INVESTMENT OBJECTIVE

To provide income and long term capital appreciation through investment in a portfolio of income generating global securities.

INVESTMENT PROCESS

Employing a flexible asset allocation approach, the fund is actively managed and invests mainly in a diversified portfolio of income generating equities, bonds and money market securities, from issuers around the world, including emerging markets. Although the fund does not have sustainable investment as an objective, the promotion of environmental and/or social characteristics is achieved through the fund's commitment to maintain at least 10% of the value of its portfolio invested in Sustainable Investments, as defined by the SFDR. In addition to the E/S characteristics promoted, the fund also applies the investment manager's proprietary responsible screen (the T. Rowe Price Responsible Exclusion List). The fund may use derivatives for hedging, efficient portfolio management and investment purposes. The fund may also use derivatives to create synthetic short positions in currencies, debt securities, credit indices and equities. The fund may use total return swaps (TRS) and is expected to do so on a continuous basis. For full investment objective and policy details refer to the prospectus. The manager is not constrained by the fund's benchmark.

Past performance is not a reliable indicator of future performance.

CALENDAR YEARS

(NAV, total return)							2021	2022	2023
Class I							7.10%	-13.44%	10.83%
Custom Benchmark							6.29%	-13.17%	14.60%

Performance for additional share classes is shown later in this document.

Source for performance: T. Rowe Price. Fund performance is calculated using the official NAV with dividends reinvested, if any. The value of the investment will vary and is not guaranteed. It will be affected by changes in the exchange rate between the base currency of the fund and the subscription currency, if different. Sales charges (up to a maximum of 5% for the A Class), taxes and other locally applied costs have not been deducted and if applicable, they will reduce the performance figures.

Please note that no management fees are charged to the Z, S and J share classes. No administration agent fees are charged to the J Class. No expenses or any other fees are charged to the Z class. Fee arrangements for the Z, S and J share classes are made directly with the investment manager. Please see the prospectus for further information.

Where the base currency of the fund differs from the share class currency, exchange rate movements may affect returns.

Hedged share classes (denoted by 'h', 'b' or 'n') utilize investment techniques to mitigate currency risk between the underlying investment currency(ies) of the fund and the currency of the hedged share class. The costs of doing so will be charged to the share class and there is no guarantee that such hedging will be effective.

Performance data will be displayed when a share class has more than 1 year history of returns.

The manager is not constrained by the fund's benchmark(s), which is (are) used for performance comparison purposes only.

The investment policy of the fund changed as at 1 October 2022, with the addition of a minimum commitment to sustainable investments. The performance prior to this date was achieved without this consideration.

Effective 1 October 2022, the comparator benchmark for the fund changed to 50% Bloomberg Global Aggregate Bond Index (Hedged to USD) and 50% MSCI AC World Net Index. Prior to this change, the comparator benchmark was 60% Bloomberg Global Aggregate Bond Index (Hedged to USD) and 40% MSCI AC World Net Index. Historical benchmark representations have not been restated.

KEY FUND RISKS

ABS and MBS - Asset-Backed Securities (ABS) and Mortgage-Backed Securities (MBS) may be subject to greater liquidity, credit, default and interest rate risk compared to other bonds. They are often exposed to extension and prepayment risk. **China Interbank Bond Market** - The China Interbank Bond Market may subject the fund to additional liquidity, volatility, regulatory, settlement procedure and counterparty risks. The fund may incur significant trading and realisation costs. **Contingent convertible bond** - Contingent Convertible Bonds may be subject to additional risks linked to: capital structure inversion, trigger levels, coupon cancellations, call extensions, yield/valuation, conversions, write downs, industry concentration and liquidity, among others. **Country (China)** - Chinese investments may be subject to higher levels of risks such as liquidity, currency, regulatory and legal risks due to the structure of the local market. **Country (Russia and Ukraine)** - Russian and Ukrainian investments may be subject to higher risks associated with custody and counterparties, liquidity, market disruptions, as well as strong or sudden political risks. **Credit** - Credit risk arises when an issuer's financial health deteriorates and/or it fails to fulfill its financial obligations to the fund. **Currency** - Currency exchange rate movements could reduce investment gains or increase investment losses. **Default** - Default risk may occur if the issuers of certain bonds become unable or unwilling to make payments on their bonds. **Derivatives** - derivatives may result in losses that are significantly greater than the cost of the derivative. **Distressed or defaulted debt** - Distressed or defaulted debt securities may bear substantially higher degree of risks linked to recovery, liquidity and valuation. **Emerging markets** - Emerging markets are less established than developed markets and therefore involve higher risks. **High yield bond** - High yield debt securities are generally subject to greater risk of issuer debt restructuring or default, higher liquidity risk and greater sensitivity to market conditions. **Interest rate** - Interest rate risk is the potential for losses in fixed-income investments as a result of unexpected changes in interest rates. **Issuer concentration** - Issuer concentration risk may result in performance being more strongly affected by any business, industry, economic, financial or market conditions affecting those issuers in which the fund's assets are concentrated. **Prepayment and extension** - Mortgage- and asset-backed securities could increase the fund's sensitivity to unexpected changes in interest rates. **Sector concentration** - Sector concentration risk may result in performance being more strongly affected by any business, industry, economic, financial or market conditions affecting a particular sector in which the fund's assets are concentrated. **Small and mid-cap** - Small and mid-size company stock prices can be more volatile than stock prices of larger companies. **Total return swap** - Total return swap contracts may expose the fund to additional risks, including market, counterparty and operational risks as well as risks linked to the use of collateral arrangements.

Credit ratings for the securities held in the fund are provided by Moody's, Standard & Poor's and Fitch and are converted to the Standard & Poor's nomenclature. A rating of "AAA" represents the highest-rated securities, and a rating of "D" represents the lowest-rated securities. When a rating is available from all three agencies, the median rating is used. If there are two ratings, the lower rating is used and if only one rating is available, that rating is used. If a rating is not available, the security is classified as Not Rated (NR). The rating of the underlying investment vehicle is used to determine the creditworthiness of credit default swaps and sovereign securities. The fund is not rated by any agency. U.S. Government Agency securities, if any, may include conventional pass-through securities and collateralized mortgage obligations. This category may include rated and unrated securities.
