

Global Small Cap Equity Fund

OBJECTIVES AND PROCESS

- Seeks long-term capital appreciation
- Invests at least two-thirds of its assets in equity securities of small-capitalisation companies located worldwide
- Invests in no fewer than three countries and may invest more than 25% in any one country
- Seeks to identify companies that are well managed and have flexible balance sheets, sustainable cash flows and undervalued relative to their intrinsic value
- Uses a negative screen to exclude securities issued by companies based on their exposure to ESG risks
- Invests principally in equity securities of global small-capitalisation companies (within the MSCI World Small Cap Index market-cap range at the time of purchase) but can invest up to 10% in emerging markets (companies that operate from countries in the MSCI Emerging Markets Index)
- May use futures/derivatives for hedging or efficient portfolio management purposes

KEY RISKS

Market risk: securities may decline in value due to factors affecting securities markets generally, and equity securities generally have greater price volatility than debt securities.

Global investment risk: securities of certain jurisdictions may experience more rapid and extreme changes in value and may be affected by uncertainties such as international political developments, currency fluctuations and other developments in the laws and regulations of countries in which an investment may be made.

Smaller-company securities risk: securities of companies with smaller market capitalisations tend to be more volatile and less liquid than securities of larger companies. **ESG risk:** applying an ESG screen for security selection may result in lost opportunity in a security or industry resulting in possible underperformance relative to peers, ESG screens are dependent on third party data and errors in the data may result in the incorrect inclusion or exclusion of a security.
