## OBJECTIVES AND INVESTMENT POLICY

### Objectives

The Sub-fund's investment objective is long-term capital growth.

### Investment policy

The Sub-fund seeks to achieve its investment objective by actively managing a portfolio of shares issued by Italian companies, preferably small and mid-cap companies, i.e. those that are not part of the FTSE MIB index.

The Sub-fund invests at least 80% of its net assets in equities and equivalent securities of Italian companies, including at least 70% of its net assets in equities and equivalent securities issued by companies that are not part of the FTSE MIB index.

The Sub-fund may also invest up to 20% of its net assets in shares of European companies with a market capitalisation of less than 10 billion euros at the time of acquisition.

The Sub-fund may also invest up to 10% of its net assets in convertible bonds.

The Sub-fund uses the main financial derivatives for investment purposes and/or to hedge against risks. Leverage calculated based on the sum of notionals method: maximum 150%.

The Sub-fund is actively managed and is not managed in relation to a benchmark index. For the purpose of calculating the performance fee, the following benchmark is used: 90% FTSE Italia Mid Cap Index EUR TR + 10% Bloomberg Euro Treasury Bills 0-3 Months Index.

### Specific information on units

You may request the sale of your units on a weekly basis, except in certain circumstances (see the prospectus).

The Sub-fund will distribute potential dividends to unitholders of the A-AZ FUND (DIS) class and reinvest potential dividends for unitholders of the A-AZ FUND (ACC) class.

### Definitions

**Actively managed Sub-fund:** a Sub-fund for which the manager has the flexibility to select the securities that make up the portfolio, in line with the objectives and investment policy laid out.

## RISK AND REWARD PROFILE

### Definition of the risk and reward indicator

The aim of the risk indicator is to provide you with an evaluation of changes in unit prices. Risk category 6 means that the unit price is very volatile. As a result, the risk of loss and the expected return may also be very high. However, even the lowest category does not mean that the investment is “risk free”.

Historical data may not provide reliable information about the future. The displayed risk indicator is not guaranteed and is likely to change over time. There is no capital guarantee and the value of the Sub-fund is not protected.

### Reason why the Sub-fund is classified in this risk category

This Sub-fund's risk level primarily reflects the investment positions in equities depending on market volatility within the predefined margin.

### Particular risks for the Sub-fund not included in the indicator:

**Risks associated with equities:** this refers to the financial risk associated with the direct or indirect holding of financial assets that represent the shares of a company. The value of equities can increase or decrease depending on the particular characteristics of the issuer (profitability, financial capacity) and the general developments of the stock markets.

**Concentration risk:** when the Sub-fund invests heavily in a company, sector or country that is significantly affected by an adverse event, its unit price may fall.

**Systemic risk:** this is the risk of circumstances such as an economic shock or political instability on the market in which the Fund invests causing a loss of value for all investments in the Fund.

Other investment risks are specified in the risks section of the prospectus.
