J O Hambro Capital Management UK Growth Fund

X Non-distributing USD IE00BLLV8718

A sub-fund of J O Hambro Capital Management Umbrella Fund PLC

Managed by JOHCM Funds (Ireland) Limited

Objectives and investment policy

- The Fund's investment objective is to achieve long-term capital growth.
- The Fund will invest in the equity securities of solid, well managed companies domiciled or exercising the predominant part of their economic activities in the UK and capable of generating growth throughout the economic cycle. At all times at least three quarters of the Fund's total assets will be invested in such securities. The Fund will invest in a broad range of equity market capitalisations, ranging from FTSE100 companies to smaller companies.
- The Fund promotes environmental and social characteristics throughout the investment decision making process.
- The Fund is actively managed which means that the fund managers use their expertise to pick investments to achieve the objective of the Fund.
- Performance of the Fund may be measured against the FTSE All-Share TR Index (the "Index"). The Index is used as a target benchmark for the Fund. The use of the Index does not limit the investment decisions of the fund manager so the shareholdings of the Fund may differ significantly from those of the Index. The Index is used as it represents the performance of all eligible companies listed on the London Stock Exchange's main market, which pass screening for size and liquidity. The index captures 98% of the UK's market capitalisation.
- Any income the Fund generates for this share class will not be distributed but continued to be accrued in the share price.
- You can buy and sell shares in the Fund on any day which is a working day in Dublin and the UK. Instructions received before 12:00 noon will be processed that day. Instructions received after 12:00 noon will be processed at 12:00 noon on the following working day.
- Recommendation: The Fund may not be suitable for those investors who plan to withdraw their money within five years.
- Index data: FTSE International Limited ("FTSE") © FTSE 2022. "FTSE®" is a trade mark of the London Stock Exchange Group companies and is used by FTSE International Limited under licence. All rights in the FTSE indices and / or FTSE ratings vest in FTSE and/or its licensors. Risk and reward profile

Lower risk Typically lower rewards					Higher risk Typically higher rewards	
1	2	3	4	5	6	7

The risk and reward indicator is calculated on the basis of the share class volatility (the ups and downs in its value) over the prior 5 year period.

The risk and reward indicator:

- is based on simulated historical performance data and may not be a reliable indication for the future;
- is not guaranteed and may change over time.
- As this share class has not been in existence for 5 years, simulated performance data has been used.
- The lowest category does not mean that a share class is risk free.

The share class category reflects the following factors:

- Higher volatility can result from investments in shares as their value may fluctuate more than other financial instruments, such as bonds.
- Your initial investment is not guaranteed.
- The Fund may invest in shares priced in currencies other than the currency of the share class. This may result in the value of the share class increasing or decreasing due to changes in foreign exchange rates.

In addition to the risk captured by the indicator, the Fund value may be affected by:

- Any change in the Company's tax status or in legislation could affect the value of investments held by the Company.
- Political and/or regulatory risks.
- Management risk: The companies in which the Fund invests may lack

management depth or the ability to generate funds to facilitate growth. Also, companies with new products or services could sustain significant losses if projected markets do not materialise. Whilst such companies offer greater growth potential than more established companies, investment involves greater risk.

- Liquidity risk: The risk that some securities held by the Fund may be difficult or impossible to sell at the desired time and price. The Fund's investments include shares in small-cap companies. Small-cap companies tend to be traded less frequently and in lower volumes than larger companies making them potentially less liquid and more volatile.

Investors should note that a more detailed description of risk factors is set out in full in the Prospectus.
