

Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest. Unless otherwise defined in this document, all words and expressions defined in the Company's current Prospectus shall have the same meaning herein.

New Capital Euro Value Credit Fund (the "Fund"), a sub-fund of New Capital UCITS Fund Plc (the "Company")

New Capital Euro Value Credit Fund EUR I Acc. (the "Share Class") – ISIN: IE00BF2B2Y39

The management company of the Fund is KBA Consulting Management Limited (the "Manager")

Objective and Investment Policy

Objective: The Fund's investment objective is to seek long-term appreciation through a combination of income and capital growth.

Policy: The Fund will invest in a diversified range of debt securities with a range of maturities (including inter alia notes, bills, bonds, commercial paper, certificates of deposit and floating rate notes) issued by governments, institutions and corporations primarily listed or traded on Recognised Markets worldwide. The Fund will invest primarily in euro-denominated securities but may invest up to 30% of its net assets in non-euro hard currency-denominated securities. The Fund will invest across a variety of geographical locations.

The Fund will predominantly hold corporate bonds with investment grade ratings (Baa or above by Moody's or BBB or above by Standard and Poor's or equivalent credit ratings as determined by another credit rating agency or by the Sub-Investment Manager) but up to 30% of the Fund's net assets may be invested in lower quality securities. Up to 10% may be invested in unrated securities.

The Fund focusses on the best investment opportunities in the investable universe, taking a systematic approach that combines systematic screening of bottom-up opportunities with top-down asset allocation themes.

The Fund may use techniques and instruments for purposes of efficient portfolio management including reduction of risk or cost, or the generation of additional capital or income for the Fund, with a level of risk which is consistent with the risk profile of the Fund such as forward foreign currency exchange contracts, futures contracts, options, put and call options on securities, indices and currencies, swap contracts, repurchase/reverse repurchase agreements and/

or stock lending agreements. The use of these instruments may result in the Fund being leveraged. However, the total exposure of the Fund as a result of all positions held by it will not exceed its Net Asset Value.

The Investment Manager has discretion in managing the investments of the Fund.

Distributions on income share classes will be paid bi-annually. Accumulating share classes accumulate income.

Benchmark: The Fund's benchmark is the BoA Merrill Lynch Euro Large Cap Corporate Index and may be used for comparative purposes only. The Fund is actively managed and as such does not seek to replicate its benchmark index, but instead may differ from the performance benchmark in order to achieve its objective. The investment manager is not constrained by the benchmark in the selection of investments and may use its discretion to invest in companies or sectors not included in the benchmark in order to take advantage of specific investment opportunities.

Profile of typical investor: The Fund is suitable for investors seeking capital growth and income over a 5- to 10-year time horizon, with a medium level of volatility.

Dealing: Shares in the Fund can be bought and sold daily (every Business Day of the Fund).

Further Information: Please refer to the Prospectus for more detailed information.

Risk and Reward Profile

The Fund is in category 3 as it has a low to medium level of volatility. The risk category shown is not guaranteed and may shift over time. Historical data may not be a reliable indicator for the future risk profile of the Fund.

The lowest risk category does not mean a "risk-free investment". The Fund is also subject to risks which are not included in the calculation of the risk-reward indicator.

Liquidity risk: The risk that assets may not be saleable immediately at a price consistent with that observed for valuation purposes.

Currency risk: Investors not investing in their local currency will additionally be exposed to the fluctuation of the exchange rate between their local currency and the currency class in which they are invested.

Credit risk: The issuer of a Bond or a similar investment within the Fund may not pay income or repay capital to the Fund when due. Bonds which are rated below investment grade are considered to have a higher risk exposure with respect to meeting their payment obligations.

Interest rate risk: Investments in bonds are affected by interest rates and inflation trends which may affect the value of the Fund.

Further information: The Prospectus for this Fund gives you more details about all the risks for this Fund – see under "Practical Information" for how to obtain a copy.
