The Fund's risk and reward profile shows the variations in value an investment in this Fund would have undergone over the past five years, whereby simulated performance data is used in the case of missing history. The Fund's risk rating may change in the future. Please note, higher possible gains generally also mean higher possible losses. The lowest risk category does not mean that the Fund is risk free.

Why is the Fund in the specific category?

Amongst other, equity prices mainly reflect the expected prospects of firms, as estimated by market participants. Expectations tend to fluctuate more strongly in times of higher uncertainty. The Fund's application of Swing Pricing also impacts its risk and reward profile.

Are there any other particular risks?

The Fund's risk and reward profile does not reflect the risk inherent in future circumstances that differ from what the Fund has experienced in the recent past. This includes the following events which are rare but can have a large impact.

- Liquidity risk: Assets cannot necessarily be sold at limited cost in an adequately short timeframe. However, this Fund's investments should generally have good liquidity.
- Counterparty risk: Bankruptcy or insolvency of the Fund's derivative counterparties may lead to payment or delivery default. The Fund will endeavor to mitigate this risk by the receipt of financial collateral given as guarantees.
- Operational risk: Deficient processes, technical failures or catastrophic events may cause losses.
- Political and Legal risks: Investments are exposed to changes of rules and standards applied by a specific country. This includes restrictions on currency convertibility, the imposing of taxes or controls on transactions, the limitations of property rights or other legal risks.
- Sustainability risks: Sustainability risks are environmental, social or governance events or conditions that can have a material negative effect on the return, depending on the relevant sector, industry and company exposure.
