

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest. Unless otherwise defined in this document, all words and expressions defined in the Company's current Prospectus shall have the same meaning herein.

New Capital Europe Future Leaders Fund (the "Fund"), a sub-fund of New Capital UCITS Fund Plc (the "Company")

New Capital Europe Future Leaders Fund USD Unhedged O Acc. (the "Share Class") – ISIN: IE00BK5H0Z09
The management company of the Fund is KBA Consulting Management Limited (the "Manager")

Objective and Investment Policy

Objective: The investment objective of the Fund is to achieve long-term capital appreciation primarily through investment in a portfolio of European equities.

Policy: In seeking to achieve its investment objective, the Fund will primarily invest in equities of companies that have their registered office in the Europe ex-UK Region, the securities of which are listed or traded on Recognised Markets worldwide. The Fund will have a maximum exposure of 15% of its Net Asset Value to companies outside of the Europe ex-UK Region.

The Fund may also invest in other collective investment schemes ("CIS") provided such investments are eligible for investment by UCITS and give exposure to investments in which the Fund may invest directly in accordance with the investment policy of the Fund. Investment in CIS shall not exceed in aggregate 10% of the Net Asset Value of the Fund.

The Fund will not invest in financial derivative instruments ("FDIs") for investment purposes. However, the Fund may use FDIs such as forward foreign currency exchange contracts, futures contracts, options, warrants, put and call options on securities, indices and currencies and/or foreign exchange swap contracts for hedging purposes.

The Investment Manager has discretion in managing the investments of the Fund.

Dividends on income share classes will be paid bi-annually. Accumulating share classes accumulate income.

Benchmark: The Fund will be actively managed in reference to the MSCI Europe ex UK Index in that such a benchmark will be used for performance comparison purposes. The Fund does not seek to replicate its benchmark index, but instead may differ from the performance benchmark in order to achieve its objective. The Index will not be used to define the portfolio composition of the Fund and accordingly the Fund may be invested in securities which are not constituents of the Index in order to take advantage of specific investment opportunities.

Profile of typical investor: The Fund is suitable for investors seeking capital growth and income over a medium term with a high level of volatility.

Dealing: Shares in the Fund can be bought and sold daily (every Business Day of the Fund).

Further information: Please refer to the Prospectus for more detailed information.

Risk and Reward Profile

The risk indicator is based on the volatility of the Fund's performance over the years the Fund has been in existence combined with simulated benchmark data. The risk category shown is not guaranteed and may shift over time. Historical data may not be a reliable indicator for the future risk profile of the Fund. The lowest risk category does not mean a "risk-free investment".

The Fund is also subject to risks which are not included in the calculation of the risk-reward indicator.

Liquidity risk: The risk that assets may not be saleable immediately at a price consistent with that observed for valuation purposes.

Currency risk: Investors not investing in their local currency will additionally be exposed to the fluctuation of the exchange rate between their local currency and the currency class in which they are invested.

Hedging risk: The Fund utilises forward exchange rate contracts to minimise currency risk, forward contracts do not precisely mirror movements in the market exchange rate which can result in differences in performance between share classes.

FX risk: Currency hedging strategies are not employed for the Share Class and as such the performance of the Share Class may be strongly influenced by movements in FX rates.

Further information: The Prospectus for this Fund gives you more details about all the risks for this Fund – see under "Practical Information" for how to obtain a copy.
