Important Information

Risks

An investment in the Fund involves a high degree of risk, including the risk that the entire amount invested may be lost. The Fund is primarily designed to purchase certain investments, which will introduce significant risk to the Fund, including asset performance, price volatility, administrative risk and counterparty risk. No guarantee or representation is made that any Fund's investment program will be successful, or that such Fund's returns will exhibit low correlation with an investor's traditional securities portfolio.

Any investment in the Fund will be deemed to be a speculative investment and is not intended as a complete investment program. Investment in the Fund is suitable only for persons who can bear the economic risk of the loss of their investment and who meet the conditions set forth in the PGIM Funds plc's Prospectus, Supplement and Key Investor Information Document (the "KIID") or Key Information Document (the "KID") (collectively the "Fund Documents"). There can be no assurances that the Fund will achieve its investment objective. Prospective and existing Investors should carefully consider the risks involved in an investment in the Fund, including, but not limited to, those discussed in the Fund Documents. Prospective and existing Investors should consult their own legal, tax and financial advisors about the risks of an investment in the Fund. Any such risk could have a material adverse effect on the Fund and its Shareholders.

The return may increase or decrease as a result of currency fluctuations. The use of financial derivative instruments may result in increased gains or losses within the Fund.

Where an investor's own currency is different from the currency of the Fund, the return on investment may be affected by fluctuations in the currency exchange rate. Also, the use of financial derivative instruments may result in increased gains or losses within the Fund. The NAV of the Fund is calculated on a daily basis and published on the Fund's website at the following address: www.pgimfunds.com.

Benchmark Risk: The Fund may be subject to market or other risks inherent in the asset class or securities market represented by a benchmark. The Fund's performance relative to that benchmark may be subject to wide variation depending on market conditions, or could move closely in line with that of the benchmark over certain periods. Even if the Fund achieves an excess return above the benchmark gross of fees, if the applicable fees and expenses exceed that excess return, investors should note that net performance would be less than the benchmark due to those fees and expenses.

Currency Risk: The value of the investments of the Fund designated in another currency may rise and fall due to exchange rate fluctuations.

Custodial Risk: Assets which are traded in markets where custodial and/or settlement systems are not fully developed may be exposed to risk in circumstances where the custodian will have no liability.

Emerging Market Risk: The Fund invests in emerging markets, which may experience political, market, social, regulatory, and/or economic instabilities. These instabilities may reduce the value of the Fund's investments.

Political Risk: The value of the Fund's investments may be affected by uncertainties such as international policy developments and changes in government policies. This can result in more pronounced risks where conditions have a particular impact on one or more countries or regions.

Quantitative Investing Risk: The use of quantitative investment methods present risks such as the use of flawed or incomplete underlying investment models or the risk of errors in the implementation of these models, which may result in its strategies not performing as expected.

Small Capitalization Companies: The Fund invests in small capitalization companies in developed and emerging market countries. The securities in smaller growth companies may be subject to more unstable market movements than larger, more established companies, due to greater business risk associated with small size, limited product lines, and financial and managerial resources.

Socially Responsible Investment Risk: The Fund may achieve lower returns than an equivalent fund which does not pursue a socially responsible mandate.

***MORNINGSTAR INFORMATION**

Morningstar measures risk-adjusted returns. The overall rating is a weighted average based on the Fund's 3-, 5-, and 10-year star rating. Source: Morningstar. Inception: 27 May 2020. Ratings 3yr 5/2912, 5yr N/A, 10yr N/A.

The Morningstar Rating for funds, or "star rating", is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The Morningstar Rating does not include any adjustments for sales loads. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods.
