What is this product?

Type:
The Fund is a sub-Fund of M&G (Lux) Investment Funds 1, a société d'investissement à capital variable (SICAV), organised as an umbrella fund with segregated liability between sub-Funds. Governed and established under Luxembourg Law as an Undertaking for Collective Investment in Transferable Securities (UCITS).

Objective:
The Fund aims to provide a combination of capital growth and income to deliver a return that is higher than that of the global floating rate high yield bond market over any five-year period.

Core investment: at least 70% of the Fund is invested in high yield floating rate notes (FRNs) issued by companies or governments from anywhere in the world and denominated in any currency. The FRNs are held directly and indirectly via derivatives combined with physical bonds. The Fund also invests in asset-backed securities. The Fund aims to hedge any non-US dollar assets back to US dollar.

Other investments: the Fund may invest in cash or assets that can be turned quickly into cash.

Derivatives usage: for investment purposes and to reduce risk and cost.

Strategy in brief: the Fund is designed to provide income while minimising the negative impact of rising interest rates by investing mainly in FRNs. The Fund focuses on bonds issued by companies with below investment grade credit ratings, which typically pay higher levels of interest to compensate investors for the greater risk of default. The investment process of the fund is based on the bottom-up analysis of individual bond issues whilst remaining aware of macroeconomics developments. Spreading investments across issuers, industries and countries is an essential element of the Fund's strategy and the investment manager is assisted in the selection of individual bonds by an in-house team of credit analysts.

Benchmark: ICE BofAML Global Floating Rate High Yield Index (3% constrained) USD Hedged
The benchmark is a comparator against which the Fund's performance can be measured. The index has been chosen as the Fund's benchmark as it best reflects the scope of the Fund's investment policy. The benchmark is used solely to measure the Fund's performance and does not constrain the Fund's portfolio construction. The Fund is actively managed.The investment manager has complete freedom in choosing which investments to buy, hold and sell in the Fund. The Fund's holdings may deviate significantly from the benchmark's constituents. For unhedged and currency hedged share classes, the benchmark is shown in the share class currency.

Intended Retail Investor:
The Fund is for retail and institutional investors who want a combination of capital growth and income from a portfolio of mainly high yield corporate or government floating rate notes. The return on your Fund is directly related to the value of its underlying assets, which is determined by the credit rating and the markets' view of the debt issuer, as well as reflecting broader economic and political themes. As an investor your capital is at risk. The value of your portfolio, and any income you may receive from it, can go down as well as up. You may get back less than you originally invested.
Any income from the Fund may be paid out to you quarterly.

Term: The Fund has no set maturity date but is designed to be held for a minimum of 5 years. However, it is possible for the Directors of the company to terminate the Fund, without the prior consent of the shareholders, where it is deemed to be uneconomic to run or in the best interests of shareholders. Refer to the Prospectus for more information.

What are the risks and what could I get in return?

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product may lose money because of movements in the markets or because we are not able to pay you.

The risk indicator assumes you keep the product for 5 year(s). This product has no maturity date.
We have classified this product as 2 out of 7, which is a low risk class.

Performance scenarios

The scenarios shown illustrate how your investment could perform. You can compare them with the scenarios of other products.
The scenarios presented are an estimate of future performance based on evidence from the past on how the value of this investment varies, and are not an exact indicator. What you get will vary depending on how the market performs and how long you keep the investment/product.
The stress scenario shows what you might get back in extreme market circumstances, and it does not take into account the situation where we are not able to pay you.
The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the fund over the last 15 years. Markets could develop very differently in the future.

What happens if M&G Luxembourg S.A. is unable to pay out?

The assets of the Fund are held in safekeeping by the Depositary detailed in the prospectus. In the event of the insolvency of the Manager, the Fund's assets in the safekeeping of the Depositary will not be affected. However, in the event of the Depositary's insolvency, or someone acting on its behalf, the Fund may suffer a financial loss. However, this risk is mitigated to a certain extent by the fact the Depositary is required by law to segregate its own assets from the assets of the Fund. The Depositary will also be liable to the Fund and the investors for any loss arising from, among other things, its negligence, fraud or intentional failure properly to fulfil its obligations (subject to certain limitations). The Depositary is required by Luxembourg law to be member of the Fonds de Garantie des Dépôts Luxembourg (FGDL, the Luxembourg Deposit Guarantee Fund) https://www.cssf.lu/en/protection-of-depositors-and-investors/

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.
