KEY INVESTOR INFORMATION

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

UBAM - SNAM Japan Equity Responsible, a sub-fund of UBAM

Class: IC JPY (Capitalisation) LU1861470497

UBAM is managed by UBP Asset Management (Europe) S.A.

Objectives and investment policy

The Fund seeks to grow your capital and generate income by investing primarily in Japanese equities or equivalent.

The Fund is actively managed and relatively concentrated (typically containing 25-60 names) with low turn-over.

The Fund has two sustainability objectives:

- maintain an average portfolio's Environmental, Social and Governance (ESG) score, based on the Investment Manager's analyses of companies ESG profiles using a proprietary scoring methodology, above the median ESG Score
- evaluate the strategies deployed by companies in the field of oil & gas extraction and electricity generation to transition to a lower-carbon economy.

First step, the Investment Manager's applies ESG exclusion criteria, combined with its sustainability assessment of companies from the eligible investment universe defined as the best 300 Japanese listed stocks ranked according to the above mentioned ESG proprietary methodology among the 1000 most liquid Japanese listed stocks.

Second step, the Investment Manager's applies an ESG approach which is further embedded in the valuation and investment process of the Fund and the selection of stocks include ESG criteria when assessing stocks' fair value and normalized profitability.

ESG considerations may include carbon footprint as well as global norms compliance, social and corporate governance standards.

The ESG analysis covers 100% of the Fund's portfolio.

A performance fee in reference to the Tokyo SE (TOPIX) Total Return Index JPY (the "Benchmark") is applied to some share classes. The Benchmark is not representative of the risk profile of the Fund. The performance of the Fund is likely to be significantly different from that of the Benchmark because the Investment Manager has significant discretion to deviate from its securities and weighting.

The Benchmark is not aligned with the environmental and/or social characteristics promoted by the Fund.

The Fund's base currency is JPY.

As an equity fund, its holdings can move in line with or return less than the broad stock market, so investors should be aware that the value of their holdings could fall and that they may not get back their initial investment.

Any income received by the Fund is reinvested (capitalisation share class).

Investors in the Fund can subscribe and redeem units on any business day in Luxembourg except days where the decisive market is closed: Japan (JP).

Details of the closing days are available here: <https://www.ubp.com/en/our-offices/ubp-asset-management-europe-sa>.

The recommended holding period is minimum 5 years.

Risk and reward profile

This indicator represents the annual historical volatility of the Fund over a 5-year period.

Risk category 6 reflects a very high potential gain and/or loss in the value of the portfolio.

Historical data such as that used to calculate the synthetic indicator cannot be considered as a reliable indication of the Fund's future risk profile.

The risk category associated with the Fund is not guaranteed and may change over time.

The lowest risk category does not mean "risk free".

Your initial investment is not guaranteed.

Significant risk(s) for the Fund not taken into account in this indicator include the following:

Counterparty risk: The use of over-the-counter derivatives exposes the Fund to a risk that the counterparty to the transactions will fully or partially fail to honour its contractual obligations. This may result in a financial loss for the Fund.

ESG and Sustainability risk: It may result in a material negative impact on the value of an investment and performance of the Fund. Assessment of sustainability risks is complex and requires subjective judgments, which may be based on data which is difficult to obtain and/or incomplete, estimated, out of date or otherwise materially inaccurate. All or part of said data may come/originate from third parties.

Liquidity risk: Liquidity risk exists when particular investments are difficult to purchase or sell. This can reduce the Fund's returns because the Fund may be unable to trade at advantageous times or prices.

Full details of risks are disclosed in the chapter "Risk Factors" in the prospectus.
