

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

This document may be representative of distribution and capitalisation units as indicated in the Practical Information section.
This Fund is managed by CA Indosuez Wealth (Asset Management)

The objective of the Fund is to provide capital gains by investing mainly in shares of companies worldwide (including in Emerging Markets), without restriction of size, activity or country, in respect of a thematic investment process.

"Return to shareholders": generate a positive performance over the medium-long term period through the selection of companies characterized by an active shareholder remuneration policy, such as payment of dividends and significant share buy back programs.

"Quality at a reasonable Price": generate a positive long-term performance by investing in quality companies whose valuation does not fully integrate the strong fundamentals.

"International Value": generate a positive performance over the medium-long term period through the selection of companies characterized by a 30% of their revenues generated internationally.

"Smart Value": generate a positive long-term performance by investing in companies offering (particularly) attractive valuation levels while having better fundamentals than their peers.

The Fund will not invest more than 10% of its assets in units of other UCITS, including UCITS ETFs.

Investment in UCITS will be made in accordance with point C of Section 5 “Investment restrictions” of the prospectus.

The Fund can invest on an ancillary basis (i.e. up to 49% of its net assets), in money market UCITS funds and in fixed income UCITS funds with a daily liquidity.

The Fund can invest in all currencies and currency risks may be hedged against the reference currency of the Fund.

The Fund may invest in all currencies and currency notes may be hedged against the reference currency of the Fund.

The Fund may use financial derivatives. Derivative financial instruments, whether negotiated on a regulated market that operates regularly and that is recognized and open to the public or dealt on over-the-counter markets, will be aimed at covering risks, ensuring efficient management of the portfolio and reaching the objective described here above.

Until 31 July 2022 included, the reference benchmark of the Fund is composed of 50% Eurostoxx (SX5T) and 50% S&P (SPTR500N) expressed in euros. As from 1 August 2022, The reference benchmark of the Fund shall be 50% MSCI Europe Net Return EUR Index (M7EU) + 50% MSCI USA Net Return USD Index (M1US) expressed in euros. The Fund's objective is to outperform this benchmark. The Fund is actively managed, meaning that it may significantly differ from the benchmark in terms of its composition and that there is no restriction regarding the extent to which the Fund's portfolio may deviate from the benchmark. The investment scope is not limited to the benchmark index; the manager may purchase securities or invest in sectors which are not cited, for example in order to benefit from specific circumstances or to adapt to market conditions.

The Fund falls under article 8 of the Disclosure Regulation. It does not take into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation and its portfolio alignment with such Taxonomy Regulation is not calculated. Therefore, the “do not significant harm” principle does not apply to any of the investments of this financial product.

The ESG screening applies to at least 90% of the portfolio. The average ESG rating of the Fund exceeds the average ESG rating of its initial investment universe, namely worldwide equity markets (including emerging markets).

Risk Category 6 reflects very high potential gains and/or losses for the portfolio. This is due to investments in international equities, shares of UCITS and Money Market Instruments without any geographic constraints.

Historical data such as that used to calculate the synthetic indicator cannot be considered as a reliable indication of the Fund's future risk profile.

The risk category associated with the Fund is not guaranteed and may change over time.

The lowest risk category does not mean "risk free".

Your initial investment is not guaranteed.

Significant risk(s) for the Fund not taken into account in this indicator include the following:

Concentration risk: To the extent that the Fund's investments are concentrated in a particular country, market, industry or asset class, the Fund may be susceptible to loss due to adverse occurrences affecting that country, market, industry or asset class.

Currency risk: The Fund invests in overseas markets. It can be affected by changes in exchange rates which may cause the value of your investment to decrease or increase.

Investments into other UCIs/UCITS: A Fund which invests in other collective investment schemes will not have an active role in the day-to-day management of the collective investment schemes in which it invests. Moreover, a Fund will generally not have the opportunity to evaluate the specific investments made by any underlying collective investment schemes before they are made. Accordingly, the returns of a Fund will primarily depend on the performance of these unrelated underlying fund managers and could be substantially adversely affected by the unfavourable performance.

Emerging market risk: The Fund may invest in developing overseas markets which carry a higher risk than investing in larger established markets. Investments in emerging markets are likely to experience greater rises and falls in value and may suffer trading problems.

Risk linked to the use of derivative instruments: The Fund uses derivative instruments, which means financial instruments whose value depends on those of an underlying asset. Therefore, fluctuations in the price of an underlying asset, even if minor, could lead to significant variations in the price of the corresponding derivative instrument. With the use of over-the-counter derivatives, there is a risk that the counterparty to the transactions will wholly or partially fail to honour its contractual obligations. This may result in a financial loss to the Fund.

Liquidity risk: Liquidity risk exists when particular investments are difficult to purchase or sell. This can reduce the Fund's returns because the Fund may be unable to transact at advantageous times or prices. This can be the result of shocks of unprecedented intensity and severity such as but not limited to pandemics and natural disasters.
