

A sub-fund of FundLogic Global Solutions Unit Trust, an Irish alternative investment fund

Investment strategy and objective

The investment objective of FundLogic Global Solutions MSCI All Country World Index Trust (the "Fund") is to provide exposure to the performance of the MSCI ACWI Net Total Return Index (the "Index"), denominated in USD before all fees and expenses charged to, or incurred by, the Fund.

The Fund uses a passive process to track the performance of the Index. In this regard, the Fund invests in a basket of transferable securities (the "Funding Assets"), and uses derivatives such as total return swaps to achieve its investment objective. The use of these derivatives allows the Fund to exchange the performance of the Funding Assets against the performance of the Index. Please refer to the section headed "Illustrative Example of the Fund Structure" below for more information.

About the Index

The Index is a broad global equity benchmark that represents large and mid-cap equity performance across 23 developed markets countries and 26 emerging markets countries. It covers approximately 85% of the global investable equity opportunity set. The Index is a total return net index which is calculated and maintained by MSCI Inc. ("MSCI").

1. The Tracking Error is computed as the annualised standard deviation of the difference in performance between the return of the fund and its benchmark.

Illustrative Example of the Fund Structure

- 1. Unit Purchase:** Investor buys units for cash
- 2. Purchase of a Selection of Funding Assets:** Fund invests the cash proceeds in a basket of Funding Assets. These are held in a segregated account with the depositary
- 3. Financing Swap:** Fund enters into a swap in order to swap out the performance of the Funding Assets
- 4. Performance Swap:** Fund enters into a swap in order to get exposure to the Index performance

Key Features and Risks

Key Features:

- Liquidity with 95 calendar days notice for redemption
- The Fund's supplement provides a limit of counterparty exposure of 10%.

Risks:

- Past performance and/or simulated data may not be a reliable indicator of the Fund's future performance.
- The Fund is neither capital guaranteed nor protected.
- There is no assurance that the Fund will achieve its investment objective and you may lose money. The Fund's performance will be affected by market movements.
- Derivatives Counterparty Risk: The Fund will be exposed to the risk of default of the parties with which it transacts. In particular, if Morgan Stanley and/or its affiliates became insolvent, the Index return obtained through derivatives might fail.
- Operational Risk: The insolvency of any institutions providing services such as safekeeping of assets (the Fund's Depositary and Sub-Custodian) may expose the Fund to financial loss.
- More information in relation to risks in general may be found in the "Risk Factors and Special Considerations" section of the Prospectus.

Counterparty Risk Mitigation

On a daily basis FundLogic SAS monitors the mark-to-market value of the swap to ensure that it is in line with the Funding Assets and that the counterparty ratio does not breach the counterparty investment restrictions outlined in the Fund's supplement.

Risk Warning

Past performance is not a guarantee of future performance. The value of the investments and the income from them can go down as well as up and an investor may not get back the amount invested. There can be no assurance that the Fund will achieve its investment objectives. The information presented does not constitute, and should not be construed as, investment advice or recommendations with respect to the securities or investments mentioned herein or to participate in any particular trading strategy.

Investments may be in a variety of currencies and therefore changes in rates of exchange between currencies may cause the value of investments to decrease or increase. Furthermore, the value of investments may be adversely affected by fluctuations in exchange rates between the investor's reference currency and the base currency of the investments.

Investments in derivative instruments carry certain inherent risks such as the risk of counterparty default, and before investing you should ensure you fully understand these risks. Use of leverage may also magnify losses as well as gains to the extent that leverage is employed. These investments are designed for investors who understand and are willing to accept these risks. Performance may be volatile, and an investor could lose all or a substantial portion of his or her investment.
