JPM Global Opportunistic Convertibles Income A (acc) - EUR (hedged)

a Share Class of JPMorgan Investment Funds – Global Opportunistic Convertibles Income Fund. The management company is JPMorgan Asset Management (Europe) S.à r.l.

Objectives, Process and Policies

INVESTMENT OBJECTIVE

To provide regular income and the potential for capital growth by investing primarily in a portfolio of convertible securities globally, focusing on securities trading below par value.

INVESTMENT PROCESS

Investment approach

- Globally diversified convertible bond strategy.
- Fundamental approach that focuses on convertible issuers across geographies, sectors and issuers where temporary market dislocations result in the relevant securities trading below par value.
- The opportunity to invest in convertible securities trading below par value is expected to reduce over time, accordingly the prices of the securities are expected to return to par value and the income they generate will converge with that of other convertible securities.
- When the opportunity to invest in securities trading below par value due to temporary market dislocations is reduced and securities within the portfolio begin to return to par value, the Sub-Fund is expected to merge into a Sub-Fund with similar investment exposures and main risks, subject to regulatory approval and applicable UCITS rules.
