KEY INVESTOR INFORMATION

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

UBAM - Select Horizon, a sub-fund of UBAM

Class: AC USD (Capitalisation) LU2002006836

UBAM is managed by UBP Asset Management (Europe) S.A.

Objectives and investment policy

The Fund seeks to grow your capital and generate income by investing primarily in a large diversified asset allocation with a long-term horizon including any kind of bonds, Convertible bonds and any kind of equities without any geographic constraints.

Exposure may be direct or through regulated UCITS and non-UCITS funds.

The non-UCITS funds will have an investment policy and a risk exposure similar to the UCITS funds and will be submitted to a regulatory supervision equivalent to a UCITS.

The Fund is actively managed.

The Fund invests in a range of currencies. These investments may or may not be hedged at the Investment Manager's discretion.

The Fund is not managed in reference to a benchmark.

The Fund may invest up to:

- 100% of its net assets in High yield
- 100% of its net assets in Emerging countries
- 100% of its net assets in equity
- 20% of its net assets in Contingent Convertible bonds (CoCos).

High yield bonds are issued by companies whose business is more sensitive to the economic cycle and pay higher interest. The return on such securities, in the same way as their level of risk, is therefore higher than traditional bond products.

The Fund's base currency is USD.

As a Fund with mixed strategy, its holdings can move in line with or return less than the broad stock market, so investors should be aware that the value of their holdings could fall and that they may not get back their initial investment.

Any income received by the Fund is reinvested (capitalisation share class).

Investors in the Fund can subscribe and redeem units on any business day in Luxembourg.

Details of the closing days are available here: <https://www.ubp.com/en/our-offices/ubp-asset-management-europe-sa>.

The recommended holding period is minimum 3 years.

Risk and reward profile

With lower risk, With higher risk,
potentially lower rewards potentially higher rewards

This indicator represents the annual historical volatility of the Fund over a 3-year period.

Risk category 5 reflects a high potential gain and/or loss in the value of the portfolio.

Historical data such as that used to calculate the synthetic indicator cannot be considered as a reliable indication of the Fund's future risk profile.

The risk category associated with the Fund is not guaranteed and may change over time.

The lowest risk category does not mean "risk free".

Your initial investment is not guaranteed.

Significant risk(s) for the Fund not taken into account in this indicator include the following:

Counterparty risk: The use of over-the-counter derivatives exposes the Fund to a risk that the counterparty to the transactions will fully or partially fail to

honour its contractual obligations. This may result in a financial loss for the Fund.

Credit risk: The Fund invests in bonds, cash or other money market instruments. There is a risk that the issuer may default. The likelihood of this happening will depend on the credit-worthiness of the issuer. The risk of default is usually greatest with bonds that are rated as sub-investment grade.

Currency risk: The Fund invests in overseas markets. It can be affected by changes in exchange rates which may cause the value of your investment to decrease or increase.

Emerging countries risk: The Fund invests in overseas countries which carry a higher risk than investing in larger established countries. Investments in Emerging countries are likely to experience greater rises and falls in value and may suffer trading problems. A Fund which invests in Emerging countries rather than more developed countries may encounter difficulties when buying and selling investments. Emerging countries are also more likely to experience political uncertainty and investments held in these countries may not have the same protection as those held in more developed countries.

Liquidity risk: Liquidity risk exists when particular investments are difficult to purchase or sell. This can reduce the Fund's returns because the Fund may be unable to trade at advantageous times or prices.

Full details of risks are disclosed in the chapter "Risk Factors" in the prospectus.
