## Fund details

Investment Manager	Holger Frey, Bruno Azevedo
Fund launch date	25.06.2020
Share class launch date	25.06.2020
Share class	UBHP
Share class currency	CHF
Distribution policy	Accumulating
Fund domicile	Luxembourg
ISIN	LU2176899370
Benchmark	MSCI World ESG Leaders (NR) (USD cross hedged to CHF)

## Investment Policy

The fund assets are invested in companies which offer impactful solutions with the potential to generate positive impact towards tackling environmental challenges. The investable universe is broken down into four sub-groups: sustainable infrastructure, resources, waste mitigation and carbon reduction technologies. The investment objective is long-term capital appreciation from actively managed exposure to this emerging secular market potential for solution oriented companies.

Investing involves risk including the risk of loss of capital. Past performance does not predict future returns. Neither simulated nor historical performance is a reliable indicator for current or future performance.

## Potential Risks

The Fund's risk and reward profile does not reflect the risk inherent in future circumstances that differ from what the Fund has experienced in the recent past. This includes the following events which are rare but can have a large impact.

- Credit risk: Issuers of assets held by the Fund may not pay income or repay capital when due. The Fund's investments generally have low credit risk.
- Liquidity risk: Assets cannot necessarily be sold at limited cost in an adequately short timeframe. Part of the Fund's investments may be prone to limited liquidity. The Fund will endeavor to mitigate this risk by various measures.
- Operational risk: Deficient processes, technical failures or catastrophic events may cause losses.
- Political and Legal risks: Investments are exposed to changes of rules and standards applied by a specific country. This includes restrictions on currency convertibility, the imposing of taxes or controls on transactions, the limitations of property rights or other legal risks.
- Sustainability risks: Sustainability risks are environmental, social or governance events or conditions that can have a material negative effect on the return, depending on the relevant sector, industry and company exposure.

The product's investment objectives, risks, charges and expenses, as well as more complete information about the product, are provided in the prospectus (or relevant offering document), which should be read carefully before investing.

**Investors may lose part or all of their invested amount.**

**The full offering documentation including complete information on risks may be obtained free of charge from a Credit Suisse client advisor, representative, or, where applicable, via Fundsearch (credit-suisse.com/fundsearch).**

**The investment promoted in this marketing material concerns the acquisition of units or shares in a fund and not of any underlying assets. The underlying assets are owned by the fund only.**

## Risk profile<sup>2</sup>

PRIIP SRI

Larger values (up to 7) indicate higher risk while lower values (up to 1) indicate lower risk.

<sup>2</sup> The risk indicator assumes you keep the Product for 7 years. The actual risk can vary significantly if you redeem at an early stage and you may get back less. The Summary Risk Indicator is a guide to the level of risk of this Product compared to other products. It shows how likely it is that the Product will lose money because of movements in the markets. Be aware of currency risk if your reference currency differs from the currency of the Product. You may receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. Investors shall note that the Product may be exposed to further risks such as operational, counterparty, political, sustainability and legal risks that are not included in the Summary Risk Indicator. This Product does not include any protection from future market performance so you could lose some or all of your investment.

## Performance commentary

The fund delivered a positive absolute return in the first quarter of 2024 but underperformed the benchmark. Despite the fund's outperformance in February and March, the rally in AI-related stocks in January drove outperformance of the benchmark over the quarter. Within our sub-themes, the best contribution came from the Sustainable Infrastructure sub-theme, where companies such as Installed Building Products (IBP) and Acuity Brands were the top contributors. IBP delivered strong quarterly results and guided further market strength as it is constructive on single-family housing demand in the US (IBP Q4 2023 earnings call, February 22, 2024); Acuity Brands reported positive trends in order rates, margin trends, and continued progress on new product developments (Acuity Brands Q1 2024 earnings call, January 9, 2024). Waste Mitigation also contributed positively, with Sweden-based Biotage being the strongest contributor. The company rallied after reporting a strong quarter, helped by its recent acquisition in the Bioseparations area. The Carbon Reduction Technologies sub-theme detracted the most from performance, with Nordic Semiconductor and SOITEC down as both companies maintained cautious guidance amid the ongoing industry-wide inventory destocking. Finally, the Resources sub-theme registered a mildly negative contribution, with renewable energy companies like Vestas and SolarEdge down, although wind turbine manufacturer Vestas delivered fourth-quarter results that confirmed an improving operating performance (Vestas, Q4 2023 earnings call, February 7, 2024).

## Market comments

The stock markets started the year on a strong footing, with indices such as the S&P 500 and Nasdaq 100 registering multiple all-time highs over the quarter. The S&P 500 clinched its best start of the year since 2019, despite escalating tensions between major global powers and despite major economies like Germany, the UK, and Japan slipping into recession (Bloomberg, April 1, 2024). Although the so-called "Magnificent Seven" accounted for 40% of the year-to-date performance of the S&P 500 (Reuters, March 28, 2024), the belief that the economy will remain resilient while inflation fades has prompted investors to look for opportunities beyond those megacaps, leading to a broadening of the current stock market rally into other sectors (Reuters, March 24, 2024).

In March the EU Council reached a provisional agreement on the Packaging and Packaging Waste Regulation (PPWR), which aims to reshape the sector. In addition to stating targets for recyclability and reuse of packaging materials, it requires member states to ensure separate collection of at least 90% of single-use plastic bottles and metal beverage containers per annum by 2029, or 80% by 2026 and a strategy to achieve the 90% target. Once finalized, the agreement is expected to strengthen the development of deposit return systems across the continent (European Council, March 4, 2024). Within the broader discussion around the rise of artificial intelligence (AI), we witnessed the emergence of data centers as a key topic. While the traditional risk factor in evaluating data center locations has been the availability of energy, we now see concerns around water availability emerging as a key risk factor (DataCenterKnowledge, March 12, 2024). As computing power rises, so does the need to efficiently power and cool data centers, thus fueling strong growth for the entire value chain, as highlighted by portfolio holding nVent (nVent earnings call, February 6, 2024). In the Clean Energy space there are contrasting pictures; while the solar industry is facing the challenge of higher-than-usual inventories, wind turbine manufacturers are witnessing strong order intake momentum as exemplified by Vestas, which had a record quarter of order intake, led by strong onshore activity, especially in the US (Nordex earnings call, February 29, 2024; Vestas earnings call, February 7, 2024).

## Comments on transactions

This quarter we kept the positioning of the Environmental Impact strategy largely unchanged.

This commentary is intended only to describe past performance of the investment strategy. The strategy invests in individual securities which are owned in the strategy as part of a carefully constructed and diversified portfolio. The information presented in this commentary may be based on the assessment of CS' portfolio managers. Market developments described in this document are subject to a number of risks and uncertainties and are neither reliable indicators nor a guarantee of future results/performance. The information in this commentary may change after the date of issuance of this document without notice and should not be construed as a recommendation to buy or sell individual securities named herein.

ESG Approach

This fund has sustainable investments as a primary investment objective (within the meaning of Art. 9 of Regulation (EU) 2019/2088 on sustainability-related disclosures in the financial services sector). The objective is attained through a dedicated investment process focusing on investments in themes and sectors whose economic activities address specific ESG (environmental, social and governance) challenges according to the CSAM Sustainable Investing Policy ([www.credit-suisse.com/esg](http://www.credit-suisse.com/esg)), including norms-based, values-based and business conduct exclusions. For further information about the ESG investment criteria and the sustainability-related aspects of the fund please consider the legal and regulatory documents of the fund (such as, e.g., the prospectus) and visit [www.credit-suisse.com/esg](http://www.credit-suisse.com/esg). In addition to sustainability-related aspects, the decision to invest in the fund should take into account all objectives and characteristics of the fund as described in its prospectus, or in the information which is to be disclosed to investors in accordance with applicable regulations.

Certain data points are provided for mere transparency purposes and are not linked to a specific ESG investment process, nor to CSAM ESG methodology. For details about the fund's ESG decision-making process, please refer to the fund's prospectus.

ESG Characteristics

ESG Benchmark	Exclusion Criteria	ESG Integration	Active Ownership <sup>5</sup>	Sustainable Investment Objective

ESG Overview

According to MSCI methodology. Fund performance against benchmark: MSCI World ESG Leaders (NR).

	Portfolio	Benchmark
ESG Rating	AA	AA
ESG Quality score	7.40	7.77
Environmental score	5.85	6.62
Social score	5.10	5.47
Governance score	6.32	5.94
Coverage for Rating/Scoring	98.45%	99.96%
Weighted Average Carbon Intensity (Tons of CO2e/\$M sales)	111.06	60.47
Coverage for Carbon Intensity	98.45%	99.79%

Note: The total carbon intensity figure shown in this section may be higher than the total in the breakdown graph. This is because the figure is normalized, and actual weights are inflated because of limited data coverage. For further information on the MSCI methodology for the above listed ESG data points, please refer to the glossary.

<sup>4</sup> If the currency of a financial product and/or its costs is different from your reference currency, the return and cost may increase or decrease as a result of currency fluctuations.

<sup>5</sup> Active Ownership is part of the fund's strategy to act in the best interests of its investors and to preserve and optimize the long-term value of their investments. To promote best practices and to ensure that the investee companies are sustainable and successful in the long term, Active Ownership is designed to influence the investee companies on two levels: first, through proxy voting, and second, through engagement. In the case of investments in other funds (Target Funds), the fund has no or only limited ability to exercise Active Ownership on the Target Fund, resp. on the Target Funds' investee companies.

## Top 10 positions - ESG Characteristics

In terms of the fund's total economic exposure. Certain data points disclosed in this table are provided for mere transparency purposes and are not linked to a specific ESG investment process, nor to CSAM ESG methodology. For details about the fund's ESG decision-making process, please refer to the fund's prospectus. Source: MSCI

Instrument Name <sup>6</sup>	Weight in portfolio	GIICS sector	MSCI ESG Rating	Controversy flag	Environmental score	Social score	Governance score	Carbon intensity (tCO <sub>2</sub> e / \$M sales)

VESTAS WIND SYSTEMS	2.97%	Industrials	AAA	Yellow	7.80	5.00	6.30	6.50

Note: All ESG data points in the table refer to an underlying issuer as applicable (e.g., an equity issuer in case of a convertible bond). For further information on the methodology for the above listed ESG data points, please refer to the glossary.

## Asset breakdown by ESG rating

In % of total economic exposure. Fund performance against benchmark: MSCI World ESG Leaders (NR). Source: MSCI ESG rating

	Portfolio	Benchmark	Portfolio Benchmark
AAA	24.63	26.06	
AA	27.13	44.22	
A	33.24	22.31	
BBB	12.55	6.89	
BB	-	0.48	
B	0.90	-	
CCC	-	-	
Not ratable	1.55	0.00	
No data coverage	-	0.03	

Note: For further information on MSCI's ESG rating methodology and the difference between categories "not ratable" and "no data coverage", please refer to the glossary.

## Carbon emission intensity contribution by GIICS sector

Tons of CO<sub>2</sub> equivalent emission intensity (GHG scopes 1 & 2) per \$m sales, by GIICS sector split. Fund performance against benchmark: MSCI World ESG Leaders (NR). Source: MSCI

	Portfolio	Benchmark	Portfolio Benchmark
Materials	48.84	18.37	
Industrials	42.50	9.79	
Others	6.49	24.44	
Consumer Discretionary	6.15	2.48	
Information Technology	5.35	5.26	
<b>Total</b>	<b>109.33</b>	<b>60.34</b>	

Note: Security weighted data coverage is 98.45% for the portfolio. The total shown in this section may be lower than the one in the 'ESG Overview' section. This is because the figures in this breakdown are not normalized and use the actual weights. For further information on the Carbon emission intensity, please refer to the glossary.

## Asset breakdown by ESG controversy flag

In % of fund total economic exposure to investee companies. Fund performance against benchmark: MSCI World ESG Leaders (NR). Source: MSCI

	Portfolio	Benchmark	Portfolio Benchmark
Green	81.36	40.69	
Yellow	15.83	42.40	
Orange	1.26	16.87	
Red	-	-	
No data coverage	-	0.03	

Note: Exposure to investee companies represents 98.45% of portfolio weight for this share class. MSCI only provides data on ESG controversies for corporate issuers. Any remaining instruments (e.g., government bonds) are excluded from this breakdown. For further information on MSCI's ESG controversy flag methodology, please refer to the glossary.

<sup>6</sup> The individual entities and/or instruments mentioned on this page are meant for illustration purposes only and are not intended as a solicitation or an offer to buy or sell any interest or any investment.

## Glossary

Accumulating	Indicates a regular reinvestment of the dividends received in the portfolio itself
Annualized Risk	Annualized risk is a statistic, which is used to measure the risk of a fund by describing the range of returns, which were achieved in the observation period are most likely to be achieved. Greater volatility implies greater risk.
Beta	A measure of the volatility, or systematic risk, of a single security or fund in comparison to the market as a whole.
Carbon emission intensity	The weighted average emissions intensity, which is provided by MSCI ESG, divides the Scopes 1 & 2 emissions in tons of CO2-equivalent by million \$ sales. Intensities are broken down by GICS sector and are security weighted.
ESG benchmark	A ticked 'ESG benchmark' box reflects that the ESG section in this document compares the ESG performance of the portfolio with an ESG index. In case the box is not ticked, this means that the ESG section in this document compares the ESG performance of the portfolio with a non-ESG index or that no comparison is performed due to a lack of a recognized benchmark. The investor shall read the legal documentation of the Fund to understand how the benchmark is used. In any case, a ticked 'ESG benchmark' box does not mean that the ESG benchmark is used to attain the ESG strategy of the fund.
ESG Controversy Flag	ESG Controversy Flag is designed to provide timely and consistent assessments of ESG controversies involving publicly traded companies and fixed income issuers. A controversy case is typically a one-off event such as an environmental oil spill, an accident, or allegations such as safety issues in a production facility. Controversy flags can be red, orange, yellow or green. Red indicates that a company is involved in one or more very severe controversies. Orange indicates that a company has been involved in one or more recent severe structural controversies that are ongoing. Yellow indicates that the company is involved in severe-to-moderate level controversies. Green indicates that the company is not involved in any major controversies. For further information on the methodology, please refer to <a href="http://www.msci.com/our-solutions/esg-investing/">www.msci.com/our-solutions/esg-investing/</a> .
ESG Quality score	The ESG Quality score, based on MSCI ESG scores of underlyings, is measured on a scale from 0 (very poor) to 10 (very good). It does not correspond directly to the underlying Environment, Social and Governance Pillar scores. The Pillar scores are derived on an absolute basis, while the portfolio ESG Quality score is adjusted by MSCI to reflect the industry-specific level of ESG risk exposure. As Pillar scores are absolute, and the portfolio ESG Quality score is relative, the first cannot be averaged to derive the latter. The coverage rate is security weighted.
Issuer ESG Rating	Company and Government ESG Ratings, which are provided by MSCI ESG, are measured on a scale from AAA (highest rating) to CCC (lowest rating). Company ESG Ratings are based on the issuer's exposure to industry specific ESG risks and its ability to mitigate those risks relative to peers. Company ESG Ratings are calculated on an industry relative basis while the underlying individual E, S and G Ratings are absolute. Hence, the ESG Rating cannot be seen as an average of the individual E, S and G Ratings. Government ESG Ratings identify a country's exposure to and management of ESG risk factors and explain how these factors might impact the long-term sustainability of its economy. They are derived from 0-10 scores on underlying factors in the E, S and G pillars. For further information on the MSCI methodology, please refer to <a href="http://www.msci.com/our-solutions/esg-investing/">www.msci.com/our-solutions/esg-investing/</a> .
Ex post	Refers to metrics based on historical data
GICS	Global Industry Classification Standard
Greenhouse gas (GHG) emissions	Scope 1 emissions are generated by a company directly from owned or controlled sources such as the burning of fuels (stationary or mobile), industrial processes, etc. Scope 2 emissions are indirect emissions, primarily those associated with the electricity consumed by a company. Scope 3 emissions are all other indirect emissions associated with a company's operations, such as business travel, waste generated, and products both upstream (in the supply chain) and downstream (use of the products and end of life). Scope 3 emissions typically account for the largest proportion of a company's emissions.
Information ratio	This statistic measures how much a fund's out-performance may be attributed to manager skill as oppose to market movement. A high Information Ratio infers more manager skill than a low value would suggest.
ITD	Inception-to-date
Maximum drawdown	Represents the worst possible result (in percentage terms) that occurred during the period being analyzed.
MTD	Month-to-date
LuxFLAG Environment	For more information about the methodology and label validity, please visit <a href="http://luxflag.org">luxflag.org</a> . Validity: 01 October 2023 - 30 September 2024. Investors must not rely on this label with regard to investor protection issues and LuxFLAG does not incur any liability related to financial performance or default of the fund.
MSCI	MSCI refers to the external data provider MSCI ESG Research LLC and/or its affiliates.
MSCI ESG Methodology	For further information on the methodology applied to assess the ESG characteristics of the investments, please refer to <a href="http://www.msci.com/our-solutions/esg-investing/">www.msci.com/our-solutions/esg-investing/</a>
NAV	Net Asset Value
Not ratable / No data coverage	Where MSCI considers an asset type for ESG analysis but data on an economic exposure is unavailable due to a lack of data from the data vendor, the investment falls under the category "No data coverage". Where MSCI considers an asset type out of scope for ESG analysis (e.g. Cash, Currency), the economic exposure falls under the category "Not ratable". For further information regarding excluded asset types, please refer to <a href="http://www.msci.com/our-solutions/esg-investing/">www.msci.com/our-solutions/esg-investing/</a> .
Ongoing Charges	The calculation of the ongoing charge is based on the Committee of European Securities Regulators/10-674 Directive. For a maximum of 12 months from fund fiscal year end and since inception, the ongoing charges figure is based on estimated expenses. After that, the ongoing charges correspond to the TER of the last annual report. It excludes performance fees and portfolio transaction costs, except in the case of an entry/exit charge paid by the fund when buying or selling shares/units in another collective investment undertaking.
Portfolio/Benchmark ESG Rating	Discrepancies may exist between the portfolio-level ESG Rating calculated by CSAM applying the MSCI methodology (provided in this factsheet) and the ESG Ratings displayed by other providers (e.g., MSCI ESG fund ratings). There are three main reasons for these potential deviations: (1) CSAM uses updated month-end holdings data as basis for its calculation, (2) CSAM consistently uses underlying issuer data where applicable (e.g., equity issuer in case of a convertible bond), and (3) look-through approach for target funds applied by CSAM. The coverage rate is security weighted. For further information on the MSCI methodology, please refer to <a href="http://www.msci.com/oursolutions/esg-investing/">www.msci.com/oursolutions/esg-investing/</a> .
QTD	Quarter-to-date
Sustainable Finance Disclosure Regulation (SFDR)	Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector
Sustainable investment objective	Where the 'sustainable investment objective' box is ticked, this means that the product implements CSAM investment strategies that allocate capital into companies that offer solutions to society's challenges and meet a sustainable investment objective. The sustainable investment objective is achieved through a dedicated investment process focusing on investments in themes and sectors whose economic activities address specific ESG challenges. An unticked box reflects that the product does not aim to meet a sustainable investment objective.
Sustainable thematic	This product undertakes investments that are dedicated to addressing the United Nations Sustainable Development Goals (e.g. education or clean energy) through a thematic approach.
TNA	Total Net Assets
Tracking error	Measure of the deviation of the return of a fund compared to the return of a benchmark over a fixed period of time.
YTD	Year-to-date

## Warning statements

Asset breakdown	Indicative allocation may change over time. All holdings are shown strictly for information purposes only and do not constitute investment recommendations of Credit Suisse. Please note that this does not constitute an offer or a solicitation to buy or sell any interest or any investment.
Swinging Single Pricing	For more details, please refer to the relevant chapter "Net Asset Value" of the fund's prospectus
Performance start date	Performance calculation and presentation start with the first full month of an invested strategy. This can lead to a difference in launch and performance start dates.
PRIIP SRI	The Summary Risk Indicator is a guide to the level of risk of this Product compared to other products. It shows how likely it is that the Product will lose money because of movements in the markets.

---

## ESG Notes

The figures contained in this section are not audited. Where ESG related information, statements and scorings are made in this document, CS may have, partially or entirely, relied on publicly available information, internally developed data and/or information obtained from other third-party sources which CS believes to be reliable. CS' ability to verify such ESG objectives may be limited by the reliability of the data available in respect of the underlying assets and the status of the regulations in relation to tracking and providing such data. CS has not independently verified any information obtained from these public and third-party sources and cannot make any representations or warranties as to its accuracy, completeness or reliability. It is possible that the data from ESG data providers may be incorrect, unavailable, or not fully updated. This is especially true where CS has limited access to data from external parties regarding the underlying elements of an investment, for example due to a lack of look-through data. Such data gaps could result in an incorrect assessment of a sustainability practice and/or related sustainability risks and opportunities. Investors shall not use the ESG data provided in this document for the sake of meeting their own regulatory disclosure or reporting requirements. CS cannot make any guarantee about the content or completeness of such ESG disclosures, which remain subject to change and cannot be relied upon. In particular, CS shall not be liable for any errors or omissions in connection with any ESG data herein, or for any direct, indirect, special, punitive, consequential or any other damages (including lost profits). In the absence of a standardized, industry-wide ESG classification system, CS has developed its own ESG framework (the "CS Sustainable Investment Framework"). Therefore, investors should note that the ESG classification of the fund reflects CS' opinion and is based on the CS Sustainable Investment Framework which classification may vary from the classification made by third parties. The fact that a fund follows the CS Sustainable Investment Framework does not necessarily mean that it meets the investors overall investment objectives, nor their sustainability preferences. Given that sustainability regulations and guidelines are still developing, CS may need to review certain ESG classifications/descriptions as industry practices change and as more regulatory guidance becomes available. The ESG-performance of a portfolio might also differ from its financial performance and CS cannot make any representation as to the correlation between financial and ESG performance. Sustainability-related practices also differ by region, industry and ESG issue and are continually evolving. Consequently, sustainability-related practices may change over time. Similarly, new local sustainability requirements may result in additional compliance costs, disclosure obligations or other restrictions on the fund. CS' view on the appropriate classification may also evolve over time, including in response to regulatory guidance or changes in industry approach to classification.

Unauthorised copying of the information of the licensors or property right holders is strictly prohibited.

The full offering documentation including, the prospectus or offering memorandum, the Key Investor Information Document (KIID), the Key Information Document (KID), the fund rules, as well as the annual and bi-annual reports ("Full offering documentation"), as the case may be, may be obtained free of charge in one of the languages listed below from the legal entity/entities indicated below and where available via FundSearch ([credit-suisse.com/fundsearch](https://credit-suisse.com/fundsearch)).

Information on your local distributors, representatives, information agent, paying agent, if any, and your local contacts in respect of the investment product(s) can be found below.

The only legally binding terms of any investment product described in this material, including risk considerations, objectives, charges and expenses are set forth in the prospectus, offering memorandum, subscription documents, fund contract and/or any other fund governing documents.

For a full description of the features of the products featured in this material as well as a full description of the opportunities, risks, and costs associated with the respective products, please refer to the relevant underlying securities prospectuses, sales prospectuses, or other additional product documents, which we will be pleased to provide to you at any time upon request.

The investment promoted in this marketing material concerns the acquisition of units or shares in a fund and not of any underlying assets. The underlying assets are owned by the fund only.

This material may not be forwarded or distributed to any other person and may not be reproduced. Any forwarding, distribution or reproduction is unauthorized and may result in a violation of the U.S. Securities Act of 1933, as amended (the "Securities Act"). The securities referred to herein have not been, and will not be, registered under the Securities Act, or the securities laws of any states of the United States and, subject to certain exceptions, the securities may not be offered, pledged, sold or otherwise transferred within the United States or to, or for the benefit or account of, U.S. persons.

In addition, there may be conflicts of interest with regard to the investment.

In connection with the provision of services, Credit Suisse AG and/or its affiliates may pay third parties or receive from third parties, as part of their fee or otherwise, a one-time or recurring fee (e.g., issuing commissions, placement commissions or trailer fees).

Prospective investors should independently and carefully assess (with their tax, legal and financial advisers) the specific risks described in available materials, and applicable legal, regulatory, credit, tax and accounting consequences prior to making any investment decision.

The alternative investment fund manager or the (UCITS) management company, as applicable, may decide to terminate local arrangements for the marketing of the shares/units of a fund, including terminating registrations or notifications with the local supervisory authority.
