VISIONFUND - US EQUITY LARGE CAP CORE (the “Sub-fund”), a sub-fund of VISIONFUND (the “Sub-fund”)

Share Class A EUR (H) (the “Class”) - LU2123303708

Management company: Edmond de Rothschild Asset Management (Luxembourg)

Objectives and investment policy

Objective

The objective of this Sub-fund is to outperform its benchmark index over a full market cycle by investing in an actively managed portfolio. Environmental, social and governance (ESG) criteria are one of the management components. However, the individual weighting of each of these criteria in the final decision is not defined upstream.

Benchmark index

The performance of the Sub-fund may be compared with the S&P 500 Index, expressed in USD, calculated with net dividends reinvested. The Sub-fund is actively managed. The benchmark index is exclusively used for performance comparison purposes.

Investment policy

The Sub-fund invests at least 75% of its net assets in equities of large-cap companies, in any sector, which have their registered office in the United States or which conduct a predominant part of their activity in the United States.

All securities must be listed on a US market.

The Sub-fund may be exposed to currency risk up to 100% of its net assets.

In order to protect its assets and/or achieve its management objective, the Sub-fund may use derivative financial instruments traded on regulated markets or over-the-counter markets.

For cash management purposes, the Sub-fund may invest up to 25% of its net assets in transferable debt securities and money market instruments. The Sub-fund will primarily target issues from public or private issuers.

At least 90% of portfolio companies will have an ESG rating. This will consist of either an internal ESG rating as defined by the manager's ESG integration and responsible investment policy (available on its website at the following link: <https://www.wellington.com/en/sustainable-investing/sustainable-finance-disclosure-regulation-sfdr/>), or a rating provided by an external non-financial rating agency. At the end of this process, the Fund's ESG rating will be higher than that of its investment universe.

In addition, the securities selection process includes negative screening designed to exclude companies that contribute to the production of controversial weapons, in accordance with international conventions in this area, as well as companies exposed to activities related to thermal coal or tobacco, in accordance with the Edmond de Rothschild Group's exclusion policy, which is available on its website <https://www.edmond-de-rothschild.com/fr/asset-management/investissement-responsable>.

The Sub-fund is classified as “Article 8(1) of the Sustainability Regulation” because it promotes a set of ESG characteristics, although no benchmark index has been designated to achieve these environmental or social characteristics.

In line with its ESG strategy, the Sub-fund promotes environmental characteristics but does not invest in environmentally sustainable economic activities within the meaning of the Taxonomy Regulation. The investments underlying this financial product do not take into account the EU criteria for environmentally sustainable economic activities under the Taxonomy Regulation.

The indicator shown above is calculated based on historical data and, as such, may not be a reliable indicator of the Sub-fund's future risk profile. It is not certain that the risk and reward category shown will remain unchanged, and the classification may change over time. Category 1 does not mean that an investment is risk-free. Repayment of the initial investment is not guaranteed.

Due to insufficient historical data, the risk indicator incorporates simulated data based on a reference portfolio. Risk category 6 reflects a potential for very high gains and/or losses in the value of the portfolio. This is because of investments in equities on the American market.

Significant risks not taken into account in this indicator:

Credit risk: When a significant level of investment is made in debt securities.

Liquidity risk: The markets for some securities and instruments may have limited liquidity. This restricted liquidity may be disadvantageous for the Sub-fund, both in terms of obtaining the indicated prices and executing orders at the desired prices.

Impact of instruments such as derivative contracts: The use of derivative instruments may result in a greater decrease in assets than the decrease in the underlying assets invested or on the markets.

Counterparty risk: When a fund is hedged by guarantees or has significant investment exposure through contracts with a third party.

Counterparty risk: the Sub-fund may incur losses if a counterparty defaults and is unable to meet its contractual obligations.

Operational risk: the Sub-fund may incur losses due to the failure of operational processes, particularly those relating to the custody of assets. The occurrence of any of these risks may negatively impact the net asset value.

The occurrence of any of these risks may negatively impact the net asset value.
