

La Française Systematic Global Listed Infrastructure IC

Registered in: DE ES LU FR AT

KEY FIGURES

NAV : 1,088.32€
Fund size : €16.68M

SYNTHETIC RISK INDICATOR

INVESTMENT HORIZON

CHARACTERISTICS

Legal form : UCITS fund
Inception date : 20/07/2020
Benchmark : NMX Infrastructure Composite TR Index (EUR)
Allocation of distributable amounts : Capitalization
Currency : EUR
Valuation frequency : Daily
Clients : Institutionals
Main associated risks : volatility, equities, currency

COMMERCIAL INFORMATION

ISIN code : DE000A2P4YX9
Bloomberg Ticker : VERINFI GR Equity
WKN Code : A2P4YX
Cut-off time : D before 11:00 am CET
Settlement : D+2 business days
Min. initial subscription : 100 000 EUR
Max. subscription fees : 0%
Max. redemption fees : 0%
Management fees and other administrative and operating expenses : 1.16% (31/12/2023)
Transaction costs : 0.26% (31/12/2023)
Custodian : BNP Paribas S.A., Niederlassung Deutschland
Administrator : BNP Paribas S.A., Niederlassung Deutschland
Management company : La Française Systematic Asset Management GmbH
Portfolio Manager(s) : Team La Française Systematic Asset Management GmbH

INVESTMENT STRATEGY

The focused equity fund invests in core infrastructure companies that provide or operate infrastructure networks. The stock selection process is purely systematic and focuses on the factors quality, value, trend stability, low volatility and ESG. All positions are basically equally weighted and rebalanced quarterly.

NET PERFORMANCES

Calculated according to the BVI method. Calculation basis: share price (subscription fee not taken into account), distributions reinvested. Any subscription fee reduces the capital employed and the performance shown. If no values are available for more than 5 years, the performance since inception is shown.

DISCLAIMER

This customer information constitutes advertising according to Sec. 63 (6) WpHG (German Securities Trading Act). It must be understood neither as a purchase or sales offer nor as investment advice. All information and estimates have been compiled with the greatest measure of care. However, no guarantee can be given for correctness. The presented performances are values from the past, from which no conclusions can be drawn as to a future development of a fund. Future results can be higher as well as lower. Commissions and costs that are incurred on issuance and redemption of shares remain outside of consideration in the calculation of the performance. The solely binding basis for the acquisition of funds are exclusively the current sales documents (sales prospectus, the essential investor information document, the annual financial report and – if it is not older than eight months – the half-year report). The sales documents are available in a German version free of charge from the publisher, La Française Systematic Asset Management GmbH, Neue Mainzer Straße 80 – 60311 Frankfurt/Main, phone +49 (0)69.975743-0 or online at www.la-francaise-systematic-am.com and from the following paying agents : In Austria from the paying agent Société Générale S.A., Paris, Vienna branch, Prinz Eugen-Straße 8-10/5/TOP 11, A-1040 Vienna. In Luxembourg at BNP Paribas Securities Services, Luxembourg branch, 60 Avenue J.F. Kennedy, LU-1855 Luxembourg. Investors in France and Spain can submit their buy, sell and exchange orders to their custodian. Payments to investors such as redemption proceeds, any distributions and other payments are made by their custodian. You can find the daily fund prices at www.la-francaise-systematic-am.com.

DEFINITIONS

The synthetic risk indicator makes it possible to assess the level of risk of this product compared to others. It indicates the likelihood of this product incurring losses in the event of market developments or our inability to pay you.

If an issue premium is incurred for the purchase of fund shares, 100% of it can be received by the distribution partner; the distribution partner will inform the exact amount on request during the course of the investment consulting. The latter also applies to any payments of a running sales commission by the management company to the distribution partner.

Performance calculation basis: share price; distributions reinvested. The calculation is based on the BVI method. Commissions and costs incurred on the subscription and redemption of shares were not taken into account in the calculation of performance. In the case of an investment amount of EUR 1,000.00 over an investment period of five years and, if applicable, a subscription fee of e.g. 5 percent, the investment result in the first year would be reduced by the subscription fee in the amount of EUR 50.00 as well as by additional individually incurred securities account costs. In subsequent years, the investment result may also be reduced by individual custody account costs. Issue surcharges and custody account costs reduce the capital invested and the performance shown. Information on past performance does not allow a forecast for the future.

Volatility is a measure for the strength of fluctuation in the performance of the fund during a certain period. The higher it is the more volatile and therefore risky a fund is.

The Sharpe Ratio measures the average return earned in excess in dependency of the risk relative to a benchmark (risk-free rate). For the assessment of this key figure, the attainable riskfree yield is subtracted from the yield actually earned. The result is divided by the risk that has been taken by the fund. A Sharpe Ratio > 1 indicates that an excess yield compared to the riskfree money market investment has been earned. At the same time, it shows the ratio of this excess yield to the risk taken. In reverse, a negative Sharpe Ratio (<0) illustrates that the money market interest rate has not been outperformed.

Value-At-Risk represents the maximum potential loss of an investor on the value of an asset or a portfolio of financial assets that should only be reached with a given probability over a given horizon.

The recovery is the time needed to recover the maximum loss (max drawdown).
