The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

AMO Japan Growth Equity Portfolio (the "Sub-Fund")

Class E EUR (Acc) (LU2194464892) (the "Share Class")

A Sub-Fund of AMO UCITS Fund (the "Fund")

Management Company: Carne Global Fund Managers (Luxembourg) S.A.

Objectives and Investment Policy

Objective

The Sub-Fund aims to outperform the TOPIX Index (gross of tax with dividends reinvested) in the medium to long term, through an active management and mainly bottom up approach.

Principal Investment Strategy

The Sub-Fund is actively managed with reference to the TOPIX Index (gross of tax with dividends reinvested) (the "Index"). Although a majority of the Sub-Fund's holdings are included in the Index, the Investment Manager is not bound by the components or weighting of the Index when selecting investments and may also use its discretion to invest in securities not included in the Index. The target tracking error is not expected to exceed 10%, but this shall neither constitute a constraint nor a limit for the Investment Manager.

The Sub-Fund invests at least 80% of its net assets in stocks listed in Japan. The Sub-Fund aims to generate excess returns by investing in stocks with long-term high growth potential based on a comprehensive bottom up research. A continuous and comprehensive bottom-up research covering both qualitative and

quantitative aspects will allow the Investment Manager to develop an in-depth and thorough understanding of a company. The investment portfolio of the Sub-Fund is constructed with due regard to diversification of the growth categories, market size, growth potential and the stage of a growth cycle.

Investment Horizon

The Sub-Fund is suitable for investors who seek capital growth over the long-term and who can afford to set aside the capital invested for at least 3 to 5 years.

Distribution Policy

This Class is a Capitalisation Share Class. Capitalisation Share Classes retain and reinvest all net income. In this regard the income is retained in the net asset value and reflected in the net asset value per share of the relevant class.

Dealing Frequency

You may sell shares each day that is a bank business day in Luxembourg, Tokyo and London (except Good Friday and 24 December of each year).

Risk and Reward Profile

1	2	3	4	5	6	7
---	---	---	---	---	---	---

This indicator above is based on simulated historical data and may not be a reliable indication of the future risk profile of the Sub-Fund. The risk category shown is not guaranteed and may change over time. The lowest category does not mean a risk free investment.

This Fund is in risk category 6 because of the high range and frequency of price movements (volatility) of the underlying investments in which the Sub-Fund invests.

The Sub-Fund may be subject to risks which are not included in the calculation of the risk-reward indicator associated with the following:

Equity Risk: The Sub-Fund invests in shares of companies, and the value of these shares can be negatively affected by changes in the company, its industry or the economy in which it operates.

Investments in Smaller Company shares: The Sub-Fund buys shares in smaller companies. It may be difficult to sell these shares, in which case the Sub-Fund may not be able to minimise a loss on such shares.

Country Risk: This Fund invests primarily in Japan, which means that it is more sensitive to local economic, market, political or regulatory events in Japan, and will be more affected by these events than other Funds that invest in a broader range of regions.

Company Specific Risk: Any change to the business performance, capital structure, management or nature of business of a specific Company may negatively affect the valuation of the Sub-Fund.

Risk of Concentration: Investments are made in a limited number of companies which makes the Sub-Fund more vulnerable to fluctuations in the value of those investments.

The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.

For more information on these and other risks see the section "Risk Considerations" in the Prospectus.
