Investment Manager applied indicators for adverse impact defined in the final RTS related to SFDR.

The sustainability profile of issuers' economic activities was considered in order to exclude those with material exposure to economic activities that caused significant harm as per the approach further described below.

### How were the indicators for adverse impacts on sustainability factors taken into account?

The Investment Manager selected indicators for adverse impacts on sustainability factors from the final RTS related to SFDR and defined two (2) main approaches to take them into account: (i) the Investment Manager completely excluded from the Subfund's portfolio investment positions that had exposure to certain controversial activities or that violated certain principles in line with the investment strategy of the Subfund, a list which is updated on a monthly basis, and (ii) the Investment Manager's exposure to investment positions depended on how they position themselves compared to MSCI ACWI. The table below outlines for each indicator for adverse impacts on sustainability factors how the Investment Manager has taken them into account in its investment decisions

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

1. GHG emissions	Lower weighted average emission compared to MSCI ACWI
2. Carbon footprint	Lower weighted average footprint compared to MSCI ACWI
3. GHG intensity	Lower weighted average intensity compared to MSCI ACWI
4. Exposure to companies active in the fossil fuel sector	Not more than 5% higher compared to MSCI ACWI
5. Share of non-renewable energy consumption and production	Lower share compared to MSCI ACWI
6. Energy consumption intensity per high impact climate sector	Lower share compared to MSCI ACWI
7. Activities negatively affecting biodiversity-sensitive areas	Lower share compared to MSCI ACWI
8. Emissions to water	Lower weighted average emission compared to MSCI ACWI
9. Waste	Lower weighted average hazardous waste production compared to MSCI ACWI
10. Violations of UN Global Compact principles	No investments in companies violating UN Global Compact principles
11. Lack of processes and compliance mechanisms to monitor compliance	Lower share compared to MSCI ACWI
12. Unadjusted gender pay gap	Lower weighted average pay gap compared to MSCI ACWI
13. Board gender diversity	Higher weighted average percentage of female board members compared to MSCI ACWI
14. Exposure to controversial weapons	No investment in companies with exposure to controversial weapons

The investment manager took the relevant metrics within the scope of the advese impacts into account and excluded the issuers whose relevant measurements were in breach of the contractually agreed threshold.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The Subfund used the MSCI Global Compact screen to assess alignment with the following global standards:

- UN Global Compact Principles
- UN Guiding Principles for Business and Human Rights
- International Labour Organization

Alignment with the OECD Guidelines was assessed through these global standards as they covered the majority of the OECD principles. Such principles were further covered by the MSCI ESG Controversies framework. A company that failed to comply with either of the three standards could not be considered for investment. Failure was defined as a company being implicated in one or more controversy cases where there were credible allegations that the company or its management inflicted serious large-scale harm in violation of global norms.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The E&S impacts of the activities of the securities held by the Subfund were assessed by the Investment Manager as set out in the table below. The consideration of the indicators for principal adverse impacts provided additional input to the E&S pillar of the ESG evaluation of issuers and may have, in some cases and under certain conditions, led to exclusions or conditional inclusions of securities. The Investment Manager monitored and

evaluateed a range of indicators for principal adverse impacts. However, as the reporting of many of these metrics by investee entities were voluntary, the availability of data on some indicators was limited. As such, the integration of indicators for principal adverse impacts was conducted on a best-efforts basis, and reflected the availability of such information.

Adverse Sustainability Indicator	Aim	Details	Portfolio Value	Benchmark Value (MSCI ACWI )	Portfolio relative to benchmark	Coverage - Portfolio	Status

HSBC Holdings PLC	K. Financial and insurance activities	United Kingdom	1.00%
La Mondiale SAM	K. Financial and insurance activities	France	0.83%

### What was the proportion of sustainability-related investments?

The total proportion was 4.40%, encompassing ETFs, Cash & Equivalents, and CLOs, which were not aligned with environmental and social characteristics and thus did not qualify as sustainable investments. Concentrating on investments that conformed to environmental and social (E/S) characteristics, the Subfund had 7.95% of its net assets in financial products that support environmental and social objectives.

#### What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

**#1** Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#20ther** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments such as cash, cash equivalents and non-rated securities such as CLOs and ETFs.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or

The proportion of investments aligned with environmental or social characteristics promoted by this Subfund (category #1 above) was 55% of its total net assets. Within this category the Subfund held a proportion of 4.4% of its total net assets in sustainable investments (category #1A above), and 50.6% of its assets were promoting other E/S characteristis (category #1B).

### In which economic sectors were the investments made?

### **Fund Sectoral Exposure**

## \*\*\*\*

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund did not make sustainable investments with an environmental objective aligned with the EU Taxonomy (0%).

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

	Yes:		
		In fossil gas	In nuclear energy
×	No		

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best

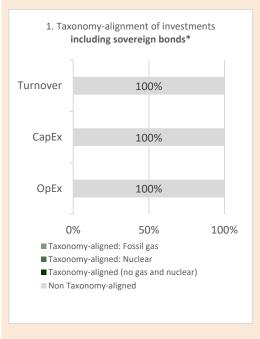

performance.

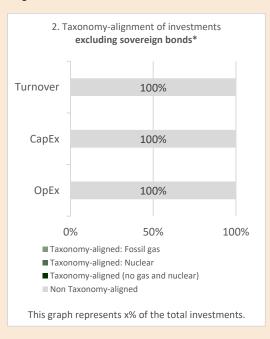

<sup>&</sup>lt;sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- turnover
   reflecting the
   share of revenue
   from green
   activities of
   investee
   companies.
- capital
   expenditure
   (CapEx) showing
   the green
   investments made
   by investee
   companies, e.g. for
   a transition to a
   green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- \* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.
- What was the share of investments made in transitional and enabling activities?

The Sub-Fund did not make investments in transitional and enabling economic activities (0%).

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The percentage of investments that were aligned with the EU Taxonomy remained the same, 0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Subfund made 4.4% of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

The Subfund made 0.0% of socially sustainable investments.

are

account the criteria
for environmentally
sustainable
economic activities
under Regulation
(EU) 2020/852.

### What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Investments included under "#2 Other" were made up of cash and cash equivalents as well as ETF products and CLOs which were not rated by data providers and did not have any minimum E&S safeguards. Derivatives for hedging purposes such as currency forwards of interest rates swaps were not included.

The Fund's total allocation to "#2 Other" was 45%. This included cash & equivalents which were used to manage the day to day liquidity of the fund. The allocation towards cash & equivalents was 24% (relative to total net assets of the entire fund, excl. derivatives). In addition, securitised products such as CLOs (not rated), where the fund invested predominately in AAA rated securities, amounted to an exposure of 10%. The CLO allocation was used as a diversifier for the fund's investment in carry/yield efficient positions. Finally, the fund allocated 10% towards ETFs to better manage liquidity and to reflect the Subfund's thematic approach through the use of passive instruments.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period?

To attain the environmental characteristics promoted by this Subfund, the Subfund applied ESG Exclusions and ESG Integration.

The Subfund excluded investments in companies based on following criteria:

- Norm-Based Exclusions: UN Global Compact Violation, SVVK List and Controversial Weapons
- Value-Based Exclusions: < 5% revenue threshold on Tobacco, Adult Entertainment, Coal and direct Gambling
- Rating Based Exclusions: Companies which were classified as "ESG Laggards" (MSCI ESG Rating CCC) could not be traded by the Subfund.

The above mentioned negative exclusion list was implemented in the fund management's portfolio management tool and was used by the Investment Manager in the bottom-up security selection process. The exlusion list was updated monthly and allowed the Subfund to adhere to the policy and the pre-contractual agreement. Every execution and position was pre- and post-trade checked by the risk management engine of the system to ensure adherence to the exclusion list and notify of any significant changes. However, in 2023 there was one breach as a result of the exclusion list being updated inadequately. This problem was promptly identified and the exclusion list was improved to reflect the shortcoming which led to the inability to detect a potential breach.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

### How did this financial product perform compared to the reference benchmark?

The Sub-Fund does not use a reference benchmark for the purpose of attaining the environmental and/or social characteristics.

- How does the reference benchmark differ from a broad market index?
  N/A
- How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

N/A

- How did this financial product perform compared with the reference benchmark?
  N/A
- How did this financial product perform compared with the broad market index?
  N/A

#### ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Cape Capital SICAV-UCITS – Cape Select Bond Fund ("the Subfund")

Legal entity identifier: 5493002K2TXZ8F12BY79

### Environmental and/or social characteristics

#### Did this financial product have a sustainable investment objective? Yes No It made **sustainable** It promoted Environmental/Social (E/S) characteristics and investments with an while it did not have as its objective a environmental objective: % sustainable investment, it had a proportion of in economic activities that % of sustainable investments qualify as environmentally with an environmental objective in economic sustainable under the EU activities that qualify as environmentally Taxonomy sustainable under the EU Taxonomy in economic activities that do with an environmental objective in not qualify as environmentally economic activities that do not qualify as sustainable under the EU environmentally sustainable under the EU Taxonomy Taxonomy with a social objective It made sustainable investments It promoted E/S characteristics, but **did not** make any sustainable investments with a social objective: %

2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the

Taxonomy or not.

Sustainable

**investment** means an investment in an

economic activity that contributes to an environmental or social objective,

provided that the investment does not

significantly harm

that the investee

companies follow

good governance

The **EU Taxonomy** is

system laid down in

a classification

Regulation (EU)

practices.

any environmental or social objective and

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Subfund mainly invested in companies exhibiting superior ESG profiles based on the internal assessment via a proprietary ESG rating. In addition, the Subfund did not invest in certain sectors or companies on the basis of binding norm-based, value-based, and standard industry exclusions. No reference benchmark was designated for the purpose of attaining the environmental and social ("E&S") characteristics promoted.

Nevertheless, at year end 2023 the Subfund had 3.52% of its total assets (excl. cash & equivalents) invested into assets which fullfilled the criteria for sustainable Investments.

### How did the sustainability indicators perform?

The Sustainability indicators used to measure the attainment of the E&S characteristics promoted were the following:

- Number of companies with an MSCI ESG rating of B: 0
- Number of companies with revenues >0% from activities in cluster munitions, landmines, nuclear weapons, non-detectable fragments, depleted uranium, white phosphorus, blinding laser, or bio / chemical weapons: 2 (3.32% of AUM)
- Number of companies with revenues of >5% from activities in tobacco, adult entertainment, direct gambling, or coal: **1 (1.58% of AUM)**

### ...and compared to previous periods?

Compared to the last period, the Subfund gained exposure to two companies tied to the manufacturing of weapon and was exposed to one company with revenues >5% from activities in tobacco, adult entertainment, direct gambling, or coal.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Subfund had as a goal to promote E&S characteristics but did not make any sustainable investments in 2023 as it had no sustainable objectives. Therefore, the investments made by the Subfund did not contribute to such objectives.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Subfund did not make any sustainable investments.

How were the indicators for adverse impacts on sustainability factors taken into account?

The Subfund did not make any sustainable investments.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

The Subfund did not make any sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

## How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund did not consider principal adverse impacts on sustainability factors.

### What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 31.12.2023

Largest investments	Sector	% Assets	Country
UBS Group AG	Banks	8.92	Swizterland

<sup>\*</sup> Top investments excludes cash and sovereign cash equivalents

### What was the proportion of sustainability-related investments?

#### What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

**#1** Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#20ther** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The asset allocation was subject to development in both the composition of the fixed income universe and the availability of company reporting data. By the end of 2023, the Subfund held 62% in investments aligned with E/S characteristics. The remaining 38% were made in other investments.

#### In which economic sectors were the investments made?

NACE Sector	<b>Weight</b> 3.32%	
C. Manufacturing		
D. Electricity, Gas, Steam and Air Conditioning Supply	4.70%	
G. Wholesale and Retail Trade; Repair of Motor Vehicles and Motorcycles	0.78%	
H. Transportation and Storage	1.57%	
K. Financial and Insurance Activities	51.68%	

#### **Fund Exposure to Fossil Fuel Sub-Sectors**

NACE Sector Code	Nace Name	Weight
B5.1.0	Mining of hard coal	0%
B5.2.0	Mining of lignite	0%
B6.1.0	Extraction of crude petroleum	0%
B6.2.0	Extraction of natural gas	0%
B9.1.0	Support activities for petroleum and natural gas extraction	0%
C19.2.0	Manufacture of refined petroleum products	0%
D35.2.1	Manufacture of gas	0%
D35.2.2	Distribution of gaseous fuels through mains	0%
D35.2.3	Trade of gas through mains	0%
G46.7.1	Wholesale of solid, liquid and gaseous fuels and related products	0%

\*\*\*\*

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Subfund did not make sustainable investments with an environmental objective aligned with the EU Taxonomy (0%).

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

	Yes:		
		In fossil gas	In nuclear energy
×	No		

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental

objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 $<sup>^{1}</sup>$  Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

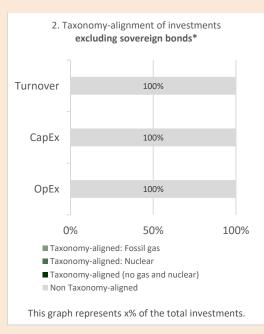

Taxonomy-aligned activities are expressed as a share of:

- turnover reflects the "greenness" of investee companies today.
- capital
   expenditure
   (CapEx) shows the
   green investments
   made by investee
   companies,
   relevant for a
   transition to a
   green economy.
- operational expenditure (OpEx) reflects the green operational activities of investee companies.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

### What was the share of investments made in transitional and enabling activities?

The Sub-Fund did not make investments in transitional and enabling economic activities (0%).

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The percentage of investments that were aligned with the EU Taxonomy remained the same, 0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-Fund did not make sustainable investments with an environmental objective not aligned with the EU Taxonomy (0%).

### What was the share of socially sustainable investments?

The Subfund did not make any socially sustainable investments, 0%.

### What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Investments incuded under "#2 Other" were made up of cash and fixed-term deposits, and derivatives on currrency and swaps. These were included as a buffer for redemptions and day-to-day management. Additionally, investments "Non-Rated" by data providers also fell under "#2 Other". This was mainly due to the lack of reporting data at the company level. These investments did not have any minimum E/S safeguards.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

To attain the environmental characteristics promoted by this Subfund, the Subfund applied ESG Exclusions and ESG Integration.

The Subfund excluded investments in companies based on following criteria:

- Norm-Based Exclusions: UN Global Compact Violation, SVVK List and Controversial Weapons
- Value-Based Exclusions: < 5% revenue threshold on Tobacco, Adult Entertainment, Coal and direct Gambling
- Rating Based Exclusions: Companies which were classified as "ESG Laggards" (MSCI ESG Rating CCC) could not be traded by the Subfund.

The above mentioned negative exclusion list was implemented in the fund management's portfolio management tool and were used by the investment manager in the bottom-up security selection process. The exlusion list was updated monthly and allowed the Subfund to adhere to the policy and the pre-contractual agreement. Every execution and position was pre- and post-trade checked by the risk management engine of the system to ensure adherence to the exclusion list and notify of any significant changes. However, in 2023 there was one breach as a result of the exclusion list being updated inadequately. This problem was promptly identified and the exclusion list was improved to reflect the shortcoming which led to the inability to detect a potential breach.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

### How did this financial product perform compared to the reference benchmark?

The Sub-Fund did not use a reference benchmark for the purpose of attaining the environmental and/or social characteristics.

How does the reference benchmark differ from a broad market index?
N/A

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

N/A

- How did this financial product perform compared with the reference benchmark?
