

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Alternative Securitised Income

a sub-fund of Schroder International Selection Fund SICAV

Class X Distribution GBP Hedged (LU2196480227)

This fund is managed by Schroder Investment Management (Europe) S.A., which is a member of the Schroders Group.

Objectives and investment policy

Objectives

The fund aims to provide income and capital growth of ICE BofA 3 Month US Treasury Bill Index + 3.5% before fees have been deducted* over a three to five year period by investing in securitised bonds issued by entities worldwide. *For the target return after fees for each Share Class please visit the Schroder website:

<https://www.schroders.com/en/lu/private-investor/investing-with-us/after-fees-performance-targets/>

Investment policy

The fund is actively managed and invests at least two-thirds of its assets in securitised bonds including, but not limited to, asset-backed securities (ABS), agency and non-agency residential mortgage-backed securities (MBS) including forward-settling securities such as to be announced (TBA) trades, commercial mortgage-backed securities (CMBS), collateralised loan obligations (CLOs) and credit risk transfer securities (CRTs). Underlying assets of the asset-backed securities may include credit card receivables, personal loans, auto loans, transportation finance and small business loans. The fund may also invest in fixed and floating rate securities issued by governments, government agencies, supra-nationals and companies worldwide.

The fund's strategy will have an overall duration of between zero and four years, but this does not preclude the fund from investing in bonds with a duration above four years.

The fund may invest up to 100% of its assets in bonds issued worldwide with an investment grade or sub-investment grade credit rating (as measured by Standard & Poor's or any equivalent grade of other credit rating agencies for rated securities and implied Schroders ratings for non-rated securities).

The fund may also invest up to one-third of its assets directly or indirectly in other securities (including other asset classes), countries, regions, industries or currencies, investment funds, warrants and money market investments, and hold cash (subject to the restrictions provided in the prospectus).

The fund may use derivatives, long and short, with the aim of achieving investment gains, reducing risk or managing the fund more efficiently.

The investment manager assesses the sustainability credentials of potential investments using a proprietary tool.

The fund does not directly invest in certain activities, industries or groups of issuers above the limits listed under "Sustainability Information" on the Fund's webpage, accessed via www.schroders.com/en/lu/private-investor/gfc.

Benchmark

The fund's performance should be assessed against its target benchmark, being to deliver ICE BofA 3 Month US Treasury Bill Index + 3.5% and compared against the ICE BofA Merrill Lynch US Floating Rate Asset Backed Securities index. The comparator benchmark is only included for performance comparison purposes and does not have any bearing on how the investment manager invests the fund's assets. Whilst the fund's investments are generally expected to deviate significantly from the components of the comparator benchmark, dependent on the investment manager's views, the fund's investments may overlap with them. The investment manager invests on a discretionary basis and there are no restrictions on the extent to which the fund's portfolio and performance may deviate from the comparator benchmark. The investment manager will invest in companies or sectors not included in the comparator benchmark. The target benchmark has been selected because the target return of the fund is to deliver the return of that benchmark as stated in the investment objective. The comparator benchmark has been selected because the investment manager believes that the benchmark is a suitable comparison for performance purposes given the fund's investment objective and policy. The performance of this share class is compared against the performance of the equivalent unhedged currency share class.

Dealing frequency

You may redeem your investment upon demand. This fund deals daily.

Distribution policy

This share class pays a quarterly distribution at a variable rate based on gross investment income.

Risk and reward profile

Lower risk

Potentially lower reward

Higher risk

Potentially higher reward

The risk and reward indicator

The risk category was calculated using historical performance data and may not be a reliable indicator of the fund's future risk profile.

The fund's risk category is not guaranteed to remain fixed and may change over time.

A fund in the lowest category does not mean a risk-free investment.

The fund is in this category because it seeks to provide rewards whilst limiting price volatility.

Risk factors

ABS and MBS risk: The fund may invest in mortgage or asset-backed securities. The underlying borrowers of these securities may not be able to pay back the full amount that they owe, which may result in losses to the fund.

Sustainability Risk: The fund has environmental and/or social characteristics. This means it may have limited exposure to some companies, industries or sectors and may forego certain investment opportunities, or dispose of certain holdings, that do not align with its sustainability criteria chosen by the investment manager. The fund may invest in companies that do not reflect the beliefs and values of any particular investor.

Credit risk: A decline in the financial health of an issuer could cause the value of its bonds to fall or become worthless.

Currency risk: The fund may lose value as a result of movements in foreign

exchange rates.

Currency risk / hedged share class: The hedging of the share class may not be fully effective and residual currency exposure may remain. The cost associated with hedging may impact performance and potential gains may be more limited than for unhedged share classes.

Derivatives risk: Derivatives may be used to manage the portfolio efficiently.

The fund may also materially invest in derivatives including using short selling and leverage techniques with the aim of making a return. A derivative may not perform as expected, may create losses greater than the cost of the derivative and may result in losses to the fund.

High yield bond risk: High yield bonds (normally lower rated or unrated) generally carry greater market, credit and liquidity risk.

Interest rate risk: The fund may lose value as a direct result of interest rate changes.

Liquidity risk: In difficult market conditions, the fund may not be able to sell a security for full value or at all. This could affect performance and could cause the fund to defer or suspend redemptions of its shares.

Operational risk: Operational processes, including those related to the safekeeping of assets, may fail. This may result in losses to the fund.

Performance risk: Investment objectives express an intended result but there is no guarantee that such a result will be achieved. Depending on market conditions and the macro economic environment, investment objectives may become more difficult to achieve.

IBOR: The transition of the financial markets away from the use of interbank offered rates (IBORs) to alternative reference rates may impact the valuation of certain holdings and disrupt liquidity in certain instruments. This may impact the investment performance of the fund.

Charges

One-off charges taken before or after you invest	
Entry charge	None
Exit charge	None
This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.	
Charges taken from the fund over a year	
Ongoing charges	0.48%
Charges taken from the fund under certain specific conditions	
Performance fee	
None	

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry and exit charges shown are maximum figures and in some cases you might pay less. You can find out the actual entry and exit charges from your financial advisor.

The ongoing charges figure is based on the last year's expenses for the year ending December 2021 and may vary from year to year.

You can find more information about the charges in Section 3 of the fund's prospectus.

Past performance

Please note that the fund's target benchmark was changed on 1 May 2021. The past performance in the above table is based on the fund's objective and benchmarks (Target benchmark: 3-month USD LIBOR plus 3.5%. Comparator benchmark: ICE BofA Merrill Lynch US Floating Rate Asset Backed Securities index) in place prior to this date. Going forward, this table will show past performance from this date based on the new objective and benchmarks (Target benchmark: ICE BofA 3 Month US Treasury Bill Index + 3.5%. Comparator benchmark: ICE BofA Merrill Lynch US Floating Rate Asset Backed Securities index).

- X Distribution GBP Hedged (LU2196480227)
- ICE BofA 3 Month US Treasury Bill Index + 3.5%
- ICE BofA Merrill Lynch US Floating Rate Asset Backed Securities Index
- 3-month USD LIBOR + 3.5%

Past performance is not a guide to future performance and may not be repeated. The value of investments may go down as well as up and you may not get back the amount you originally invested.

The chart shows performance in British pound after the ongoing charges and the portfolio transaction costs have been paid. The Benchmark performance is shown in the base currency of the fund.

The fund was launched on 17/12/2019.

The shareclass was launched on 08/07/2020.

Performance figures are only available since the launch of the respective share class.

Practical information

Depository: J.P. Morgan SE.
