

Key Investor Information

This document provides key information for investors in this Sub-fund. It is not marketing material. The information it contains is required by law to help you understand the features of the Sub-fund along with the risks and other related information, should you decide to invest. You are advised to read it so that you can make an informed decision about whether to invest.

AZ Bond - Sustainable Hybrid (the “Sub-fund”) is a sub-fund of AZ Fund 1 (the “Fund”)

B-AZ FUND (ACC) class - ISIN LU2056384667

B-AZ FUND (DIS) class - ISIN LU2056384741

The Fund is managed by Azimut Investments S.A. (the **Management Company**).

OBJECTIVES AND INVESTMENT POLICY

Objectives

The Sub-fund’s investment objective is to provide regular income and short- and medium-term capital growth.

Investment policy

The Sub-fund aims to maintain an overall ESG (Environmental, Social and Governance) rating of at least BBB for its portfolio, calculated on the basis of ESG ratings awarded by MSCI ESG Research to each of the securities it holds. More information on the Sub-fund’s ESG strategy is available in the Prospectus.

The Sub-fund invests primarily in hybrid/subordinated bonds and/or perpetual bonds, issued by both financial and non-financial institutions. The Sub-fund invests between 75% and 100% of its net assets in debt securities issued by companies with registered offices in developed countries.

The Sub-fund may invest up to 25% of its net assets in debt securities issued by governments, supranational institutions or government bodies in developed countries and/or in debt securities from issuers located in emerging countries.

At least 60% of the Sub-fund’s net assets are invested in debt securities rated BB+ or higher. The Sub-Fund may also invest up to 20% of its net assets in contingent convertible (CoCo) bonds.

The Sub-fund uses the main financial derivatives for investment purposes and/or to hedge against risks. Leverage calculated based on the sum of notionals method: maximum 200%.

The Sub-fund is actively managed and is not managed in relation to a benchmark index. For the purpose of calculating the performance fee, the following benchmark is used: ICE BofA Euro Non-Financial Subordinated Index.

Specific information on units

You may request the sale of your units on a daily basis, except in certain circumstances (see the prospectus).

The Sub-fund will distribute potential dividends to unitholders of the B-AZ FUND (DIS) class and reinvest potential dividends for unitholders of the B-AZ FUND (ACC) class.

Recommendation: this Sub-fund may not be appropriate for investors who plan to withdraw their money within five years.

Definitions

Actively managed Sub-fund: a Sub-fund for which the manager has the flexibility to select the securities that make up the portfolio, in line with the objectives and investment policy laid out.

RISK AND REWARD PROFILE

Definition of the risk and reward indicator

The aim of the risk indicator is to provide you with an evaluation of changes in unit prices. Risk category 4 means that the unit price fluctuates averagely. As a result, the risk of loss and the expected return may also be average. However, even the lowest category does not mean that the investment is “risk free”.

Historical data may not provide reliable information about the future. The displayed risk indicator is not guaranteed and is likely to change over time. There is no capital guarantee and the value of the Sub-fund is not protected.

Reason why the Sub-fund is classified in this risk category

This Sub-fund’s risk level primarily reflects the investment positions in hybrid and/or perpetual financial instruments according to the volatility of the market within the scope of the predefined margin.

Particular risks for the Sub-fund not included in the indicator:

Emerging market risk: risk associated with investing in emerging markets. Due to their political instability, the volatility of the exchange rate of their currencies and the limited number of investment opportunities, the risk of these markets is greater than in countries considered as developed.

Credit risk: issuers of debt securities, even those with a very high rating, may not be able to make payments to investors, or the fear associated with this risk may result in a decrease in the value of their debt securities.

Risks associated with convertible bonds: investments in convertible bonds are sensitive to fluctuations in underlying share prices (the “share component” of the convertible bond) while offering some form of protection for a portion of the capital (the “bond floor” of the convertible bond). The greater the share component, the lower the capital protection. As a result, a convertible bond that has increased significantly in market value as a result of a rise in the underlying share price will have a risk profile that is more similar to that of a share. On the other hand, the risk profile of a convertible bond whose market value has fallen to its bond floor as a result of a reduction in the underlying share price will, from this point on, be similar to that of a conventional bond.

Risks associated with investment policies that take an ESG (Environmental, Social and Governance criteria) approach: the use of ESG criteria can affect the performance of a Sub-fund, which may, therefore, differ from that of other Sub-funds with similar investment policies but which do not take ESG criteria into account.

Other investment risks are specified in the risks section of the prospectus.

CHARGES

The charges you pay are used to cover the costs of running the Sub-fund, including marketing and distribution costs. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest:	
Entry charge	None
Exit charge	2.50%
The percentage indicated is the maximum that may be taken out of your capital before it is invested and/or before the proceeds of your investment are paid out. Please contact your financial advisor or distributor for the actual charges.	
Charges deducted from the Sub-fund over a year:	
Ongoing charges	2.73%
Charges deducted from the Sub-fund under specific conditions:	
Performance fee	The management fee is increased or reduced on a straight-line basis by a variable management fee, up to a maximum of 20% of the amount of the management fee, based on the difference between the performance of the class and the performance of the ICE BofA Euro Non-Financial Subordinated Index benchmark index over the same performance period (so-called “fulcrum” variable management fee). The actual amount of fees charged to the Sub-fund during the last financial year was 0.02%. This amount was calculated using a calculation method that is no longer in force. Since 01/04/2022, a “fulcrum fee model” has been applied. In some cases, a performance fee may be levied even when the performance of the Sub-fund is negative.

The amount of ongoing charges indicated is an estimate because there has been a change in the charges. This amount may change from year to year.

Ongoing charges do not take into account the following:

- performance fees and
- costs of portfolio transactions, unless the Sub-fund pays entry or exit charges when it buys or sells units in another undertaking for collective investment.

To find out more about the charges, please refer to the prospectus available at www.azimutinvestments.com.

PAST PERFORMANCE

- The graph shown is not a reliable indication of future performance.
- The annual performance is calculated after deducting the fees charged to the Sub-fund.
- The Sub-fund was created in 2020.
- The B-AZ FUND (ACC) class was launched in 2020.
- The B-AZ FUND (DIS) class was launched in 2020.
- Past performance is calculated in EUR.
- The performance of the Sub-fund is not linked to that of the benchmark index. The latter is intended to be used to calculate the performance fee (fulcrum).

A*: Since 01/04/2022, a “fulcrum fee model” has been applied. Benchmark index up to 01/04/2022: 3M Euribor (EUR003M) + 2.5%.
