## KEY RISKS

**ESG Strategy Risk:** Risks associated with investment policies that take an ESG approach. The use of ESG criteria can affect the performance of a Sub-fund, which may, therefore, differ from that of other Sub-funds with similar investment policies but which do not take ESG criteria into account.

**Leverage Risk:** Risks associated with the use of leverage. The Sub-fund may achieve some leverage by using derivative financial instruments to implement its investment strategy. The use of leverage creates particular risks and may significantly increase the Sub-fund's investment risk.

**Long Short Strategy Risk:** Risk associated with the "long/short" strategy. This risk is linked to long and/ or short positions designed to adjust the net exposure to the market. The Fund may incur significant losses if its long and short positions simultaneously experience unfavourable trends in opposite directions.
