OFFER FOR SHARES

This is an offer to subscribe for shares (the "**Shares**") issued without par value in MULTI UNITS LUXEMBOURG (the "**Company**"), each Share being linked to one sub-fund of the Company (the "**Sub-Fund(s)**"), as specified below.

The Shares in each of the Sub-Funds may be divided into classes (the "**Classes**").

For further information about the rights attaching to the various Classes of Shares, see paragraph "Classes of Shares".

IMPORTANT INFORMATION

If you are in any doubt about the contents of this Prospectus, you should consult your stockbroker, attorney, accountant or other financial advisor. No person is authorised to give any information other than that contained in this Prospectus and in the KID relating to each Sub-Fund, or any of the documents referred to herein that are available for public inspection at 9, rue de Bitbourg, L-1273 Luxembourg.

- The Company is registered in the Grand Duchy of Luxembourg as an undertaking for collective investment in transferable securities (a "**UCITS**") under the form of an investment company with variable share capital ("**SICAV**"). However, such registration does not imply a positive assessment by the supervisory authority of the contents of this Prospectus or any KID or of the quality of the Shares offered for sale. Any representation to the contrary is unauthorised and unlawful.
- This Prospectus and/or more generally any information or documents with respect to or in connection with the Company and/or the Sub-Funds does not constitute an offer to anyone or solicitation by anyone in any jurisdiction in which such an offer or solicitation is not authorized or to any person to whom it is unlawful to make such offer or solicitation.
- Any information given by any person not mentioned in this Prospectus should be regarded as unauthorised. The Board of Directors has taken the precautions that the information contained in this Prospectus is accurate at the date of its publication and accepts responsibility accordingly. To reflect material changes, this Prospectus may be updated from time to time and potential subscribers should enquire from the

Company as to the issue of any later Prospectus and KID.

- The circulation and distribution of this Prospectus, as amended and restated from time to time, together with the KIDs and the offering of the Shares may be restricted in certain jurisdictions. Person receiving the Prospectus and/or more generally any information or documents with respect to or in connection with the Company and/or the Sub-Funds are required by the Company to inform themselves and to observe all applicable restrictions. The offer, sale or purchase of Shares, or the distribution, circulation or possession of the Prospectus and/or any information or documents with respect to or in connection with the Company and/or the Sub-Funds, shall be made in compliance with all applicable laws and regulations in force in any jurisdiction in which such offer, sale or purchase of Shares is made, or in which the distribution, circulation or possession of the Prospectus and/or any information or documents with respect to or in connection with the Company and/or the Sub-Funds occurs, including the obtaining of any consent, approval or permission required by such applicable laws and regulations, the satisfaction of any other formalities needing to be observed and the payment of any issuance, transfer or other taxes to be paid in such jurisdiction. It is the responsibility of any person in possession of this Prospectus and of the KIDs and any person wishing to subscribe for Shares pursuant to this Prospectus and the KIDs to inform themselves of, and to observe, all applicable laws and regulations of any relevant jurisdictions, including the obtaining of any government or other consents which may be required, the satisfaction of any other formalities needing to be observed and the payment of any issuance, transfer or other taxes requiring to be paid in such jurisdiction. Potential subscribers or purchasers of Shares should inform themselves as to the possible tax consequences, the legal requirements and any foreign exchange restrictions or exchange control requirements which they might encounter under the laws of the countries of their citizenship, residence or domicile and which might be relevant to the subscription, purchase, holding, conversion or sale of Shares.

TARGETED INVESTORS

The profile of the typical investor per each Sub-Fund is described in each Appendix annexed to the present Prospectus and in each of the KIDs.

“U.S. Persons” (as defined below) will not invest in the Sub-Funds.

HISTORICAL PERFORMANCES

The historical performance analysis of each Class of Shares will be presented in the relevant “Past performance” section of www.amundieftf.com if one complete calendar year of past performances is available after the launching of the concerned Class of Shares.

DISTRIBUTION AND SELLING RESTRICTIONS

At the date of this Prospectus, the Company has been authorised for offering in Luxembourg. The Company or specific Sub-Fund(s) may be also authorised for distribution in other jurisdictions. A list of the countries where part or all the Sub-Funds are authorized for distribution can be obtained from the registered office of the Company.

This Prospectus cannot be distributed for the purpose of offering or marketing the Shares in any jurisdiction or in any circumstances where such offering or marketing is not authorised.

No person receiving a copy of this Prospectus and of the KIDs in any jurisdiction may treat this Prospectus and the KIDs as constituting an invitation or offer to him to subscribe for Shares unless in the relevant jurisdiction such an invitation or offer could lawfully be made to him without compliance with any registration or other legal requirements.

No person has been authorised to give any information or make any representations, other than those contained in this Prospectus, in connection with the offering of Shares and, if given or made, such information or representations must not be relied on as having been authorised by the Company. You should ensure the Prospectus you receive has not been modified, amended or restated by any further versions. However, neither the delivery of this Prospectus, nor the issue of the Shares shall imply that there has been no change in the affairs of the Company since the date hereof.

Shares have not been and will not be registered under the United States Securities Act of 1933 (as amended) (the “**1933 Act**”) or the securities laws of any of the States of the United States. Shares cannot be offered, sold or delivered directly or indirectly in the United States of America, its territories or possessions or in any State or the District of Columbia (the “**United States**”), or to or for the account or benefit of any U.S. Person (as defined below). No U.S. federal or state securities commission has reviewed or approved this Prospectus. Any representation to the contrary is a criminal offence. Any re-offer or resale of any Shares in the United States or to U.S. Persons may constitute a violation of US law.

Shares will only be offered outside the United States pursuant to Regulation S under the 1933 Act. No holder of Shares will be permitted to sell, transfer or assign directly or indirectly (for example, by way of swap or other derivatives contract, participation or other similar contract or agreement) their Shares to a U.S. Person. Any such sale, transfer or assignment shall be void.

The Company will not be registered under the United States Investment Company Act of 1940, as amended (the “**Investment Company Act**”). Based on interpretations of the Investment Company Act by the staff of the United States Securities and Exchange Commission relating to foreign investment companies, of a Sub-Fund restricts its beneficial owners who are U.S. Persons and does not offer or propose to offer any of its securities publicly, it will not become subject to the registration requirements under the Investment Company Act. To ensure this requirement is maintained, the Directors may require the mandatory repurchase or redemption of Shares beneficially owned by U.S. Persons.

Applicants for Shares will be required to certify that they are not U.S. Persons. All Shareholders are required to notify the Company of any change in their status as non-U.S. Person.

“**U.S. Person**” shall mean **(A)** A “U.S. Person” within the meaning of Regulation S under the Securities Act of 1933 of the United States, as amended; or **(B)** any person other than a “Non-United States Person” as defined in CFTC Rule 4.7 (a) (1) (iv); or **(C)** a “U.S. Person” within the meaning of Section 7701(a)(30) of the Internal Revenue Code of 1986, as amended.

RELIANCE ON THIS PROSPECTUS AND ON THE KIDS

Shares in any Sub-Fund described in this Prospectus as well as in the relevant KIDs are offered only on the basis of the information contained therein and (if applicable) any addendum hereto and the latest audited annual report and any subsequent semi-annual report of the Company.

Any further information or representations given or made by any distributor, intermediary (the “**Intermediary**” defined as any sales agent, servicing agent and/or nominee, distributor, appointed to offer and sell the Shares to the investors and handle the subscription redemption, conversion or transfer request of Shareholders), dealer, broker or other person should be disregarded and, accordingly, should not be relied upon. No person has been authorised to give any information or to make any representation in connection with the offering of Shares other than those contained in this Prospectus and (if applicable) any addendum hereto and in any subsequent semi-annual or annual report and, if given or made, such information or representations must not be relied on as having been authorised by the Directors, the Management Company, the Depositary, the

Registrar and Transfer Agent or the Administrative Agent. Statements in this Prospectus and the KIDs are based on the law and practice currently in force in Luxembourg at the date hereof and are subject to change. Neither the delivery of this Prospectus or of the KIDs nor the issue of Shares shall, under any circumstances, create any implication or constitute any representation that the affairs of the Company have not changed since the date hereof.

Prospective investors may obtain, free of charge, on request, a copy of this Prospectus and of the KID(s) relating to the Sub-Fund(s) in which they invest, the annual and semi-annual financial reports of the Company and the Articles of Incorporation at the registered office of the Company or the Depositary.

INVESTMENT RISKS

Investment in any Sub-Fund carries with it a degree of financial risk, which may vary among Sub-Funds. The value of Shares and the return generated from them may go up or down, and investors may not recover the amount initially invested.

The Company does not represent an obligation of, nor is it guaranteed by, the Management Company or any other affiliate or subsidiary of Amundi Asset Management.

MARKET TIMING POLICY

The Company does not knowingly allow investments which are associated with market timing practices, as such practices may adversely affect the interests of all shareholders.

As per the CSSF Circular 04/146, market timing is to be understood as an arbitrage method through which an investor systematically subscribes and redeems or converts units or shares of the same undertaking for collective investment ("UCI") within a short time period, by taking advantage of time differences and/or imperfections or deficiencies in the method of determination of the net asset value of the UCI.

Opportunities may arise for the market timer either if the net asset value (as defined on hereafter) of the UCI is calculated on the basis of market prices which are no longer up to date (stale prices) or if the UCI is already calculating the net asset value when it is still possible to issue orders.

Market timing practices are not acceptable as they may affect the performance of the UCI through an increase of the costs and/or entail a dilution of the profit.

Accordingly, the Directors may, whenever they deem it appropriate and at their sole discretion, cause the Registrar and Transfer Agent and the Administrative Agent, respectively, to implement any of the following measures:

- Cause the Registrar and Transfer Agent to reject any application for conversion and/or subscription of Shares from investors whom the former considers market timers.

- The Registrar and Transfer Agent may combine Shares which are under common ownership or control for the purposes of ascertaining whether an individual or a group of individuals can be deemed to be involved in market timing practices.

- If a Sub-Fund is primarily invested in markets which are closed for business at the time the Sub-Fund is valued during periods of market volatility cause the Administrative Agent to allow for the Net Asset Value per Share to be adjusted to reflect more accurately the fair value of the Sub-Fund's investments at the point of valuation.

DATA PROTECTION

In accordance with the provisions of the law of 1st August 2018 on the organization of the National Commission for Data Protection and the general regime on data protection and any other data protection law applicable in Luxembourg, and with the Regulation n°2016/679 of 27 April 2016 on the protection of natural persons with regard to the processing of personal data and on the free movement of such data (the "**Data Protection Law**"), the Company, as data controller (the "**Data Controller**"), collects, stores and/or processes, by electronic or other means, the personal data supplied by the investors at the time of their subscription and/or the prospective investors, for the purpose of fulfilling the services required by the investors and/or the prospective investors and complying with its legal obligations.

The personal data processed includes the name, contact details (including postal and/or e-mail address), banking details and invested amount of each investor (and, if the investor is a legal person, of its contact person(s) and/or beneficial owner(s)) (the "**Personal Data**").

The investor may, at his/her/its discretion, refuse to communicate the Personal Data to the Data Controller. In this case, however, the Data Controller may refuse to admit the investor's subscription in the Company.

The Personal Data is processed in order to admit the investor in the Company, perform contracts entered into by the Company, administer the investor's interest in and operate the Company, for the legitimate interests of the Company and to comply with the legal obligations imposed on it. In particular, such data may be processed for the purposes of: (i) account and distribution fee administration, and subscriptions and redemption; (ii) maintaining the register of shareholders; (iii) anti-money laundering identification; (iv) tax identification under the European Union Tax Savings Directive 2003/48/EC and CRS/FATCA obligations ; (v) providing client-related services; and (vi) marketing.

The “legitimate interests” referred to above are:

- the processing purposes described in points (v) and (vi) of the above paragraph of this section;
- meeting and complying with the Company’s accountability requirements and regulatory obligations globally; and
- exercising the business of the partnership in accordance with reasonable market standards.

The Personal Data may also be collected, recorded, stored, adapted, transferred or otherwise processed and used by the Company’s data recipients (the “**Recipients**”) which, in the context of the above mentioned purposes, refer to the Registrar and Transfer Agent, the Management Company, distributors, other companies of Amundi and affiliates, and the Company’s legal advisors and auditors. Such information shall not be passed on any unauthorised third persons.

The Recipients may disclose the Personal Data to their agents and/or delegates (the “**Sub-Recipients**”), which shall process the Personal Data for the sole purposes of assisting the Recipients in providing their services to the Data Controller and/or assisting the Recipients in fulfilling their own legal obligations. The relevant Recipient shall remain fully liable to the Company for the performance of the relevant Sub-Recipient’s obligations.

The Recipients and Sub-Recipients may be located either inside or outside the European Union (the “**EU**”). Where the Recipients and Sub-Recipients are located outside the EU in a country which does not ensure an adequate level of protection to Personal Data and does not benefit from an adequacy decision of the European Commission, such transfer should rely on legally binding transfer agreements with the relevant Recipients and/or Sub-Recipient in the form of the EU Commission approved model clauses. In this respect, the investor has a right to request copies of the relevant document for enabling the Personal Data transfer(s) towards such countries by writing to the Data Controller.

The Recipients and Sub-Recipients may, as the case may be, process the Personal Data as data processors (when processing the Personal Data upon instructions of the Data Controller), or as distinct data controllers (when processing the Personal Data for their own purposes, namely fulfilling their own legal obligations). The Personal Data may also be transferred to third-parties such as governmental or regulatory agencies, including tax authorities, in accordance with applicable laws and regulations. In particular, Personal Data may be disclosed to the Luxembourg tax authorities which in turn may,

acting as data controller, disclose the same to foreign tax authorities.

In accordance with the conditions laid down by the Data Protection Law, the investor acknowledges his/her rights to:

- access his/her Personal Data;
- correct his/her Personal Data where it is inaccurate or incomplete;
- object to the processing of his/her Personal Data;
- restrict the use of his/her Personal Data;
- ask for erasure of his/her Personal Data; and
- ask for Personal Data portability.

The investor has also the right to object to the use of his/her/its Personal Data for marketing purposes by writing to the Data Controller.

The investor may exercise the above rights by writing to the Data Controller at the following e-mail address: www.amundi.com – “**Contact Us**”.

It is stated that the exercise of some rights may result, on a case-by-case basis, in it being impossible for the Company to provide the required services.

The investor also acknowledges the existence of his/her right to lodge a complaint with the *Commission Nationale pour la Protection des Données* (“**CNPD**”) in Luxembourg at the following address: 1, avenue du Rock’n’Roll, L-4361 Esch-sur-Alzette, Grand Duchy of Luxembourg, or with any other competent data protection supervisory authority.

INVESTOR RIGHTS

The Management Company draws the investors’ attention to the fact that any investor will only be able to fully exercise his investor rights directly against the Company, notably the right to participate in general shareholders’ meetings if the investor is registered himself and in his own name in the shareholders’ register of the Company. In cases where an investor invests in the Company through an intermediary investing into the Company in its own name but on behalf of the investor, it may not always be possible for the investor to exercise certain shareholder rights directly against the Company. Investors are advised to take advice on their rights.

I/ Investment Objectives/ Investment Powers and Restrictions

INVESTMENT OBJECTIVES

The Company aims to provide investors with professionally managed Sub-Funds investing in a wide range of transferable securities and money market instruments in accordance with Part I of the law of 17 December 2010 on undertakings for collective investment (the “**2010 Law**”) in order to achieve an optimum return from capital invested while reducing investment risk through diversification.

In addition, the Company aims to provide investors with professionally managed index Sub-Funds whose objective is to replicate the composition of a certain financial index recognised by the Luxembourg supervisory authority, unless otherwise mentioned in the relevant Appendix.

The investment policy and objective of each Sub-Fund will be determined in its concerned Appendix annexed to the present Prospectus.

A Sub-Fund may carry out its investment objective via an Indirect Replication and/or a Direct Replication as described in the following paragraphs:

- **a Sub-Fund with an Indirect Replication** may not necessarily invest directly in the constituents of the financial index as set out in its considered Appendix annexed to the present Prospectus.

The exposure to the performance of the considered financial index will be achieved by way of derivative transactions and/or instruments (the “**Indirect Replication**”).

a) If the Sub-Fund uses unfunded Indirect Replication technique for whole or part of its assets, it will (i) invest in a basket of transferable securities and liquid assets as further described in section A below (the “**Investment Portfolio**”) and (ii) enter into one or several OTC swap transactions whose overall purpose of which is to reach its investment objective, exchanging the value of its Investment Portfolio against the value of a basket of transferable securities or other eligible assets corresponding to its investment objective. Such an OTC swap transaction is designated as the “**Unfunded Swap**”.

b) If the Sub-Fund uses funded Indirect Replication technique for whole or part of its assets, it will enter into an OTC swap transaction the purpose of which is to reach its investment objective, exchanging the invested proceeds against the value of a basket of transferable securities or other eligible assets corresponding to its investment objective. Such an OTC swap

transaction is designated as a “**Funded Swap**”. A Sub-Fund investing in a Funded Swap is subject to dedicated Risk Management Process and Collateral Policy set forth in the present Prospectus.

A Sub-Fund with Indirect Replication may use both Funded Swap-based portfolio and Unfunded Swap-based portfolio at the same time, without prejudice to the particular conditions set out in its considered Appendix annexed to the present Prospectus.

Provided that a Sub-Fund may carry out its investment objective through an Unfunded Swap, the basket of securities held by such Sub-Fund in its investment portfolio will be selected on the basis of the following eligibility criteria, in particular:

When the Sub-Fund invests in equities:

- their inclusion in a major stock exchange index;
- liquidity (must exceed a minimum daily trading volume and market capitalization);
- credit rating of the country where the issuer has its registered office (must have a least a minimum S&P or equivalent rating);
- diversification criteria, in particular regarding:
 - the issuer (application of investment ratios to assets that qualify for UCITS, pursuant to the 2010 Law);
 - the geography;
 - the sector.

When the Sub-Fund invests in bonds:

The considered Sub-Fund will invest mainly in bonds issued by a given OECD-member country or by a private-sector issuer, and denominated in one of the OECD country currencies.

These securities will be bonds selected on the basis of the following criteria:

- eligibility criteria and in particular:
 - senior debt;
 - fixed maturity;
 - maximum residual maturity;
 - minimum issuance volume;
 - minimum S&P or equivalent credit rating.
- diversification criteria, including:
 - the issuer (application of investment ratios to assets that qualify for UCITS, pursuant to the 2010 Law);
 - the geography;
 - the sector.

The basket of transferable securities held by the Sub-Fund may be adjusted daily such that its value will generally be at least 100% of the Sub-Fund's net assets. When necessary, this adjustment will be made to ensure that the market value of the OTC swap contract mentioned above is less than or equal to zero, which will neutralize the counterparty risk arising from the OTC swap.

Investors may find more information on the above eligibility and diversification criteria, and in particular the list of eligible indices, on Amundi's website at www.amundi.tff.com.

Information on the updated composition of the basket of assets held in the Sub-Fund and the counterparty risk resulting from the OTC swap is available on the page dedicated to the Sub-Fund on Amundi's website at www.amundi.tff.com.

The frequency of any updates and/or the date on which the information above is updated is also set out on the same page of the above-mentioned website.

The counterparty to the OTC swap is a first class financial institution that specialises in that type of transaction. Such counterparty will not assume any discretion over the composition of the Sub-Fund's portfolio or over the underlying of the financial derivatives instruments.

Unless otherwise mentioned in the Sub-Fund's appendix, the using of the OTC swap will not involve leverage.

The net asset value of the Sub-Fund will increase (or decrease) according to the valuation of the OTC swap.

Adjustments of the OTC swap contract's nominal in the event of eventual subscriptions and redemptions will be performed based on the "mark to market" valuation method.

The valuation of the OTC swap agreements will be provided by the counterparty, but the Management Company will make its own independent valuation thereof.

The valuation of the OTC swap agreements will be checked by the auditor of the Company during their annual audit mission.

Despite all measures taken by the Company to reach its objectives, these measures are subject to independent risk factors, including but not limited to, changes in the fiscal or commercial regulations. No guarantee whatsoever may be offered to the investor in this regard.

- **a Sub-Fund with a Direct Replication** may carry out its investment objective by investing in a portfolio of transferable securities or other eligible assets that will typically comprise the constituents composing the financial index as set out in its considered Appendix annexed to the

present Prospectus and in doing so will apply the investment limits as set out in the above section "Investment Objectives / Investment Powers and Restrictions".

In order to optimize such Direct Replication method and to reduce the costs of investing directly in all constituents of the financial index, a Sub-Fund may decide to use a "sampling" technique that consists in investing in a selection of representative constituent of financial index as set out in its considered Appendix annexed to the present Prospectus.

According to this sampling technique, a Sub-Fund may invest in a selection of transferable securities representative of the financial index as set out in its considered Appendix annexed to the present Prospectus in proportions that do not reflect their weight within the financial index as set out in its considered Appendix annexed to the present Prospectus, and as the case may be invest in securities that are not constituents of the financial index.

If stated in the relevant Sub-Fund Appendix, a Sub-Fund may not invest (i) in securities of companies involved in the production or sale of the following controversial weapons : anti-personnel mines and cluster bombs as well as chemical, biological and depleted uranium weapons. (ii), in securities of companies in breach of international conventions on Human or Labor Rights or that violate, repeatedly and seriously, one or more of the ten principles of the Global Compact*, in securities of companies involved in Tobacco production or distribution, or of companies with significant exposure to Thermal coal or of companies with significant exposure to nuclear weapons or unconventional oil & gas. The exclusion of these securities is based on Amundi's methodology.

*United Nations Global Compact (UN Global Compact): "A call to companies to align strategies and operations with universal principles on human rights, labour, environment and anti-corruption, and take actions that advance societal goals."

The exclusion of these securities is based on Amundi's methodology as described in Section "Overview of the Responsible Investment Policy".

In addition, and to a limited extent, a Sub-Fund in Direct Replication may also engage in transactions such as, structured notes, financial derivative instruments ("FDI") mainly for achieving the objectives under (i) and (ii) below, including futures transactions OTC swaps, hedging swap, forward contracts, non-deliverable forwards, spot foreign exchange transactions, to:

- i. reduce the level of tracking errors
or
- ii. optimise its cash management

- or
- iii. reduce transaction costs or allowing exposure in the case of illiquid securities or securities which are unavailable for market or regulatory reasons (in particular in the case of emerging market country exposure)
- or
- iv. assist in achieving its investment objective and for reasons such as generating efficiencies in gaining exposure to the constituents of the financial index or to the financial index itself
- or
- v. for such other reasons as the Directors deem of benefit to the Sub-Fund.

In circumstances where a Sub-Fund would contract a FDI, the counterparty to that specific FDI would be a first class financial institution that specialises in that type of transaction. Such counterparty will not assume any discretion over the composition of the Sub-Fund's portfolio or over the underlying of the financial derivatives instruments.

To ensure transparency on the use of the Direct Replication method (i.e. either full replication of the financial index or sampling to limit replication costs) and on its consequences in terms of the assets in the Sub-Fund's portfolio, information on the updated composition of the basket of assets held by the Sub-Fund is available on the page dedicated to the Sub-Fund accessible on Amundi's website at www.amundiief.com, except otherwise mentioned in the Sub-Fund's Appendix. The frequency of any updates and/or the date on which the aforementioned information is updated is also indicated on the same page of the aforementioned website.

INVESTMENT POWERS AND RESTRICTIONS

In order to achieve the Company's investment objectives and policies, the Board of Directors has determined that the following investment powers and restrictions shall apply to all investments by the Company:

A. INVESTMENT IN TRANSFERABLE SECURITIES AND LIQUID ASSETS

- 1) In order to achieve the Company's investment objectives and policies, the Directors have determined that the following investment powers and restrictions shall apply to all investments made by certain Sub-Funds of the Company: The Company, in certain Sub-Funds, may solely invest in
 - a) transferable securities and money market instruments admitted to or dealt in on a regulated market within the meaning of item 1.4 of article 4 of Directive 2004/39/EC;
 - b) transferable securities and money market instruments dealt in on another

- regulated market that operates regularly and is recognised and is open to the public (a "**Regulated Market**") in a member state as defined in the 2010 Law (the "Member State");
- c) transferable securities and money market instruments admitted to official listing on a stock exchange or dealt in on another Regulated Market located within any other country in Europe, Asia, Oceania, the Americas and Africa;
- d) recently issued transferable securities and money market instruments provided that:
 - i) the terms of issue provide that application be made for admission to official listing in any of the stock exchanges or Regulated Markets referred to above;
 - ii) such admission is secured within one year of the issue.
- e) units or shares of UCITS authorised according to Directive 2009/65/EC, should they be situated in a Member State or not, provided that the UCITS in which each Sub-Fund of the Company intends to invest, may not, according to its constitutive documents, invest more than 10% of its net assets in aggregate, in units/shares of other UCITS or other UCIs.

The diversification limits relating to the investment in units or shares of UCITS described in this sub-paragraph are set out in the appendix of each Sub-Fund.
- f) deposits with credit institutions which are repayable on demand or have the right to be withdrawn, and maturing in no more than 12 (twelve) months, provided that the credit institution has its registered office in a Member State or, if the registered office of the credit institution is situated in OECD country being FATF member, provided that it is subject to prudential rules considered by the Luxembourg Supervisory Authority as equivalent to those laid down in European Union law;
- g) financial derivative instruments including cash settlement instruments, dealt in on a Regulated Market referred to in sub-paragraphs a), b), c) and/or financial derivative instruments dealt in over-the-counter ("OTC Derivatives") provided that:
 - i) the underlying consists of instruments covered by the paragraph 1) above (points a to f), financial indices, interest rates, foreign exchanges rates or currencies in which each of the Sub-Funds may invest according to their investment objective;

- ii) the counterparties to OTC derivative transactions are institutions subject to prudential supervision, and belonging to the categories approved by the Luxembourg Supervisory Authority; and
 - iii) the OTC derivatives are subject to reliable and verifiable valuation on a daily basis and can be sold, liquidated or closed by an offsetting transaction at any time at their fair value at the Company's initiative.
- h) money market instruments other than those dealt in on a Regulated Market and referred to in Article 1 of the 2010 Law, if the issue or the issuer of such instruments is itself regulated for the purpose of protecting investors and savings, and provided that they are:
- i) issued or guaranteed by a central, regional, or local authority, a central bank of a Member State, the European Central Bank, the European Union or the European Investment Bank, a non Member State or, in the case of a Federal State, by one of the members making up the federation, or by a public international body to which one or more Member States belong; or
 - ii) issued by an undertaking whose securities are dealt in on Regulated Markets referred to in subparagraphs a), b) or c); or
 - iii) issued or guaranteed by an establishment subject to prudential supervision, in accordance with the criteria defined by the European Union law or by an establishment which is subject to and comply with prudential rules considered by the Luxembourg Supervisory Authority to be at least equivalent to those laid down by European Union law; or
 - iv) issued by other bodies belonging to the categories approved by the Luxembourg Supervisory Authority provided that investments in such instruments are subject to investor protection equivalent to that laid down in the first, the second and the third indent above and provided that the issuer is a company whose capital and reserves amount at least to ten million Euro (EUR 10,000,000.-) and which presents and publishes its annual accounts in accordance with Directive 2013/34/EU, is an entity which, within a group of companies which includes one or several listed companies, is dedicated to the financing of the group or is an entity which is dedicated to the financing of securitisation vehicles which benefit from a banking liquidity line.
- 2) In addition, each Sub-Fund of the Company may invest a maximum of 10% of its net assets in transferable securities and money market instruments other than those referred to in paragraph (1).
- 3) Except for situations of exceptionally unfavourable market conditions where a temporary breach of the 20% limit is required by the circumstances and justified having regard to the interest of the investors, each Sub-Fund may hold up to 20% of its net assets in bank deposits at sight that are accessible at any time, in order to cover current or exceptional payments or for the time necessary to reinvest in eligible assets or for a period of time strictly necessary in case of unfavourable market conditions..
- 4)
- a) each Sub-Fund may not invest more than 10% of its net assets in transferable securities or money market instruments issued by the same issuer.
- Each Sub-Fund may not invest more than 20% of its net assets in deposits made with the same issuer. The risk exposure to a counterparty of each Sub-Fund in an OTC derivative transaction may not exceed 10% of its net assets when the counterparty is a credit institution referred to in (1) f) above or 5% of its net assets in other cases.
- b) in addition to the limit set forth in point a) above, the total value of transferable securities and money market instruments amounting more than 5% of the net assets of one Sub-Fund, must not exceed 40% of the net assets of this Sub-Fund. This limitation does not apply to deposit and OTC derivative transactions made with financial institutions subject to prudential supervision.
 - c) Notwithstanding the individual limits laid down in paragraph a), b) above, each Sub-Fund may not combine:
 - investments in transferable securities or money market instruments issued by, and
 - i) deposits made with,
 - ii) exposures arising from OTC derivatives transactions undertaken with a single issuer for more than 20% of the Sub-Fund's net assets.

d) the limit of 10% in sub-paragraph 4 a) above may be increased to a maximum of 35% in respect of transferable securities and money market instruments which are issued or guaranteed by a Member State or its local authorities, by an OECD country being FATF member or by public international bodies of which one or more Member States are members, and such securities and money market instruments need not be included in the calculation of the limit of 40% stated in sub-paragraph 4) b).

e) the limit of 10% in sub-paragraph 4 a) above may be increased to a maximum of 25% for bonds that fall under the definition of covered bonds in point (1) of Article 3 of Directive (EU) 2019/2162 of the European Parliament and of the Council of 27 November 2019 on the issue of covered bonds and covered bond public supervision and in respect of qualifying debt securities issued before 8 July 2022 by a credit institution whose registered office is situated in a Member State and which is subject, by virtue of law, to particular public supervision in order to protect the holders of such qualifying debt securities. For purposes hereof, "qualifying debt securities" are securities the proceeds of which are invested in accordance with applicable law in assets providing a return which will cover the debt service through the maturity date of the securities and which will be applied on a priority basis to the payment of principal and interest in the event of a default by the issuer. To the extent that a relevant Sub-Fund invests more than 5% of its net assets in debt securities issued by such an issuer, the total value of such investments may not exceed 80% of the net assets of such Sub-Fund. Such securities need not be included in the calculation of the limit of 40% stated in sub-paragraph 4 b).

The ceilings set forth in paragraph 4 above may not be aggregated, and accordingly, investments in the securities of any one issuer, effected in compliance with the provisions set forth in paragraph 4, may under no circumstances exceed 35% of any Sub-Fund's net assets.

f) companies which are included in the same group for the purposes of consolidated accounts (as defined in accordance with Directive 2013/34/EU) or in accordance with recognised international accounting rules are considered as a single body or issuer for the purpose of calculating the limits contained in this section.

Each Sub-Fund may invest in aggregate up to 20% of its net assets in

transferable securities and money market instruments with the same group.

5) Notwithstanding the ceilings set forth above, each Sub-Fund is authorised to invest in accordance with the principle of risk spreading, up to 100% of its net assets in transferable securities and money market instruments issued or guaranteed by (i) a Member State of the European Union, its local authorities, or a public international body of which one or more Member State(s) of the European Union are member(s), (ii) any member state of the OECD or any member country of the G-20, or (iii) Singapore or Hong Kong, provided that:

- a) such securities are part of at least six different issues; and
- b) the securities from any one issue do not account for more than 30% of the net assets of such Sub-Fund.

Such authorisation will be granted should the shareholders have a protection equivalent to that of shareholders in UCITS complying with the limits laid down in 4) above.

6) The Company may:

- a) not acquire more than 10% of the debt securities of any single issuing body;
- b) not acquire more than 10% of the non-voting shares of any single issuing body;
- c) not acquire more than 10% of the money market instruments of any single issuing body;
- d) not acquire more than 25% of the units of any single collective investment undertaking.

These four above limits apply to the Company as a whole.

The limits under a), c) and d) above may be disregarded at the time of acquisition if at that time the gross amount of the bonds or of the money market instruments or the net amount of the instruments in issue cannot be calculated.

The Company may not acquire any shares carrying voting rights which would enable the Company to take legal or management control or to exercise significant influence over the management of the issuing body.

7) The ceilings set forth under 6) above do not apply in respect of

- a) transferable securities and money market instruments issued or guaranteed by a Member State or by its local authorities;
- b) transferable securities and money market instruments issued or guaranteed by any other State which is not a Member State;

- c) transferable securities and money market instruments issued by a public international body of which one or more Member State(s) is/are member(s);
- d) shares in the capital of a company which is incorporated under or organised pursuant to the laws of a State which is not a Member State provided that (i) such company invests its assets principally in securities issued by issuers of the State, (ii) pursuant to the law of that State a participation by the relevant Sub-Fund in the equity of such vehicle constitutes the only possible way to purchase securities of issuers of that State, and (iii) such vehicle observes in its investments policy the restrictions set forth in paragraph 4) and 5) above as well as in **C.** hereafter;
- e) shares held by the Company in the capital of subsidiaries carrying on exclusively the business of management, advice or marketing of the Company in the country/state where the subsidiary is located, regarding the repurchase of units/shares requested by the unit holders/shareholders.

The investment restrictions listed above and in **C.** hereafter apply at the time of purchase of the relevant investments. If these limits are exceeded with respect to a Sub-Fund for reasons beyond the control of the Sub-Fund or when exercising subscription rights, the Sub-Fund shall adopt as a priority objective for the sales transactions of the relevant Sub-Fund the remedying of that situation, taking due account of the interests of the shareholders.

While ensuring observance of the principle of risk-spreading, the Company may derogate from limitations 4) to 7) above and in **C.** hereafter for a period of six months following the date of its inscription to the Luxembourg official list of UCIs.

- 8) The Company shall ensure that the global exposure relating to the use of derivative instruments in one Sub-Fund does not exceed its total asset value. The risk exposure is calculated taking into account the current value of the underlying assets, the counterparty risk, future market movements and the time available to liquidate the positions.

If a Sub-Fund invests in financial derivative instruments, the exposure to the underlying assets may not exceed in aggregate the investment limits laid down in paragraph A. 4) above. When the Sub-Fund invests in index-based financial derivative instruments, these investments do not have to be combined to the limits laid down in paragraph A. 4).

When a transferable security or money market instrument embeds a derivative, the

latter must be taken into account when complying with the above requirements.

B. INVESTMENT MADE BY INDEX SUB-FUNDS

The aim of the index Sub-Funds investment policy is to replicate the composition of a certain financial index which is recognised by the CSSF, on the following basis:

- a) the composition of the index is sufficiently diversified;
- b) the index represents an adequate benchmark for the market to which it refers;
- c) it is published in an appropriate manner.

Owing to the specific investment policy of the index Sub-Funds and without prejudice to the limits laid down in paragraph A. 6) and 7), the limits laid down in paragraph A. 4) are raised to a maximum of 20% for investments in shares and/or bonds issued by the same body. The aforesaid limit is raised to 35% where that proves to be justified by exceptional market conditions in particular in regulated markets where certain transferable securities or money market instruments are highly dominant as further described in the Appendices (where applicable). The investment up to this limit is only permitted for a single issuer.

Licence

The use of any financial index by a given Sub-Fund is covered by contractual licensing arrangements (the "**Licence**"). There is no guarantee that the Licence will be extended beyond its initial term or that the Licence will not be terminated.

Index Substitution

In the event that the Licence is not extended or is terminated, the Management Company may seek in agreement with the Board of Directors to replace the financial index by another suitable index though there is no certainty that one will be available.

There is no guarantee that the methodology of any financial index described in the relevant Appendix of a Sub-Fund will not be changed by the administrator of the financial index. In the event it is materially modified, the Management Company in agreement with the Board of Directors may decide in its discretion to replace the index by a suitable index if one is then available.

Shareholders will be promptly informed in the event that the Licence is terminated, and/or the index is substituted.

C. INVESTMENT IN UCITS

Certain Sub-Funds may acquire units of UCITS referred to in paragraph A. 1) e) above, provided that no more than 10% of a Sub-Fund's net assets be invested in the units. No Sub-Fund may acquire shares or units of any UCIs.

When the Sub-Funds of the Company invest in the units of other UCITS directly or indirectly managed by the Management Company or by a company linked to the Management Company by common management or control, or by a direct or indirect holding which exceeds 10% of the capital or management rights no fees may be charged to the Company on account of its investment in the units of such other UCITS. Moreover, no subscription or redemption fees may be charged to the Company on account of its investment in the units of linked underlying UCITS.

The Company may acquire no more than 25% of the units of the same UCITS. This limit may be disregarded at the time of acquisition if at that time the gross amount of the units in issue cannot be calculated. In case of a UCITS with multiple sub-funds, this restriction is applicable by reference to all units issued by the UCITS concerned, all sub-funds combined.

The underlying investments held by the UCITS in which the Company invests do not have to be considered for the purpose of the investment restrictions set forth under A above.

D. INVESTMENT IN OTHER ASSETS

a) The Company will not make investments in precious metals or certificates representing them;

b) The Company may not enter into transactions involving commodities or commodity contracts, except that the Company may employ techniques and instruments set out in paragraph E. Below subject to the conditions defined in the applicable regulations. For the avoidance of doubt, OTC total return swaps in relation to eligible Commodities financial indices are permitted;

c) The Company will not purchase or sell real estate or any option, right or interest therein, provided the Company may invest in securities secured by real estate or interests therein or issued by companies which invest in real estate or interests therein.

However, the Company may acquire movable and immovable property which is essential for the direct pursuit of its activity;

d) The Company may not carry out uncovered sales of transferable securities, money market instruments or other financial instruments referred to above;

e) The Company may not borrow for the account of any Sub-Fund, other than amounts which do not in aggregate exceed 10% of the net asset value of the Sub-Fund, and then only as a temporary measure. For the purpose of this restriction, back to back loans are not considered to be borrowings;

f) The Company will not grant loans or act as guarantor on behalf of third parties. This limitation will not prevent the Company from acquiring transferable securities, money market instruments or other financial instruments referred to 1) above;

g) The Company will not mortgage, pledge, hypothecate or otherwise encumber as security for indebtedness any securities held for the account of any Sub-Fund, except as may be necessary in connection with the borrowings mentioned in e) above, and then such mortgaging, pledging, or hypothecating may not exceed 10% of the Net Asset Value of each Sub-Fund. In connection with swap transactions, option and forward exchange transactions or futures transactions the deposit of securities or other assets in a separate account shall not be considered a mortgage, pledge or hypothecation for this purpose;

h) The Company will not underwrite or sub-underwrite securities of other issuers.

In accordance with the above Investment Restrictions, each Sub-Fund may employ techniques and instruments relating to transferable securities and money market instruments providing that these techniques and instruments are used for the purpose of efficient portfolio management. A Sub-Fund may also employ techniques and instruments intended to provide protection against foreign exchange risks in the context of the management of the assets and liabilities of the Sub-Fund (see below).

The Board of Directors may impose other investment restrictions at any time in the interest of the shareholders whenever necessary to comply with the laws and requirements of those countries where the Company Shares are offered.

E. INVESTMENT TECHNIQUES

1) Techniques and Instruments relating to transferable securities and money market instruments

Subject to the conditions under A. 1) g) above and any limitations set out in their respective investment policies, the Sub-Funds may use the following techniques and instruments for the purpose of efficient portfolio management.

For the purpose of efficient portfolio management, the Sub-Fund may undertake transactions relating to financial futures, warrants and options contracts traded on a Regulated Market. Alternatively, the Sub-Fund may undertake transactions relating to options, swaps (including total return swaps) entered into by private agreement (OTC) with highly rated financial institutions specialising in this type of transaction and participating actively in the relevant OTC market. Such OTC financial derivative instruments shall be safekept by the Depositary.

1. Options on transferable securities/ money market instruments

The Sub-Fund may buy and sell put and call options on transferable securities and money market instruments.

At the conclusion as well as during the existence of contracts for the sale of call options on securities, the Sub-Fund will hold either the

underlying securities, matching call options, or other instruments (such as warrants) that provide sufficient coverage of the commitments resulting from these transactions.

The underlying securities related to call options written may not be disposed of as long as these options are outstanding unless such options are covered by matching options or by other instruments that can be used for that purpose. The same applies to equivalent call options or other instruments which the Sub-Fund must hold where it does not have the underlying securities at the time of the writing of such options.

A Sub-Fund may not write uncovered call options on transferable securities and money market instruments. As a derogation from this rule, a Sub-Fund may write call options on securities that it does not hold at inception of the transaction, if the aggregate exercise price of such uncovered call options written does not exceed 25% of the net asset value of the Sub-Fund and the Sub-Fund is, at any time, in a position to cover the open position resulting from such transactions.

Where a put option is sold, the Sub-Fund's corresponding portfolio must be covered for the full duration of the contract by adequate liquid assets that would meet the exercise value of the contract, should the option be exercised by the counterparty.

2. Hedging through Stock Market Index Futures, Warrants and Options

As a global hedge against the risk of unfavourable stock market movements, a Sub-Fund may sell futures contracts on stock market indices, and may also sell call options, buy put options or transact in warrants on stock market indices, provided there is sufficient correlation between the composition of the index used and the Sub-Fund's corresponding portfolio.

The total commitment resulting from such futures, warrants and option contracts on stock market indices may not exceed the global valuation of securities held by the relevant Sub-Fund's corresponding portfolio in the market corresponding to each index.

3. Hedging through Interest Rate Futures, Options, Warrants, Swaps (including total return swaps)

As a global hedge against interest rate fluctuations, a Sub-Fund may sell interest rate futures contracts and may also sell call options, buy put options or transact in warrants on interest rates or enter into OTC interest rates swaps or swaptions with highly rated financial institutions specialising in this type of instruments.

The total commitment resulting from such futures, option, warrants and swaps contracts (including total return swaps) and swaptions on interest rates may not exceed the total market value of the assets to be hedged held by the Sub-

Fund in the currency corresponding to these contracts.

4. Futures, Warrants and Options on Other Financial Instruments for a Purpose other than hedging

As a measure towards achieving a fully invested portfolio and retaining sufficient liquidity, a Sub-Fund may buy or sell futures, warrants and options contracts on financial instruments (other than the transferable securities or currency contracts), such as instruments based on stock market indices and interest rates, provided that these are in line with the stated investment objective and policy of the corresponding Sub-Fund and that the total commitment arising from these transactions together with the total commitment arising from the sale of call and put options on transferable securities at no time exceeds the net asset value of the relevant Sub-Fund.

With regard to the "total commitment" referred to in the preceding paragraph, the call options written by the Sub-Fund on transferable securities for which it has adequate cover do not enter into the calculation of the total commitment.

The commitment relating to transactions other than options on transferable securities shall be defined as follows:

- the commitment arising from futures contracts is deemed equal to the value of the underlying net positions payable on those contracts which relate to identical financial instruments (after setting off all sale positions against purchase positions), without taking into account the respective maturity dates; and
- the commitment deriving from options purchased and written as well as warrants purchased and sold is equal to the aggregate of the exercise (striking) prices of net uncovered sales positions which relate to single underlying assets without taking into account respective maturity dates.

The aggregate acquisition prices (in terms of premium paid) of all options on transferable securities purchased by the Sub-Fund together with options acquired for purposes other than hedging (see above) may not exceed 15% of the net assets of the relevant Sub-Fund.

5. OTC total return swaps

In order to achieve the investment objective of the Sub-Funds replicating financial indices via an Indirect Replication methodology, the Company may, on behalf of the Sub-Funds, enter into total return swaps ("TRS") entered into by private agreement (OTC) with regulated financial institutions which have their registered office in one of the OECD countries, and which are specialised in such types of transactions, have a minimum credit rating of investment grade quality and are subject to prudential supervision (such as credit institutions or investment firms). The identity of the counterparties will be disclosed in the annual report.

Each Sub-Fund may incur costs and fees in connection with TRS upon entering into TRS and/or any increase or decrease of their notional amount. The amount of these fees may be fixed or variable. Information on costs and fees incurred by each Fund in this respect, as well as the identity of the recipients and any affiliation they may have with the Depositary, the investment adviser or the Management Company, if applicable, may be available in the annual report. All revenues arising from TRS, net of direct and indirect operational costs and fees, will be returned to the relevant Sub-Fund.

A Sub-Fund is exposed to the risk of bankruptcy, settlement default or any other type of default by the counterparty of the OTC total return swaps.

In line with UCITS guidelines, the counterparty risk (whether the counterparty is Société Générale or another third party), cannot exceed 10% of the considered Sub-Fund's total assets, by counterparty.

Any counterparty to an OTC derivative instrument entered into by any Sub-Fund will be selected according to the Management Company best execution policies and procedures. A copy of the Management Company best execution policy (including the relevant execution matrix by asset class) is mentioned at the following address: <https://www.amundi.com> section legal documentation.

TRS entered into by a Sub-Fund may be in the form of Funded Swaps and/or Unfunded Swaps.

The use by any Sub-Fund of TRS will be specified in the table "Securities financing transactions and total return swaps" of the Prospectus, within the meaning of, and under the conditions set out in, applicable laws, regulations and CSSF circulars issued from time to time, in particular, but not limited to regulation (EU) 2015/2365.

6. Efficient portfolio management techniques

The Company may employ techniques and instruments relating to transferable securities and money market instruments provided that such techniques and instruments are used for the purposes of efficient portfolio management within the meaning of, and under the conditions set out in, applicable laws, regulations and circulars issued by the CSSF from time to time.

In particular, those techniques and instruments should not result in a change of the declared investment objective of the Sub-Fund or add substantial supplementary risks in comparison to the stated risk profile of the Sub-Fund. Such securities or instruments will be safekept with the Depositary.

The risk exposure to a counterparty generated through efficient portfolio management techniques and OTC financial derivatives must be combined when calculating counterparty risk limits laid down under article 52 of the 2009 Directive.

All revenues arising from efficient portfolio management techniques, net of direct and indirect operational costs and fees, will be returned to the considered Sub-Fund. In particular, fees and cost may be paid to agents of the Company, to the Management Company, and to other intermediaries providing services in connection with efficient portfolio management techniques as normal compensation of their services. Such fees may be calculated as a percentage of gross revenues earned by the Sub-Fund through the use of such techniques. Information on direct and indirect operational costs and fees that may be incurred in this respect as well as the identity of the entities to which such costs and fees are paid – as well as any relationship they may have with the Depositary or Management Company – will be available in the annual report of the Company.

(a) Securities lending and borrowing transactions

Several Sub-Funds of the Company intend to enter into securities lending and borrowing transactions that consist in transactions whereby a lender transfers securities or instruments to a borrower, subject to a commitment that the borrower will return equivalent securities or instruments on a future date or when requested to do so by the lender, such transaction being considered as securities lending for the party transferring the securities or instruments and being considered as securities borrowing for the counterparty to which they are transferred. Securities and instruments that may be subject to lending transactions include equities, bonds, money market instruments and exchange traded funds. Securities lending transactions will be entered into for one or more of the following specific aims: (i) reduction of risk; (ii) reduction of cost; or (iii) generation of additional capital or income depending on the expected revenues and costs of the transaction which are essentially driven by the borrower's demand for the securities or instruments held in each fund's portfolio at any time. As such, it is expected that the Sub-Funds will enter into such type of transactions on a temporary basis.

The Company intends more specifically to enter into securities lending transactions provided that the following rules are complied with in addition to the abovementioned conditions:

- the borrower in a securities lending transaction must be a regulated financial institution which has its registered office in one of the OECD countries, and which is specialised in such types of transactions, has a minimum credit rating of investment grade quality and is subject to prudential supervision (such as credit institution or investment firm). The identity of the borrower will be disclosed in the annual report;

- the Company may only lend securities or instruments to a borrower either directly or through a standardised system organised by a recognised clearing institution or through a lending system organised by a financial institution subject to prudential supervision rules considered by the CSSF as equivalent to those provided by EU law and specialised in this type of transaction;
- the Company may only enter into securities lending transactions provided that it is entitled at any time under the terms of the agreement to request the return of the securities lent or to terminate the agreement.

For certain Sub-Funds, the Company and the Management Company have appointed Amundi Intermediation as securities lending agent (the “**Securities Lending Agent**”).

The Securities Lending Agent is in charge of counterparty selection and best execution.

The securities lending transactions may be executed with related parties, belonging to Credit Agricole Group such as Crédit Agricole CIB and CACEIS. The counterparties with whom securities lending transactions are entered into will be detailed in the annual report of the Company.

The net revenues (that represent the gross revenues minus the direct and indirect operational costs and fees) achieved from techniques and instruments on securities financing transactions remain with the relevant Sub-Fund.

Direct and indirect operational costs and fees may be deducted from the gross revenues delivered to the Sub-Fund. Unless otherwise specified in the relevant Sub-Fund Annex, these costs represent 35% of the gross revenues and are paid to the Securities Lending Agent.

Out of the 35% it receives, the Securities Lending Agent covers its own fees and costs and shall pay any relevant indirect fee and cost (including 5% to Caceis Bank, Luxembourg Branch acting as collateral agent and performing the settlement of securities lending transactions).

As these direct and indirect operational costs do not increase the costs of running the Sub-Fund, they have been excluded from the ongoing charges.

At least 65% of the gross revenue goes to the relevant Sub-Fund.

Sub-Funds that enter into securities lending may likely be affected by strong variations in context of market opportunities. The volume of use of this technique with a view to optimizing revenues is

likely to be impacted by the expected return in consideration of market appetite. During periods of high demand (e.g. borrower demand to borrow stocks from the underlying market), the proportion of the Sub-Funds’ net assets subject to securities lending transactions may approach the maximum percentage, while there may also be periods in which there is little or no demand from the market to borrow the underlying securities, in which case this proportion could be 0%. Furthermore, Sub-Funds may be also affected by on-going adaptation of the market against new regulatory framework implementation. Maximum of use of securities lending will not be above the maximum level indicated in Appendix E, such maxima are determined by management constraints.

Both the Securities Lending Agent and Caceis Bank, Luxembourg Branch are related parties to the Management Company.

For the avoidance of doubt securities lending transaction will be limited to Sub-Fund applying Direct Replication investment policy.

The annual report of the Company contains if applicable the following details:

- the exposure obtained through efficient portfolio management techniques;
- the identity of the counterparty(ies) to these efficient portfolio management techniques;
- the type and amount of collateral received by the UCITS to reduce counterparty exposure; and
- the revenues arising from efficient portfolio management techniques for the entire reporting period together with the direct and indirect operational costs and fees incurred.

The use by any Sub-Fund of securities lending and borrowing transactions will be specified in the table “Securities financing transactions and total return swaps” of the Prospectus, within the meaning of, and under the conditions set out in, applicable laws, regulations and CSSF circulars issued from time to time, in particular, but not limited to regulation (EU) 2015/2365.

(b) repurchase, reverse repurchase and buy-sell-back transactions

The Company may enter into repurchase agreements that consist of forward transactions at the maturity of which the Company (seller) has the obligation to repurchase the assets sold and the counterparty (buyer) the obligation to return the assets purchased under the transactions. The Company may further enter into reverse repurchase agreements that consist of forward transactions at the maturity of which the counterparty (seller) has the obligation to repurchase the asset sold and the Company (buyer) the obligation to return the assets purchased under the transactions.

The Company's involvement in such transactions is, however, subject to the additional following rules:

- the counterparty to these transactions must be a regulated financial institution which has its registered office in one of the OECD countries, and which is specialised in such types of transactions, has a minimum credit rating of investment grade quality and is subject to prudential supervision (such as credit institution or investment firm). The identity of the counterparty will be disclosed in the annual report;
- the Company may only enter into reverse repurchase agreement and/or repurchase agreement transactions provided that it is able at any time (a) to recall the full amount of cash in a reverse repurchase agreement or any securities subject to a repurchase agreement or (b) to terminate the agreement in accordance with applicable regulations. However, fixed-term transactions that do not exceed seven days should be considered as arrangements on terms that allow the assets to be recalled at any time by the Company.

The Company may enter into buy-sell back transactions which consist of transactions, not being governed by a repurchase agreement or a reverse repurchase agreement as described above, whereby a party buys or sells securities or instruments to a counterparty, agreeing, respectively, to sell to or buy back from that counterparty securities or instruments of the same description at a specified price on a future date. Such transactions are commonly referred to as buy-sell back transactions for the party buying the securities or instruments, and sell-buy back transactions for the counterparty selling them.

The use by any Sub-Fund of repurchase, reverse repurchase and buy-sell back transactions will be specified in the table "Securities financing transactions and total return swaps". As of the date of the Prospectus, the Sub-Funds have not engaged and have no intention to engage in repurchase, including reverse repurchase, transactions and or buy-sell-back transactions.

If any Sub-Fund engages into repurchase, reverse repurchase and/or buy-sell back transactions in the future, the Prospectus will be further amended to provide required information as per the applicable laws and regulations.

2) Techniques and Instruments to protect against exchange risks

For the purpose of protecting against currency fluctuations, the Sub-Fund may undertake transactions relating to financial futures, warrants and options contracts traded on a Regulated Market.

Alternatively, the Sub-Fund may undertake transactions relating to options, swaps and forward contracts entered into by private agreement (OTC) with regulated financial institutions which have their registered office in one of the OECD countries, and which are specialised in such types of transactions, have a minimum credit rating of investment grade quality and are subject to prudential supervision (such as credit institutions or investment firms).

In order to hedge foreign exchange risks, a Sub-Fund may have outstanding commitments in currency futures and/or sell call options, purchase put options or transact in warrants with respect to currencies or enter into currency forward contracts or currency swaps. The hedging objective of the transactions referred to above presupposes the existence of a direct relationship between the contemplated transactions and the assets or liabilities to be hedged and implies that, in principle, transactions in a given currency may not exceed the valuation of the aggregate assets denominated in that currency nor may they, as regards their duration, exceed the period during which such assets are held.

3) Other instruments

(a) Warrants

Warrants shall be considered as transferable securities if they give the investor the right to acquire newly issued or to be issued transferable securities. The Sub-Funds, however, may not invest in warrants where the underlying is gold, oil or other commodities.

The Sub-Funds may invest in warrants based on stock exchange indices for the purpose of efficient portfolio management.

(b) Rules 144 A Securities

The Sub-Funds may invest in so-called Rule 144A securities which are securities that are not required to be registered for resale in the United States under an exemption pursuant to Section 144A of the 1933 Act ("Rule 144A Securities") but can be sold in the United States to certain institutional buyers. A Sub-Fund may invest in Rule 144A Securities, provided that: such securities are issued with registration rights pursuant to which such securities may be registered under the 1933 Act and traded on the US OTC Fixed Income Securities market. Such securities shall be considered as newly issued transferable securities.

In the event that any such securities are not registered under the 1933 Act within one year of issue, such securities shall be considered as subject to the 10% limit of the net assets of the Sub-Fund applicable to the category of non-listed securities.

(c) Structured Notes

Subject to any limitations in its investment objective and policy and to the Investment Restrictions outlined above, each Sub-Fund may invest in structured notes, comprising listed government bonds, medium-term notes, certificates or other similar instruments issued by prime rated issuers where the respective coupon and/or redemption amount has been modified (or structured), by means of a financial instrument.

The Investment Restrictions apply on the issuer of the Structured Note and also on its underlying assets.

These notes are valued by brokers with reference to the revised discounted future cash flows of the underlying assets.

COLLATERAL POLICY

In the context of OTC financial derivatives transactions and efficient portfolio management techniques, the Company may receive collateral with a view to reduce its counterparty risk. This section sets out the collateral policy applied by the Company in such case. All assets received by the Company in this context shall be considered as collateral for the purposes of this section.

Any Eligible Collateral, as detailed below, within the context described above will be the relevant Sub-Fund's property. It will be delivered on the relevant Sub-Fund's securities account at its Depository.

Eligible collateral:

Collateral received by the Company may be used to reduce its counterparty risk exposure if it complies with the criteria set out in applicable laws, regulations and circulars issued by the Luxembourg Supervisory Authority from time to time notably in terms of liquidity, valuation, issuer credit quality, correlation, risks linked to the management of collateral and enforceability. In particular, collateral should comply with the following conditions:

- (a) any collateral received other than cash should be of high quality, highly liquid and traded on a regulated market or multilateral trading facility with transparent pricing in order that it can be sold quickly at a price that is close to pre-sale valuation;
- (b) it should be valued on at least a daily basis and assets that exhibit high price volatility should not be accepted as collateral unless suitably conservative haircuts are in place;
- (c) it should be issued by an entity that is independent from the counterparty and is expected not to display a high correlation with the performance of the counterparty;

- (d) it should be sufficiently diversified in terms of country, markets and issuers with a maximum exposure of 20% of the Sub-Fund's Net Asset Value to any single issuer on an aggregate basis, taking into account all collateral received;
- (e) it should be capable of being fully enforced by the Company at any time without reference to or approval from the counterparty;
- (f) where there is a title transfer, collateral received should be held by the Depository or one of its sub-custodians to which the Depository has delegated the custody of such collateral. For other types of collateral arrangement (e.g. a pledge), collateral can be held by a third-party custodian which is subject to prudential supervision and which is unrelated to the provider of the collateral.

Notwithstanding the condition specified in (d) above, the Sub-Fund may accept collateral that increases its exposure to a single issuer to more than 20% of its net asset value provided that:

- such collateral is issued by (i) a Member State, (ii) one or more of its local authorities, (iii) a third country, or (iv) a public international body to which one or more Member States belong and;
- such collateral consists of at least six different issues, but collateral from any single issue shall not account for more than 30% of the Sub-Fund's net assets.

The Company has established an Eligibility Policy setting out additional eligibility criteria:

- for equities received as collateral, the Company assesses the eligibility through average daily traded volume and market capitalization thresholds. The Company has also defined eligible countries of issuance for equities received as collateral;
- for bonds received as collateral, the eligibility policy relies on credit risk rating issued by a major rating agency, maturity, seniority of the debt and minimum outstanding issue thresholds. The Company has also defined eligible countries of issuance for bonds received as collateral, depending on the type of bonds considered.

Subject to the abovementioned conditions, collateral received by the Company may consist of:

- (i) cash and cash equivalents, including short-term bank certificates and Money market instruments;

- (ii) bonds issued or guaranteed by a Member State of the OECD or by their local public authorities or by supranational institutions and undertakings with EU, regional or worldwide scope or by any country as long as the conditions (a) to (e) set out above are fully complied with;
- (iii) shares or units issued by money market UCIs calculating a daily net asset value and being assigned a rating of AAA or its equivalent;
- (iv) shares or units issued by UCITS investing mainly in bonds/shares mentioned in (v) and (vi) below;
- (v) bonds issued or guaranteed by first class issuers offering adequate liquidity;
- (vi) shares admitted to or dealt in on a regulated market of a Member State of the EU or on a stock exchange of a Member State of the OECD or the stock exchange of any country as long as the conditions (a) to (e) set out above are fully complied with, on the condition that these shares are included in a main index.

Level and valuation of collateral

The Company will determine the required level of collateral for Funded Swaps by reference to the applicable counterparty risk limits set out in this Prospectus and taking into account the nature and characteristics of transactions, the creditworthiness and identity of counterparties and prevailing market conditions.

The securities acquired by the Sub-Fund as Funded Swap collateral must be issued by an entity that is independent from the counterparty and which is not expected to display a high correlation with the performance of the counterparty.

Haircut policy

Collateral will be valued, on a daily basis, using available market prices and taking into account appropriate discounts which will be determined for each asset class based on the Management Company’s haircut policy.

Such haircut will be determined by the Management Company based on criteria, including, but not limited to:

- (a) nature of the security;
- (b) maturity of the security (when applicable);
- (c) the security issuer rating (when applicable).

The Management Company expects that the discount percentages specified in the table below will be used in the calculation of the value of

collateral received by the Sub-Fund (the Management Company reserves the right to vary this policy at any time in which case this Prospectus will be updated accordingly):

Collateral Type	Margin
(i)	100% - 102%
(ii)	100% - 110%
(iii)	100% - 102%
(iv)	100% - 135%
(v)	100% - 115%
(vi)	100% - 135%

Collateral types denominated in a currency other than the currency of the Sub-Fund may be subject to an additional haircut.

Reinvestment of collateral

Non-cash collateral received by the Company may not be sold, re-invested or pledged. Cash collateral received by the Company can only be:

- i. placed on deposit with credit institutions which have their registered office in an EU Member State or, if their registered office is located in a third-country, are subject to prudential rules considered by the Luxembourg Supervisory Authority as equivalent to those laid down in European Union law;
- ii. invested in high-quality government bonds;
- iii. used for the purpose of reverse repo transactions provided the transactions are with credit institutions subject to prudential supervision and the Company is able to recall at any time the full amount of cash on accrued basis; and/or
- iv. invested in short-term money market funds as defined in the Guidelines on a Common Definition of European Money Market Funds.

Re-invested cash collateral should be diversified in accordance with the diversification requirements applicable to non-cash collateral as set out above.

The Sub-Fund may incur a loss in reinvesting the cash collateral it receives. Such a loss may arise due to a decline in the value of the investment made with cash collateral received. A decline in the value of such investment of the cash collateral would reduce the amount of collateral available to be returned by the Sub-Fund to the counterparty at the conclusion of the transaction. The Sub-Fund would be required to cover the difference in value between the collateral originally received and the amount available to be

returned to the counterparty, thereby resulting in a loss to the Sub-Fund.

Risk Management Process

The Company will employ a risk-management process which enables it to monitor and measure at any time the risk of the positions and their contribution to the overall risk profile of each Sub-Fund. The Company will employ, if applicable, a process for accurate and independent assessment of the value of any OTC derivative instruments.

There are three possible risk measurements approaches (commitment, Absolute Value-at-Risk, Relative Value-at-Risk). The Management Company decides which approach is applicable for each Sub-Fund.

Unless otherwise specified in the relevant Sub-Fund Appendix, the global exposure of the Sub-Funds are calculated using the commitment approach as detailed in applicable laws and regulations, including but not limited to CSSF Circular 11/512.

II/ Net Asset Value

CALCULATION OF THE NET ASSET VALUE PER SHARE

The net asset value per share (hereinafter the "**Net Asset Value per Share**") of each Class in each Sub-Fund will be calculated by the Administrative Agent in the reference currency (hereinafter the "**Reference Currency**") of each Sub-Fund and Class.

The Net Asset Value per Share is calculated on each Valuation Day as defined in Appendix H *Glossary Of Terms*, and at least twice per month. The Net Asset Value per Share for all Sub-Funds will be determined on the basis of the last available closing prices or other reference prices as specified in the relevant Appendices. If since the close of business, there has been a material change in the quotations on the markets on which a substantial portion of the investments attributable to a particular Sub-Fund are dealt or quoted, the Company may, in order to safeguard the interests of shareholders and the Company, cancel the first valuation and carry out a second valuation prudently and in good faith.

The Net Asset Value per Share of each Class of Shares for all Sub-Funds is determined by dividing the value of the total assets of the Sub-Fund properly allocable to such Class of Shares less the liabilities of the Sub-Fund properly allocable to such Class of Shares by the total number of Shares of such Class outstanding on any Valuation Day.

The Net Asset Value of the Classes of Shares may differ within each Sub-Fund as a result of the dividend policy, the management fee, the subscription and redemption fees for each Class.

In calculating the Net Asset Value per Share, income and expenditure are treated as accruing on a daily basis.

The calculation of the Net Asset Value per Share of the different Classes of Shares shall be made in the following manner:

a) The assets of the Company shall be deemed to include:

- all cash on hand or on deposit, including any interest accrued thereon;
- all bills and demand notes payable and accounts receivable (including proceeds of securities sold but not delivered);
- all bonds, time notes, certificates of deposit, shares, stock, debentures, debenture stocks, units or shares of undertakings for collective investment, subscription rights, warrants, options and other securities, financial instruments and similar assets owned or contracted for by the Company (provided that the Company may make adjustments in a manner not inconsistent with paragraph (i) below with regards to fluctuations in the market value of securities caused by trading ex-dividends, ex-rights, or by similar practices);
- all stock dividends, cash dividends and cash distributions receivable by the Company to the extent information thereon is reasonably available to the Company;
- all interest accrued on any interest-bearing assets owned by the Company except to the extent that the same is included or reflected in the principal amount of such assets;
- the preliminary expenses of the Company insofar as the same have not been written off;
- all other assets of any kind and nature including expenses paid in advance.

The value of such assets shall be determined as follows:

- the value of any cash on hand or on deposit bills and demand notes and accounts receivable, prepaid expenses, cash dividends, interests declared or accrued and not yet received, all of which are deemed to be the full amount thereof, unless in any case the same is unlikely to be paid or received in full, in which case the value thereof is arrived at after making such discount as may be considered appropriate in such case to reflect the true value thereof;

- securities listed on a recognised stock exchange or dealt on any other regulated market (hereinafter referred to as a “Regulated Market”) that operates regularly, is recognised and is open to the public, will be valued at their last available closing prices, or, in the event that there should be several such markets, on the basis of their last available closing prices on the main market for the relevant security;
 - in the event that the last available closing price does not, in the opinion of the Directors, truly reflect the fair market value of the relevant securities, the value of such securities will be determined by the Directors based on the reasonably foreseeable sales proceeds determined prudently and in good faith;
 - securities not listed or traded on a stock exchange or not dealt on another Regulated Market will be valued on the basis of the probable sales proceeds determined prudently and in good faith by the Directors;
 - the value of financial derivative instruments traded on exchanges or on other Regulated Markets shall be based upon the last available settlement prices of these financial derivative instruments on exchanges and Regulated Markets on which the particular financial derivative instruments are traded by the Company; provided that if financial derivative instruments could not be liquidated on the day with respect to which net assets are being determined, the basis for determining the value of such financial derivative instruments shall be such value as the Directors may deem fair and reasonable;
 - the financial derivative instruments which are not listed on any official stock exchange or traded on any other organised market will be valued in a reliable and verifiable manner on a daily basis and verified by a competent professional appointed by the Company;
 - investments in UCITS will be valued on the basis of the last available net asset value of the units or shares of such UCITS;
 - all other transferable securities and other permitted assets will be valued at fair market value as determined in good faith pursuant to procedures established by the Board of Directors;
 - liquid assets and money market instruments may be valued at market value plus any accrued interest or on an amortised cost basis as determined by the Board of Directors. All other assets, where practice allows, may be valued in the same manner. If the method of valuation on an amortised cost basis is used, the portfolio holdings will be reviewed from time to time under the direction of the Board of Directors to determine whether a deviation exists between the Net Asset Value calculated using the market quotation and that calculated on an amortised cost basis. If a deviation exists which may result in a material dilution or other unfair result to investors or existing shareholders, appropriate corrective action will be taken including, if necessary, the calculation of the Net Asset Value by using available market quotations; and
 - in the event that the above mentioned calculation methods are inappropriate or misleading, the Board of Directors may adjust the value of any investment or permit some other method of valuation to be used for the assets of the Company if it considers that the circumstances justify that such adjustment or other method of valuation should be adopted to reflect more fairly the value of such investments. Any assets held not expressed in the reference currency of the Company will be converted into such reference currency at the rate of exchange prevailing in a recognised market on the day preceding the Valuation Day.
- Any assets held in a particular Sub-Fund not expressed in the Reference Currency of the Sub-Fund will be translated into such Reference Currency at the rate of exchange prevailing in a recognised market on the Dealing Day preceding the Valuation Day (as defined in Appendix H *Glossary Of Terms*). The same rule shall supply mutatis mutandis in relation to Classes.
- The Board of Directors, in its discretion, may permit some other method of valuation, based on the probable sales price as determined with prudence and in good faith by the Board of Directors, to be used if it considers that such valuation better reflects the fair value of any asset of the Company.

In the event that the quotations of certain assets held by the Company should not be available for calculation of the Net Asset Value per Share of a Sub-Fund, each one of these quotations might be replaced by its last known quotation (provided this last known quotation is also representative) preceding the last quotation or by the last appraisal of the last quotation as of the relevant Valuation Day, as determined by the Board of Directors.

b) The liabilities of the Company shall be deemed to include:

- i) all loans, bills and accounts payable;
- ii) all accrued or payable administrative expenses payable by the Company;
- iii) all known liabilities, present and future, including all matured contractual obligations for payment of money or property;
- iv) an appropriate provision for future taxes based on capital and income to the Dealing Day preceding the Valuation Day, as determined from time to time by the Company, and other reserves, if any, authorised and approved by the directors, in particular those that have been set aside for a possible depreciation of the investments of the Company; and
- v) all other liabilities of the Company of whatsoever kind and nature except liabilities represented by shares of the Company. In determining the amount of such liabilities, the Company shall take into account all expenses payable by the Company.

All shares in the process of being redeemed by the Company shall be deemed to be issued until the close of business on the Valuation Day applicable to the redemption. The redemption price is a liability of the Company from the close of business on this date until paid.

All shares issued by the Company in accordance with subscription applications received shall be deemed issued from the close of business on the Valuation Day applicable to the subscription. The subscription price is an amount owed to the Company from the close of business on such day until paid.

The net assets of the Company are expressed in Euro and are at any time equal to the total of the net assets of the various Sub-Funds.

TEMPORARY SUSPENSION OF THE CALCULATION OF THE NET ASSET VALUE PER SHARE

The Company may suspend the calculation of the Net Asset Value of one or more Sub-Funds and the issue, redemption and conversion of any Classes of Shares in the following circumstances:

- (a) during any period when any of the principal stock exchanges or other markets on which a substantial portion of the investments of the Company attributable to such Sub-Fund from time to time is quoted or dealt in is closed otherwise than for ordinary holidays, or during which dealings therein are restricted or suspended;
- (b) during the existence of any state of affairs which constitutes an emergency in the opinion of the Directors as a result of which disposal or valuation of assets owned by the Company attributable to such Sub-Fund would be impracticable;
- (c) during any breakdown or restriction in the means of communication normally employed in determining the price or value of any of the investments of such Sub-Fund or the current price or value on any stock exchange or other market in respect of the assets attributable to such Sub-Fund;
- (d) during any period when the Company is unable to repatriate funds for the purpose of making payments on the redemption of Shares of such Sub-Fund or during which any transfer of funds involved in the realisation or acquisition of investments or payments due on redemption of Shares cannot, in the opinion of the Directors, be effected at normal rates of exchange;
- (e) during any period when in the opinion of the Directors of the Company there exist unusual circumstances where it would be impracticable or unfair towards the Shareholders to continue dealing with Shares of any Sub-Fund of the Company or any other circumstance or circumstances where a failure to do so might result in the Shareholders of the Company, a Sub-Fund or a Class of Shares incurring any liability to taxation or suffering other pecuniary disadvantages or other detriment which the shareholders of the Company, a Sub-Fund or a Class of Shares might not otherwise have suffered;

- (f) in the event of (i) the publication of the convening notice to a general meeting of at which a resolution to wind up the Company or a Sub-Fund is to be proposed, or of (ii) the decision of the Board of Directors to wind up one or more Sub-Funds, or (iii) to the extent that such a suspension is justified for the protection of the Shareholders, of the notice of the general meeting of Shareholders at which the merger of the Company or a Sub-Fund is to be proposed, or of the decision of the Board of Directors to merge one or more Sub-Funds;
- (g) when for any other reason beyond the control of the Board of Directors, the prices of any investments owned by the Company attributable to such Sub-Fund cannot promptly or accurately be ascertained;
- (h) where a UCITS in which a Sub-Fund has invested a substantial portion of its assets temporarily suspends the calculation of the net asset value of its shares/units or the repurchase, redemption or subscription of its shares/units, whether on its own initiative or at the request of its competent authorities;
- (i) following the suspension of the calculation of the net asset value per share/unit, the issue, redemption and/or conversion of shares/units, at the level of a master fund in which a Sub-Fund invests in its quality of feeder fund of such master fund.

The suspension of the calculation of the Asset Value of a Sub-Fund shall have no effect on the calculation of the Net Asset Value per Share, the issue, redemption and conversion of Shares of any other Sub-Fund which is not suspended.

Any such suspension shall be promptly notified to Shareholders requesting redemption or conversion of their Shares by the Company at the time of the filing of the written request for such redemption. The Board of Directors may also make public such suspension in such a manner as it deems appropriate.

Suspended subscription, redemption and conversion applications may be withdrawn by written notice provided that the Company receives such notice before the suspension ends.

Suspended subscription, redemption and conversion applications shall be executed on the first Valuation Day following the resumption of Net Asset Value calculation by the Company.

PUBLICATION OF THE NET ASSET VALUE PER SHARE

The Net Asset Value per Share of each Class within each Sub-Fund is made public at the registered office of the Company and is available at the office of the Depositary. The Company may arrange for the publication of this information in leading financial newspapers. The Company cannot accept any responsibility for any error or delay in publication or for non-publication of prices.

III/ Characteristics of the Shares

THE SHARES (ISSUE AND FORM)

After the initial subscription period, as defined in the relevant Appendices, Shares will be issued at the Net Asset Value per Share of the relevant Class (the "**Issue Price**"). Fractions of Shares will be issued as determined for each Class and each Sub-Fund in the relevant Appendices, the Company being entitled to receive the adjustment.

The shares will only be issued in registered form. The share register is conclusive evidence of ownership. The Company treats the registered owner of a Share as the absolute and beneficial owner thereof.

Registered shares are issued in uncertificated form and shall be materialised by an inscription in the register of shareholders unless a share certificate (the "**Share Certificate**") is specifically requested at the time of subscription. Any charges in connection with the issue of Share Certificate will be borne by the investors. When Certificates will be issued, such Certificates will only be in denominations of 1, 10 and 100 shares. Should an investor request Share Certificates, these will, in principle, be delivered in Luxembourg within fifteen calendar days of receipt of payment of the purchase price.

Holders of Shares Certificates must return their Share Certificates, duly renounced, to the Company before redemption instructions may be effected. The uncertificated form of Shares enables the Company to effect redemption instructions without undue delay, and consequently the Board of Directors recommends that investors maintain their Shares in uncertificated form.

Shares are freely transferable (with the exception that Shares may not be transferred to any person who is not a Qualified Holder, as defined under paragraph "Subscription Procedure").

Shares do not carry any preferential or preemptive rights and each Share, irrespective of the Class to which it belongs or its Net Asset Value, is entitled to one vote at all general meetings of shareholders. Fractions of Shares are not entitled to a vote but are entitled to a prorata portion of the Company's performance made to the relevant

Shares and of the distribution proceeds at the time of liquidation of the Company. Shares are issued with no par value and must be fully paid for on subscription.

Upon the death of a shareholder, the Board of Directors reserves the right to require the provision of appropriate legal documentation in order to verify the rights of all and any successors in title to Shares.

No Shares of any Class will be issued by the Company during any period in which the determination of the Net Asset Value of the Shares is suspended by the Company, as noted at under "Temporary Suspension of Calculation of the Net Asset Value".

CLASSES OF SHARES

Within each Sub-Fund, the Company may create different Classes of Shares which are entitled to regular dividend payments ("**Distribution Shares**") or with earnings reinvested ("**Capitalisation Shares**"), or which differ also by the targeted investors, their reference currencies, their currency hedging policy, by the management fees or the subscription/redemption fees.

Class "**C**" Shares, Class of Shares dedicated to all Investors, capitalizing, listed at least on one stock exchange (please refer to the Chapter V - Secondary Market for UCITS ETF) and which may be expressed in different currencies.

Class "**D**" Shares, Class of Shares dedicated to all Investors, distributing, listed at least on one stock exchange (please refer to the Chapter V - Secondary Market for UCITS ETF) and which may be expressed in different currencies.

Class "**Dist**" Shares: Class of Shares dedicated to all investors, distributing, expressed in the currency of the Sub-Fund or in any other currency as specified in the relevant Sub-Fund annex, and listed in different currencies depending on the considered stock exchange (please refer to the Chapter V - Secondary Market for UCITS ETF).

Class "**Acc**" Shares: Class of Shares dedicated to all investors, capitalizing, expressed in the currency of the Sub-Fund or in any other currency as specified in the relevant Sub-Fund annex and listed in different currencies depending on the considered stock exchange (please refer to the Chapter V - Secondary Market for UCITS ETF).

Class "**CI**" Shares: Class of Shares dedicated to Institutional Investors within the meaning of the article 174 (2) c) of the 2010 Law, capitalizing which may be expressed in different currencies and not listed on a stock exchange.

Class "**DI**" Shares: Class of Shares dedicated to Institutional Investors within the meaning of the article 174 (2) c) of the 2010 Law, distributing

which may be expressed in different currencies and not listed on a stock exchange.

Class "**S-Acc**" Shares: Class of Shares dedicated to Institutional Investors within the meaning of the article 174 (2) c) of the 2010 Law, capitalizing which may be expressed in different currencies.

Class "**S-Dist**" Shares: Class of Shares dedicated to Institutional Investors within the meaning of the article 174 (2) c) of the 2010 Law, distributing which may be expressed in different currencies.

The amounts invested in the several Classes of Shares of one Sub-Fund are themselves invested in a common underlying portfolio of investments within the Sub-Fund, although the Net Asset Value per Share of each Class of Shares may differ as a result of either the distribution policy and/or the Management fee and/or Administrative fee (as defined hereafter) and/or the subscription and redemption fees for each Class.

For further information on the Classes of Shares, investors should refer to the relevant Appendix for each Sub-Fund.

IV/ Investing in the Company on the Primary Market

The primary market is the market on which Shares are issued by the Company to Authorised Participants and/or redeemed by the Company from Authorised Participants subject to the terms and conditions stated below and in the relevant Appendices (the "**Primary Market**").

The Primary Market regarding Shares of Sub-Funds denominated as UCITS ETF is essentially relevant for the Authorised Participants of those UCITS ETF.

The Investment Manager has entered into agreements with the Authorised Participants, determining the conditions under which the Authorised Participants may subscribe for and redeem Shares.

An Authorised Participant may submit a dealing request to subscribe or redeem Shares in a Sub-Fund by an electronic platform for on-line collection of orders or to call dedicated lines to place such orders apart of any electronic platform. In both cases the Authorised Participant will have to submit a Dealing Form. The Deadline for applications received on a Dealing Day is 5.00 p.m Luxembourg time on this day, unless otherwise defined in Appendix D *Summary table of sub-fund's dealing timeline*.

The use of the electronic platform is subject to the prior consent of the Management Company or, where relevant, the Investment Manager and must be in accordance with and comply with applicable law. Subscription and redemption

orders placed electronically may be subject to a specific Dealing Deadline.

Dealing Forms may be obtained from the Management Company and the Registrar and Transfer Agent.

All applications are at the Authorised Participant's own risk. Dealing Forms and electronic dealing requests, once accepted, shall (save as determined by the Management Company or, where relevant, the Investment Manager) be irrevocable. The Company, Amundi, the Management Company, the Investment Manager and the Registrar and Transfer Agent shall not be responsible for any losses arising in the transmission of Dealing Forms or for any losses arising in the transmission of any dealing request through the electronic order entry facility.

Applications for Subscriptions/Redemption of Shares received by the Registrar and Transfer Agent on any Dealing Day (as defined in Appendix H *Glossary Of Terms*) before any Sub-Fund Dealing Deadline (as described in Appendix D *Summary Table Of Sub-Fund's Dealing Timeline*), will be processed on that Dealing Day for Subscription/Redemption, using the Net Asset Value per Share calculated on the applicable Valuation Day, as defined in Appendix H *Glossary Of Terms*, and which will be based on the last available closing prices or other reference prices as specified in the relevant Appendices.

All applications for subscription/Redemption will be dealt at an unknown Net Asset Value ("forward pricing").

Any applications for subscription/redemption received after the Dealing Deadline on the relevant Dealing Day will be processed on the next Dealing Day on the basis of the Net Asset Value per Share determined as of the relevant Valuation Day.

Different time limits may apply if subscriptions for Shares are made through a Distributor/Nominee but in any case, the Nominee/Distributor will make sure that on a given Dealing Day (as defined in Appendix H *Glossary Of Terms*), subscription orders are received by the Registrar and Transfer Agent before the Dealing Deadline. No Distributor/Nominee is permitted to withhold subscription orders to benefit personally from a price change. Investors should note that they might be unable to purchase or redeem Shares through a Distributor/Nominee on days that such Distributor/Nominee is not open for business.

Subscriptions for Shares can be accepted only on the basis of the current Prospectus and each relevant KID. The Company will produce an audited annual report (the "**Annual Report**") containing the audited accounts and an unaudited semi-annual report (the "**Semi-annual Report**"). Following the publication of the first of

either report, the current Prospectus at that date will be valid only if accompanied by such Annual Report or Semi-annual Report if more recent. These reports in their latest version will form an integral part of the Prospectus.

Rejection of Subscriptions/Redemptions

The Company may reject any subscription in whole or in part, and the Board of Directors may, at any time and from time to time and in its absolute discretion without liability and without notice, discontinue the issue and sale of Shares of any Class in any one or more Sub-Funds.

The Company also has absolute discretion (but shall not be obliged) to reject or cancel in whole or in part any subscription for Shares prior to the issue of Shares to an Authorised Participant in the event that an Insolvency Event occurs to the Authorised Participant and/or to minimise the exposure of the Company to an Authorised Participant's Insolvency Event.

Adjustments on Subscription/Redemptions

The Company also has the right to determine whether it will only accept redemptions from an Authorised Participant in kind or in cash (or a combination of both cash and in kind) on a case by case basis: (i) upon notification to the relevant Authorised Participant where an Insolvency Event occurs to the relevant Authorised Participant, or the Company reasonably believes that the relevant Authorised Participant poses a credit risk, or (ii) in all other cases, with the relevant Authorised Participant's consent (where relevant).

Redemption requests will be processed only where the payment is to be made to the Authorised Participant's account of record. In addition, the Company may impose such restrictions as it believes necessary to ensure that no Shares are acquired by Authorised Participants who are not Qualified Holder.

The Board of Directors may also, in its sole and absolute discretion, determine that in certain circumstances, it is detrimental for existing Shareholders to accept an application for Shares in cash or in kind (or a combination of both cash and in kind), representing more than 5 percent. of the Net Asset Value of a Sub-Fund. In such case, the Board of Directors may postpone the application and, in consultation with the relevant Authorised Participant, require such Authorised Participant to stagger the proposed application over an agreed period of time. The Authorised Participant shall be liable for any costs or reasonable expenses incurred in connection with the acquisition of such Shares.

The Management Company or the Registrar and Transfer Agent reserves the right to request further details from an Authorised Participant. Each Authorised Participant must notify and furnish the Registrar and Transfer Agent with any

change in their details and furnish the Company with any additional documents relating to such change as it may request. Amendments to an Authorised Participant's registration details and payment instructions will only be effected upon receipt by the Registrar and Transfer Agent of the original documentation.

Measures aimed at the prevention of money laundering may require an Authorised Participant to provide verification of identity to the Company (Please refer to section "Money Laundering Prevention" of this Prospectus).

The Company will specify what proof of identity is required, including but not limited to a passport or identification card duly certified by a public authority such as a notary public, the police or the ambassador in their country of residence, together with evidence of the Authorised Participant's address, such as a utility bill or bank statement. In the case of corporate applicants, this may require production of a certified copy of the certificate of incorporation (and any change of name), by-laws, memorandum and articles of association (or equivalent), and the names and addresses of all directors and beneficial owners.

It is further acknowledged that the Company, the Management Company and the Registrar and Transfer Agent shall be held harmless by the Authorised Participant against any loss arising as a result of a failure to process the subscription if information that has been requested by the Management Company or the Registrar and Transfer Agent has not been provided by the Authorised Participant.

The Company only accepts the ownership of Shares by any person, firm, partnership or corporate body provided that those holders comply with Luxembourg laws and regulations. Therefore the Company may restrict or prevent the ownership of Shares if it may result in a breach of any Luxembourg law or regulation.

As the Company is not registered under the United States Securities Act of 1933, as amended, neither registered under the United States Investment Company Act of 1940, as amended, its Shares may not be offered or sold, directly or indirectly, in the United States of America or its territories or possessions or areas subject to its jurisdiction, or to citizens or residents thereof.

Accordingly, the Company may require any subscriber to provide it with any information that it may consider necessary for the purpose of deciding whether or not he is, or will be, a Qualified Holder.

"Qualified Holder" means any person who:

- a) is authorized to own Shares pursuant to the Luxembourg laws and regulations; and

- b) is not a U.S. Person and is a Qualified Purchaser (as defined in the US Investment Company Act of 1940 as amended); and
- c) is not a Benefit Plan Investor (as defined in the US Employee Retirement Income Security Act of 1974, as amended); and
- d) is not, or is not related to, a citizen or resident of the United States of America, a US partnership, a US corporation or a certain type of estate or trust insofar as the ownership of any Shares or any other equity securities of the Company by such person would materially increase the risk that the Company could be or become a "controlled foreign corporation" within the meaning of the US Internal Revenue Code of 1986, as amended.

The Company retains the right to offer only one Class of Shares for subscription in any particular jurisdiction in order to conform to local law, custom, business practice or the Company's commercial objectives.

Payment Procedure

The currency of payment for Shares of each Sub-Fund will be the Reference Currency as more fully described in APPENDIX C - SUMMARY OF SHARES AND FEES.

If timely payment for Shares is not made, the relevant issue of Shares may be cancelled (or postponed if a Share Certificate has to be issued) and a subscriber may be required to compensate the Company for any loss incurred in relation to such cancellation (as more fully described in paragraph "Failure to Deliver").

The Board of Directors reserves the right to delay payment for a further five Business Days, without interest accruing, if market conditions are unfavourable, and it is, in the Board of Directors' reasonable opinion, in the best interest of the remaining shareholders. However, the delay for the payment of redeemed Shares will not exceed 10 Business Days.

All redeemed Shares shall be cancelled by the Company.

Settlement of the transfer of Investments and/or cash payments in respect of subscriptions and redemptions will take place within the Business Days specified in the relevant Confirmation Statement (as defined hereinafter) after the Dealing Day (or such earlier time as the Board of Directors may determine). The Company reserves the right, in its sole discretion, to require the applicant to indemnify the Company against any losses arising as a result of a Sub-Fund's failure to receive payment within stated settlement times.

Unless otherwise specified in the relevant Confirmation Statement, the standard settlement period for subscribing directly to Shares will be no later than 5 Settlement Days following the relevant Dealing Day.

Unless otherwise specified in the relevant Confirmation Statement, in the case of redemptions, the Registrar and Transfer Agent will issue instructions for payment or settlement to be effected no later than 5 Settlement Days after the relevant Dealing Day for all Sub-Funds. The Company reserves the right to delay payment for a further 5 Settlement Days, provided such delay is in the interest of the remaining Shareholders.

Notwithstanding the foregoing, the payment of the Redemption Proceeds may be delayed if there are any specific local statutory provisions or events of force majeure which are beyond the Company's control which makes it impossible to transfer the Redemption Proceeds or to proceed to such payment within the normal delay. This payment shall be made as soon as reasonably practicable thereafter but without interest.

A Confirmation Statement will be sent to the Authorised Participant detailing the redemption proceeds due thereto as soon as reasonably practicable after determination of the Redemption Price of the Shares being redeemed. Shareholders should check this statement to ensure that the transaction has been accurately recorded.

Confirmation Statement

A confirmation statement will be sent to the subscriber (or his nominated agent if so requested by the subscriber) as soon as reasonably practicable, providing full details of the transaction (the "**Confirmation statement**"). Subscribers should always check this statement to ensure that the transaction has been accurately recorded.

Subscribers other than Authorised Participants are given a personal account number (the "**Account Number**") on acceptance of their initial subscription, and this, together with the shareholder's personal details, is proof of their identity to the Company. The Account Number should be used by the shareholder for all future dealings with the Company and the Registrar and Transfer Agent.

Any change to the shareholder's personal details, loss of Account Number or loss of or damage to a Share Certificate, must be notified immediately to the Registrar and Transfer Agent. Failure to do so may result in the delay of an application for redemption. The Company reserves the right to require an indemnity or other verification of title or claim to title countersigned by a bank, stockbroker or other party acceptable to it before accepting such changes.

If any subscription is not accepted in whole or in part, the subscription monies or the balance outstanding will be returned to the subscriber by post or bank transfer at the subscriber's risk.

Suspension of the calculation of the Net Asset Value

No Shares will be issued by the Company during any period in which the calculation of the Net Asset Value of the relevant Sub-Fund is suspended by the Company pursuant to the powers contained in the articles of incorporation of the Company (the "**Articles of Incorporation**") and as discussed under paragraph "Temporary Suspension of Calculation of Net Asset Value per Share".

Notice of suspension will be given to subscribers, and subscriptions made or pending during a suspension period may be withdrawn by notice in writing received by the Company prior to the end of the suspension period. Subscriptions not withdrawn will be processed on the first Dealing Day following the end of the suspension period, on the basis of the Net Asset Value per Share determined on the applicable Valuation Day.

Money Laundering Prevention

Pursuant to international rules and Luxembourg laws and regulations comprising, but not limited to, the law of November 12, 2004 on the fight against money laundering and financing of terrorism, as amended, and circulars of the supervising authority, obligations have been imposed on all professionals of the financial sector to prevent the use of undertakings for collective investment for money laundering and financing of terrorism purposes. As a result of such provisions, the Registrar and Transfer Agent must in principle ascertain the identity of the subscriber in accordance with Luxembourg laws and regulations. The Registrar and Transfer Agent may require subscribers to provide any document it deems necessary to effect such identification.

In case of delay or failure by an applicant to provide the documents required, the application for subscription (or, if applicable, for redemption) will not be accepted. Neither the Company nor the Registrar and Transfer Agent have any liability for delays or failure to process deals as a result of the applicant providing no or only incomplete documentation.

Shareholders may be requested to provide additional or updated identification documents from time to time pursuant to ongoing client due diligence requirements under relevant laws and regulations.

Subscription/Redemption Charges

The subscription price of the Shares (the "**Subscription Price**") is defined as the "Initial Price" or the "Issue Price" as described in the section "The Shares (issue and form)" plus any

Subscription Charge and Primary Market Transaction Costs.

The redemption price of the Shares (the "**Redemption Price**") is defined as the "Initial Price" or the "Issue Price" as described in the section "The Shares (issue and form)" plus any Redemption Charge and any Primary Market Transaction Costs.

The Redemption Price being the Net Asset Value per Share calculated on the applicable Valuation Day, as defined in Appendix H *Glossary Of Terms*, and which will be based on the last available closing prices or other reference prices as specified in the relevant Appendices on the Valuation Day.

The Redemption Price of Shares in any Class may be higher or lower than the Initial Subscription Price paid by the shareholder depending on the Net Asset Value per Share of the Class at the time of redemption.

In addition to the Issue Price the Management Company may charge the Authorised Participant with Primary Market Transactions Costs in relation to such subscription.

The Board of Directors may also decide to charge a sum that it considers represents an appropriate figure as applicable Upfront Subscription/Redemption Sales Charges which may be at the most, the highest of:

- EUR 50,000 by subscription demand (or the equivalent in the currency of the relevant Class of Shares when denominated in another currency), and
- 5 %, retroceded to third parties.

Each Sub-Fund shall at all times have enough liquidity to enable satisfaction of any requests for redemption of Shares.

Subject to the provisions explained below under "Temporary Suspension of Redemption", applications for redemption will be considered as binding and irrevocable by the Company and must be duly signed by all registered shareholders, save in the case of joint registered shareholders where an acceptable power of attorney has been provided to the Company.

Dealings in kind and in Cash

The Company may accept subscriptions and pay redemptions either in kind or in cash (or a combination of both cash and in kind).

For Authorised Participants, the minimum initial subscription amounts and minimum redemption amounts may be higher than the amounts disclosed in the APPENDIX C - SUMMARY OF SHARES AND FEES.

For the avoidance of doubt, for investors other than Authorised Participants, the minimum initial subscription amounts, and minimum redemption amounts will remain as stated in the APPENDIX C - SUMMARY OF SHARES AND FEES.

1. In kind dealings

The Management Company will make available the Portfolio Composition File for the Sub-Funds setting out the form of Investments and/or the Cash Component to be delivered (a) by Authorised Participants in the case of subscriptions; or, (b) by the Company in the case of redemptions, in return for Shares. The Management Company's current intention is that the Portfolio Composition File will normally stipulate that Investments must be in the form of the constituents of the relevant Investments.

The Portfolio Composition File for the Sub-Funds for each Dealing Day will be available upon request from the Management Company and the relevant Intermediary.

2. Cash dealings

The Company may accept subscription and redemption requests which consist wholly of cash.

Authorised Participants wishing to make a cash redemption should notify the Company, care of the Registrar and Transfer Agent in writing and make arrangements for the transfer of their Shares into the Company's account.

If any single application for cash redemption is received in respect of any one Valuation Day which represents more than 10 percent of the Net Asset Value of any one Sub-Fund, the Board of Directors may ask such Shareholder to accept payment in whole or in part by an in-kind distribution of the portfolio securities in lieu of cash.

In the event that a redeeming Shareholder accepts payment in whole or in part by a distribution in kind of portfolio securities held by the relevant Sub-Fund, the Company may, but is not obliged to, establish an account outside the structure of the Company into which such portfolio securities can be transferred. Any expenses relating to the opening and maintenance of such an account will be borne by the Shareholder. Once such portfolio assets have been transferred into the account, the account will be valued and a valuation report will be obtained from the Company's auditor. Any expenses for the establishment of such a report shall be borne by the Shareholders concerned or any third party unless the Board of Directors considers that the dealing in kind is in the interest of the Company (or the Sub-Fund concerned) or made to protect the interests of the Company (or the Sub-Fund concerned).

The account will be used to sell such portfolio securities in order that cash can then be transferred to the redeeming Shareholder. Investors who receive such portfolio securities in lieu of cash upon redemption should note that they may incur brokerage and/or local tax charges on the sale of such portfolio securities. In addition, the Redemption Proceeds from the sale by the redeeming Shareholder of the Shares may be more or less than the Redemption Price due to market conditions and/or the difference between the prices used to calculate the Net Asset Value and bid prices received on the sale of such portfolio securities by the relevant redemption settlement time.

3. Directed cash dealing

If any request is made by an Authorised Participant to execute underlying security trades and/or foreign exchange in a specific way, the Management Company will use reasonable endeavours to satisfy such request if possible but the Management Company will not accept any responsibility or liability if the execution request is not achieved in the way requested for any reason whatsoever.

If any Authorised Participant submitting a cash subscription or redemption requests to have the Investments traded with a particular designated broker, the Management Company may at its sole discretion (but shall not be obliged to) transact for Investments with the designated broker. Authorised Participants that wish to select a designated broker are required, prior to the Management Company if applicable transacting Investments, to contact the relevant portfolio trading desk of the designated broker to arrange the trade.

The Management Company will not be responsible, and shall have no liability, if the execution of the underlying securities with the designated broker and, by extension, the Authorised Participant's subscription or redemption, is not carried out due to an omission, error, failed or delayed trade or settlement on the part of the Authorised Participant or the designated broker.

Should the Authorised Participant or the designated broker default on, or change the terms of, any part of the underlying securities transaction, they shall bear all associated risks and costs. In such circumstances, the Company and the Management Company have the right to transact with another broker and amend the terms of the Authorised Participant's subscription or redemption to take into account the default and the changes to the terms.

Failure to deliver

In the event an Authorised Participant fails to deliver (i) the required Investments and Cash Component in relation to an in kind subscription; or (ii) cash in relation to a cash subscription in the stated settlement times for the Sub-Funds

(available on the Confirmation Statement) the Management Company reserves the right to cancel the relevant subscription order and the Authorised Participant shall indemnify the Company and the Management Company for any loss suffered by the Company and the Management Company as a result of a failure by the Shareholder Authorised Participant to deliver the required Investments and Cash Component or cash in a timely fashion.

The Board of Directors may, in its sole discretion where it is in the best interests of a Sub-Fund, decide not to cancel a subscription where an Authorised Participant has failed to deliver the required Investments and Cash Component or cash, as applicable, within the stated settlement times. In this event, the Company may temporarily borrow an amount equal to the subscription and invest the amount borrowed in accordance with the investment objective and policies of the relevant Sub-Fund. Once the required Investments and Cash Component or cash, as applicable, have been received, the Company will use this to repay the borrowings. In addition, the Company reserves the right to charge the relevant Authorised Participant for any interest or other costs incurred by the Company as a result of this borrowing.

If the required Investments and Cash Component or cash (as applicable) delivered by the Authorised Participant are not sufficient to cover these interest or other costs, or if the Authorised Participant fails to deliver the required Investments and Cash Component or cash (as applicable) as soon as reasonably practicable, the Management Company may, at its absolute discretion, cancel the order and the Authorised Participant shall indemnify the Company and the Management Company for any (i) interest or costs incurred (including but not limited to transactions costs related to portfolio adjustments, and any applied interests in relation to cash borrowings), and (ii) loss suffered (including but not limited to, any loss of value of underlying assets between hedging and dehedging processes ("**Market Exposure**")) by the Company and the Management Company as a result of this settlement failure.

A redemption request by an Authorised Participant will only be valid if the Authorised Participant satisfies its settlement obligation to deliver holdings in the required number of Shares in that Sub-Fund to the Administrator by the relevant settlement times (available on the Confirmation Statement). In the event an Authorised Participant fails to deliver the required Shares of the relevant Sub-Fund in relation to a redemption within the stated settlement times, the Company and the Management Company reserves the right (but shall not be obliged) to treat this as a settlement failure by the Authorised Participant and to cancel the relevant redemption order, and the Authorised Participant shall indemnify the Company and the Management Company for any loss suffered by the Company and the Management Company as a result of a

failure by the Authorised Participant to deliver the required Shares in a timely fashion, including (but not limited to) any Market Exposure and costs suffered by the Sub-Fund and the Management Company.

Temporary Suspension of Redemption

The right of any shareholder to require the redemption of its Shares of the Company will be suspended during any period in which the calculation of the Net Asset Value per Share of the relevant Sub-Fund is suspended by the Company pursuant to the powers as discussed under paragraph "Temporary Suspension of Calculation of the Net Asset Value". Notice of the suspension period will be given to any shareholder tendering Shares for redemption. Withdrawal of an application for redemption will only be effective if written notification is received by the Registrar and Transfer Agent before termination of the period of suspension, failing which the Shares in question will be redeemed on the first Dealing Day following the end of the suspension period on the basis of the next Net Asset Value per Share determined.

Compulsory Redemption

If the Company discovers at any time that Shares are owned by any person who is not a Qualified Holder, either alone or in conjunction with any other person, whether directly or indirectly, the Board of Directors may at their discretion and without liability, compulsorily redeem the Shares at the Redemption Price as described above after giving notice of at least ten calendar days, and upon redemption, the person who is not a Qualified Holder will cease to be the owner of those Shares. The Company may require any shareholder to provide it with any information that it may consider necessary for the purpose of determining whether or not such owner of Shares is or will be a Qualified Holder.

Procedures for Redemptions and Conversions representing 10% or more of the net assets of any Sub-Fund

If any single application redemption in cash is received in respect of any one Valuation Day which represents more than 10 % of the Net Asset Value of any Sub-Fund, the Company will have the right, if the Board of Directors so determines and with the consent of the shareholder concerned, to satisfy payment in kind of the Redemption Price by allocating to such shareholder investments from the portfolio set up in connection with such classes of shares equal in value as of the Valuation Day on which the Redemption Price is calculated to the value of shares to be redeemed in lieu of cash.

If any application for redemption or conversion is received in respect of any one Valuation Day (the "**First Valuation Day**"), which either singly or when aggregated with other such applications so received, represents more than 10% of the Net

Asset Value of any Sub-Fund, the Company reserves the right, in its sole and absolute discretion and without liability (and in the reasonable opinion of the Board of Directors to do so is in the best interest of the remaining shareholders), to scale down pro rata each application with respect to such First Valuation Day so that not more than 10% of the Net Asset Value of the Sub-Funds be redeemed or converted on such First Valuation Day.

To the extent that any application for redemption or conversion is not given full effect on such First Valuation Day by virtue of the exercise by the Company of its power to pro-rate applications, such application shall be treated with respect to the unsatisfied balance thereof as if a further request had been made by the shareholder in question in respect of the next Valuation Day and, if necessary, subsequent Valuation Days, until such application shall have been satisfied in full.

With respect to any application received in respect of the First Valuation Day, to the extent that subsequent applications shall be received in respect of following Valuation Days, such later applications shall be postponed in priority to the satisfaction of applications relating to the First Valuation Day, but subject thereto shall be dealt with as set out above.

CONDITIONS FOR CONVERSION OF SHARES

Unless otherwise mentioned in the Appendices, conversions of Shares between Sub-Funds and between Classes of Shares are possible as detailed hereunder. Also, unless otherwise mentioned in the Appendices, no conversion fee will be levied.

Shareholders may convert all or part of their Shares into Shares of another Class of the same Sub-Fund or of other Sub-Funds by application in writing or by fax to the Registrar and Transfer Agent or the Nominee, stating which Shares are to be converted into which Sub-Funds and/or Classes.

The application for conversion must include either the monetary amount the shareholder wishes to convert or the number of Shares the shareholder wishes to convert. In addition, the application for conversion must include the shareholder's personal details together with his Account Number, (and if applicable) the registered Share Certificate.

Failure to provide any of this information may result in delay of the application for conversion.

Applications for conversion must be received by the Registrar and Transfer Agent in the delay described in the relevant Appendices before the conversion deadline, which is 5 p.m. in Luxembourg (the "**Conversion Deadline**" as defined in the Appendix of each Sub-Fund), and

will be processed on that Dealing Day, using the Net Asset Value calculated on the applicable

Valuation Day, as defined in Appendix H *Glossary Of Terms*, which will be based on the last available closing prices or other reference prices as specified in the relevant Appendices on such Valuation Day.

All applications for conversion will be dealt at an unknown Net Asset Value ("forward pricing").

Any application received after the Conversion Deadline on Dealing Day will be processed on the next Dealing Day, on the basis of the Net Asset Value per Share determined as of the relevant Valuation Day.

Applications for conversion on any one Valuation Day, which either singly or when aggregated with other such applications so received, represent more than 10% of the Net Asset Value of any one Sub-Fund, may be subject to additional procedures set forth under paragraph "Procedures for Redemptions and Conversions Representing 10% or more of the net assets of any Sub-Fund."

The rate at which all or part of the Shares in an original Sub-Fund are converted into Shares in a new Sub-Fund or a new Class of Shares is determined in accordance with the following formula:

$$A = \frac{(B \times C \times D)}{E}$$

where:

- A is the number of Shares to be allocated in the new Sub-Fund/ Class;
- B is the number of Shares of the original Sub-Fund/Class to be converted;
- C is the Net Asset Value per Share of the original Sub-Fund/Class as of the relevant Valuation Day;
- D is the actual rate of exchange on the day concerned in respect of the Reference Currency of the original Sub-Fund/Class and the Reference Currency of the new Sub-Fund/ Class;
- E is the Net Asset Value per Share of the new Sub-Fund/Class as of the relevant Valuation Day.

Following such conversion of Shares, the Administrative Agent will inform the shareholder of the number of Shares of the new Sub-Fund/Class obtained by conversion and the price thereof.

V/ Secondary Market for UCITS ETF

LISTING ON THE STOCK EXCHANGE

The intention of the Company is for each of its Sub-Funds (or Share Class if relevant)

denominated as UCITS ETF (as mentioned in each corresponding Appendix, if applicable), to have at least one Share Class traded throughout the day on at least one regulated market or multilateral trading facility with at least one market maker which takes action to ensure that the stock exchange value of its Share Class does not significantly vary from its Net Asset Value and where applicable its indicative Net Asset Value (as defined below).

It is contemplated to make an application to list the Classes of Shares of the Sub-Funds denominated as UCITS ETF on one or several stock exchanges.

A list of these stock exchanges where the Shares can be bought and sold can be obtained from the registered office of the Company.

Unless otherwise mentioned in the relevant Appendices, the main market maker for all the Sub-Funds denominated as UCITS ETF is Société Générale Paris office. For the avoidance of doubt, other market makers (whether or not member of the Société Générale's Group) could be appointed from time to time by the Company in respect of one or several stock exchange on which the certain shares classes are listed.

Certain Authorised Participants who subscribe for Shares may act as market makers; other Authorised Participants are expected to subscribe for Shares in order to be able to offer to buy Shares from or sell Shares to their customers as part of their broker/dealer business.

Through such Authorised Participants being able to subscribe for or redeem Shares, a liquid and efficient secondary market may develop over time on one or more Relevant Stock Exchanges as they meet secondary market demand for such Shares.

Through the operation of such a secondary market, persons who are not Authorised Participants will be able to buy Shares from or sell Shares to other secondary market investors or market makers, broker/dealers, or other Authorised Participants.

Investors should be aware that on days other than Business Days or Dealing Days of a Sub-Fund when one or more markets are trading Shares but the underlying market(s) on which the Reference Index of the Sub-Fund are traded are closed, the spread between the quoted bid and offer prices in the Shares may widen and the difference between the market price of a Share and the last calculated Net Asset Value per Share may, after currency conversion, increase.

Investors should also be aware that on such days the Reference Index would not necessarily be calculated and available for investors in making their investment decisions because prices of the Reference Index would not be available on such days. The settlement of trades in Shares on Relevant Stock Exchanges will be through the facilities of one or more clearing and settlement

systems following applicable procedures which are available from the Relevant Stock Exchanges.

INDICATIVE NET ASSET VALUE PER SHARE

The Company may at its discretion make available or may designate other persons to make available on its behalf, on each Business Day, an intra-day net asset value (the "iNAV") for one or more Sub-Funds considered as UCITS ETF. If the Company or its designee makes such information available on any Business Day, the iNAV will be calculated based upon information available during the trading day or any portion of the trading day, and will ordinarily be based upon the current value of the assets/exposures, adjusted by the relevant foreign exchange rate, as the case may be, of the Sub-Fund and/or the considered financial index in effect on such Business Day, together with any cash amount in the Sub-Fund as at the previous Business Day. The Company or its designee will make available an iNAV if this is required by any relevant stock exchange.

An iNAV is not, and should not be taken to be or relied on as being, the value of a Share or the price at which Shares may be subscribed for or redeemed or purchased or sold on any relevant stock exchange. In particular, any iNAV provided for any Sub-Fund where the constituents of the concerned financial index are not actively traded during the time of publication of such iNAV may not reflect the true value of a Share, may be misleading and should not be relied on.

Investors should be aware that the calculation and reporting of any iNAV may reflect time delays in the receipt of the prices of the relevant constituent securities in comparison to other calculated values based upon the same constituent securities including, for example, the concerned financial index or the iNAV of other exchange traded funds based on the same concerned financial index. Investors interested in buying or selling Shares on a relevant stock exchange should not rely solely on any iNAV which is made available in making investment decisions, but should also consider other market information and relevant economic and other factors (including, where relevant, information regarding the concerned financial index, the relevant constituent securities and financial instruments based on the concerned financial index corresponding to the relevant Sub-Fund).

Additional information on the iNAV for one or more Sub-Funds considered as UCITS ETF may, subject to the conditions and limits of the considered market operator, be provided on the website of the relevant stock exchange that lists the Shares. This information is also available on Reuters or Bloomberg page dedicated to the Share considered. Additional information on the Bloomberg and Reuters codes corresponding to the iNAV of any Share Class quoted on a stock

exchange is also available under the "factsheet" section of the website www.amundiETF.com.

PURCHASE AND SALE PROCEDURE ON THE SECONDARY MARKET

The secondary market is the market on which the Shares can be purchased and/or sold directly on the stock exchanges (the "**Secondary Market**").

For all purchases and/or sales of Shares made on the Secondary Market, no minimum purchase and/or sale is required other than the minimum that may be required by the relevant stock exchange.

The Company will not charge any purchase or sale fee in relation to the purchase or sale of the Shares of UCITS ETF on any exchange where they are listed. However, some market intermediaries may charge broker fees or other kind of fees. The Company does not receive these fees.

The Shares of the Sub-Funds purchased on the Secondary Market are generally not redeemable from the Company. Investors must buy and sell the Shares on the Secondary Market with the assistance of an intermediary (e.g. a stockbroker) and may incur fees for doing so. In addition, investors may pay more than the current net asset value when buying Shares and may receive less than the current net asset value when selling them.

In the event of a Suspension of the Secondary Market (as defined below), not based on an Index Liquidity Event (as defined below), the Management Company will allow shareholders to redeem their Shares on the Primary Market at a price based at the applicable Net Asset Value per Share, provided that the Net Asset Value per Shares is not itself suspended under the applicable regulations and/or the Prospectus and/or the Articles of Incorporation.

"**Suspension of the Secondary Market**" means any situation where it is impossible for shareholders to sell their Shares on all the stock exchanges where the considered Sub-Fund is listed for a period of at least of three Business Days since the occurrence of (i) the suspension of quotation by the market operator or (ii) the impossibility to trade observed by all shareholders on the considered stock exchange, and which is based on either:

- i. the significant variation of the stock exchange value of the considered listed Shares of the Sub-Fund in comparison with its indicative net asset value;
- ii. the lack of Authorised Participants, or the inability by the Authorised Participants to meet their commitment to conduct their business by means of a permanent presence on the market, thus making it impossible to trade the

considered Shares on the considered place of quotation to which the share class is admitted.

“Index Liquidity Event” means any market disruption event and/or any liquidity issue affecting part or all the components of the Index, which leads to a suspension of their market appreciation.

Upon Suspension of the Secondary Market, the following redemption procedure (the **“Procedure”**) will apply. Redemption orders initiated in case of Suspension of the Secondary Market shall be sent by any considered Shareholder to the financial intermediary acting as account keeper of its Shares (the **“Relevant Intermediary”**) and shall contain (i) the number of Shares to be redeemed and the (ii) targeted redemption date and (ii) a copy of the notice published by the Management Company on its website (www.amundieff.com) and presenting the decision to extend the Primary Market (the **“Extended Primary Market Notification”**) for any considered Share Class of a Sub-Fund.

Redemption orders dealt in those circumstances shall be relayed, through the Relevant Intermediary, to a member of Euroclear France and then transmitted by such member to the pre-centralization agent of the considered Sub-Fund **“Société Générale SGSS/CHB/SET/DIR/NANT, 32 avenue du Champ de Tir, BP 81 236, 44312 NANTES CEDEX 3, FRANCE”**.

The aforementioned pre-centralisation agent will forward the redemption orders to the Registrar and Transfer Agent.

Depending on the arrangements in place between the Relevant Intermediary and the other investment firms involved in the redemption chain, additional constraints, delays or intermediary fees could be applicable, and the Shareholders are invited to contact their Relevant Intermediary in order to obtain additional information about those eventual constraints and/or fees (being understood that such Intermediary fees will not benefit to the Management Company).

The foregoing is a summary of the Procedure which will be further detailed in the Extended Primary Market Notification.

Redemption orders dealt with in these circumstances in accordance of the terms of the Procedure will not be subject to the potentially applicable minimum redemption thresholds and the Upfront Redemption Sales Charges should only consist in the exit charge as described for each Sub-Fund in the relevant Appendix.

VI/ Miscellaneous

COMPANY CHARGES

The Company (or each Sub-Fund or Classes of Shares if relevant on a pro rata basis) will pay a management fee and an administrative fee, as a percentage of its Net Asset Value, as detailed for each Sub-Fund in Appendix C – SUMMARY OF SHARES AND FEES.

Are deemed to constitute a Management fee (hereafter the **“Management fee”**), the fees that compensate the Management Company for the services provided in relation to the relevant Sub-Fund and all other service providers including distributors.

Are deemed to constitute an administrative fee (hereafter the **“Administrative fee”**) the fees and expenses of the Company which are generally based on the net assets of the relevant Sub-Funds or Classes of Shares if relevant and which include but are not limited to:

- fees of professional firms, such as the auditors and legal advisers;
- government, regulatory, registration, local representatives, cross-border marketing and listing related expenses;
- costs of providing information to shareholders, such as the costs of creating, translating, printing and distributing shareholder reports, prospectuses and KIDs;
- extraordinary expenses, such as any legal or other expertise needed to defend the interests of Shareholders;
- all other costs associated with operation and distribution, including expenses incurred by the Management Company, Depositary and all service providers in the course of discharging their responsibilities to the Company.

Such Administrative fee also include all other costs incurred by the Management Company in maintaining and operating the Sub-Funds.

Expenses not included in the Management fee or Administrative fee disclosed in Appendix C – SUMMARY OF SHARES AND FEES:

- taxes on assets and income;
- standard brokerage fees and bank charges incurred on business transactions and securities trades;
- any fees that the board agrees the Company should pay to independent board members

for their service on the board (currently, no such fees are paid);

- any fees and costs incurred by the agents of Amundi Asset Management centralising orders and supporting best execution; some of these agents may be affiliates of Amundi.

Both Management fee and Administrative fee may be paid by the Company either directly to the Management Company (which may in turn pay the Service Provider when applicable) or directly to the relevant Service Providers as defined below.

DISTRIBUTION POLICY

Unless otherwise (i) mentioned in the Appendices or (ii) decided by the Board of Directors, the Company does not intend to distribute all or part of either its investment income or the net capital gains realised. The Board of Directors shall therefore recommend the reinvestment of the results of the Company and as a consequence no dividend shall be paid to shareholders.

In any case, no distribution of dividends may be made if, as a result, the share capital of the Company would fall below the minimum capital required by the Luxembourg law.

Notwithstanding, the Board of Directors may propose to the Annual General Meeting of Shareholders the payment of a dividend if it considers it is in the interest of the Shareholders; in this case, subject to approval of the Shareholders, a cash dividend may be distributed out of the available net investment income and the net capital gains of the Company.

Upon proposal of the Board of Directors, the Annual General Meeting of Shareholders may also decide to distribute to the Shareholders a dividend in the form of Shares of one or more Sub-Funds, in proportion to the existing Shares of the same Sub-Fund, if any, already held by each Shareholder.

In relation to the Distribution Shares existing in certain Sub-Funds (please refer to Appendices), it is intended that the Company will distribute dividends in the form of cash in the relevant Sub-Fund's Reference Currency. Annual dividends are declared separately in respect of such Distribution Shares at the Annual General Meeting of Shareholders. In addition, the Directors may declare interim dividends.

The Board of Directors may decide also that dividends be automatically reinvested by the purchase of further Shares. In such case, the dividends will be paid to the Registrar and Transfer Agent who will reinvest the money on behalf of the Shareholders in additional Shares of the same Class. Such Shares will be issued on the payment date at the Net Asset Value per

Share of the relevant Class in non-certificated form.

Fractional entitlements to registered Shares will be recognised for each Class according to the mention determined in the relevant Appendix.

Declared dividends not claimed within five years of the due date will lapse and revert to the Company. No interest shall be paid on a dividend declared and held by the Company at the disposal of its beneficiary.

TAXATION

The information set forth below is based on law and administrative practice in Luxembourg as at the date of this Prospectus and may be subject to modification thereof. The Company, the Management Company and their affiliates do not provide tax advice. The tax treatment of investments will depend on an individual's circumstances. If investors are in any doubt as to their tax position, they must consult with an appropriate professional tax adviser.

The Company

A charge (Taxe d'abonnement) equal to (i) 0.01% per annum for all Classes of Shares dedicated to institutional investors and (ii) 0.05% per annum for the Classes dedicated to retail investors, is payable quarterly to Luxembourg authorities and calculated on the basis of the Net Assets of each Sub-Fund on the last day of the quarter.

The portion of the assets of any Sub-Fund invested in other Luxembourg UCI is not subject to the aforesaid tax.

The Sub-Funds (i) whose securities are listed or traded on at least one stock exchange or another regulated market operating regularly, recognised and open to the public and (ii) whose exclusive object is to replicate the performance of one or more indices are not subject to the aforesaid tax.

If several Classes of Shares exist within the relevant Sub-Fund, the exemption only applies to Classes of Shares fulfilling the conditions of sub-point (i) above.

At the date of this Prospectus, the Company is not liable to any Luxembourg tax other than a once-and-for-all tax of EUR 1,250.- that was paid by the Company upon incorporation.

Investment income from dividends and interest received by the Company may be subject to withholding taxes at varying rates. Such withholding taxes are not usually recoverable.

Shareholders

The Council of the European Union has adopted, on 3 June 2003, the European Savings Directive 2003/48/EC of the Council on savings income in

the forms of interest implemented into Luxembourg National Law by the law of 12 April 2005 (the "**2005 Law**"). According to the provision of the 2005 Law, a taxation may apply to individual resident of a Member State of the European Union who have invested assets in another Member State of the European Union.

The EU Savings Directive has been repealed by Council Directive of 2015/2060 of 10 November 2015 with effect from 1 January 2016. However, for a transitional period, the EU Savings Directive shall continue to apply and notably regarding reporting obligations and scope of information to be provided by the Luxembourg paying agent (within the meaning of the EU Savings Directive) and regarding obligations of the EU Member States in respect of the issuance of the tax residence certificate and elimination of double taxation.

As a consequence of the repeal of the EU Savings Directive, the 2005 Law will no longer apply, save for the provisions related to the above mentioned obligations and within the transitional period foreseen by the said Council Directive.

On 9 December 2014, the Council of the European Union adopted Directive 2014/107/EU amending Directive 2011/16/EU of 15 February 2011 on administrative cooperation in the field of taxation, which now provides for an automatic exchange of financial account information between EU Member States ("**DAC Directive**"), including income categories contained in the EU Savings Directive. The adoption of the aforementioned directive implements the OECD Common Reporting Standard and generalizes the automatic exchange of information within the European Union as of 1 January 2016.

Thus, the measures of cooperation provided by the EU Savings Directive are to be replaced by the implementation of the DAC Directive which is also to prevail in cases of overlap of scope. As Austria has been allowed to start applying the DAC Directive up to one year later than other Member States, special transitional arrangements taking account of this derogation apply to Austria.

In addition, Luxembourg signed the OECD's multilateral competent authority agreement ("**Multilateral Agreement**") to automatically exchange information under the CRS. Under this Multilateral Agreement, Luxembourg will automatically exchange financial account information with other participating jurisdictions as of 1 January 2016.

The Luxembourg law of 18 December 2015 relating to the automatic exchange of information in tax matters that implements the DAC Directive and the Multilateral Agreement in Luxembourg has been published in the official journal on 24 December 2015 and is effective as from 1 January 2016 (the "**CRS Law**").

Shareholders should get information about, and where appropriate take advice on, the impact of the changes to the EU Savings Directive, the implementation of the DAC Directive and the Multilateral Agreement in Luxembourg and in their country of residence on their investment.

AUTOMATIC EXCHANGE OF INFORMATION

The Company may be subject to the Standard for Automatic Exchange of Financial Account Information in Tax matters (the "**Standard**") and its Common Reporting Standard (the "**CRS**") as set out in the CRS Law.

Under the terms of the CRS Law, the Company is likely to be treated as a Luxembourg Reporting Financial Institution. As such, as of 30 June 2017 and without prejudice to other applicable data protection provisions as set out in the Company documentation, the Company will be required to annually report to the Luxembourg tax authority (the "**LTA**") personal and financial information related, inter alia, to the identification of, holdings by and payments made to (i) certain investors as per the CRS Law (the "**Reportable Persons**") and (ii) the controlling persons (i.e. the natural persons who exercise control over an entity, in accordance with the Financial Action Task Force Recommendations - the "**Controlling Persons**") of certain non-financial entities ("**NFEs**") which are themselves Reportable Persons. This information, as exhaustively set out in Annex I of the CRS Law (the "**Information**"), will include personal data related to the Reportable Persons.

The Company's ability to satisfy its reporting obligations under the CRS Law will depend on each investor providing the Company with the Information, along with the required supporting documentary evidence. In this context, the investors are hereby informed that, as data controller, the Company will process the Information for the purposes as set out in the CRS Law. The investors undertake to inform their Controlling Persons, if applicable, of the processing of their Information by the Company.

The investors are further informed that the Information related to Reportable Persons within the meaning of the CRS Law will be disclosed to the LTA annually for the purposes set out in the CRS Law. In particular, the investors are also informed that the Management Company or its delegates may from time to time require the investors to provide information in relation to their identity and fiscal residence of financial account holders (including certain entities and their Controlling Persons) in order to ascertain their CRS status and report information regarding a shareholder and his/her/its account to the LTA.

The investors further undertake to immediately inform the Company of, and provide the Company with all supporting documentary evidence of any changes related to the Information after occurrence of such changes.

Any investor that fails to comply with the Company's Information or documentation requests may be held liable for penalties imposed on the Company and attributable to such investor's failure to provide the Information or subject to disclosure of the Information by the Company to the LTA, in accordance with the applicable domestic legislation.

The Company reserves the right to refuse any application for Shares if the information provided or not provided does not satisfy the requirements under the CRS Law.

Investors should consult their professional advisors on the possible tax and other consequences with respect to the implementation of the CRS.

SUSTAINABLE INVESTING

Disclosure Regulation

On 18 December 2019, the European Council and European Parliament announced that they had reached a political agreement on the Disclosure Regulation, thereby seeking to establish a pan-European framework to facilitate Sustainable Investment. The Disclosure Regulation provides for a harmonised approach in respect of sustainability-related disclosures to investors within the European Economic Area's financial services sector.

The scope of the Disclosure Regulation is extremely broad, covering a very wide range of financial products (e.g. UCITS funds, alternative investment funds, pension schemes etc.) and financial market participants (e.g. E.U. authorised investment managers and advisers). It seeks to achieve more transparency regarding how financial market participants integrate Sustainability Risks into their investment decisions and consider adverse sustainability impacts in the investment process. Its objectives are to (i) strengthen protection for investors of financial products, (ii) improve the disclosures made available to investors by financial market participants and (iii) improve the disclosures made available to investors regarding the financial products, to amongst other things, enable investors to make informed investment decisions.

For the purposes of the Disclosure Regulation, the management company meets the criteria of a "financial market participant", whilst the Company and each Sub-Fund qualifies as a "financial product".

Taxonomy Regulation

The Taxonomy Regulation aims to identify economic activities which qualify as environmentally sustainable (the "Sustainable Activities").

Article 9 of the Taxonomy Regulation identifies such activities according to their contribution to six environmental objectives: (i) Climate change mitigation; (ii) Climate change adaptation; (iii) Sustainable use and protection of water and marine resources; (iv) Transition to a circular economy; (v) Pollution prevention and control; (vi) Protection and restoration of biodiversity and ecosystems.

An economic activity shall qualify as environmentally sustainable where that economic activity contributes substantially to one or more of the six environmental objectives, does not significantly harm any of the other five environmental objectives ("do no significant harm" or "DNSH" principle), is carried out in compliance with the minimum safeguards laid down in Article 18 of the Taxonomy Regulation and complies with technical screening criteria that have been established by the European Commission in accordance with the Taxonomy Regulation. The "do no significant harm" principle applies only to those investments underlying the relevant Sub-Funds that take into account the European Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of the relevant Sub-Funds do not take into account the EU criteria for environmentally sustainable economic activities.

The Sub-Funds identified as Article 8 or Article 9 in their respective Appendix may commit or may not commit to invest, at the date of this Prospectus, in economic activities that contribute to the environmental objectives set out in the Article 9 of the Taxonomy Regulation.

For more information on Amundi's approach to the Taxonomy Regulation please refer to Appendix I – ESG Related Disclosures to this Prospectus and to the Amundi ESG Regulatory Statement on www.amundi.com.

Commission Delegated Regulation (EU) 2022/1288 of 6 April 2022

Commission Delegated Regulation (EU) 2022/1288, setting out the RTS was published on 25 July 2022 in the Official Journal of the EU (OJ). The RTS will apply from 1 January 2023.

Further to art. 14 (2) of the RTS, information about the environmental or social characteristics of art. 8 sub-funds is available in Appendix I - ESG Related Disclosures to this Prospectus.

Further to art. 18 (2) of the RTS, information about sustainable investments of art. 9 sub-funds is available in Appendix I - ESG Related Disclosures to this Prospectus.

For further details on how a Sub-Fund complies with the requirements of the Disclosure Regulation, the Taxonomy Regulation and the RTS, please refer to the relevant Sub-Fund's

Appendix, the annual financial statements of the Fund, and also to Appendix I - ESG Related Disclosures to this Prospectus.

Overview of the Responsible Investment Policy

Since its creation, the Amundi group of companies ("**Amundi**") has put responsible investment and corporate responsibility as one of its founding pillars, based on the conviction that economic and financial actors have a greater responsibility towards sustainable society and that ESG is a long-term driver of financial performance.

Amundi considers that, in addition to economic and financial aspects, the integration within the investment decision process of ESG dimensions, including sustainability factors and sustainability risks, allows a more comprehensive assessment of investment risks and opportunities.

Integration of Sustainability Risks by Amundi

Amundi's approach to sustainability risks relies on three pillars: a targeted exclusion policy, integration of ESG scores in the investment process and stewardship.

Therefore, for passively managed sub-funds, Amundi excludes controversial weapons manufacturers from most of its passively managed sub-funds as disclosed in each sub-fund description. Amundi has also developed a range of passively managed sub-funds that replicate indices that explicitly take into account sustainability risks and principal adverse impact on sustainability factors in their methodologies. For this particular range of passively managed sub-funds, the management process excludes companies in contradiction with the Responsible Investment Policy described below, such as those which do not respect international conventions, internationally recognized frameworks or national regulations.

In addition Amundi has developed its own ESG rating approach. The Amundi ESG rating aims to measure the ESG performance of an issuer, i.e. its ability to anticipate and manage sustainability risks and opportunities inherent to its industry and individual circumstances.

Amundi ESG rating process is based on the "Best-in-class" approach. Ratings adapted to each sector of activity aim to assess the dynamics in which companies operate.

ESG rating and analysis is performed within the ESG analysis team of Amundi, which is also used as an independent and complementary input into the decision process.

The Amundi ESG rating is a ESG quantitative score translated into seven grades, ranging from A (the best scores universe) to G (the worst). In

the Amundi ESG Rating scale, the securities belonging to the exclusion list correspond to a G.

For corporate issuers the ESG performance is assessed by comparison with the average performance of its industry, through the three ESG dimensions:

1. Environmental dimension: this examines issuers' ability to control their direct and indirect environmental impact, by limiting their energy consumption, reducing their greenhouse emissions, fighting resource depletion and protecting biodiversity.
2. Social dimension: this measures how an issuer operates on two distinct concepts: the issuer's strategy to develop its human capital and the respect of human rights in general.
3. Governance dimension: This assesses capability of the issuer to ensure the basis for an effective corporate governance framework and generate value over the long-term.

The methodology applied by Amundi ESG rating uses 38 criteria (as of January 02, 2023) that are either generic (common to all companies regardless of their activity) or sector specific which are weighted according to sector and considered in terms of their impact on reputation, operational efficiency and regulations in respect of an issuer.

For more information on the 38 criteria considered by Amundi (as of January 02, 2023) please refer to the Responsible Investment Policy and Amundi ESG Regulatory Statement available on www.amundi.lu.

The Amundi ESG rating also considers potential negative impacts of the issuer's activities on sustainability (principal adverse impact of investment decisions on sustainability factors, as determined by Amundi) including on the following indicators:

- Greenhouse gas emission and Energy Performance (Emissions and Energy Use Criteria)
- Biodiversity (Waste, recycling, biodiversity and pollution Criteria, Responsible Management Forest Criteria)
- Water (Water Criteria)
- Waste (Waste, recycling, biodiversity and pollution Criteria)
- Social and employee matters (Community involvement and human rights criteria, Employment practices Criteria, Board Structure Criteria, Labour Relations Criteria and Health and Safety Criteria)
- Human rights (Community involvement & Human Rights Criteria)

- Anti-corruption and anti-bribery (Ethics Criteria)

Stewardship activity is an integral part of Amundi's ESG strategy. Amundi has developed an active stewardship activity through engagement and voting. The Amundi Engagement Policy applies to all Amundi funds and is included in the Responsible Investment Policy.

More detailed information are included in the Amundi's Responsible Investment Policy and in the Amundi's ESG Regulatory Statement available at www.amundi.com.

Integration of Amundi's Sustainability Risks approach at Sub-Fund level

The Sub-Funds classified pursuant to article 8 of the Disclosure Regulation aim to promote environmental or social characteristics and to invest in companies that follow good governance practices. These Sub-Funds, unless otherwise specified in their investment policies, exclude all issuers specified in the exclusion list of the Responsible Investment Policy as outlined above.

Principal Adverse Impact

Principal Adverse Impacts ("PAIs") are negative, material or likely to be material effects on Sustainability Factors that are caused, compounded by or directly linked to investment decisions by the issuer.

For passively managed Sub-Funds, Amundi considers PAIs via a combination of approaches: exclusions, engagement, vote, controversies monitoring.

For Sub-Funds classified under art. 8 and art. 9 of the Disclosure Regulation, Amundi considers PAIs in Annex 1, Table 1 of the RTS applying to the Sub-Fund's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches.

For all other Sub-Funds not classified pursuant to art. 8 or art. 9 of the Disclosure Regulation Amundi considers a selection of PAIs through its normative exclusion policy and for these Sub-Funds only indicator n.14 (Exposure to controversial weapons anti-personnel mines, cluster munitions, chemical weapons and biological weapons) of Annex 1, Table 1 of the RTS will be taken into account.

All other Sub-Funds not classified pursuant to art. 8 or art. 9 of the Disclosure Regulation take into account principal adverse impact of investments on sustainability factors in their investment process by excluding securities of companies involved in the production or sale of controversial weapons. These sub-funds do not integrate sustainability risks in their investment process as

their objective is to replicate as closely as possible the performance of a benchmark that does not take into consideration such risks in its methodology.

These Sub-Funds do not integrate sustainability risks in their investment process as their objective is to replicate as closely as possible the performance of a benchmark that does not take into consideration such risks in its methodology.

More detailed information on Principal Adverse Impact are included in the Amundi's ESG Regulatory Statement available at www.amundi.com.

THE VOLCKER RULE

Legislative and regulatory changes in the United States are relevant to Crédit Agricole, the Sub-Funds and the Shareholders. On July 21, 2010, President Obama signed into law the Dodd-Frank Act. Section 619 of the Dodd-Frank Act and its implementing regulations (commonly known as the "**Volcker Rule**") restrict the ability of a banking entity, such as most entities within the Crédit Agricole Group, from, among other things, acquiring or retaining any equity, partnership or other ownership interest in, or sponsoring (including serving as a commodity pool operator for), a "covered fund" (which term includes certain hedge funds and private equity funds).

The Volcker Rule excludes from the definition of covered fund some foreign public funds that meet certain conditions.

In order for a Sub-Fund to qualify as a foreign public fund, the following requirements must be satisfied:

- 1) the Sub-Fund must be organized or established outside of the United States (including any state, possession, or territory);
- 2) the ownership interests of the Sub-Fund are authorized to be offered and sold to retail investors in the Sub-Fund's home jurisdiction;
- 3) the ownership interests of the Sub-Fund are sold predominately through one or more public offerings outside the United States (sold "predominately" outside the United States requires that, in the initial offering, 85% or more of the vehicle's interests are sold to investors that are not residents of the United States);
- 4) if the Sub-Fund is effectively invested by retail investors,
 - a. ETF must be quoted on an exchange

- b. Non-ETF must be effectively invested by retail with minimum investment amount less than 25 K-Euros;
- 5) the offering disclosure documents must be publicly available.
- 6) An additional condition is required for organized or located United States banking entities with respect to the foreign public fund they sponsor: the fund's ownership interests are sold predominately to persons other than the sponsoring organized or located United States banking entity, the foreign public fund, affiliates of the sponsoring United States banking entity and the foreign public fund, and directors and employees of such entities.

The statutory effective date of the Volcker Rule is July 21, 2012 and a banking entity, subject to certain exceptions, was required to bring its activities and investments into compliance with the Volcker Rule by the end of the conformance period, on July 21, 2015. The U.S. Federal Reserve Board has granted two one-year extensions of the conformance period for "legacy covered funds" sponsored or acquired on or before December 31, 2013, extending the conformance period for such funds to July 21, 2017.

The Management Company and its Affiliated Entities provide no assurances to Shareholders regarding the treatment of the Sub-Funds under the Volcker Rule. Shareholders should seek legal advice regarding the implications of the Volcker Rule to the investors' purchase of any Shares in the Sub-Funds."

THE COMPANY – GENERAL INFORMATION

The Company has been incorporated on 29 March 2006 under Luxembourg laws as a "*société d'investissement à capital variable*" for an unlimited period of time with a constitutive capital of EUR 31,100. The Company is subject to Part I of the 2010 Law. Its registered office is established in Luxembourg.

The Articles of Incorporation have been deposited with the *Registre de Commerce et des Sociétés* of Luxembourg and shall be published in the *Mémorial C Recueil des Sociétés et Associations* (the "*Mémorial*") of 14 April 2006. The Company has been registered with the *Registre de Commerce et des Sociétés* of Luxembourg under number B 115 129.

The Articles of Incorporation may be amended from time to time by a general meeting of shareholders, subject to the quorum and majority requirements provided by the laws of Luxembourg.

The Company is established as an umbrella fund and will issue Shares in different Classes in the different Sub-Funds. The Directors shall maintain for each Sub-Fund a separate portfolio.

Vis-à-vis third parties, the Company shall constitute one single legal entity, but by derogation from article 2093 of the Luxembourg Civil Code, the assets of a particular Sub-Fund are only applicable to the debts, engagements and obligations of that Sub-Fund. The assets, commitments, charges and expenses which cannot be allocated to one specific Sub-Fund will be charged to the different Sub-Funds proportionally to their respective net assets, and prorata temporis, if appropriate due to the amounts considered.

In relation between shareholders, each Sub-Fund is treated as a separate legal entity.

For consolidation purposes, the base currency of the Company is the EURO.

MANAGEMENT AND ADMINISTRATION

The Board of Directors

The Board of Directors, whose members' names (the "**Directors**") appear on the first pages of this Prospectus, is responsible for the information contained in this Prospectus. They have taken all reasonable care to ensure that at the date of this Prospectus, the information contained herein is accurate and complete in all material respects. The Board of Directors accepts responsibility accordingly.

Despite the delegation by the Company of the management and administration functions to the Management Company (as described in the next paragraph), the Board of Directors remains responsible for the Company's management, control, administration and the determination of its overall investment objectives and policies.

There are no existing or proposed service contracts between any of the Directors and the Company, although the Directors are entitled to receive remuneration in accordance with usual market practice.

The Management Company

Pursuant to the 2010 Law, the Board of Directors has designated Amundi Luxembourg S.A. to act as its management company.

On 01 January 2024, Amundi Luxembourg S.A. has replaced Amundi Asset Management as Management Company under Chapter 15 of the 2010 Law.

The Management Company has been incorporated on 20 December 1996 for 99 (ninety nine) years. Its registered office is established in Luxembourg.

The Management Company is responsible for investment management, administrative services, marketing services and distribution services.

As of the date of the Prospectus, the Management Company also acts as management company for other investment funds. The names of these other funds are available upon request from the Management Company.

The Management Company has the option of delegating to third parties some or all of its responsibilities. For example, so long as it retains control and supervision, the Management Company can appoint one or more investment managers to handle the day-to-day management of the Sub-Fund's assets, or one or more advisors to provide investment information, recommendations and research concerning prospective and existing investments.

The Management Company can also appoint various service providers, including those listed below, and can appoint distributors to market and distribute Sub-Fund's Shares in any jurisdiction where the Shares are approved for sale.

The Management Company has designed and implemented a remuneration policy that is consistent with and promotes sound and effective risk management by having a business model that by its nature does not encourage excessive risk taking, such risk being inconsistent with the risk profile of the Sub-Funds.

The Management Company has identified those of its staff members whose professional activity has a material impact on the risk profiles of the Sub-Funds, and will ensure that these staff members comply with the remuneration policy.

The remuneration policy integrates governance, a pay structure that is balanced between fixed and variable components and risk and long-term performance alignment rules. These alignment rules are designed to be consistent with the interests of the Management Company, the Company and the shareholders, with respect to such considerations as business strategy, objectives, values and interest and includes measures to avoid conflicts of interests.

The Management Company ensures that the calculation of any performance-based remuneration is based on the applicable multi-year performance figures of the Company and that the actual payment of such remuneration is spread over the same period.

The details of the current remuneration policy of the Management company, such as a description of how remuneration and benefits are calculated and the identity of the persons responsible for awarding the remuneration and benefits, are available on <https://www.amundi.lu/retail/Local-Content/Footer/Quick-Links/Regulatory->

information/Amundi and a paper copy is available to investors free of charge upon request to the registered office of the Management Company.

The Voting Policy attached to the securities held by the Company and applied by the Management Company, as well as the report on conditions under which such voting rights have been exercising are available on the Management Company's website : <https://www.amundi.com> section legal documentation.

Investors may contact the Management Company to question on the details of the exercise of voting rights on each resolution presented at the general meeting of a given issuer as soon as the consolidated holding of the Management Company represents more than the holding threshold set in the Voting Policy. Any absence of response from the Management Company may be interpreted, after a period of one month, as it has exercised its voting rights in accordance with the principles set out in the Voting Policy.

The Investment Manager

For each Sub-Fund, the Management Company may delegate its asset management functions to an Investment Manager. Unless otherwise disclosed in the relevant Sub-Fund's Appendix, the Management Company has delegated its asset management functions to Amundi Asset Management, with registered office at 91-93 Boulevard Pasteur 75730 Paris Cedex 15P.

The Investment Manager is entitled to receive as remuneration for its services a fee that is included in the Management Fee as specified in Appendix C – SUMMARY OF SHARES AND FEES.

For each Sub-Fund, the Investment Manager may delegate its duties, or part of it, to one or several Sub-Investment Managers, as defined in the relevant Sub-Fund's Appendix. If so, the identity of such Sub-Investment Manager(s) will be disclosed in the relevant Sub-Fund's Appendix.

The Distributor and Nominee Agent

The Management Company may delegate under its responsibility and control to one or several banks, financial institutions and other authorised Intermediaries as Distributors and Nominees to offer and sell the Shares to investors and handle the subscription, redemption, conversion or transfer requests of shareholders. Subject to the law of the countries where Shares are offered, such Intermediaries may, with the agreement of the Board of Directors, and the Depositary, act as nominees for the investor.

In this capacity, the Intermediary shall apply for the subscription, conversion or redemption of Shares for the account of its client and request registration of such operations in the Sub-Fund's Shares' register in the name of the Intermediary.

Notwithstanding the foregoing, a shareholder may invest directly in the Company without using the services of a nominee. The agreement between the Company and any nominee shall contain a provision that gives the shareholder the right to exercise its title to the Shares subscribed through the nominee. The Nominee Agent will have no power to vote at any general meeting of shareholders, unless the shareholder grants it a power of attorney in writing his authority to do so.

An investor may ask at any time in writing that the Shares shall be registered in his name and in such case, upon delivery by the investor to the Registrar and Transfer Agent of the relevant confirmation letter of the Nominee, the Registrar and Transfer Agent shall enter the corresponding transfer and investors' name into the shareholder register and notify the Nominee Agent accordingly.

However, the aforesaid provisions are not applicable for shareholders who have acquired Shares in countries where the use of the services of a nominee (or other Intermediary) is necessary or compulsory for legal, regulatory or compelling practical reasons.

In relation to any subscription, an Intermediary authorised to act as nominee is deemed to represent to the Directors that:

- a) the investor is a Qualified Holder;
- b) it will notify the Board of Directors and the Registrar and Transfer Agent immediately if it learns that an investor is no longer a Qualified Holder;
- c) in the event that it has discretionary authority with respect to Shares which become beneficially owned by any person who is not a Qualified Holder, the Intermediary will cause such Shares to be redeemed and;
- d) it will not knowingly transfer or deliver any Shares or any part thereof or interest therein to any person who is not a Qualified Holder nor will any Shares be transferred to the United States.

The Board of Directors may, at any time, require Intermediaries who act as nominees to make additional representations to comply with any changes in applicable laws and regulations.

The list of Nominee Agents is available at the registered office of the Company.

The Depositary

Société Générale Luxembourg is the Company's depositary and paying agent (the "**Depositary**").

The Depositary is a wholly-owned subsidiary of Société Générale, a Paris-based credit institution. The Depositary is a Luxembourg

public limited company registered with the Luxembourg trade and companies register under number B 6061 and whose registered office is situated at 11, avenue Emile Reuter, L-2420 Luxembourg. Its operational center is located 28-32, place de la Gare, L-1616 Luxembourg. It is a credit institution in the meaning of the law of 5 April 1993 relating to the financial sector, as amended.

The Depositary will assume its functions and duties in accordance with articles 33 to 37 of the 2010 Law and the Commission Delegated Regulation (EU) 2016/438 of 17 December 2015 supplementing the UCITS Directive (the "EU Level 2 Regulation"). The relationship between the Company, the Management Company and the Depositary is subject to the terms of a depositary and paying agent agreement entered into for an unlimited period of time (the "**Depositary and Paying Agent Agreement**").

In accordance with the 2010 Law, and pursuant to the Depositary and Paying Agent Agreement, the Depositary carries out, *inter alia*, the safe-keeping of the assets of the Company as well as the monitoring of the cash flows and the monitoring and oversight of certain tasks of the Company.

In addition, Société Générale Luxembourg will act as the Company's principal paying agent. In that capacity, Société Générale Luxembourg will have as its principal function the operation of procedures in connection with the payment of distributions and, as the case may be, redemption proceeds on the Shares.

The Depositary may delegate Safe-keeping Services (as defined in the Depositary and Paying Agent Agreement) to Safe-keeping Delegates (as defined in the Depositary and Paying Agent Agreement) under the conditions stipulated in the Depositary and Paying Agent Agreement and in accordance with article 34*bis* of the 2010 Law and articles 13 to 17 of the EU Level 2 Regulation. A list of the Safe-keeping Delegates is available on <https://www.securities-services.societegenerale.com/en/solution-finder/global-custody/>.

The Depositary is also authorized to delegate any other services under the Depositary and Paying Agent Agreement other than Oversight Services and Cash Monitoring Services (as defined in the Depositary and Paying Agent Agreement).

The Depositary is liable to the Company for the loss of Held In Custody Assets (as defined in the Depositary and Paying Agent Agreement and in accordance with article 18 of the EU Level 2 Regulation) by the Depositary or the Safe-keeping Delegate. In such case, the Depositary shall be liable to return a Held In Custody Assets of an identical type or the corresponding amount to the Company without undue delay, unless the Depositary can prove that the loss arose as a result of an external event beyond its reasonable

control, the consequences of which would have been unavoidable despite all reasonable efforts to the contrary.

In performing any of its other duties under the Depositary and Paying Agent Agreement, the Depositary shall act with all due skill, care and diligence that a leading professional Depositary for hire engaged in like activities would observe. The Depositary is liable to the Company for any other losses (other than loss of Held In Custody Assets described above) as a result of negligence, bad faith, fraud, or intentional failure on the part of the Depositary (and each of its directors, officers, servants or employees).

The liability of the Depositary as to Safe-keeping Services shall not be affected by any delegation as referred to in article 34bis of the 2010 Law or excluded or limited by agreement.

The Depositary and Paying Agent Agreement is entered into for an unlimited period. Each party to the Depositary and Paying Agent Agreement may terminate it upon a ninety (90) calendar days' prior written notice. In case of termination of the Depositary and Paying Agent Agreement, a new depositary shall be appointed. Until it is replaced, the resigning or, as the case may be, removed depositary shall continue only its custody duties (and no other duties), and to that extent shall take all necessary steps for the safeguard of the interests of the shareholders.

The Depositary is not responsible for any investment decisions of the Company or of one of its agents or the effect of such decisions on the performance of a relevant Sub-Fund.

The Depositary is not allowed to carry out activities with regard to the Company that may create conflicts of interest between the Company, the shareholders and the Depositary itself, unless the Depositary has properly identified any such potential conflicts of interest, has functionally and hierarchically separated the performance of its depositaries tasks from its other potentially conflicting tasks, and the potential conflicts of interest are properly identified, managed, monitored and disclosed to the shareholders.

In that respect, the Depositary has in place a policy for the prevention, detection and management of conflicts of interest resulting from the concentration of activities in Société Générale's Group or from the delegation of safekeeping functions to other Société Générale entities or to an entity linked to the Management Company.

This conflict of interest management policy intends to:

- (a) identify and analyse potential conflict of interest situations;
- (b) record, manage and track conflict of interest situations by:
 - implementing permanent measures to manage conflicts

of interest including the separation of tasks, the separation of reporting and functional lines, the tracking of insider lists and dedicated IT environments;

- implementing, on a case-by-case basis:
 - appropriate preventive measures including the creation of an ad hoc tracking list and new chinese walls, and by verifying that transactions are processed appropriately and/or by informing the clients in question;
 - or, by refusing to manage activities which may create potential conflicts of interest.

Thus, the Depositary in its capacity, in one hand, as depositary and paying agent and, on the other hand, as administrative, registrar and transfer agent of the Company has established a functional, hierarchical and contractual separation between the performance of its depositary functions and the performance of those tasks outsourced by the Company.

The Administrative Agent

Société Générale Luxembourg has been appointed by the Management Company as Administrative Agent.

In such capacities, Société Générale Luxembourg is responsible for the administrative functions required by Luxembourg law such as the calculation of the Net Asset Value, the proper book-keeping of the Company and all other administrative functions as required by the laws of the Grand Duchy of Luxembourg and as further described in the aforementioned agreement.

With the prior consent of the Management Company and in respect of applicable laws and regulations, the administrative agent may delegate the exercise or the performance of certain of its tasks and obligations.

Société Générale Luxembourg is a Luxembourg limited company (société anonyme), wholly owned by Société Générale.

It has its registered office in Luxembourg at 11, avenue Emile Reuter, L-2420 Luxembourg and its operational center at 28-32, Place de la gare, L-1616 Luxembourg. Its main activity consists in corporate and private banking and custody. As of July 1st, 2009, its fully paid-in capital was EUR 1,389,042,648.

The aforementioned agreement may be terminated by either party upon ninety days' prior written notice or immediately in certain circumstances.

The Corporate and Domiciliary Agent

Arendt Services S.A. has been appointed by the Management Company as Corporate and Domiciliary agent.

In such capacities, Arendt Services S.A. is obliged :

- (a) to identify the Company's board members, its shareholders and its ultimate beneficial owners;
- (b) to keep in its files all the documentation required to identify the above-mentioned persons for a period of at least 5 years after the end of the relations with such persons and/or with the Company;
- (c) to comply with and answer any legal request that the authorities responsible for the application of the law may address to it in the exercise of their power;
- (d) to fully cooperate with the Luxembourg authorities responsible for combating money laundering (i) by supplying them with all necessary information in accordance with the applicable legislation and (ii) by automatically informing in accordance with Luxembourg law the Public Prosecutor (Procureur d'Etat) at the District Court of Luxembourg of any fact that could be indicative of money laundering or terrorist financing.

Arendt Services S.A., is a société anonyme existing under the laws of the Grand Duchy of Luxembourg, having its registered office at 9, rue de Bitbourg, L-1273 Luxembourg, registered with the Luxembourg Trade and Companies Register under the number B 145 917.

The Registrar and Transfer Agent

Société Générale Luxembourg has been appointed by the Management Company as Registrar and Transfer Agent of the Company.

Société Générale Luxembourg is a Luxembourg limited company (*société anonyme*).

It has its registered office in Luxembourg at 28-32, Place de la Gare, L-1616 Luxembourg.

The Registrar and Transfer Agent will be responsible for handling the processing of subscriptions for Shares, dealing with requests for redemptions and conversions and accepting transfers of funds, for the safekeeping of the shareholders Register of the Company, the delivery of Share Certificates, if requested, the safekeeping of all non-issued Share Certificates of the Company, for accepting Shares Certificates rendered for replacement, redemption or conversion and for providing and

supervising the mailing of statements, reports, notices and other documents to the shareholders, as further described in the above mentioned agreement.

With the prior consent of the Management Company and in respect of applicable laws and regulations, the registrar agent may delegate the exercise or the performance of certain of its tasks and obligations.

Dissolution and Liquidation of the Company

The Company may at any time be dissolved by a resolution taken by the general meeting of shareholders subject to the quorum and majority requirements as defined in the Articles of Incorporation of the Company.

Whenever the capital falls below two thirds of the minimum capital as provided by the 2010 Law, the Board of Directors has to submit the question of the dissolution and liquidation of the Company to the general meeting of shareholders. The general meeting, for which no quorum shall be required, shall decide on simple majority of the votes of the Shares presented and voting at the meeting.

The question of the dissolution and liquidation of the Company shall also be referred to the general meeting of shareholders whenever the capital falls below one quarter of the minimum capital. In such event, the general meeting shall be held without quorum requirements and the dissolution may be decided by the shareholders holding one quarter of the votes present or represented at that meeting.

The meeting must be convened so that it is held within a period of forty days from when it is ascertained that the net assets of the Company have fallen below two thirds or one quarter of the legal minimum as the case may be.

The issue of new Shares by the Company shall cease on the date of publication of the notice of the general meeting of shareholders, to which the dissolution and liquidation of the Company shall be proposed.

This notice will be published in at least two newspapers one of which is in Luxembourg.

One or more liquidators shall be appointed by the general meeting of shareholders to realise the assets of the Company, subject to the supervision of the relevant supervisory authority in the best interests of the shareholders.

The proceeds of the liquidation of each Sub-Fund, net of all liquidation expenses, shall be distributed by the liquidators among the holders of Shares in each Class in accordance with their respective rights. The amounts not claimed by shareholders at the end of the liquidation process shall be deposited, in accordance with Luxembourg law, with the *Caisse de Consignation* in Luxembourg until the statutory limitation period has lapsed.

Termination of a Sub-Fund / Class of Shares

The Directors may decide at any moment the termination of any Sub-Fund or Class of Shares. In the case of termination of a Sub-Fund or Class of Shares, the Directors may offer to the shareholders of such Sub-Fund or Class of Shares the conversion of their Shares into Classes of Shares of another Sub-Fund or into another Class of Shares within the same Sub-Fund, under terms fixed by the Directors, or the redemption of their Shares for cash at the Net Asset Value per Share (including all estimated expenses and costs relating to the termination) determined on the Valuation Day (as defined in Appendix H *Glossary Of Terms*).

In the event that for any reason the value of the assets in any Sub-Fund or any Class of Shares within a Sub-Fund has decreased below 50 million Euros or any other amount determined by the Directors as mentioned in the Appendix to be the minimum level for such Sub-Fund or such Class of Shares to be operated in an economically efficient manner, or if a change in the economic or political situation relating to the Sub-Fund or Class of Shares concerned would have material adverse consequences on the investments of that Sub-Fund, the Directors may decide to (i) compulsorily redeem all the Shares of the Sub-Fund or Class of Shares at the Net Asset Value per Share (taking into account actual realisation prices of investments and realisation expenses), calculated on the Valuation Day at which such decision shall take effect or (ii) to offer to the Shareholders of the relevant Sub-Fund or Class of Shares the conversion of their Shares into Shares of another Sub-fund or Class of Shares.

The Company shall serve a notice to the Shareholders of the relevant Sub-Fund or Class of Shares in writing prior to the effective date for such Compulsory Redemption, which will indicate the reasons for, and the procedure of, the redemption operations. Unless it is otherwise decided in the interests of, or to maintain equal treatment between, the Shareholders, the Shareholders of the Sub-Fund or Class of Shares concerned may continue to request redemption or conversion of their Shares free of charge, taking into account actual realisation prices of investments and realisation expenses and prior to the date effective for the compulsory redemption.

Any request for subscription shall be suspended as from the moment of the announcement of the termination, the merger or the transfer of the relevant Sub-Fund or Class of Shares.

Notwithstanding the powers conferred on the Board of Directors by the first paragraph hereof, the general meeting of Shareholders of any one Classes of Shares issued in a Sub-Fund or Class of Shares may, upon proposal from the Directors, redeem all the Shares issued in such Sub-Fund or Class of Shares and refund to the

Shareholders the Net Asset Value of their Shares (taking into account actual realisation prices of investments and realisation expenses) calculated on the Valuation Day at which such decision shall take effect. There shall be no quorum requirements for such general meeting of Shareholders that shall decide by resolution taken by simple majority of those present or represented.

Assets which may not be distributed to their owners upon the implementation of the redemption will be deposited with the *Caisse de Consignation* on behalf of the persons entitled thereto.

All redeemed Shares shall be cancelled thereafter by the Company.

Merger and Division of Sub-Funds

The Board of Directors may decide to proceed with a merger (within the meaning of the 2010 Law) of the assets and of the liabilities of the Company or a Sub-Fund with those of (i) another existing Sub-Fund within the Company or another existing sub-fund within another Luxembourg or foreign UCITS, or of (ii) another Luxembourg or foreign UCITS. In such a case, the Board of Directors is competent to decide on or to approve the effective date of the merger. Such a merger shall be subject to the conditions and procedures imposed by the Law, in particular concerning the terms of the merger to be established by the Board of Directors and the information to be provided to the Shareholders.

The Board of Directors may also decide to absorb (i) any sub-fund within another Luxembourg or a foreign UCI irrespective of their form, or (ii) any Luxembourg or foreign UCI constituted under a non-corporate form. Without prejudice to the more stringent and/or specific provisions contained in any applicable law or regulation, the decision of the Board of Directors will be published (either in newspapers to be determined by the Board of Directors or by way of a notice sent to the relevant Shareholders at their addresses indicated in the Shareholders Register) one month before the date on which the merger becomes effective in order to enable Shareholders to request during such period the repurchase or redemption of their units or, where possible, the conversion thereof into Shares in another Sub-Fund with similar investment, without any charge other than those retained by the Sub-Fund to meet disinvestment costs. At the expiry of this period, the decision to absorb shall bind all the Shareholders who have not exercised such right. The exchange ratio between the relevant Shares of the Company and those of the absorbed UCI or of the relevant sub-fund thereof will be calculated on the effective date of the absorption on the basis of the relevant net asset value per Share on such date.

Notwithstanding the powers conferred to the Board of Directors by the preceding paragraphs,

the Shareholders of the Company or the Shareholders of the relevant Sub-Fund(s), as the case may be, may also decide on any of the mergers or absorptions described above as well as on the effective date thereof by resolution taken with no quorum requirement and adopted at a simple majority of the votes validly cast. Where the Company is the absorbed entity which, thus, ceases to exist as a result of the merger, the general meeting of Shareholders of the Company must decide on the effective date of the merger. Such general meeting will decide by resolution taken with no quorum requirement and adopted by a simple majority of the votes validly cast.

In addition to the above, the Company may also absorb another Luxembourg or foreign UCI incorporated under a corporate form in compliance with the Luxembourg law dated 10 August 1915 on commercial companies as amended from time to time.

In the event that the Board of Directors believes it is required for the interests of the Shareholders of the relevant Sub-Fund or that a change in the economic or political situation relating to the Sub-Fund concerned has occurred which would justify it, the Board of Directors may decide to divide any Sub-Fund. In the case of division of Sub-Funds, the existing Shareholders of the respective Sub-Funds have the right to require, within thirty days of notification and enforcement of such event, the redemption by the Company of their Shares without redemption costs.

Any request for subscription, redemption and conversion shall be suspended as from the moment of the announcement of the division of the relevant Sub-Fund.

Reorganisation of Share Classes

The Board of Directors may decide to reorganise Share Classes, as further described below, in the event that, for any reason, the Board of Directors determines that:

1. the Net Asset Value of a Share Class has decreased to, or has not reached, the minimum level for that Share Class to be operated in an efficient manner; or
2. changes in the legal, economic or political environment would justify such reorganisation; or
3. the product rationalisation would justify such reorganization.

In such a case, the Board of Directors may decide to re-allocate the assets and liabilities of any Share Class to those of one or several other Share Classes, and to re-designate the Shares of the Share Class concerned as Shares of such other Share Class or Share Classes (following a split or amalgamation of Shares, if necessary,

and the payment to shareholders of the amount corresponding to any fractional entitlement).

In addition, the shareholders will be informed in due time of such reorganisation by way of a written notice, prior to the entrance into force of such reorganisation. The notice will be published and/or communicated to shareholders in compliance with the section PUBLICATION OF NOTICES. The notice will explain the reasons for and the process of the reorganisation.

General Meetings

The annual general meeting of shareholders will be held at the registered office of the Company on the first Friday of April of each year (or the immediately next Luxembourg Business Day if this day is not a Business Day) at 10 a.m.

Shareholders in any Sub-Fund may hold, at any time, general meetings to decide on any matters that relate exclusively to such Sub-Fund. In addition, the shareholders of any Class of Shares may hold, at any time, general meetings to decide on any matters that relate exclusively to such Class of Shares.

Notices of all general meetings are sent by mail to all registered shareholders at their registered address at least eight days prior to such meeting. Such notice will indicate the time and place of such meeting and the conditions of admission thereto, will contain the agenda and will refer to the requirements of Luxembourg law with regard to the necessary quorum and majority at such meeting.

Annual and Semi-annual Reports

Audited Annual Reports and unaudited Semi-annual Reports will be made available for public inspection at each of the registered offices of the Company and the Administrative Agent within four, respectively two months following the relevant accounting period, and the latest Annual Report shall be available at least fifteen days before the annual general meeting. The Company's financial year ends on December 31st of each year.

Publication of Notices

Notice of any developments concerning your investment in the Company or its Sub-Funds, unless other communication media are specified in the Prospectus or required in accordance with the applicable laws and regulations in Luxembourg, will be notified through the website <https://www.amundi.lu/retail/Shareholder-Notices/MultiUnitsLuxembourg> or any successors thereto.

You are consequently invited to consult this website on a regular basis.

Documents Available for Inspection

Copies of the following documents may be inspected free of charge during usual business hours on any weekday (Saturday and public holidays excepted) at the registered office of the Company, 9, rue de Bitbourg, L-1273 Luxembourg:

1. the Articles of Incorporation of the Company;
2. the KIDs;
3. the last audited Annual Report and the Semi-annual Report of the Company.

A copy of the documents listed above may be delivered without cost to interested investors at their request.

A copy of the contingency plan, within the meaning of Regulation (EU) 2016/1011 on indices used as benchmarks in financial instruments and financial contracts or to measure the performance of investment funds, is available upon request from the Management Company.

Statements made in this Prospectus are based on the laws and practice in force at the date of this Prospectus in the Grand Duchy of Luxembourg and are subject to changes in those laws and practice.

APPENDICES

APPENDIX 1**MULTI UNITS LUXEMBOURG – Amundi DAX III**

The Sub-Fund is an index-tracking UCITS passively managed.

The Reference Currency of the Sub-Fund is the Euro (EUR).

INVESTMENT OBJECTIVE

The investment objective of MULTI UNITS LUXEMBOURG - **Amundi DAX III** is to track both the upward and the downward evolution of the DAX® (the "**Index**") while minimising the volatility of the difference between the return of the Sub-Fund and the return of the Index (the "**Tracking Error**").

The anticipated level of the tracking error under normal market conditions is expected to be up to 1%.

THE INDEX

Deutsche Börse (provider of the Index) is the German leading provider of equity indices.

All equity indices of Deutsche Börse are weighted by market capitalisation; however, only freely available and tradable shares ("free float") are taken into account. The Index described herein is constructed and maintained by Deutsche Börse in accordance with this methodology. Shareholders may obtain information on the methodology by accessing Deutsche Börse's website on www.deutsche-boerse.com.

Deutsche Börse's editorial decisions regarding the Index are made independently of any party.

Whilst the Directors believe that the following description of the Index is correct, it has been based on public information obtained from Deutsche Börse and available on Deutsche Börse's website and such description has not been endorsed by Deutsche Börse.

- **Index Objectives**

The DAX® reflects the German blue chip segment comprising the largest and most actively traded German companies that are listed at the Frankfurt Stock Exchange (FWB®). Its 30 component issues have been admitted to the Prime Standard Segment. The DAX® was conceived as the successor to the 'Börsen-Zeitung Index', with a historical time series dating back until 1959.

- **Index Methodology**

The DAX® Index is capital-weighted, whereby the weight of any individual issue is proportionate to its respective share in the overall capitalisation of the index.

However, only freely available and tradable shares ("free float") are taken into account. So weighting in the Index is based exclusively on the free-float portion of the issued share capital. The number of shares of individual companies might be capped for the DAX® Index to achieve a limited weight of such companies within the Index.

The composition of the Index is reviewed and rebalanced on quarterly basis.

The rebalancing frequency as described above will have no impact in terms of costs in the context of the performance of the investment objective.

There is no guarantee that the index methodology as described in section above will not be changed by Deutsche Börse. In the event it is materially modified, the Manager in agreement with the Directors may decide in its discretion to replace the Index by a suitable index if one is then available.

- **Additional Information on Index**

Additional information on the Index, its composition, calculation and rules for periodical review and rebalancing and on the general methodology behind the Index can be found on <http://www.dax-indices.com>.

For additional Information on the Index please refer to paragraph B "Investment made by Index Sub-Fund" of Section I "Investment Objective / Investment Powers and Restrictions" of the main part of this Prospectus and on APPENDIX F – BENCHMARK REGULATION.

INVESTMENT POLICY

The Sub-Fund will carry out its investment objective via a Direct Replication as described and in compliance with the section INVESTMENT OBJECTIVES of the part I/ Investment Objectives/ Investment Powers and Restrictions of this Prospectus.

Within the limits set forth in this Prospectus and on an ancillary basis, the Sub-Fund may hold cash and cash equivalents.

The Sub-Fund will not invest more than 10% of its assets in units or shares of other UCITS. No investment will be made in any UCIs.

INVESTMENT TECHNIQUES

The maximum and expected proportions of the Sub-Fund's assets that can be subject to SFTs and TRS are disclosed in APPENDIX E - SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS.

The Sub-Fund intends to use from time to time securities lending transactions for one or more of the following specific aims: (i) reduction of risk; (ii) reduction of cost; or (iii) generation of additional capital or income for the UCITS with a level of risk which is consistent with the risk profile of the UCITS

and the risk diversification rules laid down in Article 52 of Directive 2009/65/EC of the European Parliament and of the Council of 13 July 2009 on the coordination of laws, regulations and administrative provisions relating to undertakings for collective investment in transferable securities.

ELIGIBILITY OF THE SUB-FUND

The Sub-Fund is eligible to the French equity savings plans (**PEA**) which means that the Sub-Fund invests at least 75% of its assets in a diversified portfolio of equities issued by an issuer incorporated either in European Union member state or in a member state of the European Economic Area.

Please refer to Appendix APPENDIX G – SPECIFIC INVESTMENT RATIO for information regarding the Sub-Fund and the German Investment Funds Tax Act (InvStG-E) ("**GiTA**").

TARGETED INVESTORS

The Sub-Fund is dedicated to both retail and institutional investors wishing to have an exposure to the German blue-chip market.

CLASSES OF SHARES AND FEES

The Sub-Fund will issue the Classes of Shares, subject to different terms and conditions described in APPENDIX C - SUMMARY OF SHARES AND FEES. Other Share Classes may be available. For a current listing of available Share Classes go to www.amundiETF.com.

DEFINITIONS

"Business Day", "Dealing Day" and "Valuation Day": Please refer to the APPENDIX H – GLOSSARY OF TERMS.

"Dealing Deadline": Please refer to the APPENDIX D – SUMMARY TABLE OF SUB-FUND'S DEALING TIMELINE.

LISTING

The Sub-Fund is a UCITS ETF. As a consequence all its Shares shall be traded throughout the day on one or several regulated market or multilateral trading facilities with at least one market maker which takes action to ensure that the stock exchange value of the Shares does not significantly vary from its iNAV (as defined above).

In the event of Suspension of the Secondary Market (as defined above in the Prospectus) the following exit charges will apply (in replacement of the maximum redemption charges stated above): 0.05% of the Net Asset Value per Share multiplied by the number of shares redeemed.

A list of these stock exchanges and/or multilateral trading facilities can be obtained from the registered office of the Company.

Additional information on the iNAV of an exchange-traded share are provided in section "Indicative Net Asset Value per Share" of the Prospectus and on the website www.amundiETF.com.

PUBLICATION OF THE NET ASSET VALUE

The Net Asset Value per Share will be available at the registered office of the Company and will be published on www.amundiETF.com.

RISKS WARNING

Among the different risks described in APPENDIX B - SPECIAL RISK CONSIDERATIONS AND RISK FACTORS, the Sub-Fund is more specifically exposed to the following risks:

Equity Risk, Capital at Risk, Risks linked to Sampling and Optimization techniques, Sub-Fund Liquidity Risk, Liquidity Risk on Secondary Market, Risk that the Sub-Fund's investment objective is only partially achieved, Risk of using financial derivative instruments, Counterparty Risk, Risk linked to Securities Lending, Collateral Management Risk, Index Calculation Risk.

SUSTAINABILITY RISKS

This Sub-Fund does not promote ESG characteristics and does not maximize portfolio alignment with Sustainability Factors, however it remains exposed to Sustainability Risks and the occurrence of such risks could cause a negative material impact on the value of the investments made by the Sub-Fund. Further information can be found in the "SUSTAINABLE INVESTING" Section of the Prospectus.

TAXONOMY REGULATION

In accordance of article 7 of the Taxonomy Regulation, the Management Company draws the attention of investors to the fact that the investments underlying this Sub-Fund do not take into account the European Union criteria for environmentally sustainable economic activities.

DISTRIBUTION OF INCOME

Please refer to the Distribution Policy section of the Prospectus.

DISCLAIMER

This financial instrument is neither sponsored nor promoted, distributed or in any other manner supported by Deutsche Börse AG (the "**Licensor**"). The Licensor does not give any explicit or implicit

warranty or representation, neither regarding the results deriving from the use of the Index and/or the Index Trademark nor regarding the Index value at a certain point in time or on a certain date nor in any other respect. The Index is calculated and published by the Licensor. Nevertheless, as far as admissible under statutory law the Licensor will not be liable vis-à-vis third parties for potential errors in the Index. Moreover, there is no obligation for the Licensor vis-à-vis third parties, including investors, to point out potential errors in the Index.

Neither the publication of the Index by the Licensor nor the granting of a license regarding the Index as well as the Index Trademark for the utilization in connection with the financial instrument or other securities or financial products, which derived from the Index, represents a recommendation by the Licensor for a capital investment or contains in any manner a warranty or opinion by the Licensor with respect to the attractiveness on an investment in this product.

In its capacity as sole owner of all rights to the Index and the Index Trademark the Licensor has solely licensed to the issuer of the financial instrument the utilization of the Index and the Index Trademark as well as any reference to the Index and the Index Trademark in connection with the financial instrument.

APPENDIX 2

MULTI UNITS LUXEMBOURG – Amundi LevDax Daily (2x) leveraged

The Sub-Fund is an index-tracking UCITS passively managed.

The Reference Currency of the Sub-Fund is the Euro (EUR).

INVESTMENT OBJECTIVE

The investment objective of MULTI UNITS LUXEMBOURG - **Amundi LevDax Daily (2x) leveraged** is to track both the upward and the downward evolution of the LevDAX® (the "Index") while minimising the volatility of the difference between the return of the Sub-Fund and the return of the Index (the "Tracking Error").

The anticipated level of the tracking error under normal market conditions is expected to be up to 1%.

THE INDEX

Deutsche Börse (provider of the Index) is the German leading provider of equity indices.

All equity indices of Deutsche Börse are weighted by market capitalisation; however, only freely available and tradable shares ("free float") are taken into account. The Index described herein is constructed and maintained by Deutsche Börse in accordance with this methodology. Shareholders may obtain information on the methodology by accessing Deutsche Börse's website on www.deutsche-boerse.com.

Deutsche Börse's editorial decisions regarding the Index are made independently of any party.

Whilst the Directors believe that the following description of the Index is correct, it has been based on public information obtained from Deutsche Börse and available on Deutsche Börse's website and such description has not been endorsed by Deutsche Börse.

- **Index Objectives**

The LevDAX® gives a daily leveraged exposure to the DAX®. The DAX® reflects the German blue chip segment comprising the largest and most actively traded German companies that are listed at the Frankfurt Stock Exchange (FWB®). Its 30 component issues have been admitted to the Prime Standard Segment.

- **Index Methodology**

The LevDAX® gives a daily 200% leveraged exposure to the DAX® minus leverage financing costs. The Leverage strategy will be applied at the level of the Index.

Leverage can be readjusted intraday if the DAX® value decreases intraday of 25%. Intraday adjustments will be based on algorithmic objective frameworks.

The DAX® is capital-weighted, whereby the weight of any individual issue is proportionate to its respective share in the overall capitalisation of the DAX®. However, only freely available and tradable shares ("free float") are taken into account. So weighting in the DAX® is based exclusively on the free-float portion of the issued share capital. The number of shares of individual companies might be capped for the DAX® to achieve a limited weight of such companies within the DAX®.

The composition of the Index is reviewed and rebalanced on quarterly basis.

Rebalancing operations carried out within the frequency stated above could have an impact in terms of costs paid or incurred by the Sub-Fund and could consequently affect the performance of the Sub-Fund.

- **Additional Information on Index**

Additional information on the Index, its composition, calculation and rules for periodical review and rebalancing and on the general methodology behind the Index can be found on <http://www.dax-indices.com>.

For additional Information on the Index please refer to paragraph B "Investment made by Index Sub-Fund" of Section I "Investment Objective / Investment Powers and Restrictions" of the main part of this Prospectus and on APPENDIX F – BENCHMARK REGULATION.

INVESTMENT POLICY

The Sub-Fund will carry out its investment objective via an Indirect Replication as described and in compliance with the section INVESTMENT OBJECTIVES of the part I/ Investment Objectives/ Investment Powers and Restrictions of this Prospectus.

Within the limits set forth in this Prospectus and on an ancillary basis, the Sub-Fund may hold cash and cash equivalents.

The Sub-Fund will not invest more than 10% of its assets in units or shares of other UCITS; No investment will be made in any UCIs.

INVESTMENT TECHNIQUES

The maximum and expected proportions of the Sub-Fund's assets that can be subject to SFTs and TRS are disclosed in APPENDIX E - SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS.

ELIGIBILITY OF THE SUB-FUND

The Sub-Fund is eligible to the French equity savings plans (PEA) which means that the Sub-Fund invests at least 75% of its assets in a diversified portfolio of equities issued by an issuer incorporated either in European Union member state or in a member state of the European Economic Area.

Please refer to Appendix APPENDIX G – SPECIFIC INVESTMENT RATIO for information regarding the Sub-Fund and the German Investment Funds Tax Act (InvStG-E) (“GITA”).

TARGETED INVESTORS

The Sub-Fund is dedicated to both retail and institutional investors wishing to have an exposure to the German blue-chip market.

CLASSES OF SHARES AND FEES

The Sub-Fund will issue the Classes of Shares, subject to different terms and conditions described in APPENDIX A – SUMMARY OF SHARES AND FEES. Other Share Classes may be available. For a current listing of available Share Classes go to www.amundiETF.com.

DEFINITIONS

“Business Day”, “Dealing Day” and “Valuation Day”: Please refer to the APPENDIX H – GLOSSARY OF TERMS.

“Dealing Deadline”: Please refer to the APPENDIX D – SUMMARY TABLE OF SUB-FUND’S DEALING TIMELINE.

LISTING

The Sub-Fund is a UCITS ETF. As a consequence all its Shares shall be traded throughout the day on one or several regulated market or multilateral trading facilities with at least one market maker which takes action to ensure that the stock exchange value of the Shares does not significantly vary from its iNAV (as defined above).

In the event of Suspension of the Secondary Market (as defined above in the Prospectus) the following exit charges will apply (in replacement of the maximum redemption charges stated above): 1% of the Net Asset Value per Share multiplied by the number of shares redeemed.

A list of these stock exchanges and/or multilateral trading facilities can be obtained from the registered office of the Company.

Additional information on the iNAV of an exchange-traded share are provided in section “Indicative Net Asset Value per Share” of the Prospectus and on the website www.amundiETF.com.

PUBLICATION OF THE NET ASSET VALUE

The Net Asset Value per Share will be available at the registered office of the Company and will be published on www.amundiETF.com.

RISKS WARNING

Among the different risks described in APPENDIX B - SPECIAL RISK CONSIDERATIONS AND RISK FACTORS, the Sub-Fund is more specifically exposed to the following risks:

Equity Risk, Capital at Risk, Risks linked to Sampling and Optimization techniques, Sub-Fund Liquidity Risk, Liquidity Risk on Secondary Market, Risk that the Sub-Fund’s investment objective is only partially achieved, Risk of using financial derivative instruments, Counterparty Risk, Risk linked to Securities Lending, Collateral Management Risk, Index Calculation Risk.

The Sub-Fund is also exposed to :

Risk incurred from the daily readjustment in leverage : Investors are doubly exposed to fluctuations that affect the price or level of the Parent Index from day to day. In particular, any loss in value on the underlying market will be amplified and result in an even greater depreciation in the Sub-Fund’s net asset value. The daily readjustment in the index formula of the underlying “leveraged” strategy means that, for a period of more than one trading day, the Sub-Fund’s performance will not be equal to the double of the Parent Index’s performance.

For example, if the Parent Index gains 10% on a given trading day, then declines 5% on the following day, the ETF will have gained a total of 8% after these two days (and before deduction of applicable fees), while the Parent Index will have gained 4.5% over the same period.

If the Parent Index loses 5% on each of two consecutive trading days, it will have lost a total of 9.75%, while the ETF will have lost 19% over the same period (before deduction of applicable fees).

An unfavourable upside case

	Parent Index	Benchmark	Resulting leverage
Performance on Day1	+ 10%	+ 20%	x2
Performance on Day 2	- 5%	- 10%	x2
Total performance, period	+4.5%	+8%	x1.78

A favourable upside case

	Parent Index	Benchmark	Resulting leverage
Performance on Day 1	- 5%	- 10%	x2
Performance on Day 2	- 5%	- 10%	x2
Total performance, period	- 9.75%	-19%	x1.95

Moreover, it possible that, during an observation period of more than one day and in the event of steep volatility of the Parent Index during this period, the Sub-Fund's net asset value could decline even if the Parent Index shows a gain over this same period.

Example of reverse leverage:

	Parent Index	Benchmark			Resulting leverage
	Performance on Day i	Value on day i	Performance on Day i	Value on day i	
		100		100	
Day 1	20%	120	40%	140	x2
Day 2	-20%	96	40%	84	x2
Day 3	30%	124.8	60%	134.4	x2
Day 4	-20%	99.84	40%	80.64	x2
Day 5	10%	109.824	20%	96.768	x2
Total period	+ 9.82%		- 3.23%		x -0.33

SUSTAINABILITY RISKS

This Sub-Fund does not promote ESG characteristics and does not maximize portfolio alignment with Sustainability Factors, however it remains exposed to Sustainability Risks and the occurrence of such risks could cause a negative material impact on the value of the investments made by the Sub-Fund. Further information can be found in the "SUSTAINABLE INVESTING" Section of the Prospectus.

TAXONOMY REGULATION

In accordance of article 7 of the Taxonomy Regulation, the Management Company draws the attention of investors to the fact that the investments underlying this Sub-Fund do not take into account the European Union criteria for environmentally sustainable economic activities.

APPENDIX 3

MULTI UNITS LUXEMBOURG – Amundi S&P 500 II

The Sub-Fund is an index-tracking UCITS passively managed.

The Reference Currency of the Sub-Fund is the Euro (EUR).

INVESTMENT OBJECTIVE

The investment objective of MULTI UNITS LUXEMBOURG - Amundi S&P 500 II is to track both the upward and the downward evolution of the S&P 500[®] Net Total Return (the "Index") denominated in US Dollars - while minimising the volatility of the difference between the return of the Sub-Fund and the return of the Index (the "Tracking Error").

For daily hedged share classes mentioned in APPENDIX C - SUMMARY OF SHARES AND FEES, the Sub-Fund will also use a daily currency-hedge strategy, in order to minimize the impact of the evolution of each respective share class currency against currencies of each Index component.

The anticipated level of the tracking error under normal market conditions is expected to be up to 0.50%.

THE INDEX

- **Index Objectives**

The S&P 500 Net Total Return is a free-float capitalization-weighted index, published since 1957, of the prices of 500 large-cap common stocks actively traded in the United States. The stocks included in the S&P 500 Net Total Return are those of large publicly held companies that trade on either of the two largest American stock market companies (the NYSE and the NASDAQ OMX).

- **Index Methodology**

The S&P Index Committee follows a set of published guidelines for maintaining the index. Complete details of these guidelines, including the criteria for index additions and removals, policy statements, and research papers are available on the Web site at www.indices.standardandpoors.com.

CRITERIA FOR INDEX ADDITIONS

- **Financial Viability.** Companies should have four consecutive quarters of positive as-reported earnings, whereas-reported earnings are defined as GAAP Net Income excluding discontinued operations and extraordinary items.

- **Adequate Liquidity and Reasonable Price.**

- **Sector Representation:** companies' industry classifications contribute to the maintenance of a sector balance that is in line with the sector composition of the universe of eligible companies with market cap in excess of US\$ 3.5 billion.

- **Company Type:** constituents must be operating companies. Closed-end funds, holding companies, partnerships, investment vehicles and royalty trusts are not eligible. The Index Committee strives to minimize unnecessary turnover in index membership and each removal is determined on a case-by-case basis.

CRITERIA FOR INDEX REMOVALS

- Companies that substantially violate one or more of the criteria for index inclusion.

- Companies involved in merger, acquisition, or significant restructuring such that they no longer meet the criteria for index inclusion.

The composition of the Index is reviewed and rebalanced on quarterly basis, or, in limited circumstances as further described in the Index methodology, at an earlier date as decided by the Index sponsor.

The rebalancing frequency as described above will have no impact in terms of costs in the context of the performance of the investment objective.

- **Additional Information on Index**

For additional information on the Index, its composition, calculation and rules for periodical review and rebalancing and on the general methodology behind the Index can be found on <http://www.spindices.com>.

For additional Information on the Index please refer to paragraph B "Investment made by Index Sub-Fund" of Section I "Investment Objective / Investment Powers and Restrictions" of the main part of this Prospectus and on APPENDIX F – BENCHMARK REGULATION.

INVESTMENT POLICY

The Sub-Fund will carry out its investment objective via an Indirect Replication as described and in compliance with the section INVESTMENT OBJECTIVES of the part I/ Investment Objectives/ Investment Powers and Restrictions of this Prospectus.

Within the limits set forth in this Prospectus and on an ancillary basis, the Sub-Fund may hold cash and cash equivalents.

According to the investment objective and policy described above, the Sub-Fund will not invest more than 10% of its assets in units or shares of other UCITS. No investment will be made in any UCIs.

INVESTMENT TECHNIQUES

The maximum and expected proportions of the Sub-Fund's assets that can be subject to SFTs and TRS are disclosed in APPENDIX E - SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS.

ELIGIBILITY OF THE SUB-FUND

Please refer to Appendix APPENDIX G – SPECIFIC INVESTMENT RATIO for information regarding the Sub-Fund and the German Investment Funds Tax Act (InvStG-E) (“GITA”).

TARGETED INVESTORS

The Sub-Fund is dedicated to both retail and institutional investors wishing to have an exposure to the prices of 500 large-cap common stocks actively traded in the United States of America.

CLASSES OF SHARES AND FEES

The Sub-Fund will issue the Classes of Shares, subject to different terms and conditions described in APPENDIX C - SUMMARY OF SHARES AND FEES. Other Share Classes may be available. For a current listing of available Share Classes go to www.amundiETF.com.

To assist with meeting some of the Sub-Fund's costs (that may notably include fees of the Investment Manager, the Administrative and the Depositary Agent and the Index Licence costs) the Manager may request a fees contribution from the counterparties to the derivative transaction and/or instruments involved to achieve the Indirect Replication (further details are available on www.amundiETF.com and upon request at www.amundi.com – “Contact Us”).

DEFINITIONS

“Business Day”, “Dealing Day” and “Valuation Day”: Please refer to the APPENDIX H – GLOSSARY OF TERMS.

“Dealing Deadline”: Please refer to the APPENDIX D – SUMMARY TABLE OF SUB-FUND'S DEALING TIMELINE.

LISTING

The Sub-Fund is a UCITS ETF. DISCLAIMER

The Sub-Fund is not sponsored, endorsed, sold or promoted by Standard & Poor's and its affiliates (“S&P”). S&P makes no representation, condition or warranty, express or implied, to the owners of the

fund or any member of the public regarding the advisability of investing in securities generally or in the fund particularly or the ability of the S&P 500 Net Total Return Index to track the performance of certain financial markets and/or sections thereof and/or of groups of assets or asset classes. S&P's only relationship to Amundi Asset Management is the licensing of certain trademarks and trade names and of the S&P 500 Index which is determined, composed and calculated by S&P without regard to Amundi Asset Management or the fund. S&P has no obligation to take the needs of Amundi Asset Management or the owners of the fund into consideration in determining, composing or calculating the S&P 500 Net Total Return Index. S&P is not responsible for and has not participated in the determination of the prices and amount of the fund or the timing of the issuance or sale of the fund or in the determination or calculation of the equation by which the fund shares are to be converted into cash. S&P has no obligation or liability in connection with the administration, marketing, or trading of the fund.

S&P does not guarantee the accuracy and/or the completeness of the S&P 500 Net Total Return Index or any data included therein and S&P shall have no liability for any errors, omissions, or interruptions therein. S&P makes no warranty, condition or representation, express or implied, as to results to be obtained by Amundi Asset Management, owners of the fund, or any other person or entity from the use of the S&P 500 Net Total Return Index or any data included therein. S&P makes no express or implied warranties, representations or conditions, and expressly disclaims all warranties or conditions of merchantability or fitness for a particular purpose or use and any other express or implied warranty or condition with respect to the S&P 500 Net Total Return Index or any data included therein. without limiting any of the foregoing, in no event shall S&P have any liability for any special, punitive, indirect, or consequential damages (including lost profits) resulting from the use of the S&P 500 Net Total Return Index or any data included therein, even if notified of the possibility of such damages.

APPENDIX 4

MULTI UNITS LUXEMBOURG – Amundi Australia S&P/ASX 200

The Sub-Fund is an index-tracking UCITS passively managed.

The Reference Currency of the Sub-Fund is the Euro (EUR).

INVESTMENT OBJECTIVE

The investment objective of MULTI UNITS LUXEMBOURG - Amundi Australia S&P /ASX 200 is to track both the upward and the downward evolution of the S&P/ASX 200 Net Total Return Index denominated in Australian dollars (AUD) (the "Index") - while minimising the volatility of the difference between the return of the Sub-Fund and the return of the Index (the "Tracking Error").

For daily hedged share classes mentioned in APPENDIX C - SUMMARY OF SHARES AND FEES, the Sub-Fund will also use a daily currency-hedge strategy, in order to minimize the impact of the evolution of each respective share class currency against currencies of each Index component.

The anticipated level of the tracking error under normal market conditions is expected to be up to 0.50%.

THE INDEX

- **Index Objectives**

The S&P/ASX 200 Net Total Return measures the performance of the 200 largest index-eligible stocks listed on the ASX by float-adjusted market capitalization. The index is float-adjusted, covering approximately 80% of Australian equity market capitalization.

The S&P/ASX 200 Net Total Return index constituents are rebalanced quarterly to ensure adequate market capitalization and liquidity.

The S&P/ASX 200 Net Total Return is maintained by the S&P Australian Index Committee, including Standard & Poor's economists and index analysts and Australian Securities Exchange representatives.

- **Index Methodology**

The S&P Australian Index Committee follows a set of published guidelines for maintaining the index. Complete details of these guidelines, including the criteria for index additions and removals, policy statements, and research papers are available on the Web site at www.indices.standardandpoors.com.

The Index Committee reviews constituents quarterly to ensure adequate market capitalization and liquidity.

Quarterly review changes take effect the third Friday of December, March, June, and September.

The weighting of constituents in the S&P/ASX 200 Net Total Return is determined by the float-adjusted market capitalization assigned to each security by the Index Committee. Every index constituents' float adjustment is reviewed as part of the March quarterly review.

CRITERIA FOR INDEX ADDITIONS

- Listing: Only securities listed on the Australian Securities Exchange are considered for inclusion in any of the S&P/ASX indices.

- Market Capitalization: Companies are assessed based on the average of their previous 6-month day-end float adjusted market capitalization.

- Public Float: There must be public float of at least 30% for a stock to warrant inclusion in the S&P/ASX indices.

- Liquidity: Only securities that are actively and regularly traded are eligible for inclusion in any S&P/ASX indices.

The Index Committee strives to minimize unnecessary turnover in index membership and each removal is determined on a case-by-case basis.

CRITERIA FOR INDEX REMOVALS

- Companies that substantially violate one or more of the criteria for index inclusion.

- Companies involved in merger, acquisition, or significant restructuring such that they no longer meet the criteria for index inclusion.

The composition of the Index is reviewed and rebalanced on quarterly basis, or, in limited circumstances as further described in the Index methodology, at an earlier date as decided by the Index sponsor.

The rebalancing frequency as described above will have no impact in terms of costs in the context of the performance of the investment objective.

- **Additional Information on Index**

For additional information on the Index methodology, its composition, calculation and rules for periodical review and rebalancing and on the general methodology behind the Index can be found on <http://www.spindices.com>.

APPENDIX 8

MULTI UNITS LUXEMBOURG – Amundi S&P 500 VIX Futures Enhanced Roll

The Sub-Fund is an index-tracking UCITS passively managed.

The Reference Currency of the Sub-Fund is the US Dollars (USD).

INVESTMENT OBJECTIVE

The investment objective of MULTI UNITS LUXEMBOURG - Amundi S&P 500 VIX Futures Enhanced Roll is to track both the upward and the downward evolution of the “S&P 500 VIX Futures Enhanced Roll Index” (the “**Index**”) denominated in US Dollars - while minimising the volatility of the difference between the return of the Sub-Fund and the return of the Index (the “**Tracking Error**”).

The anticipated level of the tracking error under normal market conditions is expected to be up to 0.50%.

THE INDEX

- **Index Objectives**

The S&P 500 VIX Futures Enhanced Roll Index provides exposure, both positive and negative, to the movement of the futures contracts market, as listed on the Chicago CBOE pertaining to the implicit volatility of the S&P 500 index.

This Index also provides exposure to the US money market, given the absence of financing to implement the strategy.

The S&P 500 index comprises the 500 leading American companies and is denominated in US dollars.

This Index is calculated in real time and is available on the S&P website: www.standardandpoors.com.

- **Index Methodology**

The performance of the Index is equal to the performance of a basket of short-term (1 to 2 month maturities) and medium-term (3-5 term maturities) futures on the VIX index increased by the cumulative performance of American Treasury interest rates (3-month T-Bill). In order to optimise the performance of the Index, the basket comprises medium-term futures in calm periods and short-term futures in stress periods. Movement from one basket to the other is defined, according to Index methodology, by signals based on the value of the VIX in relation to its moving average.

The monitored performance is based on the Index at 3.15 pm in Chicago (GMT-6) in US Dollars.

An exhaustive description and complete construction methodology for the Index is available on the website: www.standardandpoors.com. The tracked performance is at Index close.

The composition of the Index is reviewed and rebalanced on quarterly basis, or, in limited circumstances as further described in the Index methodology, at an earlier date as decided by the Index sponsor.

Rebalancing operations carried out within the frequency stated above could have an impact in terms of costs paid or incurred by the Sub-Fund and could consequently affect the performance of the Sub-Fund.

- **Additional Information on Index**

Additional information on the Index, its composition, calculation and rules for periodical review and rebalancing and on the general methodology behind the Index can be found on <http://www.spindices.com>.

For additional Information on the Index please refer to paragraph B “Investment made by Index Sub-Fund” of Section I “Investment Objective / Investment Powers and Restrictions” of the main part of this Prospectus and on APPENDIX F – BENCHMARK REGULATION.

INVESTMENT POLICY

The Sub-Fund will carry out its investment objective via an Indirect Replication as described and in compliance with the section INVESTMENT OBJECTIVES of the part I/ Investment Objectives/ Investment Powers and Restrictions of this Prospectus.

Within the limits set forth in this Prospectus and on an ancillary basis, the Sub-Fund may hold cash and cash equivalents.

The Sub-Fund will not invest more than 10% of its assets in units or shares of other UCITS. No investment will be made in any UCIs.

INVESTMENT TECHNIQUES

The maximum and expected proportions of the Sub-Fund’s assets that can be subject to SFTs and TRS are disclosed in APPENDIX E - SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS.

ELIGIBILITY OF THE SUB-FUND

Please refer to Appendix APPENDIX G – SPECIFIC INVESTMENT RATIO for information regarding the Sub-Fund and the German Investment Funds Tax Act (InvStG-E) (“**GITA**”).

TARGETED INVESTORS

The Sub-Fund is dedicated to both retail and institutional investors wishing to have an exposure

to the implicit volatility market of shares making up the S&P 500 index.

CLASSES OF SHARES AND FEES

The Sub-Fund will issue the Classes of Shares, subject to different terms and conditions described in APPENDIX C - SUMMARY OF SHARES AND FEES. Other Share Classes may be available. For a current listing of available Share Classes go to www.amundiETF.com.

DEFINITIONS

"Business Day", "Dealing Day" and "Valuation Day": Please refer to the APPENDIX H – GLOSSARY OF TERMS.

"Dealing Deadline": Please refer to the APPENDIX D – SUMMARY TABLE OF SUB-FUND'S DEALING TIMELINE.

LISTING

The Sub-Fund is a UCITS ETF. As a consequence all its Shares shall be traded throughout the day on one or several regulated market or multilateral trading facilities with at least one market maker which takes action to ensure that the stock exchange value of the Shares does not significantly vary from its iNAV (as defined above).

In the event of Suspension of the Secondary Market (as defined above in the Prospectus) the following exit charges will apply (in replacement of the maximum redemption charges stated above): 0.50% of the Net Asset Value per Share multiplied by the number of shares redeemed.

A list of these stock exchanges and/or multilateral trading facilities can be obtained from the registered office of the Company.

Additional information on the iNAV of an exchange-traded share are provided in section "Indicative Net Asset Value per Share" of the Prospectus and on the website www.amundiETF.com.

PUBLICATION OF THE NET ASSET VALUE

The Net Asset Value per Share will be available at the registered office of the Company and will be published on www.amundiETF.com.

RISKS WARNING

Among the different risks described in APPENDIX B - SPECIAL RISK CONSIDERATIONS AND RISK FACTORS, the Sub-Fund is more specifically exposed to the following risks:

Capital at Risk, Sub-Fund Liquidity Risk, Liquidity Risk on Secondary Market, Risk that the Sub-Fund's investment objective is only partially achieved, Risk of using financial derivative instruments, Counterparty Risk, Collateral Management Risk, Currency Risk, Risk related to

investments in Futures on VIX, Index Calculation Risk.

- Market risk linked to the implicit volatility of the S&P 500 index:

The Sub-Fund is fully exposed to variations in the Index. The Sub-Fund is therefore exposed to 100% of market risks relating to movements arising from the implicit volatility of the securities making up the S&P 500 index. Investors are exposed, in particular, to a downward trend in volatility over the coming years.

- Risk resulting from the roll of future contracts used by the Sub-Funds:

The Index being composed of future contracts on the Vix volatility Index, the exposure to the Index is maintained by rolling positions on such future contracts on a daily basis. Such a roll consists in transferring a position on a contract close to its maturity, before its maturity, on contracts with a later maturity. The investor is exposed to a risk resulting from the roll of these contracts. In certain market situations, this phenomenon could trigger a systematic loss when rolling these contracts on a daily basis. The spread between the Sub-Fund's performance and the underlyings performance could therefore increase progressively and negatively and have a significant impact on the Sub-Fund's performance, notably in case of long term investment made in the Sub-Fund.

SUSTAINABILITY RISKS

This Sub-Fund does not promote ESG characteristics and does not maximize portfolio alignment with Sustainability Factors, however it remains exposed to Sustainability Risks and the occurrence of such risks could cause a negative material impact on the value of the investments made by the Sub-Fund. Further information can be found in the "SUSTAINABLE INVESTING" Section of the Prospectus.

TAXONOMY REGULATION

In accordance of article 7 of the Taxonomy Regulation, the Management Company draws the attention of investors to the fact that the investments underlying this Sub-Fund do not take into account the European Union criteria for environmentally sustainable economic activities.

DISTRIBUTION OF INCOME

Please refer to the Distribution Policy section of the Prospectus.

DISCLAIMER

the Sub-Fund is neither sponsored, approved, sold nor recommended by Standard & Poor's or its subsidiaries ("S&P") nor by the Chicago Board Options Exchange Inc ("CBOE") S&P and CBOE

make no declaration or provide any condition or guarantee, explicit or implicit, to Sub-Fund shareholders or to any member of the public relating to investment opportunities in securities in general or in the particular Sub-Fund or about the ability of the S&P 500 VIX Futures Enhanced Roll Index to track the yield of certain financial markets and/or sections of them and/or groups or categories of assets. The only relationship linking S&P and CBOE to Amundi Asset Management is the granting of licences for certain registered trademarks or commercial marks and for the S&P 500 VIX Futures Enhanced Roll Index that is defined, composed and calculated by S&P, without regard for pour Amundi Asset Management or for the Sub-Fund. APPENDIX 9

MULTI UNITS LUXEMBOURG – Amundi Global Equity Quality Income

The Sub-Fund is an index-tracking UCITS passively managed.

The Reference Currency of the Sub-Fund is the Euro (EUR).

INVESTMENT OBJECTIVE

The investment objective of MULTI UNITS LUXEMBOURG - **Amundi Global Equity Quality Income** is to track the unlevered performance of the "SG Global Quality Income NTR" index (the "**Index**") denominated in Euros - while minimising the volatility of the difference between the return of the Sub-Fund and the return of the Index (the "**Tracking Error**").

For monthly hedged share classes mentioned in APPENDIX C - SUMMARY OF SHARES AND FEES, the Sub-Fund will also use a monthly currency-hedge strategy, in order to minimize the impact of the evolution of each respective share class currency against currencies of each Index component.

The anticipated level of the tracking error under normal market conditions is expected to be up to 0.50%.

THE INDEX

- **Index Objectives**

The "SG Global Quality Income NTR" index is composed of companies with attractive and sustainable dividends.

The Index is designed by Société Générale Research, according to a proprietary methodology.

The Index is calculated by Solactive A.G. and published by Stuttgart Boerse A.G.

- **Index Methodology**

The Index tracks companies with attractive and sustainable dividends recognizing that in the long run, dividends have dominated equity returns while higher risk has not provided higher rewards.

In that respect, the Index methodology defines an investment universe of non financial companies having a free float adjusted market capitalisation of at least USD 3bn from developed countries as set forth below: Australia, Austria, Belgium, Canada, Denmark, Finland, France, Germany, Greece, Hong Kong, Ireland, Israel, Italy, Japan, Luxembourg, Netherlands, New Zealand, Norway, Portugal, Singapore, Spain, Sweden,

South Korea, Switzerland, United Kingdom, United States.

Then an algorithm is applied on the above mentioned investment universe. This algorithm sets the three following filters:

- a quality score (defined as the sum of 9 criteria based on profitability, leverage and operating efficiency of the issuer, such as ROA, Cash flows, etc.) of 7 or better out of 9;
- a balance sheet risk score, measured by calculating a distance to default that ranks within the top 40% of the universe;
- an expected dividend score determined through an analyst consensus. Only stocks whose expected dividend is above the maximum of 4% and 125% of the average of the universe are kept.

The process as set out in the Index methodology is based on quantitative criteria and the sources used in the context of such process are independent, in particular the annual reports and the dividends anticipations forecast from Factset. These data are subject to a quality control in order to be included within the algorithm.

All securities that meet the three above criteria are retained in the index. They are equally weighed. The number of selected securities must be between 75 and 125. If the application of the above method leads to less than 75 selected securities, (resp. more than 125), filtering thresholds are softened (resp. hardened) until leading to 75 securities in the basket (resp. 125).

The Index was set based on 1000 as of 14 May 2012 and is rebalanced quarterly over five business days, starting on the 7th Business Day in January, April, July and October.

Additional information in the Index methodology is available on Solactive's website.

The performance tracked is the closing price of the Index.

The composition of the Index is reviewed and rebalanced on quarterly basis.

The rebalancing frequency as described above will have no impact in terms of costs in the context of the performance of the investment objective.

- **Additional Information on Index**

Additional information on the Index, its composition, calculation and rules for periodical review and rebalancing and on the general methodology behind the Index can be found on <http://www.solactive.com>.

For additional Information on the Index please refer to paragraph B "Investment made by Index Sub-

Fund” of Section I “Investment Objective / Investment Powers and Restrictions” of the main part of this Prospectus and on APPENDIX F – BENCHMARK REGULATION.

INVESTMENT POLICY

The Sub-Fund will carry out its investment objective via an Indirect Replication as described and in compliance with the section INVESTMENT OBJECTIVES of the part I/ Investment Objectives/ Investment Powers and Restrictions of this Prospectus.

Within the limits set forth in this Prospectus and on an ancillary basis, the Sub-Fund may hold cash and cash equivalents.

The Sub-Fund will not invest more than 10% of its assets in units or shares of other UCITS. No investment will be made in any UCIs.

INVESTMENT TECHNIQUES

The maximum and expected proportions of the Sub-Fund’s assets that can be subject to SFTs and TRS are disclosed in APPENDIX E - SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS.

APPENDIX 10

MULTI UNITS LUXEMBOURG – Amundi S&P Eurozone Dividend Aristocrat ESG

The Sub-Fund is an index-tracking UCITS passively managed.

This Sub-Fund promotes environmental and/or social characteristics within the meaning of article 8 of SFDR, as further described in Appendix I – ESG Related Disclosures to this Prospectus.

The Reference Currency of the Sub-Fund is the Euro (EUR).

INVESTMENT OBJECTIVE

The investment objective of MULTI UNITS LUXEMBOURG - **Amundi S&P Eurozone Dividend Aristocrat ESG** is to track the unlevered performance of the “S&P Euro ESG High Yield Dividend Aristocrats Net Total Return Index” (the “**Index**”) denominated in Euros - while minimising the volatility of the difference between the return of the Sub-Fund and the return of the Index (the “**Tracking Error**”).

For monthly hedged share classes mentioned in APPENDIX C - SUMMARY OF SHARES AND FEES, the Sub-Fund will also use a monthly currency-hedge strategy, in order to minimize the impact of the evolution of each respective share class currency against currencies of each Index Component.

The anticipated level of the tracking error under normal market conditions is expected to be up to 0.50%.

THE INDEX

- **Index Objectives**

The Index is designed to measure the performance of 40 high dividend-yielding and ESG-scoring companies from the S&P Europe BMI (the “**Parent Index**”) with an Eurozone country classification, as further described in Appendix I – ESG Related Disclosures to this Prospectus. The Parent Index is representative of the European equity market.

- **Index Methodology**

The Index is a net total return index. A net total return index calculates the performance of the index constituents on the basis that any dividends or distributions are included in the index returns after withholding tax retention.

The complete methodology for the Index (including maintenance and rebalancing of the Index) is available for consultation on S&P website: <http://www.spglobal.com>.

The Index is rebalanced on an annual basis after the close of the third Friday in June.

The rebalancing frequency as described above will have no impact in terms of costs in the context of the performance of the investment objective.

- **Additional Information on Index**

Additional information on the Index, its composition, calculation and rules for periodical review and rebalancing and on the index provider’s website: <http://www.spglobal.com>.

For additional information on the Index please refer to paragraph B “Investment made by Index Sub-Fund” of Section I “Investment Objective / Investment Powers and Restrictions” of the main part of this Prospectus and on APPENDIX F – BENCHMARK REGULATION.

INVESTMENT POLICY

The Sub-Fund will carry out its investment objective via a Direct Replication as described and in compliance with the section INVESTMENT OBJECTIVES of the part I/ Investment Objectives/ Investment Powers and Restrictions of this Prospectus.

Within the limits set forth in this Prospectus and on an ancillary basis, the Sub-Fund may hold cash and cash equivalents.

The Sub-Fund will not invest more than 10% of its assets in units or shares of other UCITS. No investment will be made in any UCIs.

The Sub-Fund integrates Sustainability Risks and takes into account principal adverse impacts of investments on Sustainability Factors in its investment process as outlined in more detail in section “Sustainable Investing” of this Prospectus and will not hold any securities of companies involved in the production or sale of controversial weapons, or companies in breach of international conventions on Human or Labor Rights, or companies involved in controversial industries: tobacco, Thermal coal, nuclear weapons or unconventional oil & gas as defined in section I “Investment Objectives/ Investment Powers and Restrictions”.

More information on environmental and/or social characteristics can be found in Appendix I - ESG Related Disclosures to this Prospectus.

INVESTMENT TECHNIQUES

The maximum and expected proportions of the Sub-Fund’s assets that can be subject to SFTs and TRS are disclosed in APPENDIX E - SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS.

ELIGIBILITY OF THE SUB-FUND

Please refer to Appendix APPENDIX G – SPECIFIC INVESTMENT RATIO for information regarding the Sub-Fund and the German Investment Funds Tax Act (InvStG-E) (“GITA”).

TARGETED INVESTORS

The Sub-Fund is dedicated to both retail and institutional investors wishing to have an exposure to performance of stocks across the Eurozone market, issued by high dividend-yielding companies with robust Environmental, Social and Governance (ESG) score.

CLASSES OF SHARES AND FEES

The Sub-Fund will issue the Classes of Shares, subject to different terms and conditions described in APPENDIX C - SUMMARY OF SHARES AND FEES. Other Share Classes may be available. For a current listing of available Share Classes go to www.amundiETF.com.

DEFINITIONS

“Business Day”, “Dealing Day” and “Valuation Day”: Please refer to the APPENDIX H – GLOSSARY OF TERMS.

“Dealing Deadline”: Please refer to the APPENDIX D – SUMMARY TABLE OF SUB-FUND’S DEALING TIMELINE.

LISTING

The Sub-Fund is a UCITS ETF. As a consequence all its Shares shall be traded throughout the day on one or several regulated market or multilateral trading facilities with at least one market maker which takes action to ensure that the stock exchange value of the Shares does not significantly vary from its iNAV (as defined above).

PUBLICATION OF THE NET ASSET VALUE

The Net Asset Value per Share will be available at the registered office of the Company and will be published on www.amundiETF.com.

RISKS WARNING

Among the different risks described in APPENDIX B - SPECIAL RISK CONSIDERATIONS AND RISK FACTORS, the Sub-Fund is more specifically exposed to the following risks:

Equity Risk, Capital at Risk, Sub-Fund Liquidity Risk, Liquidity Risk on Secondary Market, Risk that the Sub-Fund’s investment objective is only partially achieved, Risk of using financial derivative instruments, Risks linked to Sampling and Optimization techniques, Risk linked to Securities Lending, Counterparty Risk, Collateral Management Risk, Currency Risk, Class Currency Hedge Risk, Market Risk linked to a controversy, Risk linked to ESG Methodologies, Risk related to ESG Score computation, Index Calculation Risk.

SUSTAINABILITY RISKS

In managing the Sustainability Risks of this Sub-Fund, the Management Company relies on S&P Dow Jones Indices as the administrator of the Index, which identifies and integrates relevant and significant Sustainable Risks in its S&P DJI ESG Score methodology. Such integration has therefore a direct impact on the investment universe of the Index. However, no insurance can be given that Sustainability Risks will be totally removed and the occurrence of such risks could cause a negative material impact on the value of the assets comprising the Index tracked or reflected by the Sub-Fund.

For further information on S&P DJI ESG Score methodology, please refer to: <http://www.spglobal.com>. Further information can also be found in the “SUSTAINABLE INVESTING” Section of the Prospectus.

DISTRIBUTION OF INCOME

Please refer to the Distribution Policy section of the Prospectus.

DISCLAIMER

The Sub-Fund is neither sponsored, approved, sold nor recommended by Standard & Poor’s or its subsidiaries (“S&P”). S&P makes no declaration or provide any condition or guarantee, explicit or implicit, to Sub-Fund shareholders or to any member of the public relating to investment opportunities in securities in general or in the particular Sub-Fund or about the ability of the S&P Euro ESG High Yield Dividend Aristocrats Net Total Return Index to track the yield of certain financial markets and/or sections of them and/or groups or categories of

assets. The only relationship linking S&P to Amundi Asset Management is the granting of licences for certain registered trademarks or commercial marks and for the S&P Euro ESG High Yield Dividend Aristocrats Net Total Return Index that is defined, composed and calculated by S&P, without regard for Amundi Asset Management or for the Sub-Fund. S&P is not obliged to take account of the needs of Amundi Asset Management or the Sub-Fund shareholders when defining the composition of or calculating the S&P Euro ESG High Yield Dividend Aristocrats Net Total Return Index. S&P is not responsible and has not been party to the definition of prices and amounts in the Sub-Fund or the schedule for issuing or selling the Sub-Funds or in defining or calculating the equation for converting shares in the Sub-Funds into liquid assets. S&P has no obligations or responsibilities in terms of the administration, marketing or commercialisation of the Sub-Fund.

S&P does not guarantee the accuracy and/or comprehensiveness of S&P Euro ESG High Yield Dividend Aristocrats Net Total Return Index or any data in it and will not be responsible for any error, omission or interruption relating to it. S&P makes no declaration or provides no conditions or guarantees, explicit or implicit, relating to the results that will be obtained by Amundi Asset Management, Sub-Fund shareholders or any other person or entity using the S&P Euro ESG High Yield Dividend Aristocrats Net Total Return Index or any data in it. S&P makes no declaration or gives any condition or guarantee, explicit or implicit, and expressly denies any guarantee, market quality conditions or aptitude for an objective or specific use and any other guarantee or condition, explicit or implicit, relating to the S&P Euro ESG High Yield Dividend Aristocrats Net Total Return Index or any data in it. Without limiting what precedes, S&P will not be responsible for any special, punitive, indirect or consequent damage (including loss of profits) resulting from using the S&P Euro ESG High Yield Dividend Aristocrats Net Total Return Index or any other data in it, even if it was warned of the possibility that the said damage may occur.

APPENDIX 11

MULTI UNITS LUXEMBOURG – Amundi MSCI Pacific Ex Japan

The Sub-Fund is an index-tracking UCITS passively managed.

The Reference Currency of the Sub-Fund is the US Dollar (USD).

INVESTMENT OBJECTIVE

The investment objective of MULTI UNITS LUXEMBOURG - **Amundi MSCI Pacific Ex Japan** is to track both the upward and the downward evolution of the MSCI Pacific ex Japan Index – Net Total Return (the "**Index**") denominated in US Dollars - while minimising the volatility of the difference between the return of the Sub-Fund and the return of the Index (the "**Tracking Error**").

The anticipated level of the tracking error under normal market conditions is expected to be up to 0.50%.

THE INDEX

- **Index Objectives**

The Index captures large and mid cap representation across 4 of 5 Developed Markets countries in the Pacific region, excluding Japan. With 147 constituents as of January 30th 2015, the Index covers approximately 85% of the free float-adjusted market capitalization in each of the following countries: Australia, Hong Kong, New Zealand and Singapore.

- **Index Methodology**

The Index is a free float market capitalisation-weighted index which measures the performance of the large and mid cap segments of the Australia, Hong Kong, New Zealand and Singapore markets.

The Index is based on the MSCI Global Investable Market Indices (GIMI) Methodology, a comprehensive and consistent approach to index construction that allows for meaningful global views and cross regional comparisons across all market capitalization size, sector and style segments and combinations.

This methodology aims to provide exhaustive coverage of the relevant investment opportunity set with a strong emphasis on index liquidity, investability and replicability. These criteria are based upon Annual Traded Value Ratio (ATVR), added to 3-month Frequency of trading.

The composition of the Index is reviewed and rebalanced on quarterly basis (in February, May, August and November).

The Index is a Net Total Return index. A Net Total Return index calculates the performance of the index constituents on the basis that any dividends or distributions are included in the index returns.

The complete methodology for the Index (including maintenance and rebalancing of the Index) is available for consultation on the MSCI web site: www.msci.com.

The rebalancing frequency as described above will have no impact in terms of costs in the context of the performance of the investment objective.

- **Additional Information on Index**

Additional information on the Index, its composition, calculation and rules for periodical review and rebalancing and on the general methodology behind the Index can be found on www.msci.com.

For additional Information on the Index please refer to paragraph B "Investment made by Index Sub-Fund" of Section I "Investment Objective / Investment Powers and Restrictions" of the main part of this Prospectus and on APPENDIX F – BENCHMARK REGULATION.

INVESTMENT POLICY

APPENDIX 12**MULTI UNITS LUXEMBOURG – Amundi Fed Funds US Dollar Cash**

The Sub-Fund is an index-tracking UCITS passively managed.

The Reference Currency of the Sub-Fund is the US Dollar (USD).

INVESTMENT OBJECTIVE

The investment objective of MULTI UNITS LUXEMBOURG - **Amundi Fed Funds US Dollar Cash** is to reflect the performance of the “Solactive Fed Funds Effective Rate Total Return index” denominated in US Dollars (the “**Benchmark Index**”).

For monthly hedged share classes mentioned in APPENDIX C - SUMMARY OF SHARES AND FEES, the Sub-Fund will also use a monthly currency-hedge strategy, in order to minimize the impact of the evolution of each respective share class currency against currencies of each Index Component.

The anticipated level of the tracking error under normal market conditions is expected to be up to 0.02%.

THE BENCHMARK INDEX

- **Benchmark Index Objectives**

The Benchmark Index is representative of the performance of a cash notional deposit paying the federal funds effective rate, which is the US short term reference rate for monetary market, with daily reinvestment of interests earned in the deposit.

- **Benchmark Index Methodology**

The federal funds rate is the interest rate at which depository institutions in the United States can lend cash to each other overnight. The rate level is computed by the Federal Open Market Committee. The federal funds effective rate is the weighted average of the federal funds rate across all transactions.

The federal funds effective rate is calculated on each United States business day.

The Benchmark Index reflects the performance of a cash deposit paying the federal funds effective rate, which is the US short term reference rate for monetary market, by daily reinvesting the interests earned in the deposit.

The Benchmark Index methodology allows the reintegration of non-business days in the interest rate calculation, as per a formula based on the last federal fund effective rate available.

Since the Benchmark Index is based upon the federal funds effective rate, it won't be periodically revised.

- **Additional Information on Benchmark Index**

Additional information on the Benchmark Index, its composition, calculation and rules for periodical review and rebalancing and on the general methodology behind the Benchmark Index can be found on www.solactive.com.

For additional Information on the Index please refer to paragraph B “Investment made by Index Sub-Fund” of Section I “Investment Objective / Investment Powers and Restrictions” of the main part of this Prospectus and on APPENDIX F – BENCHMARK REGULATION.

Nor does the Licensor offer any express or implicit guarantee or assurance either with regard to the results of using the Benchmark Index and/or Index trade mark or the Benchmark Index Price, at any time or in any other respect.

The Benchmark Index is calculated and published by the Licensor. The Licensor uses its best efforts to ensure that the Benchmark Index is calculated correctly. Irrespective of its obligations towards the Issuer, the Licensor has no obligation to point out errors in the Benchmark Index to third parties including, but not limited to, investors and/or financial intermediaries of the Sub-Fund. The Licensor does not guarantee the accuracy and/or the completeness of the Benchmark Index or any related data, and shall not have any liability for any errors, omissions or interruptions therein.

Neither publication of the Benchmark Index by the Licensor, nor the licensing of the Benchmark Index or Index trade mark, for the purpose of use in connection with the Sub-Fund, constitutes a recommendation by the Licensor to invest capital in said Financial instrument nor does it, in any way, represent an assurance or opinion of the Licensor with regard to any investment in this Sub-Fund. In not event shall the Licensor have any liability for any lost profits or indirect, punitive, special or consequential damages or losses, even if notified of the possibility thereof.

APPENDIX 13

MULTI UNITS LUXEMBOURG – Amundi Pan Africa

The Sub-Fund is an index-tracking UCITS passively managed.

The Reference Currency of the Sub-Fund is the Euro (EUR).

INVESTMENT OBJECTIVE

The investment objective of MULTI UNITS LUXEMBOURG - **Amundi Pan Africa** is to track both the upward and the downward evolution of the "SGI Pan Africa Net Total Return Index" (the "**Index**") denominated in Euro in order to offer an exposure to the African equities market or to companies whose main activity is on the African continent – while minimising the volatility of the difference between the return of the Sub-Fund and the return of the Index (the "**Tracking Error**").

The anticipated level of the tracking error under normal market conditions is expected to be up to 2%.

THE INDEX

- **Index Objectives**

The Index is composed of the stocks of companies listed on African stock exchanges or which do most of their business in Africa.

- **Index Methodology**

From a geographic perspective, the Index is composed of:

- one third South African shares;
- one third shares in companies listed or having their main activity in northern Africa;
- one third shares in companies whose main activity is in sub-Saharan Africa, excluding South Africa.

In each of these three regions, the ten largest companies by market capitalization were selected for the Index, while also taking their liquidity into consideration. No region may account for less than 25% and more than 50% of the Index's total capitalization.

No stock may account for more than 10% of the Index.

The initial listing exchanges of the Index stocks are: Johannesburg (South Africa), Cairo (Egypt), Casablanca (Morocco), London (United

Kingdom), Toronto (Canada) and New York (United States).

The composition of the Index is reviewed and rebalanced each quarter.

The Index is a net total return index. A net total return index calculates the performance of the index constituents on the basis that any dividends or distributions are included in the index returns.

The Index is calculated by Standard & Poor's.

The complete methodology for the Index (including maintenance and rebalancing of the Index) is available for consultation on the following web site: <http://www.sgindex.com>.

The rebalancing frequency as described above will have no impact in terms of costs in the context of the performance of the investment objective.

APPENDIX 14

MULTI UNITS LUXEMBOURG – Amundi Euro Government Bond 5-7Y

The Sub-Fund is an index-tracking UCITS passively managed.

The Reference Currency of the Sub-Fund is the Euro (EUR).

INVESTMENT OBJECTIVE

The investment objective of MULTI UNITS LUXEMBOURG - **Amundi Euro Government Bond 5-7Y** is to reflect the performance of the Bloomberg Barclays Euro Treasury 50bn 5-7 Year Bond Index (the “**Benchmark Index**”) denominated in Euros, while minimizing the volatility of the difference between the return of the Sub-Fund and the return of the Benchmark Index (the “**Tracking Error**”).

For Monthly Hedged share classes mentioned in APPENDIX C - SUMMARY OF SHARES AND FEES, the Sub-Fund will also use a monthly currency hedging strategy aiming at reducing the impact of a change in the share class currency against the currency of the index constituents.

The anticipated level of the tracking error under normal market conditions is expected to be up to 0.10%.

THE BENCHMARK INDEX

- **Benchmark Index Objectives**

The Bloomberg Barclays Euro Treasury 50bn 5-7 Year Bond Index offers exposure to fixed-rate, investment grade public obligations issued by sovereign countries participating in the European Monetary Union. This index contains euro-denominated bonds with a maturity between five and up to (but not including) seven years.

- **Benchmark Index Methodology**

The Benchmark Index is a bond index, calculated, maintained and published by Bloomberg Barclays.

The Bloomberg Barclays Euro Treasury 50bn 5-7 Year Bond Index measures the performance of the Eurozone government investment grade bond market. Only bonds denominated in euros and with a maturity between five and up to (but not including) seven years are included.

The Benchmark Index is a total return index. A total return index calculates the performance of the index constituents on the basis that any dividends or distributions are included in the index returns.

The composition of the Benchmark Index is reviewed and rebalanced monthly.

The rebalancing frequency as described above will have an impact in terms of costs in the context of the performance of the investment objective. Particular costs incurred as a result of such rebalancing of the Benchmark Index include additional transaction costs.

The performance tracked is that of the Benchmark Index’s closing price.

A full description of the Benchmark Index and its construction methodology and information on the composition and respective weightings of the Benchmark Index components are available on the index provider’s website at <https://www.bloomberg.com/professional/product/indices/bloomberg-barclays-indices>.

- **Additional Information on Benchmark Index**

Additional information on the Benchmark Index, its composition, calculation and rules for periodical review and rebalancing and on the general methodology behind the Benchmark Index can be found on the Internet at <https://www.bloomberg.com/professional/product/indices/bloomberg-barclays-indices>.

For additional Information on the Index please refer to paragraph B “Investment made by Index Sub-Fund” of Section I “Investment Objective / Investment Powers and Restrictions” of the main part of this Prospectus and on APPENDIX F – BENCHMARK REGULATION.

INVESTMENT POLICY

The Sub-Fund will carry out its investment objective via a Direct Replication as described and in compliance with the section INVESTMENT OBJECTIVES of the part I/ Investment Objectives/ Investment Powers and Restrictions of this Prospectus.

Within the limits set forth in this Prospectus and on an ancillary basis, the Sub-Fund may hold cash and cash equivalents.

The Sub-Fund will not invest more than 10% of its assets in units or shares of other UCITS. No investment will be made in any UCIs.

INVESTMENT TECHNIQUES

The maximum and expected proportions of the Sub-Fund’s assets that can be subject to SFTs and TRS are disclosed in APPENDIX E - SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS.

The Sub-Fund intends to use from time to time securities lending transactions for one or more of

the following specific aims: (i) reduction of risk; (ii) reduction of cost; or (iii) generation of additional capital or income for the UCITS with a level of risk which is consistent with the risk profile of the UCITS and the risk diversification rules laid down in Article 52 of Directive 2009/65/EC of the European Parliament and of the Council of 13 July 2009 on the coordination of laws, regulations and administrative provisions relating to undertakings for collective investment in transferable securities.

APPENDIX 17

MULTI UNITS LUXEMBOURG – Amundi Euro Highest Rated Macro-Weighted Government Bond

The Sub-Fund is an index-tracking UCITS passively managed.

The Reference Currency of the Sub-Fund is the Euro (EUR).

INVESTMENT OBJECTIVE

The investment objective of MULTI UNITS LUXEMBOURG - **Amundi Euro Highest Rated Macro-Weighted Government Bond** is to reflect the performance of the “FTSE MTS Highest Rated Macro-Weighted Government Bond (Mid Price) Index” (the “**Benchmark Index**”) denominated in Euros.

The anticipated level of the tracking error under normal market conditions is expected to be up to 0.30%.

THE BENCHMARK INDEX

- **Benchmark Index Objectives**

The Benchmark Index is representative of the performance of the bonds issued by the governments of Eurozone Member States that meet FTSE MTS eligibility criteria.

- **Benchmark Index Methodology**

The Benchmark Index is composed of bonds issued by the governments of Eurozone Member States that have the highest credit ratings (“AAA” or equivalent by at least two of the three ratings agencies S&P, Moody’s and Fitch). They are weighted in the Index on the basis of macroeconomic indicators.

The Benchmark Index comprises a minimum of five issuers. If an issuer is downgraded, it will be replaced with another eligible issuer country, such that at least five issuers are maintained in the Index.

Index securities are therefore among the highest rated Eurozone sovereign bonds.

The Benchmark Index eligible universe is composed of bonds that meet the following criteria:

- principal and coupons must be denominated in Euro, with no embedded options or convertibility;
- traded on the FTSE MTS platform;

- issued by the sovereign government of an Eurozone Member State having least two AAA ratings out of three from the rating agencies S&P, Moody’s and Fitch and selected by FTSE MTS;
- at least 2 billion Euros of issuance outstanding;
- maturity be at least more than one year.

The composition of the Benchmark Index is reviewed and rebalanced each month.

The Benchmark Index is a net total return index. A net total return index calculates the performance of the index constituents on the basis that any dividends or distributions are included in the index returns.

The complete methodology for the Benchmark Index (including maintenance and rebalancing of the Benchmark Index) is available for consultation on the following web site: <http://www.ftse.com>.

- **Additional Information on Benchmark Index**

Additional information on the Benchmark Index, its composition, calculation and rules for periodical review and rebalancing and on the general methodology behind the Benchmark Index can be found on <http://www.ftse.com>.

For additional Information on the Index please refer to paragraph B “Investment made by Index Sub-Fund” of Section I “Investment Objective / Investment Powers and Restrictions” of the main part of this Prospectus and on APPENDIX F – BENCHMARK REGULATION.

INVESTMENT POLICY

The Sub-Fund will carry out its investment objective via a Direct Replication as described and in compliance with the section INVESTMENT OBJECTIVES of the part I/ Investment Objectives/ Investment Powers and Restrictions of this Prospectus.

Within the limits set forth in this Prospectus and on an ancillary basis, the Sub-Fund may hold cash and cash equivalents.

The Sub-Fund will not invest more than 10% of its assets in units or shares of other UCITS. No investment will be made in any UCIs.

INVESTMENT TECHNIQUES

The maximum and expected proportions of the Sub-Fund’s assets that can be subject to SFTs and TRS are disclosed in APPENDIX E - SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS.

The Sub-Fund intends to use from time to time securities lending transactions for one or more of the following specific aims: (i) reduction of risk;

(ii) reduction of cost; or (iii) generation of additional capital or income for the UCITS with a level of risk which is consistent with the risk profile of the UCITS and the risk diversification rules laid down in Article 52 of Directive 2009/65/EC of the European Parliament and of the Council of 13 July 2009 on the coordination of laws, regulations and administrative provisions relating to undertakings for collective investment in transferable securities.

APPENDIX 18

MULTI UNITS LUXEMBOURG – Amundi S&P 500 Daily (-2x) Inverse

The Sub-Fund is an index-tracking UCITS passively managed.

The Reference Currency of the Sub-Fund is the US Dollar (USD).

INVESTMENT OBJECTIVE

The investment objective of MULTI UNITS LUXEMBOURG - Amundi S&P 500 Daily (-2x) Inverse (the "Sub-Fund") is to track both the upward and the downward evolution of the "S&P 500[®] 2X Inverse Daily Index" (the "Index") denominated in US Dollars, in order to offer an inverse exposure with daily 2x leverage, to the performance of the United States equity market – while minimising the volatility of the difference between the return of the Sub-Fund and the return of the Index (the "Tracking Error").

The anticipated level of the tracking error under normal market conditions is expected to be up to 1%.

THE INDEX

- **Index Objectives**

The Index provides two times the inverse performance of the S&P 500[®] Index (the "Parent Index") and represents a short position in this Parent Index. The S&P 500 is a free-float capitalization-weighted index, published since 1957, of the prices of 500 large-cap common stocks and is designed to reflect the U.S. equity markets and, through the markets, the U.S. economy. The stocks included in the S&P 500 are those of U.S. companies that trade on one of the eligible NYSE and NASDAQ segments.

The Index includes an adjustment to reflect the interest earned on both the initial investment and the proceeds from selling short the securities in the Parent Index.

The complete construction of the index is available on www.standardandpoors.com.

- **Index Methodology**

The Parent Index includes 500 leading companies among U.S. companies. The stocks are selected on the basis of their domicile, market capitalization, public float financial viability and liquidity. The composition of the Index is revised in conjunction with that of the Parent Index.

The S&P Index Committee follows a set of published guidelines for maintaining the index. Complete details of these guidelines, including

the criteria for index additions and removals, policy statements, and research papers are available on the Web site at:

www.indices.standardandpoors.com.

The composition of the Index is reviewed and rebalanced on quarterly basis, or, in limited circumstances as further described in the published guidelines mentioned above, at an earlier date as decided by the Index sponsor.

The rebalancing frequency as described above will have no impact in terms of costs in the context of the performance of the investment objective.

The Index's daily performance is double the daily inverse performance of the Parent Index, including dividends and price movements plus the cumulative interest (at the overnight LIBOR rate) paid daily on three times the Parent Index's closing value. The Index does not include the cost of short selling the securities that underlie the Parent Index. The leverage factor used in the Index calculation formula is reset daily.

- **Additional Information on Index**

Additional information on the Index, its composition, calculation and rules for periodical review and rebalancing and on the general methodology behind the Index can be found on www.standardandpoors.com.

For additional Information on the Index please refer to paragraph B "Investment made by Index Sub-Fund" of Section I "Investment Objective / Investment Powers and Restrictions" of the main part of this Prospectus and on APPENDIX F – BENCHMARK REGULATION.

INVESTMENT POLICY

The Sub-Fund will carry out its investment objective via an Indirect Replication as described and in compliance with the section INVESTMENT OBJECTIVES of the part I/ Investment Objectives/ Investment Powers and Restrictions of this Prospectus.

Within the limits set forth in this Prospectus and on an ancillary basis, the Sub-Fund may hold cash and cash equivalents.

The Sub-Fund will not invest more than 10% of its assets in units or shares of other UCITS. No investment will be made in any UCIs.

INVESTMENT TECHNIQUES

The maximum and expected proportions of the Sub-Fund's assets that can be subject to SFTs and TRS are disclosed in APPENDIX E - SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS.

ELIGIBILITY OF THE SUB-FUND

The Sub-Fund is eligible to the French equity savings plans (PEA) which means that the Sub-Fund invests at least 75% of its assets in a diversified portfolio of equities issued by an issuer incorporated either in European Union member state or in a member state of the European Economic Area.

Please refer to Appendix APPENDIX G – SPECIFIC INVESTMENT RATIO for information regarding the Sub-Fund and the German Investment Funds Tax Act (InvStG-E) (“GITA”).

TARGETED INVESTORS

The Sub-Fund is dedicated to both retail and institutional investors wishing to have an inverse exposure with daily 2x leverage, to the performance of the United States equity market.

CLASSES OF SHARES AND FEES

The Sub-Fund will issue the Classes of Shares, subject to different terms and conditions described in APPENDIX C - SUMMARY OF SHARES AND FEES. Other Share Classes may be available. For a current listing of available Share Classes go to www.amundiETF.com.

DEFINITIONS

“Business Day”, “Dealing Day” and “Valuation Day”: Please refer to the APPENDIX H – GLOSSARY OF TERMS.

“Dealing Deadline”: Please refer to the APPENDIX D – SUMMARY TABLE OF SUB-FUND’S DEALING TIMELINE.

LISTING

The Sub-Fund is a UCITS ETF. As a consequence all its Shares shall be traded throughout the day on one or several regulated market or multilateral trading facilities with at least one market maker which takes action to ensure that the stock exchange value of the Shares does not significantly vary from its iNAV (as defined above).

In the event of Suspension of the Secondary Market (as defined above in the Prospectus) the following exit charges will apply (in replacement of the maximum redemption charges stated above): 1% of the Net Asset Value per Share multiplied by the number of shares redeemed. A list of these stock exchanges and/or multilateral trading facilities can be obtained from the registered office of the Company.

Information on the iNAV of an exchange-traded share are also provided in section “Indicative Net Asset Value per Share” of the main part of the

Prospectus and on the website www.amundiETF.com.

PUBLICATION OF THE NET ASSET VALUE

The Net Asset Value per Share will be available at the registered office of the Company and will be published on www.amundiETF.com.

RISKS WARNING

Among the different risks described in APPENDIX B - SPECIAL RISK CONSIDERATIONS AND RISK FACTORS, the Sub-Fund is more specifically exposed to the following risks:

Equity Risk, Capital at Risk, Leverage Risk, Sub-Fund Liquidity Risk, Liquidity Risk on Secondary Market, Risk that the Sub-Fund’s investment objective is only partially achieved, Risk of using financial derivative instruments, Counterparty Risk, Collateral Management Risk, Currency Risk, Index Calculation Risk.

The Sub-Fund is also exposed to the following risk:

- Daily Reverse Leverage Risk

Investors are inversely exposed to two times the daily changes in price or level of the Parent Index. In particular any increase of the underlying market will be amplified and imply a larger decrease in the Sub-Fund’s net asset value. The daily reset in the underlying 'double short' index formula implies that the Index performance will not be equivalent to two times the inverse performance of the Parent Index exposure for holding periods greater than one trading day. This effect will increase when Parent Index volatility increase.

For example, if the Parent index is subject to a decrease of 5% over two consecutive trading days, the Index will result in a total increase of 21% (before relevant fees) while the Parent Index will result in a decrease of 9.75% over the same period: the lever is higher than two. In other cases, the lever could be lower than two.

If the Parent Index is subject to an increase of 10% on day one followed by a decrease of 5% day two, the Index will be subject to a total decrease of 12% over the 2 trading days (before relevant fees) while the Parent Index will be subject to an increase of 4.5% over the same period: compared to the first example, the volatility is higher, the lever is also higher.

The Index value may even falls although the Parent index falls over this period. If the Parent Index is subject to a decrease of 10% on day one followed by an increase of 10% day two, the Index will be subject to a total decrease of 4% over the 2 trading days (before relevant fees)

while the Parent Index will be subject to an decrease of 1% over the same period.

SUSTAINABILITY RISKS

This Sub-Fund does not promote ESG characteristics and does not maximize portfolio alignment with Sustainability Factors, however it remains exposed to Sustainability Risks and the occurrence of such risks could cause a negative material impact on the value of the investments made by the Sub-Fund. Further information can be found in the "SUSTAINABLE INVESTING" Section of the Prospectus.

TAXONOMY REGULATION

In accordance of article 7 of the Taxonomy Regulation, the Management Company draws the attention of investors to the fact that the investments underlying this Sub-Fund do not take into account the European Union criteria for environmentally sustainable economic activities.

DISTRIBUTION OF INCOME

Please refer to the Distribution Policy section of the Prospectus.

DISCLAIMER

The Sub-Fund is not sponsored, endorsed, sold or promoted by Standard & Poor's and its affiliates ("S&P"). S&P makes no representation, condition or warranty, express or implied, to the owners of the fund or any member of the public regarding the advisability of investing in securities generally or in the fund particularly or the ability of the Index to track the performance of certain financial markets and/or sections thereof and/or of groups of assets or asset classes. S&P's only relationship to Amundi Asset Management is the licensing of certain trademarks and trade names and of the Index which is determined, composed and calculated by S&P without regard to Amundi Asset Management or the fund. S&P has no obligation to take the needs of Amundi Asset Management or the owners of the fund into consideration in determining, composing or calculating the Index. S&P is not responsible for and has not participated in the determination of the prices and amount of the fund or the timing of the issuance or sale of the fund or in the determination or calculation of the equation by which the fund shares are to be converted into cash. S&P has no obligation or liability in connection with the administration, marketing, or trading of the fund.

S&P does not guarantee the accuracy and/or the completeness of the Index or any data included therein and S&P shall have no liability for any errors, omissions, or interruptions therein. S&P makes no warranty, condition or representation, express or implied, as to results to be obtained by Amundi Asset Management, owners of the

fund, or any other person or entity from the use of the Index or any data included therein. S&P makes no express or implied warranties, representations or conditions, and expressly disclaims all warranties or conditions of merchantability or fitness for a particular purpose or use and any other express or implied warranty or condition with respect to the Index or any data included therein. without limiting any of the foregoing, in no event shall S&P have any liability for any special, punitive, indirect, or consequential damages (including lost profits) resulting from the use of the Index or any data included therein, even if notified of the possibility of such damages.

APPENDIX 19

MULTI UNITS LUXEMBOURG – Amundi Euro Inflation Expectations 2-10Y

The Sub-Fund is an index-tracking UCITS passively managed.

The Reference Currency of the Sub-Fund is the Euro (EUR).

INVESTMENT OBJECTIVE

The investment objective of MULTI UNITS LUXEMBOURG - **Amundi Euro Inflation Expectations 2-10Y** is to reflect the performance of the “Markit iBoxx EUR Breakeven Euro-Inflation France & Germany Index” (the “**Benchmark Index**”) denominated in Euros, in order to offer an exposure to a long position in inflation-linked bonds issued by France and Germany and a short position in French and German sovereign bonds with adjacent durations.

For monthly hedged share classes mentioned in APPENDIX C - SUMMARY OF SHARES AND FEES, the Sub-Fund will also use a monthly currency-hedge strategy, in order to minimize the impact of the evolution of each respective share class currency against currencies of each Index component.

The anticipated level of the tracking error under normal market conditions is expected to be up to 0.50%.

THE BENCHMARK INDEX

- **Benchmark Index Objectives**

The Benchmark Index is representative of the performance of a long position in inflation-linked bonds (the “**ILB**”) issued by France and Germany and a short position in France and Germany sovereign bonds with adjacent durations.

The difference in yield (or “spread”) between these bonds is commonly referred to as a “breakeven rate of inflation” (BEI) and is considered to be a measure of the market’s expectations for inflation over a specified period of time.

- **Benchmark Index Methodology**

The Benchmark Index is designed to provide exposure to changes in inflation expectation priced by the market by entering into a long position in ILB issued by France and Germany and a short position in French and German sovereign bonds with adjacent durations.

The combination of long and short positions removes the noise related to duration of fixed

income securities, allowing for exposure, mainly but not limited to: changes in the market’s expectations for inflation.

The bonds will have the following characteristics:

Bonds issued in priority by France and Germany with a minimum outstanding amount of EUR 5 billion.

Base inflation index for the ILB is the Harmonised Index of Consumer Price.

Bonds maturity between 2 and 10 years.

Exposure to any ILB within the inflation-linked bonds portion and to any nominal sovereign bond within the nominal sovereign bonds portion cannot exceed 30% at any rebalancing date. In addition, the Benchmark Index must contain at least six ILB and at least six nominal sovereign bonds, at any time.

The bond characteristics as described above may not enable such diversification constraints to be complied with. In such circumstances, some of these characteristics may be relaxed, as further detailed in the complete methodology for the Benchmark Index, which can be found on the following website: www.markit.com/product/indices.

The daily Benchmark Index performance will not be the daily change of the breakeven inflation (“BEI”), nor a multiplier of the daily change but the daily over performance of the long inflation linked basket versus the short nominal basket, which is in theory correlated to the changes in the inflation expected by the market at the bonds maturity, represented by the breakeven inflation for such maturity.

In theory, an increase in the x years inflation expectation shall lead to a relative decrease of the price of the nominal bond with x years maturity versus the price of the equivalent inflation-linked bond and thus an increase in the performance of a long position in the inflation linked bond and a short position in the nominal bond. The Benchmark Index being composed of a long position in several inflation linked bonds and a short position in several nominal bonds with several maturities, the Benchmark Index performance will be linked to the weighted average inflation expectations at the maturities corresponding to the bonds comprising the basket. In addition, (i) price movements due to supply and demand discrepancies between inflation linked bonds and corresponding nominal bonds, (ii) transactions costs applicable to the Benchmark Index components, and (iii) seasonality cycles and potential negative carry positions due to seasonality (see the specific risk factor hereafter) will lead to deviations between the Benchmark Index performance and inflation expectations.

Please also note that the Benchmark Index is not designed to measure the realized rate of inflation, nor does it seek to replicate the returns of any index or measure of actual consumer price levels. However, on short periods realized inflation will have an impact on the performance of the Benchmark Index, typically when realized inflation over a period of time differs from market expectation during the same period.

The composition of the Benchmark Index is reviewed and rebalanced each month.

The Benchmark Index is a net total return index. A net total return index calculates the performance of the index constituents on the basis that any coupons or distributions are included in the index returns.

The complete methodology for the Benchmark Index (including maintenance and rebalancing of the Benchmark Index) is available for consultation on the following web site: www.markit.com/product/indices.

- **Additional Information on Benchmark Index**

Additional information on the Benchmark Index, its composition, calculation and rules for periodical review and rebalancing and on the general methodology behind the Benchmark Index can be found on www.markit.com/product/indices.

For additional Information on the Index please refer to paragraph B "Investment made by Index Sub-Fund" of Section I "Investment Objective / Investment Powers and Restrictions" of the main part of this Prospectus and on APPENDIX F – BENCHMARK REGULATION.

INVESTMENT POLICY

The Sub-Fund will carry out its investment objective via an Indirect Replication as described and in compliance with the section INVESTMENT OBJECTIVES of the part I/ Investment Objectives/ Investment Powers and Restrictions of this Prospectus.

Within the limits set forth in this Prospectus and on an ancillary basis, the Sub-Fund may hold cash and cash equivalents.

The Sub-Fund will not invest more than 10% of its assets in units or shares of other UCITS. No investment will be made in any UCIs.

INVESTMENT TECHNIQUES

The maximum and expected proportions of the Sub-Fund's assets that can be subject to SFTs and TRS are disclosed in APPENDIX E -

SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS.

DISCLAIMER

The Benchmark Index referred to here is the property of Markit Indices Limited (the "Index Sponsor") and it is used under license for the Sub-Fund.

The parties agree that the Index Sponsor does not approve, endorse or recommend the Sub-Fund.

Under no circumstances does the Index Sponsor provide any guarantee - whether explicit or implicit (including but not limited to the commercial value or appropriateness for any specific use or utilisation) - pertaining to the Benchmark Index or any data included in or linked to the Benchmark Index and, in particular, declines any guarantee relating to the quality, accuracy and/or exhaustiveness of the Benchmark Index or the data included in or linked to the Benchmark Index, or the results obtained from use of the Benchmark Index and/or the composition of the Benchmark Index at a given date or moment, likewise the financial rating of any issuing entity or any credit or similar event (irrespective of the definition of such) relating to a bond in the Benchmark Index at a given date or at any other time.

The Index Sponsor cannot be held liable for any reason whatsoever in terms of an error in the Benchmark Index, and the Index Sponsor is not required to inform of such an error, in the event it would occur.

Under no circumstances does the Index Sponsor issue a recommendation to buy or sell the Sub-Fund nor does it express an opinion concerning the ability of the Benchmark Index to replicate the performance of the markets in question, or concerning the Index or any transaction or product related to it, or indeed the corresponding risks.

The Index Sponsor is under no obligation to take the needs of a third party into consideration during the determination, modification in the composition or calculation of the Benchmark Index. The purchaser or a seller of the Sub-Fund and the Index Sponsor cannot be held liable in the event the Index Sponsor does not take the necessary measures in determining, adjusting or calculating the Benchmark Index.

The Index Sponsor and its related companies retain the right to process any of the bonds making up the benchmark Index, and may, when permitted, accept deposits, make loans or perform any other credit activity, and more generally carry out all or any investment banking and finance service or other commercial activity with these bonds' issuers or their related companies, and they may enter into such activities as though the Benchmark Index did not exist, without taking into account any consequences such action may have on the Benchmark Index or the Sub-Fund.

APPENDIX 20

MULTI UNITS LUXEMBOURG – Amundi US Inflation Expectations 10Y

The Sub-Fund is an index-tracking UCITS passively managed.

The Reference Currency of the Sub-Fund is the US Dollar (USD).

INVESTMENT OBJECTIVE

The investment objective of MULTI UNITS LUXEMBOURG - **Amundi US Inflation Expectations 10Y** is to reflect the performance of the “Markit iBoxx USD Breakeven 10-Year Inflation Index” (the “**Benchmark Index**”) denominated in US Dollars, in order to offer an exposure to a long position in U.S. 10-year Treasury Inflation-Protected securities (TIPS) and a short position in U.S. Treasury bonds with adjacent durations.

For monthly hedged share classes mentioned in APPENDIX C - SUMMARY OF SHARES AND FEES, the Sub-Fund will also use a monthly currency-hedge strategy, in order to minimize the impact of the evolution of each respective share class currency against currencies of each Index component.

The anticipated level of the tracking error under normal market conditions is expected to be up to 0.50%.

THE BENCHMARK INDEX

- **Benchmark Index Objectives**

The Benchmark Index is representative of the performance of a long position in the 6 last issuances of U.S. 10-year Treasury Inflation-Protected securities (the “**TIPS**”) and a short position in U.S. Treasury bonds with adjacent durations without any issuance exceeding 30% at any rebalancing date.

The difference in yield (or “spread”) between these bonds is commonly referred to as a “breakeven rate of inflation” (BEI) and is considered to be a measure of the market’s expectations for inflation over a specified period of time.

- **Benchmark Index Methodology**

The Benchmark Index is designed to provide exposure to changes in inflation expectation priced by the market by entering into:

- a long position in the last 6 U.S. 10-year TIPS issued;
- a short position in U.S. Treasury bonds with adjacent durations.

U.S. 10-year TIPS are indexed to the US Consumer Price Index.

The combination of long and short positions removes the noise related to duration of fixed income securities, allowing for exposure, mainly but not limited to changes in the market’s expectations for 10Y inflation.

The daily Benchmark Index performance will not be the daily change of the breakeven inflation (“**BEI**”), nor a multiplier of the daily change, but the daily over performance of the long inflation-linked basket versus the short nominal basket, which is in theory correlated to the changes in the inflation expected by the market at the bonds maturity, represented by the breakeven inflation for such maturity.

In theory, an increase in the x years inflation expectation shall lead to a relative decrease of the price of the nominal bond with x years maturity versus the price of the equivalent inflation-linked bond and thus an increase in the performance of a long position in the inflation-linked bond and a short position in the nominal bond. The Benchmark Index being composed of a long position in several inflation-linked bonds and a short position in several nominal bonds with several maturities, the Benchmark Index performance will not be linked to the sole 10 year inflation expectation but will be linked to the weighted average inflation expectations at the maturities corresponding to the bonds comprising the basket. In addition, (i) price movements due to supply and demand discrepancies between inflation-linked bonds and corresponding nominal bonds, (ii) transactions costs applicable to the Benchmark Index components, and (iii) seasonality cycles and potential negative carry positions due to seasonality (see the specific risk factor hereafter) will lead to deviations between the Benchmark Index performance and inflation expectations.

Please also note that the Benchmark Index is not designed to measure the realized rate of inflation, nor does it seek to replicate the returns of any index or measure of actual consumer price levels. However, on short periods realized inflation will have an impact on the performance of the Benchmark Index, typically when realized inflation over a period of time differs from market expectation during the same period.

The composition of the Benchmark Index is reviewed and rebalanced each month.

The Benchmark Index is a net total return index. A net total return index calculates the performance of the index constituents on the basis that any coupons or distributions are included in the index returns.

APPENDIX 21

MULTI UNITS LUXEMBOURG – Amundi US Treasury Bond 1-3Y

The Sub-Fund is an index-tracking UCITS passively managed.

The Reference Currency of the Sub-Fund is the US Dollar (USD).

INVESTMENT OBJECTIVE

The investment objective of MULTI UNITS LUXEMBOURG – Amundi US Treasury Bond 1-3Y is to reflect the performance of the Bloomberg Barclays US Treasury 1-3 Year Index (hereinafter the “Benchmark Index”) denominated in USD and representative of United States “Treasury bonds” with remaining maturities between 1 and up to (but not including) 3 years - while minimising the volatility of the difference between the return of the Sub-Fund and the return of the Benchmark Index (the “Tracking Error”).

For monthly hedged share classes mentioned in APPENDIX C - SUMMARY OF SHARES AND FEES, the Sub-Fund will also use a monthly currency-hedge strategy, in order to minimize the impact of the evolution of each respective share class currency against currencies of each Index component.

The anticipated level of the tracking error under normal market conditions is expected to be up to 0.10%.

THE BENCHMARK INDEX

- **Benchmark Index Objectives**

The Benchmark Index offers exposure to fixed-rate U.S. Treasury bonds that have remaining maturities between 1 and up to (but not including) 3 years.

The performance tracked is that of the Benchmark Index’s closing price.

- **Benchmark Index Methodology**

The Benchmark Index is a bond index, calculated, maintained and published by Bloomberg Barclays.

The Benchmark Index measures the performance of the US Government bond market. Only USD denominated bond issued by the US government with a remaining maturities between 1 and up to (but not including) 3 years are included.

The Benchmark Index is a total return index. A total return index calculates the performance of

the index constituents on the basis that any dividends or distributions are included in the index returns.

The composition of the Benchmark Index is reviewed and rebalanced monthly.

The rebalancing frequency as described above will have an impact in terms of costs in the context of the performance of the investment objective. Particular costs incurred as a result of such rebalancing of the Benchmark Index include additional transaction costs.

The performance tracked is that of the Benchmark Index’s closing price.

APPENDIX 24

MULTI UNITS LUXEMBOURG – Lyxor iBoxx £ Liquid Corporates Long Dated UCITS ETF

The Sub-Fund is an index-tracking UCITS passively managed.

The Reference Currency of the Sub-Fund is the GBP.

INVESTMENT OBJECTIVE

The investment objective of MULTI UNITS LUXEMBOURG – **Lyxor iBoxx £ Liquid Corporates Long Dated UCITS ETF** is to provide exposure to increases and decreases in the main segments of the corporate bond market, denominated in GBP, by replicating the movement of the Markit iBoxx GBP Liquid Corporates Long Dated Mid Price TCA index (the "**Benchmark Index**"), while minimizing the tracking error between the Sub-fund's performance and that of the Benchmark Index (the "**Tracking Error**").

For monthly hedged share classes mentioned in APPENDIX C - SUMMARY OF SHARES AND FEES, the Sub-Fund will also use a monthly currency-hedge strategy, in order to minimize the impact of the evolution of each respective share class currency against currencies of each Index component.

The anticipated level of the tracking error under normal market conditions is expected to be up to 0.50%.

THE BENCHMARK INDEX

- **Benchmark Index Objectives**

The Benchmark Index belongs to the Markit iBoxx GBP Liquid family of indices representing the main segments of the GBP denominated bond market and which meet specific liquidity criteria. The Markit iBoxx GBP Liquid indices are the easiest replicable sub-sets of the Markit iBoxx GBP family of indices. The Benchmark Index represents in particular the GBP denominated liquid non-government bond market.

- **Benchmark Index Methodology**

To be eligible for inclusion in the Benchmark Index, a bond must meet specific criteria pertaining to its residual maturity (1.5 years at re-balancing date) and issue size (at least GBP 250 millions). The number of issuers comprised in the Benchmark Index has to be between 25 and 40. Each bond is weighted using the amount outstanding as notional; the weight is determined by the bond capitalization in relation to the index capitalization and is capped at 4%.

Index is re-balanced every quarter at the end of February, May, August and November, on the last day of the month.

The Sub-Fund's Benchmark Index, denominated in GBP, is a "total return" index (i.e. all coupons detached from the components of the Benchmark Index are reinvested in the Benchmark Index) and is "trading cost adjusted" (i.e. that cost of buying and selling securities at rebalancing dates are included in the index return).

The Benchmark Index is based, in particular, on Markit Reference Data - Evaluated Bond Pricing Service. Prices are sourced by Markit from, among others, books of record contributions, parsed dealer runs, reported trade prices and executed levels.

The Benchmark Index is compiled, administered and managed by Markit.

A full description of the Benchmark Index and its construction methodology and information on the composition and respective weightings of the Benchmark Index components are available on the Internet at www.markit.com.

- **Additional Information on Benchmark Index**

Additional information on the Benchmark Index, its composition, calculation and rules for periodical review and rebalancing and on the general methodology behind the Benchmark Index can be found on www.markit.com.

For additional Information on the Index please refer to paragraph B "Investment made by Index Sub-Fund" of Section I "Investment Objective / Investment Powers and Restrictions" of the main part of this Prospectus and on APPENDIX F – BENCHMARK REGULATION.

INVESTMENT POLICY

The Sub-Fund will carry out its investment objective via an Indirect Replication as described and in compliance with the section INVESTMENT OBJECTIVES of the part I/ Investment Objectives/ Investment Powers and Restrictions of this Prospectus.

Within the limits set forth in this Prospectus and on an ancillary basis, the Sub-Fund may hold cash and cash equivalents.

The Sub-Fund will not invest more than 10% of its assets in units or shares of other UCITS. No investment will be made in any UCIs.

INVESTMENT TECHNIQUES

The maximum and expected proportions of the Sub-Fund's assets that can be subject to SFTs

and TRS are disclosed in APPENDIX E - SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS.

ELIGIBILITY OF THE SUB-FUND

Please refer to Appendix APPENDIX G – SPECIFIC INVESTMENT RATIO for information regarding the Sub-Fund and the German Investment Funds Tax Act (InvStG-E) (“GITA”).

The anticipated level of the tracking error under normal market conditions is expected to be up to 0.10%.

THE BENCHMARK INDEX

- **Benchmark Index Objectives**

The Benchmark Index is part of the FTSE Actuaries UK Gilts Index Series, which represents the UK Government bond market. The Benchmark Index comprises conventional Gilts with all outstanding terms.

The performance tracked is that of the Benchmark Index’s closing price.

- **Benchmark Index Methodology**

Except for certain categories (e.g. rump stocks), all Gilts denominated in GBP and quoted on the Stock Exchange are eligible for inclusion in the Benchmark Index. In particular, there is no time to maturity constraint: new issues are added on the business day following the auction, syndication or placement; Gilts are removed on their redemption date.

Rump Gilts are relatively small Gilts (in terms of nominal outstanding) as declared by the Debt Management Office (“DMO”).

Each bond’s weight in the Benchmark Index is determined by its nominal amount outstanding relative to the total nominal outstanding of the selected universe.

The composition of the Benchmark Index is re-balanced each time a relevant event takes place (e.g. new issuance or redemption of an issuance).

The bond prices source used to determine the Benchmark Index closing price is indicated in the index methodology available at www.ftse.com.

The Sub-Fund’s Benchmark Index is the FTSE Actuaries UK Conventional Gilts All Stocks index denominated in GBP. The Benchmark Index is a “total return” index (i.e. all coupons detached from the Benchmark Index constituents are reinvested in the Benchmark Index).

The Benchmark Index is administered and managed by FTSE Russell.

A full description of the Benchmark Index and its construction methodology and information on the composition and respective weightings of the Benchmark Index components are available on the Internet at www.ftse.com.

- **Additional Information on Benchmark Index**

Additional information on the Benchmark Index, its composition, calculation and rules for periodical review and rebalancing and on the general methodology behind the Benchmark Index can be found on www.ftse.com.

For additional Information on the Index please refer to paragraph B “Investment made by Index Sub-Fund” of Section I “Investment Objective / Investment Powers and Restrictions” of the main part of this Prospectus and on APPENDIX F – BENCHMARK REGULATION.

INVESTMENT POLICY

The Sub-Fund will carry out its investment objective via a Direct Replication as described and in compliance with the section INVESTMENT OBJECTIVES of the part I/ Investment Objectives/ Investment Powers and Restrictions of this Prospectus.

Within the limits set forth in this Prospectus and on an ancillary basis, the Sub-Fund may hold cash and cash equivalents.

The Sub-Fund will not invest more than 10% of its assets in units or shares of other UCITS. No investment will be made in any UCIs.

INVESTMENT TECHNIQUES

APPENDIX 26

MULTI UNITS LUXEMBOURG – Amundi UK Government Inflation-Linked Bond

The Sub-Fund is an index-tracking UCITS passively managed.

The Reference Currency of the Sub-Fund is the GBP.

INVESTMENT OBJECTIVE

The investment objective of MULTI UNITS LUXEMBOURG – **Amundi UK Government Inflation-Linked Bond** is to reflect the performance of the FTSE Actuaries UK Index-Linked Gilts All Stocks index (the “**Benchmark Index**”) denominated in GBP and representative of inflation linked UK government bonds (“Index-Linked Gilts”) denominated in GBP - while minimising the volatility of the difference between the return of the Sub-Fund and the return of the Benchmark Index (the “**Tracking Error**”).

For monthly hedged share classes mentioned in APPENDIX C - SUMMARY OF SHARES AND FEES, the Sub-Fund will also use a monthly currency-hedge strategy, in order to minimize the impact of the evolution of each respective share class currency against currencies of each Index component.

The anticipated level of the tracking error under normal market conditions is expected to be up to 1%.

THE BENCHMARK INDEX

- **Benchmark Index Objectives**

The Benchmark Index is part of the FTSE Actuaries UK Gilts Index Series, which represents the UK Government bond market.

Index-linked Gilts signifies that the coupon payments and the principal payment on redemption are adjusted to take account of accrued inflation, in line with the UK Retail prices Index (“RPI”), since the Gilt’s issue.

The performance tracked is that of the Benchmark Index’s closing price.

- **Benchmark Index Methodology**

Except for certain categories (e.g. convertible index-linked Gilts with outstanding conversion options and rump stocks), all index-linked Gilts denominated in GBP and quoted on the Stock Exchange are eligible for inclusion in the Benchmark Index. In particular, there is no time to maturity constraint: new issues are added on the business day following the auction,

syndication or placement; index-linked Gilts are removed on their redemption date.

Rump Gilts are relatively small Gilts (in terms of nominal outstanding) as declared by the Debt Management Office (“DMO”).

The bond prices source used to determine the Benchmark Index closing price is indicated in the index methodology available at www.ftse.com.

The Sub-Fund’s Benchmark Index is the FTSE Actuaries UK Index-Linked Gilts All Stocks index denominated in GBP. The Benchmark Index is a “total return” index (i.e. all coupons detached from the Benchmark Index constituents are reinvested in the Benchmark Index).

The Benchmark Index is administered and managed by FTSE Russell.

A full description of the Benchmark Index and its construction methodology and information on the composition and respective weightings of the Benchmark Index components are available on the Internet at www.ftse.com.

- **Additional Information on Benchmark Index**

Additional information on the Benchmark Index, its composition, calculation and rules for periodical review and rebalancing and on the general methodology behind the Benchmark Index can be found on www.ftse.com.

For additional Information on the Index please refer to paragraph B “Investment made by Index Sub-Fund” of Section I “Investment Objective / Investment Powers and Restrictions” of the main part of this Prospectus and on APPENDIX F – BENCHMARK REGULATION.

INVESTMENT POLICY

The Sub-Fund will carry out its investment objective via a Direct Replication as described and in compliance with the section INVESTMENT OBJECTIVES of the part I/ Investment Objectives/ Investment Powers and Restrictions of this Prospectus.

Within the limits set forth in this Prospectus and on an ancillary basis, the Sub-Fund may hold cash and cash equivalents.

The Sub-Fund will not invest more than 10% of its assets in units or shares of other UCITS. No investment will be made in any UCIs.

INVESTMENT TECHNIQUES

The maximum and expected proportions of the Sub-Fund’s assets that can be subject to SFTs and TRS are disclosed in APPENDIX E -

SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS.

ELIGIBILITY OF THE SUB-FUND

Please refer to Appendix APPENDIX G – SPECIFIC INVESTMENT RATIO for information regarding the Sub-Fund and the German Investment Funds Tax Act (InvStG-E) (“GITA”).

TARGETED INVESTORS

APPENDIX 27

MULTI UNITS LUXEMBOURG – Amundi US Treasury Bond 7-10Y

The Sub-Fund is an index-tracking UCITS passively managed.

The Reference Currency of the Sub-Fund is the US Dollar (USD).

INVESTMENT OBJECTIVE

The investment objective of MULTI UNITS LUXEMBOURG – Amundi US Treasury Bond 7-10Y is to reflect the performance of the Bloomberg Barclays US Treasury 7-10 Year Index (hereinafter the “**Benchmark Index**”) denominated in USD and representative of United States “Treasury bonds” with remaining maturities between 7 and up to (but not including) 10 years - while minimising the volatility of the difference between the return of the Sub-Fund and the return of the Benchmark Index (the “**Tracking Error**”).

For monthly hedged share classes mentioned in APPENDIX C - SUMMARY OF SHARES AND FEES, the Sub-Fund will also use a monthly currency-hedge strategy, in order to minimize the impact of the evolution of each respective share class currency against currencies of each Index component.

The anticipated level of the tracking error under normal market conditions is expected to be up to 0.10%.

THE BENCHMARK INDEX

- **Benchmark Index Objectives**

The Benchmark Index offers exposure to fixed-rate U.S. Treasury bonds that have remaining maturities between 7 and up to (but not including) 10 years.

The performance tracked is that of the Benchmark Index's closing price.

- **Benchmark Index Methodology**

The Benchmark Index is a bond index, calculated, maintained and published by Bloomberg Barclays.

The Benchmark Index measures the performance of the US Government bond market. Only USD denominated bond issued by the US government with a remaining maturity between 7 and up to (but not including) 10 years are included.

The Benchmark Index is a total return index. A total return index calculates the performance of

the index constituents on the basis that any dividends or distributions are included in the index returns.

The composition of the Benchmark Index is reviewed and rebalanced monthly.

The rebalancing frequency as described above will have an impact in terms of costs in the context of the performance of the investment objective. Particular costs incurred as a result of such rebalancing of the Benchmark Index include additional transaction costs.

The performance tracked is that of the Benchmark Index's closing price.

A full description of the Benchmark Index and its construction methodology and information on the composition and respective weightings of the Benchmark Index components are available on the index provider's website at <https://www.bloomberg.com/professional/product/indices/bloomberg-barclays-indices/>.

APPENDIX 28

MULTI UNITS LUXEMBOURG – Amundi UK Government Bond 0-5Y

The Sub-Fund is an index-tracking UCITS passively managed.

The Reference Currency of the Sub-Fund is the GBP.

INVESTMENT OBJECTIVE

The investment objective of **MULTI UNITS LUXEMBOURG - Amundi UK Government Bond 0-5Y** is to reflect the performance of the FTSE Actuaries UK Conventional Gilts Up To 5 Years index (hereinafter the “**Benchmark Index**”) denominated in GBP and representative of UK government bonds (“Gilts”) with remaining maturities up to 5 years - while minimising the volatility of the difference between the return of the Sub-Fund and the return of the Benchmark Index (the “**Tracking Error**”).

For monthly hedged share classes mentioned in APPENDIX C - SUMMARY OF SHARES AND FEES, the Sub-Fund will also use a monthly currency-hedge strategy, in order to minimize the impact of the evolution of each respective share class currency against currencies of each Index component.

The anticipated level of the tracking error under normal market conditions is expected to be up to 0.10%.

THE BENCHMARK INDEX

- **Benchmark Index Objectives**

The Sub-Fund’s Benchmark Index is the FTSE Actuaries UK Conventional Gilts Up To 5 Years index denominated in GBP. The Benchmark Index is a “total return” index (i.e. all coupons detached from the Benchmark Index constituents are reinvested in the Benchmark Index).

The Benchmark Index consists of securities with up-to-5-years maturity from the conventional index family of the FTSE Actuaries UK Gilts Index Series, which includes all British Government Securities quoted on the London Stock Exchange.

The performance tracked is that of the Benchmark Index’s closing price.

- **Benchmark Index Methodology**

Except for certain categories (e.g. convertible Gilts and rump stocks), all Gilts denominated in GBP with up-to-5-year remaining maturities and quoted on the London Stock Exchange are eligible for inclusion in the Benchmark Index.

A Gilt is included in the Benchmark Index either on the business day following the auction if it has a maturity at issuance up to 5 years, or after the close of the business day when its redemption date is exactly 5 years from the calculation date. Gilts are removed from the Benchmark Index on their redemption dates at the closing price on the previous day.

Rump Gilts are relatively small Gilts (in terms of nominal outstanding) as declared by the Debt Management Office (“DMO”).

Each bond’s weight in the Benchmark Index is determined by its nominal amount outstanding relative to the total nominal outstanding of the selected universe. The Benchmark Index is re-balanced each time a relevant event takes place (e.g. new issuance or redemption of an issuance).

The bond prices source used to determine the Benchmark Index closing price is indicated in the index methodology available at www.ftse.com.

The Benchmark Index is administered and managed by FTSE Russell.

A full description of the Benchmark Index and its construction methodology and information on the composition and respective weightings of the Benchmark Index components are available on the Internet at www.ftse.com.

Interest Rate Risk, Interest Rate Risk, Capital at Risk, Risks linked to Sampling and Optimization techniques Sub-Fund Liquidity Risk, Specific Risk due to Seasonality and Carry on Inflation, Liquidity Risk on Secondary Market, Risk that the Sub-Fund's investment objective is only partially achieved, Risk of using financial derivative instruments, Counterparty Risk, Collateral Management Risk, Currency Risk, Currency Hedge Risk, Class Currency Hedge Risk, Index Calculation Risk.

SUSTAINABILITY RISKS

This Sub-Fund does not promote ESG characteristics and does not maximize portfolio alignment with Sustainability Factors, however it remains exposed to Sustainability Risks and the occurrence of such risks could cause a negative material impact on the value of the investments made by the Sub-Fund. Further information can be found in the "SUSTAINABLE INVESTING" Section of the Prospectus.

TAXONOMY REGULATION

In accordance of article 7 of the Taxonomy Regulation, the Management Company draws the attention of investors to the fact that the investments underlying this Sub-Fund do not take into account the European Union criteria for environmentally sustainable economic activities.

DISTRIBUTION OF INCOME

Please refer to the Distribution Policy section of the Prospectus.

DISCLAIMER

Barclays Bank PLC or Barclays Capital Inc. and its affiliated companies (hereinafter "Barclays") did not create or issue the Sub-Fund and Barclays has no responsibility, obligation or duty with respect to the investors in the Sub-Fund.

The Barclays US Government Inflation-Linked Bond index is a trademark of Barclays Bank PLC and is used under a license granted to Amundi Asset Management, which is the issuer of the Sub-Fund. Although Amundi Asset Management can in its name enter into transactions with

Barclays that are directly or indirectly related to the Barclays US Government Inflation-Linked Bond index in relation to the Sub-Fund, investors who purchase shares of Amundi Asset Management's Sub-Fund will never acquire any interest in Barclays US Government Inflation-Linked Bond index and do not enter into any relationship with Barclays simply because they are invested in the Sub-Fund. APPENDIX 30

MULTI UNITS LUXEMBOURG – Amundi Global Aggregate Green Bond

The Sub-Fund is an index-tracking UCITS passively managed.

This Sub-Fund promotes environmental and/or social characteristics within the meaning of article 8 of SFDR, as further described in Appendix I – ESG Related Disclosures to this Prospectus.

The Sub-Fund has obtained the Greenfin label.

The Reference Currency of the Sub-Fund is the Euro (EUR).

INVESTMENT OBJECTIVE

The investment objective of MULTI UNITS LUXEMBOURG - **Amundi Global Aggregate Green Bond** is to track both the upward and the downward evolution of the “Solactive Green Bond EUR USD IG Index” (the “**Index**”) denominated in Euros, in order to offer an exposure to the Green Bonds market - while minimising the volatility of the difference between the return of the Sub-Fund and the return of the Index (the “**Tracking Error**”).

For monthly hedged share classes mentioned in APPENDIX C - SUMMARY OF SHARES AND FEES, the Sub-Fund will also use a monthly currency-hedge strategy, in order to minimize the impact of the evolution of each respective share class currency against currencies of each Index component.

The anticipated level of the tracking error under normal market conditions is expected to be up to 0.50%.

THE INDEX

- **Index Objectives**

The Index is representative of the performance of Green Bonds issued by investment grade entities and denominated in EUR and US Dollars. Green Bonds are issued in order to fund projects that have positive environmental outcomes, as further described in Appendix I – ESG Related Disclosures to this Prospectus.

- **Index Methodology**

The Index is market-value weighted, which means that components weights are defined according to each bond outstanding amount.

The Index is based, in particular, on prices provided by Solactive and third-party pricing sources.

The Index is calculated daily.

The Index is compiled, administered and managed by Solactive.

The composition of the Index is reviewed and rebalanced on the last business day of each month.

The rebalancing frequency as described above will have an impact in terms of costs in the context of the performance of the investment objective. Particular costs incurred as a result of such rebalancing of the Index include additional transaction costs.

The Index is a “total return index” (i.e. all coupons detached by the components of the Index are reinvested in the Index).

The complete methodology for the Index (including maintenance, rebalancing of the Index and its effects on the costs within the strategy) is available for consultation on the following website: <https://www.solactive.com>.

- **Additional Information on Benchmark Index**

Additional information on the Index, its composition, calculation and rules for periodical review and rebalancing and on the general methodology behind the Index can be found on <https://www.solactive.com>.

For additional Information on the Index please refer to paragraph B “Investment made by Index Sub-Fund” of Section I “Investment Objective / Investment Powers and Restrictions” of the main part of this Prospectus and on APPENDIX F – BENCHMARK REGULATION.

INVESTMENT POLICY

The Sub-Fund will carry out its investment objective via a Direct Replication as described and in compliance with the section INVESTMENT OBJECTIVES of the part I/ Investment Objectives/ Investment Powers and Restrictions of this Prospectus.

Within the limits set forth in this Prospectus and on an ancillary basis, the Sub-Fund may hold cash and cash equivalents.

The Sub-Fund will not invest more than 10% of its assets in units or shares of other UCITS. No investment will be made in any UCIs.

The Sub-Fund integrates Sustainability Risks and takes into account principal adverse impacts of investments on Sustainability Factors in its investment process as outlined in more detail in section “Sustainable Investing” of this Prospectus and will not hold any securities of

companies involved in the production or sale of controversial weapons, or companies in breach of international conventions on Human or Labor Rights, or companies involved in controversial industries: tobacco, Thermal coal, nuclear weapons or unconventional oil & gas as defined in section I "Investment Objectives/ Investment Powers and Restrictions".

More information on environmental and/or social characteristics can be found in Appendix I - ESG Related Disclosures to this Prospectus.

INVESTMENT TECHNIQUES

The maximum and expected proportions of the Sub-Fund's assets that can be subject to SFTs and TRS are disclosed in APPENDIX E - SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS.

The Sub-Fund intends to use from time to time securities lending transactions for one or more of the following specific aims: (i) reduction of risk; (ii) reduction of cost; or (iii) generation of additional capital or income for the UCITS with a level of risk which is consistent with the risk profile of the UCITS and the risk diversification rules laid down in Article 52 of Directive 2009/65/EC of the European Parliament and of the Council of 13 July 2009 on the coordination of laws, regulations and administrative provisions relating to undertakings for collective investment in transferable securities.

ELIGIBILITY OF THE SUB-FUND

Please refer to Appendix APPENDIX G – SPECIFIC INVESTMENT RATIO for information regarding the Sub-Fund and the German Investment Funds Tax Act (InvStG-E) ("GITA").

TARGETED INVESTORS

The Sub-Fund is dedicated to both retail and institutional investors wishing to have an exposure to the Green Bonds market.

CLASSES OF SHARES AND FEES

The Sub-Fund will issue the Classes of Shares, subject to different terms and conditions described in APPENDIX C - SUMMARY OF SHARES AND FEES. Other Share Classes may be available. For a current listing of available Share Classes go to www.amundiETF.com.

DEFINITIONS

"Business Day", "Dealing Day" and "Valuation Day": Please refer to the APPENDIX H – GLOSSARY OF TERMS.

"Dealing Deadline": Please refer to the APPENDIX D – SUMMARY TABLE OF SUB-FUND'S DEALING TIMELINE.

LISTING

The Sub-Fund is a UCITS ETF. As a consequence all its Shares shall be traded throughout the day on one or several regulated market or multilateral trading facilities with at least one market maker which takes action to ensure that the stock exchange value of the Shares does not significantly vary from its iNAV (as defined above).

In the event of Suspension of the Secondary Market (as defined above in the Prospectus) the following exit charges will apply (in replacement of the maximum redemption charges stated above): 2% of the Net Asset Value per Share multiplied by the number of shares redeemed.

A list of these stock exchanges and/or multilateral trading facilities can be obtained from the registered office of the Company.

Information on the iNAV of an exchange-traded share are also provided in section "Indicative Net Asset Value per Share" of the main part of the Prospectus and on the website www.amundiETF.com.

PUBLICATION OF THE NET ASSET VALUE

The Net Asset Value per Share will be available at the registered office of the Company and will be published on www.amundiETF.com.

RISKS WARNING

Among the different risks described in APPENDIX B - SPECIAL RISK CONSIDERATIONS AND RISK FACTORS, the Sub-Fund is more specifically exposed to the following risks:

Interest Rate Risk, Interest Rate Risk, Credit risk, Capital at Risk, Risk linked to Securities Lending, Low Diversification Risk, Risks linked to Sampling and Optimization techniques, Risk of investment in Emerging and Developing Markets, Sub-Fund Liquidity Risk, Liquidity Risk on Secondary Market, Risk that the Sub-Fund's investment objective is only partially achieved, Risk of using financial derivative instruments, Counterparty Risk, Collateral Management Risk, Currency Risk, Currency Hedge Risk, Class Currency Hedge Risk, Market Risk linked to a controversy, Index Calculation Risk.

LIMITS OF THE EXTRA-FINANCIAL APPROACH

The extra-financial approach implemented by the Sub-Fund is largely based on third party data that may be incomplete, inaccurate or unavailable from time to time. The Management Company is therefore dependent on the quality and reliability

of such information. Finally, investments in Green Bonds may induce sectoral biases in the global bond market.

SUSTAINABILITY RISKS

In managing the Sustainability Risks of this Sub-Fund, the Management Company relies on Solactive as the administrator of the Index, which identifies and integrates relevant and significant Sustainable Risks in its Index methodology. Such integration has therefore a direct impact on the investment universe of the Index. However, no insurance can be given that Sustainability Risks will be totally removed and the occurrence of such risks could cause a negative material impact on the value of the assets comprising the Index tracked or reflected by the Sub-Fund. For further information on the methodology of the Index, please refer to: <https://www.solactive.com>. Further information can also be found in the "SUSTAINABLE INVESTING" Section of the Prospectus.

DISTRIBUTION OF INCOME

Please refer to the Distribution Policy section of the Prospectus.

DISCLAIMER

The Sub-Fund is not sponsored, promoted, sold or supported in any other manner by Solactive AG nor does Solactive AG offer any express or implicit guarantee or assurance either with regard to the results of using the Index and/or Index trade mark or the Index Price at any time or in any other respect. The Index is calculated and published by Solactive AG.

Solactive AG uses its best efforts to ensure that the Index is calculated correctly. Irrespective of its obligations towards the issuer, Solactive AG has no obligation to point out errors in the Index to third parties including but not limited to investors and/or financial intermediaries of the Sub-Fund. Neither publication of the Index by Solactive AG nor the licensing of the Index or Index trade mark for the purpose of use in connection with the Sub-Fund constitutes a recommendation by Solactive AG to invest capital in the Sub-Fund nor does it in any way represent an assurance or opinion of Solactive AG with regard to any investment in the Sub-Fund.

APPENDIX 31

MULTI UNITS LUXEMBOURG – Amundi FTSE Italia All Cap PIR 2020

The Sub-Fund is an index-tracking UCITS passively managed.

INVESTMENT OBJECTIVE

The investment objective of **MULTI UNITS LUXEMBOURG – Amundi FTSE Italia All Cap PIR 2020** is to track both the upward and the downward evolution of the FTSE Italia PIR All Cap Net Tax Index (the “**Index**”) denominated in Euros and representative of the Italian large, mid and small cap equity market suitable for the “Piano Individuale di Risparmio a lungo termine” (PIR), set up before 31 December 2018 or from 1 January 2020, pursuant to the Italian 2017 Budget Law (Law 11 December 2016, No. 232) as amended and supplemented (the “**PIR Law**”), while minimizing the volatility of the difference between the return of the Sub-Fund and the return of the Index (the “**Tracking Error**”).

For daily hedged share classes mentioned in APPENDIX C - SUMMARY OF SHARES AND FEE, the Sub-Fund will also use a daily currency-hedge strategy, in order to minimize the impact of the evolution of each respective share class currency against currencies of each Index component.

The anticipated level of the tracking error under normal market conditions is expected to be up to 0.50%.

THE INDEX

- **Index Objectives**

The Index measures the performance of stocks of Italian large, medium and small capitalization companies suitable for the PIR Law.

The Index comprises all constituents of the FTSE MIB Index and all constituents of the FTSE Italia PIR PMI Index.

The FTSE MIB Index measures the performance of the 40 most liquid and capitalized stocks listed on the Mercato Telematico Azionario (MTA) and the Mercato telematico degli Investment Vehicles (MIV) markets of Borsa Italiana.

The FTSE Italia PIR PMI Index comprises all constituents in the FTSE Italia Mid Cap Index and 20 constituents in the FTSE Italia Small Cap Index, selected according to size and liquidity.

The FTSE Italia Mid Cap Index consists of the top 60 shares ranked by company full market capitalization (i.e. before the application of any investability weightings) which are not included in

the FTSE MIB Index and which qualify as such after the application of the liquidity and free float screens.

The FTSE Italia Small Cap Index captures the performance of all other small shares which are not included in the FTSE MIB Index or the FTSE Italia Mid Cap Index which qualify as such after the application of the liquidity and free floats screens.

- **Index Methodology**

The Index comprises all constituents of the FTSE MIB Index and the FTSE Italia PIR PMI Index.

The Index is market capitalisation weighted after adjusting constituents for free float.

At each rebalancing the Index is subject to a two-level capping, aiming at ensuring its compliance:

a) to the PIR

Law requirements, mandating both:

- a minimum 3.5% (cautionary increased to 5%) weight of companies not included in FTSE MIB Index or FTSE Italia Mid Cap Index;
- a minimum 21% (cautionary increased to 25%) weight of companies not included in FTSE MIB Index;

b) to UCITS concentration requirements, mandating that no shares would have a weight exceeding 10% and that the sum of all shares above 5% is not exceeding 40%.

The Index is administered and managed by FTSE Russell.

A full description and the complete methodology used to construct the Index and information on the composition and respective weightings of the Index components is available on the Internet at: www.ftserussell.com.

The Index will be rebalanced and reviewed on a quarterly basis in March, June, September and December.

The Index is a net total return index. A net total return index calculates the performance of the index constituents on the basis that any dividends or distributions are reinvested net of any withholding tax applicable.

The rebalancing frequency as described above will have no impact in terms of costs in the context of the performance of the investment objective.

- **Additional Information on Index**

Additional information on the Index, its composition, calculation and rules for periodical

review and rebalancing and on the general methodology behind the Index can be found on www.ftserussell.com.

For additional Information on the Index please refer to paragraph B “Investment made by Index Sub-Fund” of Section I “Investment Objective / Investment Powers and Restrictions” of the main part of this Prospectus and on APPENDIX F – BENCHMARK REGULATION.

INVESTMENT POLICY

The Sub-Fund will carry out its investment objective via a Direct Replication as described and in compliance with the section INVESTMENT OBJECTIVES of the part I/ Investment Objectives/ Investment Powers and Restrictions of this Prospectus.

The Sub-Fund's shares are included among eligible investment that are eligible in a “Piano Individuale di Risparmio a lungo termine” (PIR set up before 31 December 2018 or from 1 January 2020, pursuant to the Italian 2017 Budget Law (Law of 11 December 2016, N°232) as amended and supplemented.

The Sub-Fund shall invest at least 70% of the portfolio in financial instruments, whether or not negotiated on a regulated market or on a multilateral trading facility, issued by, or entered into companies which are resident in Italy, or in an EU or EEA Member State and have a permanent establishment in Italy.

At least 25% of these financial instruments, which corresponds to 17.5% of the Sub-Fund's portfolio, shall be issued by companies which are not listed in the FTSE MIB Index or in any equivalent indices, and at least further 5% of these financial instruments, which corresponds to 3.5% of the Sub-Fund's portfolio, shall be issued by companies which are not listed in the FTSE MIB index and FTSE Mid Cap Index or in any equivalent indices.

The Sub-Fund cannot invest more than 10% of the portfolio in financial instruments issued by, or entered into with the same company, or companies belonging to the same group, or in cash deposits.

The Sub-Fund cannot invest in financial instruments issued by companies which are not resident in countries that allow an adequate exchange of information with Italy.

As requested by the PIR Law in order for the Sub-Fund to qualify as PIR compliant for a full calendar year, these investment restrictions shall be fulfilled for at least two third of each calendar year starting January 1st 2020.

Within the limits set forth in this Prospectus and on an ancillary basis, the Sub-Fund may hold cash and cash equivalents.

The Sub-Fund will not invest more than 10% of its assets in units or shares of other UCITS. No investment will be made in any UCIs.

INVESTMENT TECHNIQUES

The maximum and expected proportions of the Sub-Fund's assets that can be subject to SFTs and TRS are disclosed in APPENDIX E - SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS.

The Sub-Fund intends to use from time to time securities lending transactions for one or more of the following specific aims: (i) reduction of risk; (ii) reduction of cost; or (iii) generation of additional capital or income for the UCITS with a level of risk which is consistent with the risk profile of the UCITS and the risk diversification rules laid down in Article 52 of Directive 2009/65/EC of the European Parliament and of the Council of 13 July 2009 on the coordination of laws, regulations and administrative provisions relating to undertakings for collective investment in transferable securities.

APPENDIX 32

MULTI UNITS LUXEMBOURG – Amundi MSCI EMU

The Sub-Fund is an index-tracking UCITS passively managed.

The Reference Currency of the Sub-Fund is the Euro (EUR).

INVESTMENT OBJECTIVE

The investment objective of MULTI UNITS LUXEMBOURG - Amundi MSCI EMU is to track both the upward and the downward evolution of the MSCI EMU Net Return Index (the "Index") denominated in EUR and representative of large-cap and mid-cap companies listed on developed markets in the European Economic and Monetary Union (EMU), while minimizing the volatility of the difference between the return of the Sub-Fund and the return of the Index (the "Tracking Error").

For monthly hedged share classes mentioned in APPENDIX C - SUMMARY OF SHARES AND FEES, the Sub-Fund will also use a monthly currency-hedge strategy, in order to minimize the impact of the evolution of each respective share class currency against currencies of each Index component.

The anticipated level of the tracking error under normal market conditions is expected to be up to 0.50%.

THE INDEX

- **Index Objectives**

The Index is a free float-adjusted market capitalization index that is designed to measure the performance of the large and mid cap segments across the developed market countries in the EMU.

The Index's aim is to represent 85% of the free float-adjusted market capitalisation and industry groups within the EMU.

- **Index Methodology**

The Index is an equity index calculated and published by international index provider MSCI.

The Index is based on the MSCI Global Investable Market Indices methodology taking into account the size, liquidity and minimum free float criteria of the investable universe.

The Index captures large and mid-cap representation across developed markets countries in the EMU (which are composed, as of February 2017, of the following countries:

Austria, Belgium, Finland, France, Germany, Ireland, Italy, the Netherlands, Portugal and Spain).

By targeting 85% of each country and of each industry group, the Index will reflect 85% of the total market capitalisation of the EMU markets, while also reflecting their economic diversity.

The MSCI methodology and calculation method are based on a variable number of companies in the Index.

The reference Index is a net total return index. A net total return index calculates the performance of the index constituents on the basis that any dividends or distributions are included in the index returns after withholding tax retention.

The complete methodology for the Index (including maintenance and rebalancing of the Index) is available for consultation on the MSCI website: <http://www.msci.com>.

The composition of the Index is reviewed and rebalanced every 6 months (on May and November) with quarterly reviews in February, May, August and November.

The rebalancing frequency as described above will have no impact in terms of costs in the context of the performance of the investment objective.

- **Additional Information on Index**

Additional information on the Index, its composition, calculation and rules for periodical review and rebalancing and on the general methodology behind the Index can be found on <http://www.msci.com>.

For additional Information on the Index please refer to paragraph B "Investment made by Index Sub-Fund" of Section I "Investment Objective / Investment Powers and Restrictions" of the main part of this Prospectus and on APPENDIX F – BENCHMARK REGULATION.

INVESTMENT POLICY

The Sub-Fund will carry out its investment objective via a Direct Replication as described and in compliance with the section INVESTMENT OBJECTIVES of the part I/ Investment Objectives/ Investment Powers and Restrictions of this Prospectus.

Within the limits set forth in this Prospectus and on an ancillary basis, the Sub-Fund may hold cash and cash equivalents.

The Sub-Fund will not invest more than 10% of its assets in units or shares of other UCITS. No investment will be made in any UCIs.

INVESTMENT TECHNIQUES

The maximum and expected proportions of the Sub-Fund's assets that can be subject to SFTs and TRS are disclosed in APPENDIX E - SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS.

ELIGIBILITY OF THE SUB-FUND

The Sub-Fund is eligible to the French equity savings plans (PEA) which means that the Sub-Fund invests at least 75% of its assets in a diversified portfolio of equities issued by an issuer incorporated either in European Union member state or in a member state of the European Economic Area.

Please refer to Appendix APPENDIX G – SPECIFIC INVESTMENT RATIO for information regarding the Sub-Fund and the German Investment Funds Tax Act (InvStG-E) ("GITA").

TARGETED INVESTORS

The Sub-Fund is dedicated to both retail and institutional investors wishing to have an exposure to the performance of large and mid cap stocks, across developed markets countries in the EMU.

CLASSES OF SHARES AND FEES

The Sub-Fund will issue the Classes of Shares, subject to different terms and conditions described in APPENDIX C - SUMMARY OF SHARES AND FEES. Other Share Classes may be available. For a current listing of available Share Classes go to www.amundiETF.com.

The Sub-Fund Management fee should not be the sole criteria driving subscription; Sub-Fund efficiency – represented by tracking difference, tracking error and the key metrics of secondary market liquidity – should also be analyzed. Investors should assess their personal situation and constraints before investing.

DEFINITIONS

"Business Day", "Dealing Day" and "Valuation Day": Please refer to the APPENDIX H – GLOSSARY OF TERMS.

"Dealing Deadline": Please refer to the APPENDIX D – SUMMARY TABLE OF SUB-FUND'S DEALING TIMELINE.

LISTING

The Sub-Fund is a UCITS ETF. As a consequence all its Shares shall be traded throughout the day on one or several regulated market or multilateral trading facilities with at

APPENDIX 33**MULTI UNITS LUXEMBOURG – Amundi Euro Government Bond 1-3Y**

The Sub-Fund is an index-tracking UCITS passively managed.

The Reference Currency of the Sub-Fund is the Euro (EUR).

INVESTMENT OBJECTIVE

The investment objective of MULTI UNITS LUXEMBOURG - Amundi Euro Government Bond 1-3Y is to reflect the performance of the Bloomberg Barclays Euro Treasury 50bn 1-3 Year Bond Index (the “**Benchmark Index**”) denominated in Euros, while minimizing the volatility of the difference between the return of the Sub-Fund and the return of the Benchmark Index (the “**Tracking Error**”).

For monthly hedged share classes mentioned in APPENDIX C - SUMMARY OF SHARES AND FEES, the Sub-Fund will also use a monthly currency-hedge strategy, in order to minimize the impact of the evolution of each respective share class currency against currencies of each Index component.

The anticipated level of the tracking error under normal market conditions is expected to be up to 0.10%.

THE BENCHMARK INDEX

- **Benchmark Index Objectives**

The Bloomberg Barclays Euro Treasury 50bn 1-3 Year Bond Index offers exposure to fixed-rate, investment grade public obligations issued by sovereign countries participating in the European Monetary Union. This index contains euro-denominated bonds with a maturity between one and up to (but not including) three years.

- **Benchmark Index Methodology**

The Benchmark Index is a bond index, calculated, maintained and published by Bloomberg Barclays.

The Bloomberg Barclays Euro Treasury 50bn 1-3 Year Bond Index measures the performance of the Eurozone government investment grade bond market. Only bonds denominated in euros and with a maturity between one and up to (but not including) three years are included.

The Benchmark Index is a total return index. A total return index calculates the performance of the index constituents on the basis that any dividends or distributions are included in the index returns.

The composition of the Benchmark Index is reviewed and rebalanced monthly.

The rebalancing frequency as described above will have an impact in terms of costs in the context of the performance of the investment objective. Particular costs incurred as a result of such rebalancing of the Benchmark Index include additional transaction costs.

The performance tracked is that of the Benchmark Index’s closing price.

A full description of the Benchmark Index and its construction methodology and information on the composition and respective weightings of the Benchmark Index components are available on the index provider’s website at <https://www.bloomberg.com/professional/product/indices/bloomberg-barclays-indices>

- **Additional Information on Benchmark Index**

Additional information on the Benchmark Index, its composition, calculation and rules for periodical review and rebalancing and on the general methodology behind the Benchmark Index can be found on the Internet at <https://www.bloomberg.com/professional/product/indices/bloomberg-barclays-indices>

For additional Information on the Index please refer to paragraph B “Investment made by Index Sub-Fund” of Section I “Investment Objective / Investment Powers and Restrictions” of the main part of this Prospectus and on APPENDIX F – BENCHMARK REGULATION.

INVESTMENT POLICY

The Sub-Fund will carry out its investment objective via a Direct Replication as described and in compliance with the section INVESTMENT OBJECTIVES of the part I/ Investment Objectives/ Investment Powers and Restrictions of this Prospectus.

Within the limits set forth in this Prospectus and on an ancillary basis, the Sub-Fund may hold cash and cash equivalents.

The Sub-Fund will not invest more than 10% of its assets in units or shares of other UCITS. No investment will be made in any UCIs.

INVESTMENT TECHNIQUES

The maximum and expected proportions of the Sub-Fund’s assets that can be subject to SFTs and TRS are disclosed in APPENDIX E - SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS.

The Sub-Fund intends to use from time to time securities lending transactions for one or more of

the following specific aims: (i) reduction of risk; (ii) reduction of cost; or (iii) generation of additional capital or income for the UCITS with a level of risk which is consistent with the risk profile of the UCITS and the risk diversification rules laid down in Article 52 of Directive 2009/65/EC of the European Parliament and of the Council of 13 July 2009 on the coordination of laws, regulations and administrative provisions relating to undertakings for collective investment in transferable securities.

APPENDIX 38

MULTI UNITS LUXEMBOURG – Amundi FTSE 100

The Sub-Fund is an index-tracking UCITS passively managed.

The Reference Currency of the Sub-Fund is the British Pound (GBP).

INVESTMENT OBJECTIVE

The investment objective of MULTI UNITS LUXEMBOURG - **Amundi FTSE 100** is to track both the upward and the downward evolution of the FTSE 100 Total Return Index (the "**Index**") denominated in GBP in order to offer an exposure to the performance of the 100 largest companies traded on the London Stock Exchange that pass screening for size and liquidity - while minimizing the volatility of the difference between the return of the Sub-Fund and the return of the Index ("**Tracking Error**").

For monthly hedged share classes mentioned in APPENDIX C - SUMMARY OF SHARES AND FEES, the Sub-Fund will also use a monthly currency-hedge strategy, in order to minimize the impact of the evolution of each respective share class currency against currencies of each Index component.

The anticipated level of the tracking error under normal market conditions is expected to be up to 0.05%.

THE INDEX

- **Index Objectives**

The Index consists of equities of 100 largest public companies listed on the London Stock Exchange that meet FTSE's eligibility criteria. The Index is a market-capitalisation weighted index of UK-listed blue chip companies.

- **Index Methodology**

The eligible universe of the Index is composed of securities that meet the following criteria:

- (i) Only premium Listed Equity Shares which have been admitted to trading to the London Stock Exchange with a Sterling denominated price on SETS.
- (ii) Eligible securities are required to pass screens for liquidity and free float as described in the FTSE Methodology.
- (iii) Companies are assigned UK nationality according to FTSE methodology.

The composition of the Index is reviewed and rebalanced on a quarterly basis in March, June, September and December.

A full description and the complete methodology used to construct the Index and information on the composition and respective weightings of the Index components are available on the FTSE website at www.ftse.com.

The performance monitored is that of the Index closing values computed by FTSE using the WM/Reuters Spot Rates™ at 16:00 UK time.

The rebalancing frequency as described above will have no impact in terms of costs in the context of the performance of the investment objective.

- **Additional Information on Index**

Additional information on the Index, its composition, calculation and rules for periodical review and rebalancing and on the general methodology behind the Index can be found on www.ftse.com.

For additional Information on the Index please refer to paragraph B "Investment made by Index Sub-Fund" of Section I "Investment Objective / Investment Powers and Restrictions" of the main part of this Prospectus and on APPENDIX F – BENCHMARK REGULATION.

INVESTMENT POLICY

The Sub-Fund will carry out its investment objective via an Indirect Replication as described and in compliance with the section INVESTMENT OBJECTIVES of the part I/ Investment Objectives/ Investment Powers and Restrictions of this Prospectus.

Within the limits set forth in this Prospectus and on an ancillary basis, the Sub-Fund may hold cash and cash equivalents.

The Sub-Fund will not invest more than 10% of its assets in units or shares of other UCITS. No investment will be made in any UCIs.

INVESTMENT TECHNIQUES

The maximum and expected proportions of the Sub-Fund's assets that can be subject to SFTs and TRS are disclosed in APPENDIX E - SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS.

ELIGIBILITY OF THE SUB-FUND

Please refer to Appendix APPENDIX G – SPECIFIC INVESTMENT RATIO for information regarding the Sub-Fund and the German Investment Funds Tax Act (InvStG-E) ("**GITA**").

TARGETED INVESTORS

The Sub-Fund is dedicated to both retail and institutional investors wishing to have an exposure to the large cap companies in the United Kingdom.

CLASSES OF SHARES AND FEES

The Sub-Fund will issue the Classes of Shares, subject to different terms and conditions described in APPENDIX C - SUMMARY OF SHARES AND FEES. Other Share Classes may be available. For a current listing of available Share Classes go to www.amundiETF.com.

APPENDIX 39

MULTI UNITS LUXEMBOURG – Amundi MSCI World V

The Sub-Fund is an index-tracking UCITS passively managed.

The Reference Currency of the Sub-Fund is the US dollar (USD).

INVESTMENT OBJECTIVE

The investment objective of the MULTI UNITS LUXEMBOURG – Amundi MSCI World V (the “Sub-Fund”) is to track both the upward and the downward evolution of the MSCI World Net Total Return USD Index (the “Index”) denominated in US Dollars and representative of large-cap and mid-cap companies listed on developed markets, while minimizing the volatility of the difference between the return of the Sub-Fund and the return of the Index (the “Tracking Error”).

The anticipated level of the tracking error under normal market conditions is expected to be up to 0.50%.

THE INDEX

- **Index Objectives**

The Index is a free float-adjusted market capitalization index that is designed to measure the performance of the large and mid cap segments across the developed market countries worldwide.

The Index’s aim is to represent 85% of the free float-adjusted market capitalisation of each developed country within the Index.

- **Index Methodology**

The Index is an equity index calculated and published by international index provider MSCI.

The Index is based on the MSCI Global Investable Market Indices methodology taking into account the size, liquidity and minimum free float criteria of the investable universe.

The Index is comprised solely of developed markets equity stocks and captures large and mid cap representation across developed market countries worldwide (which are composed, as of December 2017, of the following countries: Australia, Austria, Belgium, Canada, Denmark, Finland, France, Germany, Hong Kong, Ireland, Israel, Italy, Japan, the Netherlands, New Zealand, Norway, Portugal, Singapore, Spain, Sweden, Switzerland, the United Kingdom, the United States).

By targeting 85% of each country, the Index will reflect 85% of the total market capitalisation of the developed countries’ markets, while also reflecting their economic diversity.

The MSCI methodology and calculation method are based on a variable number of companies in the Index.

The Index is a net total return index. A net total return index calculates the performance of the index constituents on the basis that any dividends or distributions are included in the index returns after withholding tax retention.

The complete methodology for the Index (including maintenance and rebalancing of the Index) is available for consultation on the MSCI website: <http://www.msci.com>.

The composition of the Index is reviewed and rebalanced every 6 months (on May and November) with quarterly reviews in February, May, August and November.

The rebalancing frequency as described above will have no impact in terms of costs in the context of the performance of the investment objective.

- **Additional Information on Index**

Additional information on the Index, its composition, calculation and rules for periodical review and rebalancing and on the general methodology behind the Index can be found on the Internet at <https://www.msci.com/indexes>

DISCLAIMER

The Sub-Fund is in no way sponsored, endorsed, sold or promoted by MSCI Inc. (“MSCI”), nor by any MSCI subsidiary, nor by any of the entities

involved in establishing the MSCI indices. The MSCI indices are the sole property of MSCI, and the MSCI indices are trademarks registered by MSCI and its subsidiaries and have been licensed, for specific purposes, by Amundi Asset Management. Neither MSCI, nor any subsidiary of MSCI, nor any of the entities involved in producing or calculating the MSCI indices have made any statement or any warranty, either expressed or implied, to holders of units in the Sub-Fund or, more generally, to the general public, concerning the merits of trading in units of investment funds in general or in units of this Fund in particular or the ability of any MSCI index to track the performance of the global equities market. MSCI and its subsidiaries are the owners of certain names, registered trademarks and the MSCI indices, which are determined, constructed and calculated by MSCI without any consultation with Amundi Asset Management or the Sub-Fund. Neither MSCI, nor any MSCI subsidiary, nor any of the entities involved in the production of the MSCI indices are obliged to take into consideration the needs of Amundi Asset Management or holders of the Sub-Fund's units when determining, constructing or calculating the MSCI indices. Neither MSCI, nor any MSCI subsidiary, nor any of the entities involved in the production of the MSCI indices make any decision concerning the launch date, pricing, quantity of the Sub-Fund's units or the determination and calculation of the formula used to establish the Sub-Fund's net asset value. Neither MSCI, nor any MSCI subsidiary, nor any of the entities involved in the production of the MSCI indices accept any responsibility for or obligations concerning the administration, management or marketing of the Sub-Fund.

Although MSCI obtains data incorporated or used in the calculation of indices originating from sources that MSCI believes to be reliable, neither MSCI, nor any other party involved in the creation or calculation of the MSCI indices guarantees the accuracy and/or the completeness of the indices or any incorporated data. Neither MSCI nor any party involved in the creation or calculation of the MSCI indices makes any warranties, expressed or implied, concerning the results that the holder of a MSCI license, customers of said licensee, counterparties, fund unit holders or any other person or entity will achieve from the use of the indices or any incorporated data in relation to the rights licensed or for any other purpose.

Neither MSCI nor any other party makes any warranties, expressed or implied, and MSCI disclaims any warranties concerning the commercial value or suitability for a specific purpose of the indices or incorporated data.

Subject to the foregoing, under no circumstances shall MSCI or any other party be held liable for any loss, be it direct, indirect or other (including

loss of earnings) even if it is aware of the possibility of such a loss.

The Reference Currency of the Sub-Fund is the British Pound (GBP).

INVESTMENT OBJECTIVE

The investment objective of MULTI UNITS LUXEMBOURG - Lyxor Core UK Equity All Cap (DR) UCITS ETF (the "Sub-Fund") is to track both the upward and the downward evolution of the Morningstar UK NR Index (the "Index") denominated in GBP and representative of the United Kingdom's large and mid cap equity market - while minimizing the volatility of the difference between the return of the Sub-Fund and the return of the Index (the "Tracking Error").

The anticipated level of the tracking error under normal market conditions is expected to be up to 0.50%.

THE INDEX

- **Index Objectives**

The Index is a free float-adjusted market capitalization Index that is designed to measure the performance of the United Kingdom's large and mid-cap equity market.

The Index's aim is to represent 97% of the free float-adjusted market capitalization of the United Kingdom.

- **Index Methodology**

The Index is an equity index sponsored by international index provider Morningstar.

The Index is comprised solely of United Kingdom market equities and captures large and mid-cap representation across the United Kingdom market.

The Index is a net total return index. A net total return index calculates the performance of the index constituents on the basis that any dividends or distributions are included in the index returns after withholding tax retention.

The complete methodology for the Index (including maintenance and rebalancing of the Index) is available for consultation on the Morningstar website:
<http://www.morningstar.com/>

The composition of the Index is rebalanced quarterly in February, May, August and November.

The rebalancing frequency as described above will have no impact in terms of costs in the context of the performance of the investment objective.

The Index is also calculated in real time every Trading Day that is a Business Day.

The closing price of the Index is available on the Internet at <http://www.morningstar.com/>

- **Additional Information on Index**

Additional information on the Index, its composition, calculation and rules for periodical review and rebalancing and on the general methodology behind the Index can be found on <http://www.morningstar.com/>

For additional Information on the Index please refer to paragraph B "Investment made by Index Sub-Fund" of Section I "Investment Objective / Investment Powers and Restrictions" of the main part of this Prospectus and on APPENDIX F – BENCHMARK REGULATION.

INVESTMENT POLICY

The Sub-Fund will carry out its investment objective via a Direct Replication as described and in compliance with the section INVESTMENT OBJECTIVES of the part I/ Investment Objectives/ Investment Powers and Restrictions of this Prospectus.

Within the limits set forth in this Prospectus and on an ancillary basis, the Sub-Fund may hold cash and cash equivalents.

The Sub-Fund will not invest more than 10% of its assets in units or shares of other UCITS. No investment will be made in any UCIs.

INVESTMENT TECHNIQUES

The maximum and expected proportions of the Sub-Fund's assets that can be subject to SFTs and TRS are disclosed in APPENDIX E - SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS.

The anticipated level of the tracking error under normal market conditions is expected to be up to 0.50%.

THE INDEX

- **Index Objectives**

The Index is representative of the performance of large and mid cap stocks, across Developed Markets countries, issued by companies with robust Environmental, Social and Governance (ESG) ratings relative to their sector peers and/or which experienced a yearly improvement in these ESG ratings. Companies whose products or activities have negative social or environmental impacts are excluded from the Index, as further described in Appendix I – ESG Related Disclosures to this Prospectus.

- **Index Methodology**

The Index is an equity index calculated and published by the international index provider MSCI.

The composition of the Index is reviewed and rebalanced on an annual basis. There is a quarterly review and rebalancing of the Index to check whether constituents still comply with exclusion criteria.

The rebalancing frequency as described above will have no impact in terms of costs in the context of the performance of the investment objective.

The Index is a net total return index. A net total return index calculates the performance of the Index constituents on the basis that any dividends or distributions are reinvested net of any withholding tax applicable.

The complete methodology for the Index (including maintenance and rebalancing of the Index) is available for consultation on the index provider’s website: <http://www.msci.com>.

- **Additional Information on Index**

Additional information on the Index, its composition, calculation and rules for periodical review and rebalancing and on the general methodology behind the Index can be found on <http://www.msci.com>.

For additional Information on the Index please refer to paragraph B “Investment made by Index Sub-Fund” of Section I “Investment Objective / Investment Powers and Restrictions” of the main part of this Prospectus and on APPENDIX F – BENCHMARK REGULATION.

INVESTMENT POLICY

The Sub-Fund will carry out its investment objective via a Direct Replication as described and in compliance with the section INVESTMENT OBJECTIVES of the part I/ Investment Objectives/ Investment Powers and Restrictions of this Prospectus.

Within the limits set forth in this Prospectus and on an ancillary basis, the Sub-Fund may hold cash and cash equivalents.

The Sub-Fund will not invest more than 10% of its assets in units or shares of other UCITS. No investment will be made in any UCIs.

The Sub-Fund integrates Sustainability Risks and takes into account principal adverse impacts of investments on Sustainability Factors in its investment process as outlined in more detail in section “Sustainable Investing” of this

Prospectus and will not hold any securities of companies involved in the production or sale of controversial weapons, or companies in breach of international conventions on Human or Labor Rights, or companies involved in controversial industries: tobacco, Thermal coal, nuclear weapons or unconventional oil & gas as defined in section I "Investment Objectives/ Investment Powers and Restrictions".

SUSTAINABILITY RISKS

In managing the Sustainability Risks of this Sub-Fund, the Management Company relies on MSCI as the administrator of the Index, which identifies and integrates relevant and significant Sustainable Risks in its ESG Rating methodology. Such integration has therefore a direct impact on the investment universe of the Index. However, no insurance can be given that Sustainability Risks will be totally removed and the occurrence of such risks could cause a negative material impact on the value of the assets comprising the Index tracked or reflected by the Sub-Fund. For further information on MSCI ESG Rating methodology, please refer to: <http://www.msci.com>. Further information can

also be found in the "SUSTAINABLE INVESTING" Section of the Prospectus.

DISTRIBUTION OF INCOME

The Index is a price-weighted measure of 50 German mid-cap companies listed on the first segment of the Deutsche Börse.

- **Index Methodology**

The Index represents the performance of the 50 mid-cap stocks listed on the first segment of the German stock exchange (Deutsche Börse), which immediately follow the 30 stocks that comprise the DAX 30 index, in terms of market capitalisation and liquidity.

The Index is weighted by float-adjusted market capitalization, with the weight of each component being capped at 10% when the index is rebalanced.

The Index is a net total return index. A net total return index calculates the performance of the index constituents on the basis that any dividends or distributions are included in the index returns.

The performance tracked is that of the Index’s closing price.

The Index’s composition is revised annually and rebalanced quarterly.

A full description of the Index and its construction methodology and information on the composition and respective weightings of the Index components are available on the index provider’s website: www.dax-indices.com.

The rebalancing frequency as described above will have no impact in terms of costs in the context of the performance of the investment objective.

- **Additional Information on Index**

Additional information on the Index, its composition, calculation and rules for periodical review and rebalancing and on the general methodology behind the Index can be found on the index provider’s website: www.dax-indices.com.

For additional Information on the Index please refer to paragraph B “Investment made by Index Sub-Fund” of Section I “Investment Objective / Investment Powers and Restrictions” of the main part of this Prospectus and on APPENDIX F – BENCHMARK REGULATION.

INVESTMENT POLICY

The Sub-Fund will carry out its investment objective via an Indirect Replication as described and in compliance with the section INVESTMENT OBJECTIVES of the part I/ Investment Objectives/ Investment Powers and Restrictions of this Prospectus.

Within the limits set forth in this Prospectus and on an ancillary basis, the Sub-Fund may hold cash and cash equivalents.

APPENDIX 49

MULTI UNITS LUXEMBOURG – Amundi EUR Corporate Bond PAB Net Zero Ambition

The Sub-Fund is an index-tracking UCITS passively managed.

This Sub-Fund promotes environmental and/or social characteristics within the meaning of article 8 of SFDR, as further described in Appendix I – ESG Related Disclosures to this Prospectus.

The Reference Currency of the Sub-Fund is the Euro (EUR).

INVESTMENT OBJECTIVE

The investment objective of the MULTI UNITS LUXEMBOURG – Amundi EUR Corporate Bond PAB Net Zero Ambition (the “Sub-Fund”) is to track both the upward and the downward evolution of the Bloomberg MSCI Euro Corporate Paris Aligned Green Tilted Index (the “Index”) denominated in Euros and representative of the performance of the Euro denominated investment grade corporate bond market and which intends to meet and exceed the minimum standards of the EU Paris-aligned Benchmarks (the “EU PAB”) required under delegated acts supplementing Regulation (EU) 2019/2089 amending Regulation (EU) 2016/1011 (the “Benchmark Regulation”), while minimizing the volatility of the difference between the return of the Sub-Fund and the return of the Index (the “Tracking Error”).

For hedged share classes mentioned in APPENDIX C - SUMMARY OF SHARES AND FEES, the Sub-Fund will also use a monthly currency-hedge strategy, in order to minimize the impact of the evolution of each respective share class currency against currencies of each Index component.

The anticipated level of the tracking error under normal market conditions is expected to be up to 0.50%.

THE INDEX

- **Index Objectives**

The Index is constructed from the Bloomberg Euro Corporate Index (the “Parent Index”) and intends to be representative of the Euro denominated investment grade corporate bond market while meeting and exceeding the minimum standards of the EU PAB label, as further described in Appendix I – ESG Related Disclosures to this Prospectus. The index uses an optimization approach that aims to minimize the active total risk with respect to the Parent Index under constraints.

- **Index Methodology**

The Index is a bond index, calculated, maintained and published by Bloomberg Barclays.

The weight of each component is calculated based upon the market value of the bond. Bonds in the index are priced using bid prices. The initial price for new corporate issues entering the index is the offer price.

The Index is a total return index. A total return index calculates the performance of the index constituents on the basis that any dividends or distributions are included in the index returns.

A full description of the Index and its construction methodology and information on the composition and respective weightings of the Index components are available on the index provider's website at www.bloomberg.com/indices.

The composition of the Index is reviewed and rebalanced monthly.

The rebalancing frequency as described above will have an impact in terms of costs in the context of the performance of the investment objective. Particular costs incurred as a result of such rebalancing of the Index include additional transaction costs.

The performance tracked is that of the Index's closing price.

- **Additional Information on Index**

Additional information on the Index, its composition, calculation and rules for periodical review and rebalancing and on the general methodology behind the Index can be found on the Internet at www.bloomberg.com/indices

For additional information on the Index please refer to paragraph B “Investment made by Index Sub-Fund” of Section I “Investment Objective / Investment Powers and Restrictions” of the main part of this Prospectus and on APPENDIX F – BENCHMARK REGULATION.

INVESTMENT POLICY

- **Investment Objective**

The Sub-Fund will carry out its investment objective via a Direct Replication as described and in compliance with the section INVESTMENT OBJECTIVES of the part I/ Investment Objectives/ Investment Powers and Restrictions of this Prospectus.

Within the limits set forth in this Prospectus and on an ancillary basis, the Sub-Fund may hold cash and cash equivalents.

The Sub-Fund will not invest more than 10% of its assets in units or shares of other UCITS. No investment will be made in any UCIs.

The Sub-Fund integrates Sustainability Risks and takes into account principal adverse impacts of investments on Sustainability Factors in its investment process as outlined in more detail in section "Sustainable Investing" of this Prospectus and will not hold any securities of companies involved in the production or sale of controversial weapons, or companies in breach of international conventions on Human or Labor Rights, or companies involved in controversial industries: tobacco, Thermal coal, nuclear weapons or unconventional oil & gas as defined in section I "Investment Objectives/ Investment Powers and Restrictions".

More information on environmental and/or social characteristics can be found in Appendix I - ESG Related Disclosures to this Prospectus.

INVESTMENT TECHNIQUES

The maximum and expected proportions of the Sub-Fund's assets that can be subject to SFTs and TRS are disclosed in APPENDIX E - SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS.

ELIGIBILITY OF THE SUB-FUND

Please refer to Appendix APPENDIX G – SPECIFIC INVESTMENT RATIO for information regarding the Sub-Fund and the German Investment Funds Tax Act (InvStG-E) ("GITA").

TARGETED INVESTORS

The Sub-Fund is dedicated to both retail and institutional investors seeking exposure to the performance, whether positive or negative, of non-emerging corporate bond market, denominated in Euros. It aims to represent the performance of an investment strategy designed to meet and exceed the minimum standards of the EU PAB under the Benchmark Regulation and incorporates a broad range of climate-related objectives.

CLASSES OF SHARES AND FEES

The Sub-Fund will issue the Classes of Shares, subject to different terms and conditions described in APPENDIX C - SUMMARY OF SHARES AND FEES. Other Share Classes may be available. For a current listing of available Share Classes go to www.amundiETF.com.

DEFINITIONS

"Business Day", "Dealing Day" and "Valuation Day": Please refer to the APPENDIX H – GLOSSARY OF TERMS.

"Dealing Deadline": Please refer to the APPENDIX D – SUMMARY TABLE OF SUB-FUND'S DEALING TIMELINE.

LISTING

The Sub-Fund is a UCITS ETF. As a consequence all its Shares shall be traded throughout the day on one or several regulated market or multilateral trading facilities with at least one market maker which takes action to ensure that the stock exchange value of the Shares does not significantly vary from its iNAV (as defined above).

In the event of Suspension of the Secondary Market (as defined above in the Prospectus) the following exit charges will apply (in replacement of the maximum redemption charges stated above): 0.80% of the Net Asset Value per Share multiplied by the number of shares redeemed.

A list of these stock exchanges and/or multilateral trading facilities can be obtained from the registered office of the Company.

Information on the iNAV of an exchange-traded share are also provided in section "Indicative Net Asset Value per Share" of the main part of the Prospectus and on the website www.amundiETF.com.

PUBLICATION OF THE NET ASSET VALUE

The Net Asset Value per Share will be available at the registered office of the Company and will be published on www.amundiETF.com.

RISKS WARNING

Among the different risks described in APPENDIX B - SPECIAL RISK CONSIDERATIONS AND RISK FACTORS, the Sub-Fund is more specifically exposed to the following risks:

Interest Rate Risk, Credit risk, Capital at Risk, Sub-Fund Liquidity Risk, Liquidity Risk on Secondary Market, Low Diversification Risk, Capital Erosion Risks, Risks linked to Sampling and Optimization techniques, Specific Risk due to Credit Rating by different agencies, Risk that the Sub-Fund's investment objective is only partially achieved, Risk of using financial derivative instruments, Counterparty Risk, Collateral Management Risk, Currency Risk, Class Currency Hedge Risk, Market Risk linked to a controversy, Risk linked to ESG Methodologies, Risk related to ESG Score computation, Index Calculation Risk.

The Sub-Fund will also be exposed to the following risk:

Risk of unlimited bound on the difference in constituent weights to the Parent Index

The objective function for the optimization is to minimize active total risk between the Index and the Parent Index. However, with any 1.5°C scenario aligned strategy, there is an absolute decarbonization target which must be hit to fulfil

this 1.5°C alignment. As the level of emission reduction required for a 1.5°C scenario is absolute (as laid out by the TEG (The EU Technical Expert Group on Sustainable Finance, 2019)), the Index is designed to decarbonize on a year-on-year basis. The relative carbon footprint reduction required, at any point in time, to hit this target will therefore be dependent on the decarbonization of the Parent Index. The required footprint reduction would be amplified by a lack of decarbonization (or increased carbon footprint) in the Parent Index. Such a scenario may require an increasing level of difference in constituent weights to the Parent Index through time to achieve the desired target. Therefore, historical, back-tested tracking error may not be fully indicative of future, realized tracking error if such a situation was to become particularly extreme. Therefore future tracking error between the Index and the Parent Index can never completely be explicitly capped.

Risk of the EU PAB label withdrawal

The Index has been designed to qualify for the label 'EU Paris-aligned benchmarks ("EU PAB")'.

Therefore, it is intended to receive the associated label EU PAB. For the Index to meet the regulation, among other constraints the Index must reduce its carbon intensity at 7% year-on-year, using average weights throughout the period. The Index is designed to be compliant at each rebalance. However, the weights of companies, their carbon emissions and enterprise value (which is the denominator in the calculation of carbon intensity) can change between rebalances. To avoid window-dressing, the regulation ensures Index reporting is based on average weights between rebalances. Therefore, even if the Index is compliant at each rebalance, it may not necessarily maintain the label based on reports using average weights. Moreover, in a situation where too many companies of the Parent Index increase their absolute carbon emissions over a long period, the Index could fail to fulfil some minimum standards of EU Paris-aligned benchmarks and as a result lose its label.

Risk of unsolvable optimizations

The Index methodology is using an optimization methodology. With any use of optimization, it is not always possible to find a solution that meets all constraints simultaneously. It is prudent to be aware that increases in future relative carbon footprint reductions, or unforeseeable changes in the exclusions or other datasets may have the potential to cause unsolvable optimizations in the future. For this reason, a hierarchy of constraint relaxation has been set in the methodology of the Index to further minimize the risk of unsolvable solutions.

Risk related to the carbon data used in methodology of the Index

The analysis of companies' current and future greenhouse gas emission is partly based on declarative data, models and estimates. In the

current state of the available data, all greenhouse gas emission data are not available, and some are model based (in particular those related to scope 3 which includes all greenhouse gas emissions that are not directly related to manufacturing of a product).

Risk related the components of the Index

The methodology of the Index does not prevent to incorporate highly Greenhouse gas emitting companies' securities.

SUSTAINABILITY RISKS

In managing the Sustainability Risks of this Sub-Fund, the Management Company relies on Bloomberg Barclays as the administrator of the Index, which identifies and integrates relevant and significant Sustainable Risks using MSCI ESG Rating methodology. Such integration has therefore a direct impact on the investment universe of the Index. However, no insurance can be given that Sustainability Risks will be totally removed and the occurrence of such risks could cause a negative material impact on the value of the assets comprising the Index tracked or reflected by the Sub-Fund.

For further information on MSCI ESG Rating methodology and the Index, please refer to: www.bloomberg.com/Indices. Further information can also be found in the "SUSTAINABILITY-RELATED DISCLOSURES" Section of the Prospectus.

APPENDIX 50

MULTI UNITS LUXEMBOURG – Amundi EUR Corporate Bond ex-Financials ESG

The Sub-Fund is an index-tracking UCITS passively managed.

This Sub-Fund promotes environmental and/or social characteristics within the meaning of article 8 of SFDR, as further described in Appendix I – ESG Related Disclosures to this Prospectus.

The Reference Currency of the Sub-Fund is the Euro (EUR).

INVESTMENT OBJECTIVE

The investment objective of the MULTI UNITS LUXEMBOURG – Amundi EUR Corporate Bond ex-Financials ESG (the “Sub-Fund”) is to track both the upward and the downward evolution of the Bloomberg Barclays MSCI EUR Corporate Liquid ex Financial SRI Sustainable Index (the “Index”) denominated in Euros and representative of the performance of the non-financial investment grade corporate bond market denominated in Euros, while minimizing the volatility of the difference between the return of the Sub-Fund and the return of the Index (the “Tracking Error”).

For Monthly hedged share classes mentioned in APPENDIX C - SUMMARY OF SHARES AND FEES, the Sub-Fund will also use a monthly currency-hedge strategy, in order to minimize the impact of the evolution of each respective share class currency against currencies of each Index component.

The anticipated level of the tracking error under normal market conditions is expected to be up to 0.50%.

THE INDEX

- **Index Objectives**

The Index offers exposure to the Euro denominated investment grade bond market issued by non-financials companies meeting ESG requirements as further described in Appendix I – ESG Related Disclosures to this Prospectus.

- **Index Methodology**

The Index is a bond index, calculated, maintained and published by Bloomberg Barclays Indices.

The weight of each component is calculated based upon the market value of the bond. Bonds in the index are priced using bid prices. The initial price for new corporate issues entering the index is the offer price.

The Index is a total return index. A total return index calculates the performance of the index

constituents on the basis that any dividends or distributions are included in the index returns.

A full description of the Index and its construction methodology and information on the composition and respective weightings of the Index components are available on the index provider's website at <https://www.bloomberg.com/professional/product/indices/bloomberg-barclays-indices/>.

APPENDIX 51

MULTI UNITS LUXEMBOURG – Amundi Bloomberg Equal-weight Commodity ex-Agriculture

The Sub-Fund is an index-tracking UCITS passively managed.

The Reference Currency of the Sub-Fund is the Euro (EUR).

INVESTMENT OBJECTIVE

The investment objective of the MULTI UNITS LUXEMBOURG – Amundi Bloomberg Equal-weight Commodity ex-Agriculture (the “**Sub-Fund**”) is to track both the upward and the downward evolution of the Bloomberg Energy & Metals Equal-Weighted Total Return Index (the “**Index**”) denominated in US Dollars and converted in Euros, representative of the commodities market and more specifically of the energy, base metals and precious metals markets, while minimizing the volatility of the difference between the return of the Sub-Fund and the return of the Index (the “**Tracking Error**”).

For hedged share classes mentioned in APPENDIX C - SUMMARY OF SHARES AND FEES, the Sub-Fund will also use a monthly currency-hedge strategy, in order to minimize the impact of the evolution of each respective share class currency against currencies of each Index component.

The anticipated level of the Tracking Error under normal market conditions is expected to be up to 0.50%.

THE INDEX

• **Index Objectives**

The Index is representative of the commodities market and more specifically of the energy, base metals and precious metals markets, excluding agricultural products.

It tracks the changes in the prices of the futures contracts on energy, base metals and precious metals.

• **Index Methodology**

The Index reflects the performance of an equal-weighted basket of 12 energy and metal (base & precious) commodity futures contracts. The Index reflects the changes in the prices of the futures contracts on these commodities.

These futures contracts are listed on exchanges in the United States (CME) ,in Europe (ICE Europe) and United Kingdom (LME).

A monthly mechanism of sell/buy (“**Roll**”) allows changing the contracts included in the Index.

Exchange	Commodity	Commodity weight on Roll dates
CME	Natural Gas (HH)	1/12
CME	Crude Oil (WTI)	1/12
ICE Europe	Brent Crude Oil	1/12
ICE Europe	Low Sulphur Gas Oil	1/12
LME	Aluminium	1/12
LME	Copper	1/12
LME	Zinc	1/12
LME	Nickel	1/12
CME	Platinum	1/12
CME	Palladium	1/12
CME	Silver	1/12
CME	Gold	1/12

On each Roll, each constituent’s weight is also readjusted to maintain uniform exposure to each constituent and preserve the above level of diversification.

The Index is a “total return index” (i.e. all coupons detached by the components of the Index are reinvested in the Index).

The performance tracked is that of the Index’s closing price.

The Index is rebalanced on a quarterly basis on close of the last Business Day in January, April, July, and October.

A full description of the Index and its construction methodology and information on the composition and respective weightings of the Index components are available on the index provider’s website:

<https://www.bloomberg.com/professional/product/indices/bloomberg-commodity-index-family/>.

The rebalancing frequency as described above will have an impact in terms of costs in the context of the performance of the investment objective.

• **Additional Information on Index**

Additional information on the Index, its composition, calculation and rules for periodical review and rebalancing and on the general methodology behind the Index can be found on the index provider’s website: <https://www.bloomberg.com/professional/product/indices/bloomberg-commodity-index-family/>.

APPENDIX 52

MULTI UNITS LUXEMBOURG – Amundi Euro Highest Rated Macro-Weighted Government Bond 1-3Y

The Sub-Fund is an index-tracking UCITS passively managed.

The Reference Currency of the Sub-Fund is the Euro (EUR).

INVESTMENT OBJECTIVE

The investment objective of MULTI UNITS LUXEMBOURG - **Amundi Euro Highest Rated Macro-Weighted Government Bond 1-3Y** (the “**Sub-Fund**”) is to reflect the performance of the FTSE MTS Highest Rated Macro-Weighted Government Bond 1-3Y (Mid Price) index (the “**Benchmark Index**”) denominated in Euros and representative of the performance of Eurozone government bonds within the maturity range of 1 to 3 years, while minimizing the volatility of the difference between the return of the Sub-Fund and the return of the Benchmark Index (the “**Tracking Error**”).

The anticipated level of the tracking error under normal market conditions is expected to be up to 0.10%.

THE BENCHMARK INDEX

- **Benchmark Index Objectives**

The Benchmark Index offers an exposure to the performance of the Eurozone government bond segment within the maturity range of 1 to 3 years and more specifically to Eurozone countries with at least two AAA or equivalent credit ratings from the three main rating agencies.

- **Benchmark Index Methodology**

The Benchmark Index is composed of bonds issued by the governments of certain Eurozone Members States with the highest credit ratings, weighted on the basis of macroeconomic indicators. The Benchmark Index comprises a minimum of five issuers.

The Benchmark Index components are selected using the same criteria as those used for the other FTSE MTS Eurozone Government Broad indices (except for the credit rating criterion), described below.

To qualify for the Benchmark Index bonds must meet the following criteria:

(i) principal and coupons must be denominated in Euro, there must be no embedded options or convertibility and maturity must be within the maturity range of 1 to 3 years;

(ii) bonds must be issued by certain sovereign governments of the Eurozone and selected by FTSE MTS among a list of countries having at least two AAA ratings issued by the credit-rating agencies Standard & Poor's, Moody's and Fitch;

(iii) bonds must be quoted on the MTS Platform;

(iv) bonds must have minimum outstanding amount of €2 billion.

The composition of the Benchmark Index is reviewed and rebalanced each month.

The performance tracked is that of the Benchmark Index's closing price at 5:15 pm (CET).

The Benchmark Index is a total return index. A total return index calculates the performance of the index constituents on the basis that any dividends or distributions are included in the index returns.

The complete methodology (including maintenance and rebalancing of the Benchmark Index) is available at:

<http://www.ftse.com/products/indices/ftsemts>

The rebalancing frequency as described above will have no impact in terms of costs in the context of the performance of the investment objective.

- **Additional Information on Benchmark Index**

Additional information on the Benchmark Index, its composition, calculation and rules for periodical review and rebalancing and on the general methodology behind the Benchmark Index can be found on the Internet at <http://www.ftse.com/products/indices/ftsemts>

For additional Information on the Index please refer to paragraph B “Investment made by Index Sub-Fund” of Section I “Investment Objective / Investment Powers and Restrictions” of the main part of this Prospectus and on APPENDIX F – BENCHMARK REGULATION.

INVESTMENT POLICY

The Sub-Fund will carry out its investment objective via a Direct Replication as described and in compliance with the section INVESTMENT OBJECTIVES of the part I/ Investment Objectives/ Investment Powers and Restrictions of this Prospectus.

Within the limits set forth in this Prospectus and on an ancillary basis, the Sub-Fund may hold cash and cash equivalents.

The Sub-Fund will not invest more than 10% of its assets in units or shares of other UCITS. No investment will be made in any UCIs.

INVESTMENT TECHNIQUES

The maximum and expected proportions of the Sub-Fund's assets that can be subject to SFTs and TRS are disclosed in APPENDIX E - SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS.

The Sub-Fund intends to use from time to time securities lending transactions for one or more of the following specific aims: (i) reduction of risk; (ii) reduction of cost; or (iii) generation of additional capital or income for the UCITS with a level of risk which is consistent with the risk profile of the UCITS and the risk diversification rules laid down in Article 52 of Directive 2009/65/EC of the European Parliament and of the Council of 13 July 2009 on the coordination of laws, regulations and administrative provisions relating to undertakings for collective investment in transferable securities.

ELIGIBILITY OF THE SUB-FUND

Please refer to Appendix APPENDIX G – SPECIFIC INVESTMENT RATIO for information regarding the Sub-Fund and the German Investment Funds Tax Act (InvStG-E) (“GITA”).

TARGETED INVESTORS

The Sub-Fund is dedicated to both retail and institutional investors wishing to have an exposure to bonds issued by Eurozone Member States with at least two AAA or equivalent credit ratings from the three rating agencies S&P, Moody's and Fitch.

CLASSES OF SHARES AND FEES

APPENDIX 53

MULTI UNITS LUXEMBOURG – Amundi Euro Highest Rated Macro-Weighted Government Bond 3-5Y

The Sub-Fund is an index-tracking UCITS passively managed.

The Reference Currency of the Sub-Fund is the Euro (EUR).

INVESTMENT OBJECTIVE

The investment objective of MULTI UNITS LUXEMBOURG - Amundi Euro Highest Rated Macro-Weighted Government Bond 3-5Y (the “Sub-Fund”) is to reflect the performance of the FTSE MTS Highest Rated Macro-Weighted Government Bond 3-5Y (Mid Price) index (the “Benchmark Index”) denominated in Euros and representative of the performance of Eurozone government bonds within the maturity range of 3 to 5 years, while minimizing the volatility of the difference between the return of the Sub-Fund and the return of the Benchmark Index (the “Tracking Error”).

The anticipated level of the tracking error under normal market conditions is expected to be up to 0.10%.

THE BENCHMARK INDEX

- **Benchmark Index Objectives**

The Benchmark Index offers an exposure to the performance of the Eurozone government bond segment within the maturity range of 3 to 5 years and more specifically to Eurozone countries with at least two AAA or equivalent credit ratings from the three main rating agencies.

- **Benchmark Index Methodology**

The Benchmark Index is composed of bonds issued by the governments of certain Eurozone Members States with the highest credit ratings, weighted on the basis of macroeconomic indicators. The Benchmark Index comprises a minimum of five issuers.

The Benchmark Index components are selected using the same criteria as those used for the other FTSE MTS Eurozone Government Broad indices (except for the credit rating criterion), described below.

To qualify for the Benchmark Index bonds must meet the following criteria:

- (j) principal and coupons must be denominated in Euro, there must be no embedded options or convertibility and maturity must be within the maturity range of 3 to 5 years;

- (ii) bonds must be issued by certain sovereign governments of the Eurozone and selected by FTSE MTS among a list of countries having at least two AAA ratings issued by the credit-rating agencies Standard & Poor's, Moody's and Fitch;

- (iii) bonds must be quoted on the MTS Platform;

- (iv) bonds must have minimum outstanding amount of €2 billion.

The composition of the Benchmark Index is reviewed and rebalanced each month.

The performance tracked is that of the Benchmark Index's closing price at 5:15 pm (CET).

The Benchmark Index is a total return index. A total return index calculates the performance of the index constituents on the basis that any dividends or distributions are included in the index returns.

The complete methodology (including maintenance and rebalancing of the Benchmark Index) is available at:

<http://www.ftse.com/products/indices/ftsemts>

The rebalancing frequency as described above will have no impact in terms of costs in the context of the performance of the investment objective.

- **Additional Information on Benchmark Index**

Additional information on the Benchmark Index, its composition, calculation and rules for periodical review and rebalancing and on the general methodology behind the Benchmark Index can be found on the Internet at <http://www.ftse.com/products/indices/ftsemts>

Among the different risks described in APPENDIX B - SPECIAL RISK CONSIDERATIONS AND RISK FACTORS, the Sub-Fund is more specifically exposed to the following risks:

INVESTMENT POLICY

The Sub-Fund will carry out its investment objective via a Direct Replication as described and in compliance with the section INVESTMENT OBJECTIVES of the part I/ Investment Objectives/ Investment Powers and Restrictions of this Prospectus.

Within the limits set forth in this Prospectus and on an ancillary basis, the Sub-Fund may hold cash and cash equivalents.

The Sub-Fund will not invest more than 10% of its assets in units or shares of other UCITS. No investment will be made in any UCIs.

INVESTMENT TECHNIQUES

The maximum and expected proportions of the Sub-Fund's assets that can be subject to SFTs and TRS are disclosed in APPENDIX E - SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS.

The Sub-Fund intends to use from time to time securities lending transactions for one or more of the following specific aims: (i) reduction of risk; (ii) reduction of cost; or (iii) generation of additional capital or income for the UCITS with a level of risk which is consistent with the risk profile of the UCITS and the risk diversification rules laid down in Article 52 of Directive 2009/65/EC of the European Parliament and of the Council of 13 July 2009 on the coordination of laws, regulations and administrative provisions relating to undertakings for collective investment in transferable securities.

ELIGIBILITY OF THE SUB-FUND

Please refer to Appendix APPENDIX G – SPECIFIC INVESTMENT RATIO for information regarding the Sub-Fund and the German Investment Funds Tax Act (InvStG-E) (“GITA”).

TARGETED INVESTORS

The Sub-Fund is dedicated to both retail and institutional investors wishing to have an exposure to bonds issued by Eurozone Member States with at least two AAA or equivalent credit ratings from the three rating agencies S&P, Moody's and Fitch.

APPENDIX 54

MULTI UNITS LUXEMBOURG – Amundi MSCI China

The Sub-Fund is an index-tracking UCITS passively managed.

The Reference Currency of the Sub-Fund is the US dollar (USD).

INVESTMENT OBJECTIVE

The investment objective of **MULTI UNITS LUXEMBOURG - Amundi MSCI China** (the “Sub-Fund”) is to track both the upward and the downward evolution of the MSCI China Net Total Return USD Index (the “Index”) denominated in USD and representative of the Chinese economy through an exposure to large and medium capitalization companies, while minimizing the volatility of the difference between the return of the Sub-Fund and the return of the Index (the “Tracking Error”).

For monthly hedged share classes mentioned in APPENDIX C - SUMMARY OF SHARES AND FEES, the Sub-Fund will also use a monthly currency-hedge strategy, in order to minimize the impact of the evolution of each respective share class currency against currencies of each Index component.

The anticipated level of the tracking error under normal market conditions is expected to be up to 2%.

THE INDEX

- **Index Objectives**

Throughout this Appendix, the term “mainland China” will refer to People’s Republic of China (“PRC”) excluding the special administrative regions of Hong Kong and Macau.

The Index provides an exposure to the large and medium capitalization segment of the MSCI China universe as defined in the MSCI Global Investable Market Indexes Methodology.

The Index’ components are accessible by non-domestic mainland China investors.

The MSCI China universe includes companies incorporated in mainland China. Otherwise, companies not incorporated in mainland China may be eligible to the MSCI China universe if they are closely linked to mainland China for instance through the geographic distribution of their operations (in terms of assets and revenues) or the geographic distribution of the companies’ shareholders.

As of March 2018, the Index includes mainly shares listed in Hong Kong and in the United States of America.

Starting June 2018, A shares large capitalization (companies incorporated in mainland China and traded on the Shanghai or Shenzhen Stock Exchange in renminbi (RMB) will be partially included in the Index. In September 2018, after the completion of this partial inclusion, the weight of A shares in the Index will be marginal. Eligible A shares to this partial inclusion are those accessible by non-domestic mainland China investors through the Shanghai-Hong Kong Stock Connect or the Shenzhen-Hong Kong Stock Connect.

- **Index Methodology**

The Index is available in real time via Reuters and Bloomberg.

The Index is a market capitalization adjusted weighted index. The process of adjusting market capitalization can be found on the MSCI Global Investable Market Indexes Methodology.

The monitored performance is based on the closing prices of the Index.

The complete methodology is available at www.msci.com

The Index is calculated by MSCI.

The MSCI methodology and calculation method results in a variable number of companies in the Index.

The composition of this Index is reviewed and rebalanced on a quarterly basis (February, May, August and November).

A full description and the complete methodology for construction of the Index and information on the composition and respective weightings of the Index is available on the website: www.msci.com.

The rebalancing frequency as described above will have no impact in terms of costs in the context of the performance of the investment objective.

The Index is a net total return index. A net total return index calculates the performance of the Index’ constituents on the basis that any dividends or distributions are reinvested net of any withholding tax applicable.

- **Additional Information on Index**

Additional information on the Index, its composition, calculation and rules for periodical review and rebalancing and on the general methodology behind the Index can be found on <http://www.msci.com>.

For additional Information on the Index please refer to paragraph B “Investment made by Index Sub-Fund” of Section I “Investment Objective / Investment Powers and Restrictions” of the main part of this Prospectus and on APPENDIX F – BENCHMARK REGULATION.

INVESTMENT POLICY

The Sub-Fund will carry out its investment objective via an Indirect Replication as described and in compliance with the section INVESTMENT OBJECTIVES of the part I/ Investment Objectives/ Investment Powers and Restrictions of this Prospectus.

Within the limits set forth in this Prospectus and on an ancillary basis, the Sub-Fund may hold cash and cash equivalents.

The Sub-Fund will not invest more than 10% of its assets in units or shares of other UCITS. No investment will be made in any UCIs.

INVESTMENT TECHNIQUES

The maximum and expected proportions of the Sub-Fund's assets that can be subject to SFTs and TRS are disclosed in APPENDIX E - SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS.

ELIGIBILITY OF THE SUB-FUND

Please refer to Appendix APPENDIX G – SPECIFIC INVESTMENT RATIO for information regarding the Sub-Fund and the German Investment Funds Tax Act (InvStG-E) (“GITA”).

TARGETED INVESTORS

The Sub-Fund is dedicated to both retail and institutional investors wishing to have an exposure to the performance of large and medium capitalization companies reflecting the Chinese economy.

CLASSES OF SHARES AND FEES

The Sub-Fund will issue the Classes of Shares, subject to different terms and conditions described in APPENDIX C - SUMMARY OF SHARES AND FEES. Other Share Classes may be available. For a current listing of available Share Classes go to www.amundiETF.com.

DEFINITIONS

“Business Day”, “Dealing Day” and “Valuation Day”: Please refer to the APPENDIX H – GLOSSARY OF TERMS.

“Dealing Deadline”: Please refer to the APPENDIX D – SUMMARY TABLE OF SUB-FUND'S DEALING TIMELINE.

LISTING

The Sub-Fund is a UCITS ETF. As a consequence, all its Shares shall be traded throughout the day on one or several regulated market or multilateral trading facilities with at least one market maker which takes action to ensure that the stock exchange value of the

Shares does not significantly vary from its iNAV (as defined above).

In the event of Suspension of the Secondary Market (as defined above in the Prospectus) the following exit charges will apply (in replacement of the maximum redemption charges stated above): 1% of the Net Asset Value per Share multiplied by the number of shares redeemed.

A list of these stock exchanges and/or multilateral trading facilities can be obtained from the registered office of the Company.

Information on the iNAV of an exchange-traded share are also provided in section “Indicative Net Asset Value per Share” of the main part of the Prospectus and on the website www.amundiETF.com.

PUBLICATION OF THE NET ASSET VALUE

The Net Asset Value per Share will be available at the registered office of the Company and will be published on <http://www.amundiETF.com>.

RISKS WARNING

Among the different risks described in APPENDIX B - SPECIAL RISK CONSIDERATIONS AND RISK FACTORS, the Sub-Fund is more specifically exposed to the following risks:

Equity Risk, Capital at Risk, Sub-Fund Liquidity Risk, Liquidity Risk on Secondary Market, Risks linked to the investment in Medium Capitalization Stocks, Risk of investment in Emerging and Developing Markets, Risk that the Sub-Fund's investment objective is only partially achieved, Risk of using financial derivative instruments, Counterparty Risk, Collateral Management Risk, Currency Risk, Class Currency Hedge Risk, Index Calculation Risk.

Specific risk of investing in the People's Republic of China:

Investors in the Sub-fund should be aware of the following risks inherent to investments in the People's Republic of China (PRC):

- Stock Connect Programs risks

The Sub-Fund will trade A-shares via the Shanghai Hong-Kong Stock Connect or the Shenzhen Hong-Kong Stock Connect (“the Stock Connect Programs”). As of the date of this publication, the Stock Connect Programs impose a daily quota on the total net purchase orders that may be executed on a Chinese stock exchange. If this quota is exceeded, purchase orders on the Stock Connect Programs will be automatically suspended (at least temporarily), which could impair the Sub-fund's capacity to achieve its investment objective.

- Economic, political and social risks

Investing in the PRC may involve certain risks not typically associated with investment in more developed economies or markets, such as greater economic, political and social uncertainties.

Indeed, the Chinese Government retains a high degree of control over the economy and any unexpected political change, social instability, insecurity and/or adverse diplomatic, political, economic or social developments in the PRC or related to the PRC (together a "Political Change"), could lead to additional actions and restrictions potentially having sudden and widespread effects, such as expropriation, confiscatory taxation or nationalization of companies included in the Sub-Fund. Any Political Change could adversely affect the economy and stock exchanges of the PRC and subsequently the value of the Sub-Fund's investments and could eventually cause the dissolution of the Sub-Fund by decision of the Board of Directors.

- Economic risks in PRC

The PRC economy has grown very rapidly. It is, however, not certain that this growth will continue and it may be irregular across the different sectors of the PRC economy. The PRC government has from time to time put in place various measures to prevent an excessively sharp acceleration of the business cycle and the transition of the country's economy from a socialist economy to one that is more market-oriented has caused economic and social tensions that could stop this transition or compromise its success. Any of these risks could diminish the Sub-fund's performance.

- PRC legal system risk

The legal system in PRC is based on statutory law. However, some regulations have yet to be implemented and there is no assurance that they will actually ever be implemented in their entirety. In particular PRC regulations on the control of exchange rates are relatively recent and their application is still quite uncertain. Moreover, these regulations give the Chinese authorities (and in particular the China Securities Regulatory Commission – "CSRC" and the State Administration of Foreign Exchange – "SAFE") broad discretion in their respective interpretation of the regulations, which leaves uncertainty as to how they might be applied and used. Any of these risks could diminish the Sub-Fund's performance.

- Accounting and reporting standards

Accounting, auditing and financial reporting standards and practices applicable to companies in the PRC may differ from those in countries that have more developed financial markets. These differences may lie in areas such as different valuation methods of the properties and assets, and the requirements for disclosure of

information to investors. As a consequence, information available about the PRC companies may not be as complete, accurate or timely as information available on companies listed in other more developed economies or markets.

- Risk that trading is suspended

Trading in the Index constituents may be temporarily suspended, making it impossible for the Sub-Fund to value these securities correctly and/or buy or sell them.

SUSTAINABILITY RISKS

This Sub-Fund does not promote ESG characteristics and does not maximize portfolio alignment with Sustainability Factors, however it remains exposed to Sustainability Risks and the occurrence of such risks could cause a negative material impact on the value of the investments made by the Sub-Fund. Further information can be found in the "SUSTAINABLE INVESTING" Section of the Prospectus.

TAXONOMY REGULATION

In accordance of article 7 of the Taxonomy Regulation, the Management Company draws the attention of investors to the fact that the investments underlying this Sub-Fund do not take into account the European Union criteria for environmentally sustainable economic activities.

DISTRIBUTION OF INCOME

Please refer to the Distribution Policy section of the Prospectus.

DISCLAIMER

The Sub-Fund is in no way sponsored, endorsed, sold or promoted by MSCI Inc. ("MSCI"), nor by any MSCI subsidiary, nor by any of the entities involved in establishing the MSCI indices. Sub-Fund's units when determining, constructing or calculating the MSCI indices. Neither MSCI, nor any MSCI subsidiary, nor any of the entities involved in the production of the MSCI indices make any decision concerning the launch date, pricing, quantity of the Sub-Fund's units or the determination and calculation of the formula used to establish the Sub-Fund's net asset value. Neither MSCI, nor any MSCI subsidiary, nor any of the entities involved in the production of the MSCI indices accept any responsibility for or obligations concerning the administration, management or marketing of the Sub-Fund.

Although MSCI obtains data incorporated or used in the calculation of indices originating from sources that MSCI believes to be reliable, neither MSCI, nor any other party involved in the creation or calculation of the MSCI indices guarantees the accuracy and/or the completeness of the indices or any incorporated data. Neither MSCI nor any party involved in the creation or calculation of the MSCI indices makes any warranties, expressed or implied, concerning the results that the holder of a MSCI license, customers of said licensee, counterparties, fund unit holders or any other person or entity will achieve from the use of the indices or any incorporated data in relation to the rights licensed or for any other purpose.

Neither MSCI nor any other party makes any warranties, expressed or implied, and MSCI disclaims any warranties concerning the commercial value or suitability for a specific purpose of the indices or incorporated data. Subject to the foregoing, under no circumstances shall MSCI or any other party be held liable for any loss, be it direct, indirect or other (including loss of earnings) even if it is aware of the possibility of such a loss.

APPENDIX 55

MULTI UNITS LUXEMBOURG – Amundi US Inverse Inflation Expectations 10Y

The Sub-Fund is an index-tracking UCITS passively managed.

The Reference Currency of the Sub-Fund is the US Dollar (USD).

INVESTMENT OBJECTIVE

The investment objective of MULTI UNITS LUXEMBOURG - Amundi US Inverse Inflation Expectations 10Y is to reflect the performance of the “iBoxx USD Inverse Breakeven 10-Year Inflation Index” (the “**Benchmark Index**”) denominated in USD, in order to offer an exposure to a short position in U.S. 10-year Treasury inflation-Protected securities (TIPS) and a long position in U.S. Treasury bonds with adjacent durations.

For monthly hedged share classes mentioned in APPENDIX C - SUMMARY OF SHARES AND FEES, the Sub-Fund will also use a monthly currency-hedge strategy, in order to minimize the impact of the evolution of each respective share class currency against currencies of each Index component.

THE BENCHMARK INDEX

- **Benchmark Index Objectives**

The Benchmark Index is representative of the performance of a short position in the 6 last issuances of U.S. 10-year Treasury Inflation-Protected securities (the “**TIPS**”) and a long position in U.S. Treasury bonds with adjacent durations without any issuance exceeding 30% at any rebalancing date.

The difference in yield (or “spread”) between nominal bonds and inflation linked bonds is commonly referred to as a “breakeven rate of inflation” (“**BEI**”) and is considered to be a measure of the market’s expectations for inflation over a specified period of time.

The difference in yield between inflation-linked bonds and nominal bonds is equal to the opposite of the BEI, has no economic significance and may be referred to as the “inverse BEI”.

- **Benchmark Index Methodology**

The Benchmark Index is designed to provide an inverse exposure to changes in inflation expectation priced by the market by entering into:

- a short position in the last 6 U.S. 10-year TIPS issued;
- a long position in U.S. Treasury bonds with adjacent durations.

U.S. 10-year TIPS are indexed to the US Consumer Price Index.

The combination of long and short positions removes the noise related to duration of fixed income securities, allowing for exposure, mainly but not limited to, inverse changes in the market’s expectations for 10Y inflation.

The daily Benchmark Index performance will not be the inverse daily change of the BEI, nor a multiplier of the inverse daily change, but the daily over performance of the long nominal basket versus the short inflation linked basket, which is in theory inversely correlated to the changes in the inflation expected by the market at the bonds maturity, represented by the BEI for such maturity.

In theory, a decrease in the x years inflation expectation shall lead to a relative increase of the price of the nominal bond with x years maturity versus the price of the equivalent inflation-linked bond and thus an increase in the performance of a long position in the nominal bond and a short position in the inflation linked bond. The Benchmark Index being composed of a short position in several inflation-linked bonds and a long position in several nominal bonds with several maturities, the Benchmark Index performance will not be linked to the sole inverse 10 year inflation expectation but will be linked to the weighted average inflation expectations at the maturities corresponding to the bonds comprising the basket. In addition, (i) price movements due to supply and demand discrepancies between inflation-linked bonds and corresponding nominal bonds, (ii) transactions costs applicable to the Benchmark Index components, and (iii) seasonality cycles and potential negative carry positions due to seasonality (see the specific risk factor hereafter) will lead to deviations between the Benchmark Index performance and inverse inflation expectations.

Please also note that the Benchmark Index is not designed to measure the realized rate of inflation or disinflation, nor does it seek to replicate the returns of any index or measure of actual consumer price levels. However, on short periods realized inflation will have an impact on the performance of the Benchmark Index, typically when realized inflation over a period of time differs from market expectation during the same period.

The composition of the Benchmark Index is reviewed and rebalanced each month.

The Benchmark Index is a « total return » index (i.e. all coupons detached by the components of the index are reinvested in the Benchmark Index).

The complete methodology for the Benchmark Index (including maintenance and rebalancing of the Benchmark Index) is available for consultation on the following <https://ihsmarkit.com/products/iboxx.html>.

- **Additional Information on Benchmark Index**

Additional information on the Benchmark Index, its composition, calculation and rules for periodical review and rebalancing and on the general methodology behind the Benchmark Index can be found on <https://ihsmarkit.com/products/iboxx.html>.

For additional Information on the Index please refer to paragraph B “Investment made by Index Sub-Fund” of Section I “Investment Objective / Investment Powers and Restrictions” of the main part of this Prospectus and on APPENDIX F – BENCHMARK REGULATION.

INVESTMENT POLICY

The Sub-Fund will carry out its investment objective via an Indirect Replication as described and in compliance with the section INVESTMENT OBJECTIVES of the part I/ Investment Objectives/ Investment Powers and Restrictions of this Prospectus.

Within the limits set forth in this Prospectus and on an ancillary basis, the Sub-Fund may hold cash and cash equivalents.

The Sub-Fund will not invest more than 10% of its assets in units or shares of other UCITS. No investment will be made in any UCIs.

INVESTMENT TECHNIQUES

The maximum and expected proportions of the Sub-Fund’s assets that can be subject to SFTs and TRS are disclosed in APPENDIX E - SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS.

The parties agree that the Index Sponsor does not approve, endorse or recommend the Sub-Fund.

Under no circumstances does the Index Sponsor provide any guarantee - whether explicit or implicit (including but not limited to the commercial value or appropriateness for any specific use or utilisation) - pertaining to the Benchmark Index or any data included in or linked to the Benchmark Index and, in particular, declines any guarantee relating to the quality, accuracy and/or exhaustiveness of the Benchmark Index or the data included in or linked to the Benchmark Index, or the results obtained from use of the Benchmark Index and/or the composition of the Benchmark Index at a given date or moment, likewise the financial rating of any issuing entity or any credit or similar event (irrespective of the definition of such) relating to a bond in the Index at a given date or at any other time.

The Index Sponsor cannot be held liable for any reason whatsoever in terms of an error in the Benchmark Index, and the Index Sponsor is not required to inform of such an error, in the event it would occur.

Under no circumstances does the Index Sponsor issue a recommendation to buy or sell the Sub-Fund nor does it express an opinion concerning the ability of the Benchmark Index to replicate the performance of the markets in question, or concerning the Benchmark Index or any transaction or product related to it, or indeed the corresponding risks.

The Index Sponsor is under no obligation to take the needs of a third party into consideration during the determination, modification in the composition or calculation of the Benchmark Index. The purchaser or a seller of the Sub-Fund and the Index Sponsor cannot be held liable in the event the Index Sponsor does not take the

necessary measures in determining, adjusting or calculating the Benchmark Index.

The Index Sponsor and its related companies retain the right to process any of the bonds making up the Index, and may, when permitted, accept deposits, make loans or perform any other credit activity, and more generally carry out all or any investment banking and finance service or other commercial activity with these bonds' issuers or their related companies, and they may enter into such activities as though the Index did not exist, without taking into account any consequences such action may have on the Benchmark Index or the Sub-Fund.

APPENDIX 56

MULTI UNITS LUXEMBOURG – Amundi MSCI China ESG Leaders Extra

The Sub-Fund is an index-tracking UCITS passively managed.

The Reference Currency of the Sub-Fund is the Euro (EUR).

This Sub-Fund promotes environmental and/or social characteristics within the meaning of article 8 of SFDR, as further described in Appendix I – ESG Related Disclosures to this Prospectus.

INVESTMENT OBJECTIVE

The investment objective of the MULTI UNITS LUXEMBOURG – Amundi MSCI China ESG Leaders Extra (the “Sub-Fund”) is to track both the upward and the downward evolution of the MSCI China Select ESG Rating and Trend Leaders Net Total Return Index (the “Index”) denominated in US Dollars, and representative of the performance of large and mid cap stocks, across the Chinese economy, issued by companies with robust Environmental, Social and Governance (ESG) ratings, while minimizing the volatility of the difference between the return of the Sub-Fund and the return of the Index (the “Tracking Error”).

The anticipated level of the tracking error under normal market conditions is expected to be up to 2%.

THE INDEX

- **Index Objectives**

The Index is representative of the performance of the Chinese economy through an exposure to large and medium capitalization companies that are part of the MSCI China universe (as defined in the MSCI Global Investable Market Indexes Methodology) with robust Environmental Social and Governance (ESG) ratings relative to their sector peers and/or which experienced a yearly improvement in these ESG ratings. Companies whose products or activities have negative social or environmental impacts are excluded from the Index, as further described in Appendix I – ESG Related Disclosures to this Prospectus.

Throughout this Appendix, the term “mainland China” will refer to People’s Republic of China (“PRC”) excluding the special administrative regions of Hong Kong and Macau.

The Index’ components are accessible by non-domestic mainland China investors. The MSCI China universe includes companies incorporated in mainland China. Otherwise, companies not incorporated in mainland China may be eligible to the MSCI China universe if they are closely linked to mainland China for instance through the geographic distribution of their operations (in

terms of assets and revenues) or the geographic distribution of the companies’ shareholders.

- **Index Methodology**

The Index is an equity index calculated and published by the international index provider MSCI.

The MSCI methodology and calculation method results in a variable number of companies in the Index.

The composition of the Index is reviewed and rebalanced on an annual basis. There is a quarterly review and rebalancing of the Index to check whether constituents still comply with exclusion criteria.

The rebalancing frequency as described above will have no impact in terms of costs in the context of the performance of the investment objective.

The Index is a net total return index. A net total return index calculates the performance of the Index constituents on the basis that any dividends or distributions are reinvested net of any withholding tax applicable.

The complete methodology for the Index (including maintenance and rebalancing of the Index) is available for consultation on the MSCI website: <http://www.msci.com>.

- **Additional Information on Index**

Additional information on the Index, its composition, calculation and rules for periodical review and rebalancing and on the general methodology behind the Index can be found on the index provider’s website: <http://www.msci.com>.

For additional Information on the Index please refer to paragraph B “Investment made by Index Sub-Fund” of Section I “Investment Objective / Investment Powers and Restrictions” of the main part of this Prospectus and on APPENDIX F – BENCHMARK REGULATION.

INVESTMENT POLICY

The Sub-Fund will carry out its investment objective via a Direct Replication as described and in compliance with the section INVESTMENT OBJECTIVES of the part I/ Investment Objectives/ Investment Powers and Restrictions of this Prospectus.

Within the limits set forth in this Prospectus and on an ancillary basis, the Sub-Fund may hold cash and cash equivalents.

The Sub-Fund will not invest more than 10% of its assets in units or shares of other UCITS. No investment will be made in any UCIs.

The Sub-Fund integrates Sustainability Risks and takes into account principal adverse impacts of investments on Sustainability Factors in its investment process as outlined in more detail in section "Sustainable Investing" of this Prospectus and will not hold any securities of companies involved in the production or sale of controversial weapons, or companies in breach of international conventions on Human or Labor Rights, or companies involved in controversial industries: tobacco, Thermal coal, nuclear weapons or unconventional oil & gas as defined in section I "Investment Objectives/ Investment Powers and Restrictions".

More information on environmental and/or social characteristics can be found in Appendix I - ESG Related Disclosures to this Prospectus.

THE INVESTMENT MANAGER

The Management Company has appointed Amundi Japan Ltd as Investment Manager of the Sub-Fund (the "**Investment Manager**") pursuant to the Investment Management Delegation Agreement (the "**Agreement**").

Amundi Japan Ltd is a limited corporation incorporated in Japan with registered office at 1-2-2 Uchisaiwaicho, Chiyoda-ku, Tokyo 100-0011.

Under this Agreement, the Investment Manager agreed to implement the investment objective and policy described above.

The Investment Manager shall receive from the Management Company a fee payable out of the Sub-Fund Management fee.

INVESTMENT TECHNIQUES

The maximum and expected proportions of the Sub-Fund's assets that can be subject to SFTs and TRS are disclosed in APPENDIX E - SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS.

ELIGIBILITY OF THE SUB-FUND

Please refer to Appendix APPENDIX G – SPECIFIC INVESTMENT RATIO for information regarding the Sub-Fund and the German Investment Funds Tax Act (InvStG-E) ("**GITA**").

TARGETED INVESTORS

The Sub-Fund is dedicated to both retail and institutional investors wishing to have an exposure to the performance of large and mid cap stocks, across the Chinese market, issued by companies with robust Environmental, Social and Governance (ESG) ratings relative to their sector peers and/or which experienced a yearly improvement in these ESG ratings.

CLASSES OF SHARES AND FEES

The Sub-Fund will issue the Classes of Shares, subject to different terms and conditions described in APPENDIX C - SUMMARY OF SHARES AND FEES. Other Share Classes may be available. For a current listing of available Share Classes go to www.amundiETF.com.

DEFINITIONS

"Business Day", "Dealing Day" and "Valuation Day": Please refer to the APPENDIX H – GLOSSARY OF TERMS.

"Dealing Deadline": Please refer to the APPENDIX D – SUMMARY TABLE OF SUB-FUND'S DEALING TIMELINE.

LISTING

The Sub-Fund is a UCITS ETF. As a consequence, all its Shares shall be traded throughout the day on one or several regulated market or multilateral trading facilities with at least one market maker which takes action to ensure that the stock exchange value of the Shares does not significantly vary from its iNAV (as defined above).

In the event of Suspension of the Secondary Market (as defined above in the Prospectus) the following exit charges will apply (in replacement of the maximum redemption charges stated above): 1% of the Net Asset Value per Share multiplied by the number of shares redeemed.

A list of these stock exchanges and/or multilateral trading facilities can be obtained from the registered office of the Company.

Information on the iNAV of an exchange-traded share are also provided in section "Indicative Net Asset Value per Share" of the main part of the Prospectus and on the website www.amundiETF.com.

PUBLICATION OF THE NET ASSET VALUE

The Net Asset Value per Share will be available at the registered office of the Company and will be published on www.amundiETF.com.

RISKS WARNING

Among the different risks described in APPENDIX B - SPECIAL RISK CONSIDERATIONS AND RISK FACTORS, the Sub-Fund is more specifically exposed to the following risks:

Equity Risk, Risk of Investing in small and mid-cap companies, Risks linked to Sampling and Optimization techniques, Lack of Reactivity to Changing Circumstances, Low Diversification Risk, Risk of investment in Emerging and Developing Markets, Capital at Risk, Sub-Fund Liquidity Risk, Liquidity Risk on Secondary Market, Risk that the Sub-Fund's investment

objective is only partially achieved, Risk of using financial derivative instruments, Counterparty Risk, Collateral Management Risk, Currency Risk, Market Risk linked to a controversy, Risk linked to ESG Methodologies, Risk related to ESG Score computation, Index Calculation Risk.

Specific risk of investing in the People's Republic of China:

Investors in the Sub-Fund should be aware of the following risks inherent to investments in the mainland China:

- Stock Connect Programs risks

The Sub-Fund will trade A-shares via the Shanghai Hong-Kong Stock Connect or the Shenzhen Hong-Kong Stock Connect (the "**Stock Connect Programs**"). As of the date of this publication, the Stock Connect Programs impose a daily quota on the total net purchase orders that may be executed on a Chinese stock exchange. If this quota is exceeded, purchase orders on the Stock Connect Programs will be automatically suspended (at least temporarily), which could impair the Sub-Fund's capacity to achieve its investment objective.

- Economic, political and social risks

Investing in the mainland China may involve certain risks not typically associated with investment in more developed economies or markets, such as greater economic, political and social uncertainties.

Indeed, the Chinese Government retains a high degree of control over the economy and any unexpected political change, social instability, insecurity and/or adverse diplomatic, political, economic or social developments in the mainland China or related to the mainland China (together a "**Political Change**"), could lead to additional actions and restrictions potentially having sudden and widespread effects, such as expropriation, confiscatory taxation or nationalization of companies included in the Sub-Fund. Any Political Change could adversely affect the economy and stock exchanges of the mainland China and subsequently the value of the Sub-Fund's investments and could eventually cause the dissolution of the Sub-Fund by decision of the Board of Directors.

- Economic risks in the mainland China

The mainland China economy has grown very rapidly. It is, however, not certain that this growth will continue and it may be irregular across the different sectors of the mainland China economy. The mainland China government has from time to time put in place various measures to prevent an excessively sharp acceleration of the business cycle and the transition of the country's economy from a socialist economy to one that is more market-oriented has caused economic and social tensions that could stop this transition or

compromise its success. Any of these risks could diminish the Sub-Fund's performance.

- Mainland China legal system risk

The legal system in mainland China is based on statutory law. However, some regulations have yet to be implemented and there is no assurance that they will actually ever be implemented in their entirety. In particular mainland China regulations on the control of exchange rates are relatively recent and their application is still quite uncertain. Moreover, these regulations give the Chinese authorities (and in particular the China Securities Regulatory Commission – "CSRC" and the State Administration of Foreign Exchange – "SAFE") broad discretion in their respective interpretation of the regulations, which leaves uncertainty as to how they might be applied and used. Any of these risks could diminish the Sub-Fund's performance.

- Accounting and reporting standards

Accounting, auditing and financial reporting standards and practices applicable to companies in the mainland China may differ from those in countries that have more developed financial markets. These differences may lie in areas such as different valuation methods of the properties and assets, and the requirements for disclosure of information to investors. As a consequence, information available about the mainland China companies may not be as complete, accurate or timely as information available on companies listed in other more developed economies or markets.

- Risk that trading is suspended

Trading in the Index constituents may be temporarily suspended, making it impossible for the Sub-Fund to value these securities correctly and/or buy or sell them.

SUSTAINABILITY RISKS

In managing the Sustainability Risks of this Sub-Fund, the Management Company relies on MSCI as the administrator of the Index, which identifies and integrates relevant and significant Sustainable Risks in its ESG Rating methodology. Such integration has therefore a direct impact on the investment universe of the Index. However, no insurance can be given that Sustainability Risks will be totally removed and the occurrence of such risks could cause a negative material impact on the value of the assets comprising the Index tracked or reflected by the Sub-Fund. This Sub-Fund is significantly exposed to regions which might have relatively low governmental or regulatory oversight or less transparency or disclosure of Sustainability Factors and therefore may be subject to more Sustainability Risks.

For further information on MSCI ESG Rating methodology, please refer to: <http://www.msci.com>.

Further information can also be found in the "SUSTAINABLE INVESTING" Section of the Prospectus.

DISTRIBUTION OF INCOME

please refer to the Distribution Policy section of the Prospectus.

DISCLAIMER

The Sub-Fund is in no way sponsored, endorsed, sold or promoted by MSCI Inc. ("MSCI"), nor by any MSCI subsidiary, nor by any of the entities involved in establishing the MSCI indices. APPENDIX 59

MULTI UNITS LUXEMBOURG – Amundi MSCI Indonesia

The Sub-Fund is an index-tracking UCITS passively managed.

The Reference Currency of the Sub-Fund is the Euro (EUR).

INVESTMENT OBJECTIVE

The investment objective of the MULTI UNITS LUXEMBOURG – Amundi MSCI Indonesia (the “**Sub-Fund**”) is to track both the upward and the downward evolution of the MSCI Indonesia Net Total Return index (the “**Index**”) denominated in US Dollars, and representative of the Indonesian equity market, while minimizing the volatility of the difference between the return of the Sub-Fund and the return of the Index (the “**Tracking Error**”).

The anticipated level of the tracking error under normal market conditions is expected to be up to 2%.

THE INDEX

- **Index Objectives**

The Index is a free float-adjusted market capitalization index representing the performance of the mid-cap and large-cap stocks of the Indonesian market.

- **Index Methodology**

The Index has the same basic characteristics as the MSCI indices. It is based on the MSCI Global Investable Market Indices methodology taking into account size-segmentation methodology and investability requirements.

The Index represents 85% of the free float-adjusted market capitalization of each group of industries in the Indonesian market.

The Index is a net total return index. A net total return index calculates the performance of the index constituents on the basis that any dividends or distributions are reinvested net of any withholding tax applicable.

The performance tracked is that of the Index’s closing price using the official closing stock market prices for the constituent stocks.

The composition of the Index is reviewed and rebalanced every 6 months (on May and November) with quarterly reviews in February, May, August and November.

A full description of the Index and its construction methodology and information on the composition and respective weightings of the Index

components are available on the index provider’s website: www.msci.com.

The rebalancing frequency as described above will have no impact in terms of costs in the context of the performance of the investment objective.

- **Additional Information on Index**

Additional information on the Index, its composition, calculation and rules for periodical review and rebalancing and on the general methodology behind the Index can be found on the index provider’s website: www.msci.com.

For additional Information on the Index please refer to paragraph B “Investment made by Index Sub-Fund” of Section I “Investment Objective / Investment Powers and Restrictions” of the main part of this Prospectus and on APPENDIX F – BENCHMARK REGULATION.

INVESTMENT POLICY

The Sub-Fund will carry out its investment objective via an Indirect Replication as described and in compliance with the section INVESTMENT OBJECTIVES of the part I/ Investment Objectives/ Investment Powers and Restrictions of this Prospectus.

Within the limits set forth in this Prospectus and on an ancillary basis, the Sub-Fund may hold cash and cash equivalents.

The Sub-Fund will not invest more than 10% of its assets in units or shares of other UCITS. No investment will be made in any UCIs.

INVESTMENT TECHNIQUES

The maximum and expected proportions of the Sub-Fund’s assets that can be subject to SFTs and TRS are disclosed in APPENDIX E - SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS.

ELIGIBILITY OF THE SUB-FUND

Please refer to Appendix APPENDIX G – SPECIFIC INVESTMENT RATIO for information regarding the Sub-Fund and the German Investment Funds Tax Act (InvStG-E) (“**GITA**”).

TARGETED INVESTORS

The Sub-Fund is dedicated to both retail and institutional investors seeking exposure to the Indonesian equity market.

CLASSES OF SHARES AND FEES

The Sub-Fund will issue the Classes of Shares, subject to different terms and conditions described in APPENDIX C - SUMMARY OF SHARES AND FEES. Other Share Classes may be available. For a current listing of available Share Classes go to www.amundielf.com.

APPENDIX 60

MULTI UNITS LUXEMBOURG – Amundi MSCI Semiconductors ESG Screened

The Sub-Fund is an index-tracking UCITS passively managed.

The Reference Currency of the Sub-Fund is the US Dollars (USD).

This Sub-Fund promotes environmental and/or social characteristics within the meaning of article 8 of SFDR, as further described in Appendix I – ESG Related Disclosures to this Prospectus.

INVESTMENT OBJECTIVE

The investment objective of the MULTI UNITS LUXEMBOURG – Amundi MSCI Semiconductors ESG Screened (the “Sub-Fund”) is to track both the upward and the downward evolution of the MSCI ACWI Semiconductors & Semiconductor Equipment ESG Filtered Net Total Return Index (the “Index”) denominated in US Dollars and representative of a select set of companies from the MSCI ACWI Semiconductors and Semiconductor Equipment Index (the “Parent Index”) that excludes companies which are Environmental, Social and Governance (ESG) laggards relative to the Parent Index, while minimizing the volatility of the difference between the return of the Sub-Fund and the return of the Index (the “Tracking Error”).

The anticipated level of the tracking error under normal market conditions is expected to be up to 2%.

THE INDEX

- **Index Objectives**

The Index aims to represent the performance of a select set of companies from the Parent Index that excludes companies which are Environmental, Social and Governance (ESG) laggards relative to the Parent Index, as further described in Appendix I – ESG Related Disclosures to this Prospectus.

- **Index Methodology**

The Index is an equity index calculated and published by the international index provider MSCI.

The Index is a net total return index. A net total return index calculates the performance of the index constituents on the basis that any dividends or distributions are reinvested net of any withholding tax applicable.

The Index is reviewed and rebalanced on a semi-annual basis as of the last business day of May and November to coincide with the May and November Semi-Annual Index Review of the

Parent Index. The Index is also rebalanced on an “as needed” basis, meaning at the end of any day on which the 35% and 20% constraints (without the buffer) are breached. Such “as needed” rebalancings ensure that the Index remains within the specified weight limits. The rebalancing will take place as of the close of the day when the Index breaches the constraints, so that the Index will always be within the constraints before the opening of the following trading day.

A full description of the Index and its construction methodology and information on the composition and respective weightings of the Index components are available on the index provider’s website: www.msci.com.

The rebalancing frequency as described above will have no impact in terms of costs in the context of the performance of the investment objective.

- **Additional Information on Index**

Additional information on the Index, its composition, calculation and rules for periodical review and rebalancing and on the general methodology behind the Index can be found on the index provider’s website: www.msci.com.

For additional Information on the Index please refer to paragraph B “Investment made by Index Sub-Fund” of Section I “Investment Objective / Investment Powers and Restrictions” of the main part of this Prospectus and on APPENDIX F – BENCHMARK REGULATION.

INVESTMENT POLICY

The Sub-Fund will carry out its investment objective via an Direct Replication as described and in compliance with the section INVESTMENT OBJECTIVES of the part I/ Investment Objectives/ Investment Powers and Restrictions of this Prospectus.

Within the limits set forth in this Prospectus and on an ancillary basis, the Sub-Fund may hold cash and cash equivalents.

The Sub-Fund will not invest more than 10% of its assets in units or shares of other UCITS. No investment will be made in any UCIs.

The Sub-Fund integrates Sustainability Risks and takes into account principal adverse impacts of investments on Sustainability Factors in its investment process as outlined in more detail in section “Sustainable Investing” of this Prospectus and will not hold any securities of companies involved in the production or sale of controversial weapons, or companies in breach of international conventions on Human or Labor Rights, or companies involved in controversial industries: tobacco, Thermal coal, nuclear weapons or unconventional oil & gas as defined

in section I “Investment Objectives/ Investment Powers and Restrictions”.

More information on environmental and/or social characteristics can be found in Appendix I - ESG Related Disclosures to this Prospectus.

INVESTMENT TECHNIQUES

The maximum and expected proportions of the Sub-Fund’s assets that can be subject to SFTs and TRS are disclosed in APPENDIX E - SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS.

ELIGIBILITY OF THE SUB-FUND

Please refer to Appendix APPENDIX G – SPECIFIC INVESTMENT RATIO for information regarding the Sub-Fund and the German Investment Funds Tax Act (InvStG-E) (“GITA”).

TARGETED INVESTORS

The Sub-Fund is dedicated to both retail and institutional investors seeking exposure to the performance of large and mid cap stocks from the semiconductors and semiconductor equipment industries that excludes companies which are Environmental, Social and Governance (ESG) laggards relative to the Parent Index.

CLASSES OF SHARES AND FEES

The Sub-Fund will issue the Classes of Shares, subject to different terms and conditions described in APPENDIX C - SUMMARY OF SHARES AND FEES. Other Share Classes may be available. For a current listing of available Share Classes go to www.amundiETF.com.

DEFINITIONS

“Business Day”, “Dealing Day” and “Valuation Day”: Please refer to the APPENDIX H – GLOSSARY OF TERMS.

“Dealing Deadline”: Please refer to the APPENDIX D – SUMMARY TABLE OF SUB-FUND’S DEALING TIMELINE.

LISTING

The Sub-Fund issues UCITS ETF Shares. UCITS ETF Shares shall be traded throughout the day on one or several regulated market or multilateral trading facilities with at least one market maker which takes action to ensure that the stock exchange value of the UCITS ETF Shares does not significantly vary from its iNAV (as defined above).

In the event of Suspension of the Secondary Market (as defined above in the Prospectus) the following exit charges will apply (in replacement of the maximum redemption charges stated above): 1% of the Net Asset Value per Share multiplied by the number of shares redeemed.

A list of these stock exchanges and/or multilateral trading facilities can be obtained from the registered office of the Company.

Information on the iNAV of an exchange-traded share are also provided in section “Indicative Net Asset Value per Share” of the main part of the Prospectus and on the website www.amundiETF.com.

PUBLICATION OF THE NET ASSET VALUE

The Net Asset Value per Share will be available at the registered office of the Company and will be published on www.amundiETF.com.

RISKS WARNING

Among the different risks described in APPENDIX B - SPECIAL RISK CONSIDERATIONS AND RISK FACTORS, the Sub-Fund is more specifically exposed to the following risks:

Equity Risk, Low Diversification Risk, Stocks, Risk of investment in Emerging and Developing Markets, Risks linked to the investment in Medium Capitalization Stocks, Capital at Risk, Sub-Fund Liquidity Risk, Liquidity Risk on Secondary Market, Risk that the Sub-Fund’s investment objective is only partially achieved, Risk of using financial derivative instruments, Risks linked to Sampling and Optimization techniques, Risk linked to Securities Lending, Counterparty Risk, Collateral Management Risk, Currency Risk, Market Risk linked to a controversy, Risk linked to ESG Methodologies, Risk related to ESG Score computation, Index Calculation Risk.

SUSTAINABILITY RISKS

In managing the Sustainability Risks of this Sub-Fund, the Management Company relies on MSCI as the administrator of the Index, which identifies and integrates relevant and significant Sustainable Risks in its ESG Ratings Methodology. Such integration has therefore a direct impact on the investment universe of the Index. However, no insurance can be given that Sustainability Risks will be totally removed and the occurrence of such risks could cause a negative material impact on the value of the assets comprising the Index tracked by the Sub-Fund. This Sub-Fund is significantly exposed to regions which might have relatively low governmental or regulatory oversight or less transparency or disclosure of Sustainability Factors and therefore may be subject to more Sustainability Risks. For further information on ESG Ratings Methodology, please refer to: www.msci.com. Further information can also be found in the “SUSTAINABLE INVESTING” Section of the Prospectus.

DISTRIBUTION OF INCOME

Please refer to the Distribution Policy section of the Prospectus.

The Index is a net total return index. A net total return index calculates the performance of the Index’ constituents on the basis that any dividends or distributions are reinvested net of any withholding tax applicable.

The performance tracked is that of the Index’s closing price using the official closing stock market prices for the constituent stocks.

The composition of the Index is reviewed and rebalanced every 6 months (on May and November) with quarterly reviews in February, May, August and November.

A full description of the Index and its construction methodology and information on the composition and respective weightings of the Index components are available on the index provider’s website: www.msci.com.

The rebalancing frequency as described above will have no impact in terms of costs in the context of the performance of the investment objective.

- **Additional Information on Index**

Additional information on the Index, its composition, calculation and rules for periodical review and rebalancing and on the general methodology behind the Index can be found on the index provider’s website: www.msci.com.

For additional Information on the Index please refer to paragraph B “Investment made by Index Sub-Fund” of Section I “Investment Objective / Investment Powers and Restrictions” of the main part of this Prospectus and on APPENDIX F – BENCHMARK REGULATION.

INVESTMENT POLICY

The Sub-Fund will carry out its investment objective via an Indirect Replication as described and in compliance with the section INVESTMENT OBJECTIVES of the part I/ Investment Objectives/ Investment Powers and Restrictions of this Prospectus.

APPENDIX 63

MULTI UNITS LUXEMBOURG – Amundi MSCI Korea

The Sub-Fund is an index-tracking UCITS passively managed.

The Reference Currency of the Sub-Fund is the Euro (EUR).

INVESTMENT OBJECTIVE

The investment objective of the MULTI UNITS LUXEMBOURG – **Amundi MSCI Korea** (the “**Sub-Fund**”) is to track both the upward and the downward evolution of the MSCI Korea 20/35 Net Total Return Index (the “**Index**”) denominated in US Dollars and representative of the South Korean equity market, while minimizing the volatility of the difference between the return of the Sub-Fund and the return of the Index (the “**Tracking Error**”).

The anticipated level of the tracking error under normal market conditions is expected to be up to 2%.

THE INDEX

- **Index Objectives**

The Index is a free float-adjusted market capitalization index representing the performance of the mid-cap and large-cap stocks of the South Korean market.

- **Index Methodology**

The Index has the same basic characteristics as the MSCI indexes.

The Index is based on the MSCI 20/35 Capped Indexes methodology designed to provide an alternative methodology to purely free float-adjusted market capitalization weighted indexes by constraining maximum weights for regulatory constraints.

The MSCI 20/35 indexes constrain the weight of the largest group entity at 35%, and all other group entities at 20%, with a buffer of 10% applied on these limits at each index rebalancing.

The Index is constructed from an underlying MSCI index, the MSCI Korea Net Total Return Index (the “**Parent Index**”). The Parent Index is based on the MSCI Global Investable Market Indexes methodology taking into account size-segmentation methodology and investability requirements.

At construction and at each rebalancing, if the weight of any group entity in the Parent Index is greater than the maximum weight, the weight of this group entity in the Index will be capped at the maximum weight. Within the capped group entity, securities are weighted in proportion to their free

float-adjusted market capitalization. The weight of the securities outside of the capped group entity will be increased in proportion to their weight prior to such capping.

The Index methodology implies that the performance of the Index on a given trading day will not necessarily be equivalent to the performance of the Parent Index.

The Index represents approximately 85% of the free float-adjusted market capitalization of South Korean market.

The Index is a net total return index. A net total return index calculates the performance of the index constituents on the basis that any dividends or distributions are reinvested net of any withholding tax applicable.

The performance tracked is that of the Index’s closing price using the official closing stock market prices for the constituent stocks.

The composition of the Index is reviewed and rebalanced quarterly as of the last business day of each February, May, August and November, to coincide with the quarterly index review of the Parent Index. The Index is also rebalanced on an “as needed” basis, meaning at the end of any day on which the 35% and 20% constraints (without the buffer) are breached. Such “as needed” rebalancings ensure that the Index remains within the specified weight limits.

A full description of the Index and its construction methodology and information on the composition and respective weightings of the Index components are available on the index provider’s website: www.msci.com.

The rebalancing frequency as described above will have no impact in terms of costs in the context of the performance of the investment objective.

- **Additional Information on Index**

Additional information on the Index, its composition, calculation and rules for periodical review and rebalancing and on the general methodology behind the Index can be found on the index provider’s website: www.msci.com.

For additional Information on the Index please refer to paragraph B “Investment made by Index Sub-Fund” of Section I “Investment Objective / Investment Powers and Restrictions” of the main part of this Prospectus and on APPENDIX F – BENCHMARK REGULATION.

INVESTMENT POLICY

The Sub-Fund will carry out its investment objective via an Indirect Replication as described and in compliance with the section INVESTMENT OBJECTIVES of the part I/

Investment Objectives/ Investment Powers and Restrictions of this Prospectus.

Within the limits set forth in this Prospectus and on an ancillary basis, the Sub-Fund may hold cash and cash equivalents.

The Sub-Fund will not invest more than 10% of its assets in units or shares of other UCITS. No investment will be made in any UCIs.

INVESTMENT TECHNIQUES

The maximum and expected proportions of the Sub-Fund's assets that can be subject to SFTs and TRS are disclosed in APPENDIX E - SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS.

APPENDIX 65

MULTI UNITS LUXEMBOURG – Amundi Global Government Inflation-Linked Bond 1-10Y

The Sub-Fund is an index-tracking UCITS passively managed.

The Reference Currency of the Sub-Fund is the US Dollar (USD).

INVESTMENT OBJECTIVE

The investment objective of MULTI UNITS LUXEMBOURG - **Amundi Global Government Inflation-Linked Bond 1-10Y** is to reflect the performance of the Bloomberg Barclays Global Inflation-Linked 1-10 Year Index (the "**Benchmark Index**") denominated in USD and representative of the government local currency inflation-linked debt from developed market countries – while minimising the volatility of the difference between the return of the Sub-Fund and the return of the Benchmark Index (the "**Tracking Error**").

For monthly hedged share classes mentioned in Appendix C - SUMMARY OF SHARES AND FEES, the Sub-Fund will also use a monthly currency-hedge strategy, in order to minimize the impact of the evolution of each respective share class currency against currencies of each Index component.

The anticipated level of the tracking error under normal market conditions is expected to be up to 1%.

THE BENCHMARK INDEX

- **Benchmark Index Objectives**

The Benchmark Index is a market-value weighted index that is designed to measure the performance of investment grade inflation-linked debt issued by developed market countries governments in local currency, with remaining maturity between 1 and 10 years.

- **Benchmark Index Methodology**

The Benchmark Index is comprised of international inflation-linked bonds issued in local currencies by governments of developed market countries.

The Benchmark Index is a net total return index. A net total return index calculates the performance of the index constituents on the basis that any coupons are included in the index returns after withholding tax retention.

The composition of the Benchmark Index is re-balanced monthly.

The rebalancing frequency as described above will have no impact in terms of costs in the context of the performance of the investment objective.

A full description and the complete methodology used to construct the Benchmark Index and information on the composition and respective weightings of the Benchmark Index components are available on the website: <https://www.bloombergindices.com>.

The performance monitored is that of the Benchmark Index closing price available on the website <https://www.bloombergindices.com>.

- **Additional Information on Benchmark Index**

Additional information on the Benchmark Index, its composition, calculation and rules for periodical review and rebalancing and on the general methodology behind the Benchmark Index can be found on: <https://www.bloombergindices.com>.

For additional Information on the Index please refer to paragraph B "Investment made by Index Sub-Fund" of Section I "Investment Objective / Investment Powers and Restrictions" of the main part of this Prospectus and on APPENDIX F – BENCHMARK REGULATION.

INVESTMENT POLICY

The Sub-Fund will carry out its investment objective via a Direct Replication as described and in compliance with the section INVESTMENT OBJECTIVES of the part I/ Investment Objectives/ Investment Powers and Restrictions of this Prospectus.

Within the limits set forth in this Prospectus and on an ancillary basis, the Sub-Fund may hold cash and cash equivalents.

The Sub-Fund will not invest more than 10% of its assets in units or shares of other UCITS. No investment will be made in any UCIs.

INVESTMENT TECHNIQUES

The maximum and expected proportions of the Sub-Fund's assets that can be subject to SFTs and TRS are disclosed in APPENDIX E - SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS.

ELIGIBILITY OF THE SUB-FUND

Please refer to Appendix APPENDIX G – SPECIFIC INVESTMENT RATIO for information regarding the Sub-Fund and the German Investment Funds Tax Act (InvStG-E) ("**GITA**").

TARGETED INVESTORS

The Sub-Fund is available to all investors. Investors in this Sub-Fund are seeking a core exposure (i.e. a buy and hold investment) to the performance of the inflation-linked debt market issued by developed market countries governments in local currency.

CLASSES OF SHARES AND FEES

The Sub-Fund will issue the Classes of Shares, subject to different terms and conditions described in APPENDIX C - SUMMARY OF SHARES AND FEES. Other Share Classes may be available. For a current listing of available Share Classes go to www.amundiETF.com.

The Sub-Fund Management fee should not be the sole criteria driving subscription; Sub-Fund efficiency – represented by tracking difference, tracking error and the key metrics of secondary market liquidity – should also be analysed. Investors should assess their personal situation and constraints before investing.

DEFINITIONS

“Business Day”, “Dealing Day” and “Valuation Day”: Please refer to the APPENDIX H – GLOSSARY OF TERMS.

“Dealing Deadline”: Please refer to the APPENDIX D – SUMMARY TABLE OF SUB-FUND’S DEALING TIMELINE.

LISTING

The Sub-Fund is a UCITS ETF. As a consequence, all its Shares shall be traded throughout the day on one or several regulated market or multilateral trading facilities with at least one market maker which takes action to ensure that the stock exchange value of the Shares does not significantly vary from its iNAV (as defined above).

In the event of Suspension of the Secondary Market (as defined above in the Prospectus) the following exit charges will apply (in replacement of the maximum redemption charges stated above): 0.10% of the Net Asset Value per Share multiplied by the number of shares redeemed.

A list of these stock exchanges and/or multilateral trading facilities can be obtained from the registered office of the Company.

Information on the iNAV of an exchange-traded share are also provided in section “Indicative Net Asset Value per Share” of the main part of the Prospectus and on the website www.amundiETF.com.

PUBLICATION OF THE NET ASSET VALUE

The Net Asset Value per Share will be available at the registered office of the Company and will be published on www.amundiETF.com.

RISKS WARNING

Among the different risks described in APPENDIX B - SPECIAL RISK CONSIDERATIONS AND RISK

FACTORS, the Sub-Fund is more specifically exposed to the following risks:

Interest Rate Risk, Credit risk, Risks linked to Sampling and Optimization techniques, Inflation-linked instruments risk, Specific risk due to seasonality, carry and retroactivity on inflation, Capital at Risk, Sub-Fund Liquidity Risk, Liquidity Risk on Secondary Market, Risk that the Sub-Fund’s investment objective is only partially achieved, Risk of using financial derivative instruments, Counterparty Risk, Collateral Management Risk, Currency Risk, Class Currency Hedge Risk, Index Calculation Risk.

SUSTAINABILITY RISKS

This Sub-Fund does not promote ESG characteristics and does not maximize portfolio alignment with Sustainability Factors, however it remains exposed to Sustainability Risks and the occurrence of such risks could cause a negative material impact on the value of the investments made by the Sub-Fund. Further information can be found in the “SUSTAINABLE INVESTING” Section of the Prospectus.

TAXONOMY REGULATION

In accordance of article 7 of the Taxonomy Regulation, the Management Company draws the attention of investors to the fact that the investments underlying this Sub-Fund do not take into account the European Union criteria for environmentally sustainable economic activities.

APPENDIX 66

MULTI UNITS LUXEMBOURG – Amundi MSCI Europe ESG Leaders

The Sub-Fund is an index-tracking UCITS passively managed.

This Sub-Fund promotes environmental and/or social characteristics within the meaning of article 8 of SFDR, as further described in Appendix I – ESG Related Disclosures to this Prospectus.

The Reference Currency of the Sub-Fund is the Euro (EUR).

INVESTMENT OBJECTIVE

The investment objective of MULTI UNITS LUXEMBOURG - Amundi MSCI Europe ESG Leaders is to track both the upward and the downward evolution of the MSCI Europe ESG Leaders Net Total Return Index (the "Index") denominated in Euros in order to offer an exposure to the performance of large and mid cap stocks, across developed European countries, issued by companies having a high Environmental, Social and Governance (ESG) ratings – while minimizing the volatility of the difference between the return of the Sub-Fund and the return of the Index ("Tracking Error").

For monthly hedged share classes mentioned in APPENDIX C - SUMMARY OF SHARES AND FEES, the Sub-Fund will also use a monthly currency-hedge strategy, in order to minimize the impact of the evolution of each respective share class currency against currencies of each Index component.

The anticipated level of the tracking error under normal market conditions is expected to be up to 0.50%.

THE INDEX

- **Index Objectives**

The Index is representative of the performance of large and mid cap stocks, across developed European countries, issued by companies with high Environmental, Social and Governance (ESG) ratings relative to their sector peers, as further described in Appendix I – ESG Related Disclosures to this Prospectus.

- **Index Methodology**

The Index is an equity index calculated and published by the international index provider MSCI. The MSCI methodology and calculation method results in a variable number of companies in the Index.

The composition of the Index is reviewed and rebalanced on an annual basis. There is a quarterly

review and rebalancing of the Index to check whether constituents still comply with exclusion criteria.

The rebalancing frequency as described above will have no impact in terms of costs in the context of the performance of the investment objective.

The Index is a net total return index. A net total return index calculates the performance of the Index constituents on the basis that any dividends or distributions are reinvested net of any withholding tax applicable.

The complete methodology for the Index (including maintenance and rebalancing of the Index) is available for consultation on the MSCI website: <http://www.msci.com>.

- **Additional Information on Index**

Additional information on the Index, its composition, calculation and rules for periodical review and rebalancing and on the general methodology behind the Index can be found on: <https://www.msci.com>.

For additional Information on the Index please refer to paragraph B "Investment made by Index Sub-Fund" of Section I "Investment Objective / Investment Powers and Restrictions" of the main part of this Prospectus and on APPENDIX F – BENCHMARK REGULATION.

INVESTMENT POLICY

The Sub-Fund will carry out its investment objective via a Direct Replication as described and in compliance with the section INVESTMENT OBJECTIVES of the part I/ Investment Objectives/ Investment Powers and Restrictions of this Prospectus.

Within the limits set forth in this Prospectus and on an ancillary basis, the Sub-Fund may hold cash and cash equivalents.

The Sub-Fund will not invest more than 10% of its assets in units or shares of other UCITS. No investment will be made in any UCIs.

The Sub-Fund integrates Sustainability Risks and takes into account principal adverse impacts of investments on Sustainability Factors in its investment process as outlined in more detail in section "Sustainable Investing" of this Prospectus and will not hold any securities of companies involved in the production or sale of controversial weapons, or companies in breach of international conventions on Human or Labor Rights, or companies involved in controversial industries: tobacco, Thermal coal, nuclear weapons or unconventional oil & gas as defined in section I "Investment Objectives/ Investment Powers and Restrictions".

More information on environmental and/or social characteristics can be found in Appendix I - ESG Related Disclosures to this Prospectus.

INVESTMENT TECHNIQUES

The maximum and expected proportions of the Sub-Fund's assets that can be subject to SFTs and TRS are disclosed in APPENDIX E - SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS.

ELIGIBILITY OF THE SUB-FUND

Please refer to Appendix APPENDIX G – SPECIFIC INVESTMENT RATIO for information regarding the Sub-Fund and the German Investment Funds Tax Act (InvStG-E) (“GITA”).

TARGETED INVESTORS

The Sub-Fund is available to all investors.

The Sub-Fund is dedicated to both retail and institutional investors wishing to have an exposure to the performance of large and mid cap stocks, across developed European countries, issued by companies with high Environmental, Social and Governance (ESG) ratings to their sectors peers.

CLASSES OF SHARES AND FEES

The Sub-Fund will issue the Classes of Shares, subject to different terms and conditions described in APPENDIX C - SUMMARY OF SHARES AND FEES. Other Share Classes may be available. For a current listing of available Share Classes go to www.amundiETF.com.

DEFINITIONS

“Business Day”, “Dealing Day” and “Valuation Day”: Please refer to the APPENDIX H – GLOSSARY OF TERMS.

“Dealing Deadline”: Please refer to the APPENDIX D – SUMMARY TABLE OF SUB-FUND'S DEALING TIMELINE.

LISTING

The Sub-Fund is a UCITS ETF. As a consequence, all its Shares shall be traded throughout the day on one or several regulated market or multilateral trading facilities with at least one market maker which takes action to ensure that the stock exchange value of the Shares does not significantly vary from its iNAV (as defined above).

In the event of Suspension of the Secondary Market (as defined above in the Prospectus) the following exit charges will apply (in replacement of the maximum redemption charges stated above): 0.08% of the Net Asset Value per Share multiplied by the number of shares redeemed.

A list of these stock exchanges and/or multilateral trading facilities can be obtained from the registered office of the Company.

Information on the iNAV of an exchange-traded share are also provided in section “Indicative Net Asset Value per Share” of the main part of the Prospectus on the website www.amundiETF.com.

PUBLICATION OF THE NET ASSET VALUE

The Net Asset Value per Share will be available at the registered office of the Company and will be published on www.amundiETF.com.

RISKS WARNING

Among the different risks described in APPENDIX B - SPECIAL RISK CONSIDERATIONS AND RISK FACTORS, the Sub-Fund is more specifically exposed to the following risks:

Equity Risk, Risks linked to the investment in Medium Capitalization Stocks, Risks linked to Sampling and Optimization techniques, Capital at Risk, Sub-Fund Liquidity Risk, Liquidity Risk on Secondary Market, Risk that the Sub-Fund's investment objective is only partially achieved, Risk of using financial derivative instruments, Counterparty Risk, Collateral Management Risk, Currency Risk, Class Currency Hedge Risk, Market Risk linked to a controversy, Risk linked to ESG Methodologies, Risk related to ESG Score computation, Index Calculation Risk.

SUSTAINABILITY RISKS

In managing the Sustainability Risks of this Sub-Fund, the Management Company relies on MSCI as the administrator of the Index, which identifies and integrates relevant and significant Sustainable Risks in its ESG Rating methodology. Such integration has therefore a direct impact on the investment universe of the Index. However, no insurance can be given that Sustainability Risks will be totally removed and the occurrence of such risks could cause a negative material impact on the value of the assets comprising the Index tracked or reflected by the Sub-Fund. For further information on MSCI ESG Rating methodology, please refer to: <http://www.msci.com>. Further information can also be found in the “SUSTAINABLE INVESTING” Section of the Prospectus.

DISTRIBUTION OF INCOME

Please refer to the Distribution Policy section of the Prospectus.

DISCLAIMER

The Sub-Fund is in no way sponsored, endorsed, sold or promoted by MSCI Inc. (“MSCI”), nor by any MSCI subsidiary, nor by any of the entities involved in establishing the MSCI indices. The MSCI indices are the sole property of MSCI, and the MSCI indices are trademarks registered by MSCI and its subsidiaries and have been licensed, for specific purposes, by Amundi asset management. Neither MSCI, nor any subsidiary of MSCI, nor any of the entities involved in producing or calculating the MSCI indices have made any statement or any warranty,

either expressed or implied, to holders of units in the Sub-Fund or, more generally, to the general public, concerning the merits of trading in units of investment funds in general or in units of this Sub-Fund in particular or the ability of any MSCI index to replicate the performance of the global equities market. MSCI and its subsidiaries are the owners of certain names, registered trademarks and the MSCI indices, which are determined, constructed and calculated by MSCI without any consultation with Amundi Asset Management or the Sub-Fund. Neither MSCI, nor any MSCI subsidiary, nor any of the entities involved in the production of the MSCI indices are obliged to take into consideration the needs of Amundi Asset Management or holders of the Sub-Fund's shares when determining, constructing or calculating the MSCI indices. Neither MSCI, nor any MSCI subsidiary, nor any of the entities involved in the production of the MSCI indices make any decision concerning the launch date, pricing, quantity of the Sub-Fund's shares or the determination and calculation of the formula used to establish the Fund's net asset value. Neither MSCI, nor any MSCI subsidiary, nor any of the entities involved in the production of the MSCI indices accept any responsibility for or obligations concerning the administration, management or marketing of the Sub-Fund.

Although MSCI obtains data incorporated or used in the calculation of indices originating from sources that MSCI believes to be reliable, neither MSCI, nor any other party involved in the creation or calculation of the MSCI indices guarantees the accuracy and/or the completeness of the indices or any incorporated data. Neither MSCI nor any party involved in the creation or calculation of the MSCI indices makes any warranties, expressed or implied, concerning the results that the holder of a MSCI license, customers of said licensee, counterparties, Sub-Fund's shareholders or any other person or entity will achieve from the use of the indices or any incorporated data in relation to the rights licensed or for any other purpose.

Neither MSCI nor any other party makes any warranties, expressed or implied, and MSCI disclaims any warranties concerning the commercial value or suitability for a specific purpose of the indices or incorporated data. Subject to the foregoing, under no circumstances shall MSCI or any other party be held liable for any loss, be it direct, indirect or other (including loss of earnings) even if it is aware of the possibility of such a loss.

APPENDIX 67

MULTI UNITS LUXEMBOURG – Amundi Global Aggregate Green Bond 1-10Y

The Sub-Fund is an index-tracking UCITS passively managed.

This Sub-Fund promotes environmental and/or social characteristics within the meaning of article 8 of SFDR, as further described in Appendix I – ESG Related Disclosures to this Prospectus.

The Reference Currency of the Sub-Fund is the Euro (EUR).

INVESTMENT OBJECTIVE

The investment objective of MULTI UNITS LUXEMBOURG - **Amundi Global Aggregate Green Bond 1-10Y** is to track both the upward and the downward evolution of the “Bloomberg MSCI Global Green Bond 1-10 Year Index” (the “**Index**”) denominated in Euros, in order to offer an exposure to the Green Bonds market issued by investment grade entities and denominated in multiple currencies – while minimising the volatility of the difference between the return of the Sub-Fund and the return of the Index (the “**Tracking Error**”).

For monthly hedged share classes mentioned in APPENDIX C - SUMMARY OF SHARES AND FEES, the Sub-Fund will also use a monthly currency-hedge strategy, in order to minimize the impact of the evolution of each respective share class currency against currencies of each Index component.

The anticipated level of the Tracking Error under normal market conditions is expected to be up to 0.50%.

THE INDEX

- **Index Objectives**

The Index is representative of the performance of Green Bonds issued by investment grade entities, denominated in multiple currencies and with remaining maturity between 1 and 10 years. Green Bonds are issued in order to fund projects that have positive environmental outcomes, as further described in Appendix I – ESG Related Disclosures to this Prospectus.

- **Index Methodology**

The Index is market-value weighted, which means that components weights are defined according to each bond outstanding amount.

All index-eligible bonds are priced on a daily basis by Bloomberg’s evaluated pricing service, BVAL, except CHF-denominated bonds (which are priced by SIX) and JPY-denominated corporates (which are priced by JSDA).

The Index is calculated daily.

The Index is compiled, administered and managed by Bloomberg.

The composition of the Index is reviewed and rebalanced on the last business day of each month.

The rebalancing frequency as described above will have an impact in terms of costs in the context of the performance of the investment objective. Particular costs incurred as a result of such rebalancing of the Index include additional transaction costs. The Index is a “total return index” (i.e. all coupons detached by the components of the Index are reinvested in the Index).

The complete methodology for the Index (including maintenance, rebalancing of the Index and its effects on the costs within the strategy) is available for consultation on the following website:

www.bloomberg.com/indices.

- **Additional Information on Index**

Additional information on the Index, its composition, calculation and rules for periodical review and rebalancing and on the general methodology behind the Index can be found on www.bloomberg.com/indices.

For additional Information on the Index please refer to paragraph B “Investment made by Index Sub-Fund” of Section I “Investment Objective / Investment Powers and Restrictions” of the main part of this Prospectus and on APPENDIX F – BENCHMARK REGULATION.

INVESTMENT POLICY

The Sub-Fund will carry out its investment objective via a Direct Replication as described and in compliance with the section INVESTMENT OBJECTIVES of the part I/ Investment Objectives/ Investment Powers and Restrictions of this Prospectus.

Within the limits set forth in this Prospectus and on an ancillary basis, the Sub-Fund may hold cash and cash equivalents.

The Sub-Fund will not invest more than 10% of its assets in units or shares of other UCITS. No investment will be made in any UCIs.

The Sub-Fund integrates Sustainability Risks and takes into account principal adverse impacts of investments on Sustainability Factors in its investment process as outlined in more detail in section “Sustainable Investing” of this Prospectus and will not hold any securities of companies involved in the production or sale of controversial weapons, or companies in breach of international conventions on Human or Labor Rights, or companies involved in controversial industries: tobacco, Thermal coal, nuclear weapons or unconventional oil & gas as

defined in section I "Investment Objectives/ Investment Powers and Restrictions". More information on environmental and/or social characteristics can be found in Appendix I - ESG Related Disclosures to this Prospectus.

INVESTMENT TECHNIQUES

The maximum and expected proportions of the Sub-Fund's assets that can be subject to SFTs and TRS are disclosed in APPENDIX E - SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS.

ELIGIBILITY OF THE SUB-FUND

Please refer to Appendix APPENDIX G – SPECIFIC INVESTMENT RATIO for information regarding the Sub-Fund and the German Investment Funds Tax Act (InvStG-E) ("GITA").

TARGETED INVESTORS

The Sub-Fund is dedicated to both retail and institutional investors wishing to have an exposure to the Green Bonds market.

CLASSES OF SHARES AND FEES

The Sub-Fund will issue the Classes of Shares, subject to different terms and conditions described in APPENDIX C - SUMMARY OF SHARES AND FEES. Other Share Classes may be available. For a current listing of available Share Classes go to www.amundiETF.com.

DEFINITIONS

"Business Day", "Dealing Day" and "Valuation Day": Please refer to the APPENDIX H – GLOSSARY OF TERMS.

"Dealing Deadline": Please refer to the APPENDIX D – SUMMARY TABLE OF SUB-FUND'S DEALING TIMELINE.

LISTING

The Sub-Fund is a UCITS ETF. As a consequence all its Shares shall be traded throughout the day on one or several regulated market or multilateral trading facilities with at least one market maker which takes action to ensure that the stock exchange value of the Shares does not significantly vary from its iNAV (as defined above).

In the event of Suspension of the Secondary Market (as defined above in the Prospectus) the following exit charges will apply (in replacement of the maximum redemption charges stated above): 2% of the Net Asset Value per Share multiplied by the number of shares redeemed.

A list of these stock exchanges and/or multilateral trading facilities can be obtained from the registered office of the Company.

Information on the iNAV of an exchange-traded share are also provided in section "Indicative Net Asset Value per Share" of the main part of the Prospectus and on the website www.amundiETF.com.

PUBLICATION OF THE NET ASSET VALUE

The Net Asset Value per Share will be available at the registered office of the Company and will be published on www.amundiETF.com.

RISKS WARNING

Among the different risks described in APPENDIX B - SPECIAL RISK CONSIDERATIONS AND RISK FACTORS, the Sub-Fund is more specifically exposed to the following risks:

Interest Rate Risk, Credit risk, Risks linked to the investment in Medium Capitalization Stocks, Risk of investment in Emerging and Developing Markets, Lack of Operating History, Risks linked to Sampling and Optimization techniques, Capital at Risk, Sub-Fund Liquidity Risk, Liquidity Risk on Secondary Market, Risk that the Sub-Fund's investment objective is only partially achieved, Risk of using financial derivative instruments, Counterparty Risk, Collateral Management Risk, Currency Risk, Class Currency Hedge Risk, Market Risk linked to a controversy, Index Calculation Risk.

LIMITS OF THE EXTRA-FINANCIAL APPROACH

The extra-financial approach implemented by the Sub-Fund is largely based on third party data that may be incomplete, inaccurate or unavailable from time to time. The Management Company is therefore dependent on the quality and reliability of such information. Finally, investments in Green Bonds may induce sectoral biases in the global bond market.

SUSTAINABILITY RISKS

In managing the Sustainability Risks of this Sub-Fund, the Management Company relies on Bloomberg as the administrator of the Index, which identifies and integrates relevant and significant Sustainable Risks in its Index methodology. Such integration has therefore a direct impact on the investment universe of the Index. However, no insurance can be given that Sustainability Risks will be totally removed and the occurrence of such risks could cause a negative material impact on the value of the assets comprising the Index tracked or reflected by the Sub-Fund. For further information on the methodology of the Index, please refer to: www.bloomberg.com/indices. Further information can also be found in the "SUSTAINABLE INVESTING" Section of the Prospectus.

DISTRIBUTION OF INCOME

Please refer to the Distribution Policy section of the Prospectus.

DISCLAIMER

APPENDIX 68**MULTI UNITS LUXEMBOURG – Amundi MSCI Emerging Ex China**

The Sub-Fund is an index-tracking UCITS passively managed.

The Reference Currency of the Sub-Fund is the US dollar (USD).

INVESTMENT OBJECTIVE

The investment objective of **MULTI UNITS LUXEMBOURG - Amundi MSCI Emerging Ex China** (the “**Sub-Fund**”) is to track both the upward and the downward evolution of the MSCI Emerging Markets Ex China Net Total Return Index (net dividends reinvested) (the “**Index**”) denominated in US Dollars and representative of the performance of large and mid cap companies across Emerging Markets countries other than China, while minimizing the volatility of the difference between the return of the Sub-Fund and the return of the Index (the “**Tracking Error**”).

The anticipated level of the tracking error under normal market conditions is expected to be up to 2%.

THE INDEX

- **Index Objectives**

The Index is a free float-adjusted market capitalization index that is designed to measure the performance of the large and mid cap segments across the emerging market countries excluding China.

The Index’s aim is to represent 85% of the free float-adjusted market capitalisation of each emerging country.

- **Index Methodology**

The Index is an equity index calculated and published by international index provider MSCI.

The Index is based on the MSCI Global Investable Market Indices methodology taking into account the size, liquidity and minimum free float criteria of the investable universe.

The Index is comprised solely of emerging market equities and captures large and mid cap representation across emerging market countries worldwide other than China.

The MSCI methodology and calculation method are based on a variable number of companies in the Index.

The Index is a net total return index. A net total return index calculates the performance of the index constituents on the basis that any dividends or

distributions are included in the index returns after withholding tax retention.

The complete methodology for the Index (including maintenance and rebalancing of the Index) is available for consultation on the MSCI website: <http://www.msci.com>.

The composition of the Index is reviewed and rebalanced every 6 months (on May and November) with quarterly reviews in February, May, August and November.

The rebalancing frequency as described above will have no impact in terms of costs in the context of the performance of the investment objective.

- **Additional Information on Index**

Additional information on the Index, its composition, calculation and rules for periodical review and rebalancing and on the general methodology behind the Index can be found on <http://www.msci.com>.

APPENDIX 69**MULTI UNITS LUXEMBOURG – Amundi Global Government Bond II**

The Sub-Fund is an index-tracking UCITS passively managed.

The Reference Currency of the Sub-Fund is the US Dollar (USD).

INVESTMENT OBJECTIVE

The investment objective of MULTI UNITS LUXEMBOURG – Amundi Global Government Bond II (the “**Sub-Fund**”) is to reflect the performance of the FTSE G7 and EMU Government Bond Index - Developed Markets (the “**Benchmark Index**”) denominated in US Dollar, while minimizing the volatility of the difference between the return of the Sub-Fund and the return of the Benchmark Index (the “**Tracking Error**”).

For monthly hedged share classes mentioned in APPENDIX C - SUMMARY OF SHARES AND FEES, the Sub-Fund will also use a monthly currency-hedge strategy, in order to minimize the impact of the evolution of each respective share class currency against currencies of each Benchmark Index component.

The anticipated level of the tracking error under normal market conditions is expected to be up to 1%.

THE BENCHMARK INDEX

- **Benchmark Index Objectives**

The Benchmark Index is a market-value weighted index that is designed to measure the performance of international investment-grade sovereign bonds issued in local currencies by the sovereign governments of developed market countries.

The Benchmark Index is representative of fixed-rate, investment-grade, sovereign bonds issued in local currencies by the sovereign governments of developed market countries.

- **Benchmark Index Methodology**

The Benchmark Index is sponsored by international index provider FTSE Russell.

The Benchmark Index is comprised of international bonds issued in local currencies by the sovereign governments of developed market countries. As part of the World Government Bond Index (WGBI) family of indices, in order to be eligible for inclusion in the Benchmark Index, a bond must meet specific criteria pertaining to its coupon, maturity, market size, issue size and credit quality.

The Benchmark Index is a net total return index. A net total return index calculates the performance of

the index constituents on the basis that any dividends or distributions are included in the index returns after withholding tax retention.

The complete methodology for the Benchmark Index (including maintenance and rebalancing of the Benchmark Index) is available for consultation on the website:

<https://www.yieldbook.com/m/indexes/fund/>.

The composition of the Benchmark Index is rebalanced monthly.

The rebalancing frequency as described above will have no impact in terms of costs in the context of the performance of the investment objective.

- **Additional Information on Benchmark Index**

Additional information on the Benchmark Index, its composition, calculation and rules for periodical review and rebalancing and on the general methodology behind the Benchmark Index can be found on

<https://www.yieldbook.com/m/indexes/fund/>.

APPENDIX 70

MULTI UNITS LUXEMBOURG – Lyxor Core Japanese Government Bond (DR) UCITS ETF

The Sub-Fund is an index-tracking UCITS passively managed.

The Reference Currency of the Sub-Fund is the Japanese Yen (JPY).

INVESTMENT OBJECTIVE

The investment objective of MULTI UNITS LUXEMBOURG – Lyxor Core Japanese Government Bond (DR) UCITS ETF (the “**Sub-Fund**”) is to reflect the performance of the FTSE Japanese Government Bond Index (the “**Benchmark Index**”) denominated in Japanese Yen, while minimizing the volatility of the difference between the return of the Sub-Fund and the return of the Benchmark Index (the “**Tracking Error**”).

For monthly hedged share classes mentioned in APPENDIX C - SUMMARY OF SHARES AND FEES, the Sub-Fund will also use a monthly currency-hedge strategy, in order to minimize the impact of the evolution of each respective share class currency against currencies of each Benchmark Index component.

The anticipated level of the tracking error under normal market conditions is expected to be up to 1%.

THE BENCHMARK INDEX

- **Benchmark Index Objectives**

The Benchmark Index is a market-value weighted index that is designed to measure the performance of international investment-grade sovereign bonds issued in Japanese Yen by the government of Japan.

The Benchmark Index is representative of fixed-rate, investment-grade sovereign bonds issued in Japanese Yen by the government of Japan.

- **Benchmark Index Methodology**

The Benchmark Index is sponsored by international index provider FTSE Russell.

The Benchmark Index is comprised of international bonds issued in Japanese Yen by the government of Japan. As part of the World Government Bond Index (WGBI) family of indices, in order to be eligible for inclusion in the Benchmark Index, a bond must meet specific criteria pertaining to its coupon, maturity, market size, issue size and credit quality.

The Benchmark Index is a net total return index. A net total return index calculates the performance of the index constituents on the basis that any dividends or distributions are included in the index returns after withholding tax retention.

The complete methodology for the Benchmark Index (including maintenance and rebalancing of the Benchmark Index) is available for consultation on the website:

<https://www.yieldbook.com/m/indexes/fund/>.

The composition of the Benchmark Index is rebalanced monthly.

The rebalancing frequency as described above will have no impact in terms of costs in the context of the performance of the investment objective.

- **Additional Information on Benchmark Index**

Additional information on the Benchmark Index, its composition, calculation and rules for periodical review and rebalancing and on the general methodology behind the Benchmark Index can be found

on <https://www.yieldbook.com/m/indexes/fund/>.

For additional Information on the Index please refer to paragraph B “Investment made by Index Sub-Fund” of Section I “Investment Objective / Investment Powers and Restrictions” of the main part of this Prospectus and on APPENDIX F – BENCHMARK REGULATION.

INVESTMENT POLICY

The Sub-Fund will carry out its investment objective via a Direct Replication as described and in compliance with the section INVESTMENT OBJECTIVES of the part I/ Investment Objectives/ Investment Powers and Restrictions of this Prospectus.

Within the limits set forth in this Prospectus and on an ancillary basis, the Sub-Fund may hold cash and cash equivalents.

The Sub-Fund will not invest more than 10% of its assets in units or shares of other UCITS. No investment will be made in any UCIs.

INVESTMENT TECHNIQUES

The maximum and expected proportions of the Sub-Fund’s assets that can be subject to SFTs and TRS are disclosed in APPENDIX E - SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS.

ELIGIBILITY OF THE SUB-FUND

Please refer to Appendix APPENDIX G – SPECIFIC INVESTMENT RATIO for information regarding the Sub-Fund and the German Investment Funds Tax Act (InvStG-E) (“**GITA**”).

TARGETED INVESTORS

The Sub-Fund is available to all investors.

Investors in this Sub-Fund are seeking a core exposure (i.e. a buy and hold investment) to the performance of international investment-grade sovereign bonds issued in Japanese Yen by the government of Japan.

CLASSES OF SHARES AND FEES

The Sub-Fund will issue the Classes of Shares, subject to different terms and conditions described in APPENDIX C - SUMMARY OF SHARES AND FEES. Other Share Classes may be available. For a current listing of available Share Classes go to www.amundiETF.com.

The Sub-Fund Management fee should not be the sole criteria driving subscription; Sub-Fund efficiency – represented by tracking difference, tracking error and the key metrics of secondary market liquidity – should also be analyzed. Investors should assess their personal situation and constraints before investing.

DEFINITIONS

“Business Day”, “Dealing Day” and “Valuation Day”: Please refer to the APPENDIX H – GLOSSARY OF TERMS.

“Dealing Deadline”: Please refer to the APPENDIX D – SUMMARY TABLE OF SUB-FUND’S DEALING TIMELINE.

APPENDIX 71

MULTI UNITS LUXEMBOURG – Amundi US Curve steepening 2-10Y

The Sub-Fund is an index-tracking UCITS passively managed.

The Reference Currency of the Sub-Fund is the US Dollar (USD).

INVESTMENT OBJECTIVE

The investment objective of MULTI UNITS LUXEMBOURG - Amundi US Curve steepening 2-10Y is to reflect the performance of the Solactive USD Daily (x7) Steepener 2-10 Index (the “**Benchmark Index**”) denominated in USD, representative of the performance of a long position in 2Y US Treasury Note Futures (2-year contract) and a short position in the Ultra 10Y US Treasury Note Futures (10-year contract) - while minimizing the volatility of the difference between the return of the Sub-Fund and the return of the Benchmark Index (“**Tracking Error**”).

For monthly hedged share classes mentioned in APPENDIX C - SUMMARY OF SHARES AND FEES, the Sub-Fund will also use a monthly currency-hedge strategy, in order to minimize the impact of the evolution of each respective share class currency against currencies of each Index component.

The anticipated level of the tracking error under normal market conditions is expected to be up to 0.50%.

THE BENCHMARK INDEX

- **Benchmark Index Objectives**

The Benchmark Index is representative of the performance of a long position in 2Y US Treasury Note Futures (2-year contract) and a short position in the Ultra 10Y US Treasury Note Futures (10-year contract). As a result, the Benchmark Index should benefit from an increase of the difference between the 10-year US yield and the 2-year US yield. On the contrary in the case of a decrease of the difference between the 10-year US yield and the 2-year US yield the Benchmark Index should decrease.

The strategy that the Benchmark Index aims to replicate is commonly referred as a steepening strategy as it benefits from a steepening of the US interest rate curve.

- **Benchmark Index Methodology**

The Benchmark Index is designed to provide an exposure to a long position in 2Y US Treasury Note Futures (2-year contract) and a short position in the Ultra 10Y US Treasury Note Futures (10-year contract).

At rebalancing, the weight of the respective futures contract is inversely proportional to its Modified duration (i.e. the Modified duration of the Cheapest to Deliver (CTD) bond of each contract) in order to remove the potential noise related to residual duration of the strategy. Also, a multiplier of 7 will be applied to both the short and long legs resulting in a leveraged long/short position.

The daily Benchmark Index performance will not be the daily change of the 2-10 years yield differential, nor a multiplier of the 2-10 years yield differential change, but will be related to the daily over performance of the long position in the 2Y US Treasury Note Futures (2-year contract) versus the short position in the Ultra 10Y US Treasury Note Futures (10-year contract) and cash performance, which is in theory correlated to the changes in the 2-10 years yield differential.

The Benchmark Index therefore represents a funded long position in the 2Y US Treasury Note Futures (2-year contract) and short position in the Ultra 10Y US Treasury Note Futures (10-year contract).

In theory, an increase in the 2-10 years yield differential shall lead to a relative increase in value of the duration adjusted position in 2Y US Treasury Note Futures (2-year contract) versus the value of the duration adjusted position in Ultra 10Y US Treasury Note Futures (10-year contract). Futures contracts being based on a basket of bonds, the Benchmark Index performance will not be exactly linked to the 2-10 years yield differential but will be linked to the yield differential between the CTD bond of the Ultra 10Y US Treasury Note Futures (10-year contract) and the CTD bond of the 2Y US Treasury Note Futures (2-year contract). In addition, (i) futures price movements due to supply and demand discrepancies between nominal bonds and futures and (ii) transactions costs applicable to the Benchmark Index components, will lead to deviations between the Benchmark Index performance and changes in curve steepening.

The composition of the Benchmark Index is adjusted daily and is rebalanced quarterly.

The complete methodology for the Benchmark Index (including maintenance and rebalancing of the Benchmark Index) is available for consultation on the following website: <http://www.Solactive.de>.

- **Additional Information on Benchmark Index**

Additional information on the Benchmark Index, its composition, calculation and rules for periodical review and rebalancing and on the general methodology behind the Benchmark Index can be found on: <http://www.Solactive.de>.

For additional Information on the Index please refer to paragraph B “Investment made by Index Sub-Fund” of Section I “Investment Objective / Investment Powers and Restrictions” of the main part of this Prospectus and on APPENDIX F – BENCHMARK REGULATION.

INVESTMENT POLICY

The Sub-Fund will carry out its investment objective via an Indirect Replication as described and in compliance with the section INVESTMENT OBJECTIVES of the part I/ Investment Objectives/ Investment Powers and Restrictions of this Prospectus.

Within the limits set forth in this Prospectus and on an ancillary basis, the Sub-Fund may hold cash and cash equivalents.

The Sub-Fund will not invest more than 10% of its assets in units or shares of other UCITS. No investment will be made in any UCIs.

INVESTMENT TECHNIQUES

The maximum and expected proportions of the Sub-Fund's assets that can be subject to SFTs and TRS are disclosed in APPENDIX E - SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS.

ELIGIBILITY OF THE SUB-FUND

Please refer to Appendix APPENDIX G – SPECIFIC INVESTMENT RATIO for information regarding the Sub-Fund and the German Investment Funds Tax Act (InvStG-E) (“GITA”).

TARGETED INVESTORS

The Sub-Fund is available to all investors.

The Sub-Fund is dedicated to both retail and institutional investors wishing to have an exposure to changes in curve steepening in the US via a long position in the 2Y US Treasury Note Futures (2-year contract) and a short position in the Ultra 10Y US Treasury Note Futures (10-year contract).

CLASSES OF SHARES AND FEES

The Sub-Fund will issue the Classes of Shares, subject to different terms and conditions described in APPENDIX C - SUMMARY OF SHARES AND FEES. Other Share Classes may be available. For a current listing of available Share Classes go to www.amundiETF.com.

RISK MANAGEMENT

By derogation of the paragraph Risk Management Process of the main part of the Prospectus, the global exposure of this Sub-Fund is calculated using the Absolute VaR approach as detailed in applicable laws and regulations, including but not limited to CSSF Circular 11/512.

The expected level of leverage of the Sub-Fund (calculated as the sum of notional of the long exposure and the short exposure of the Benchmark Index plus the cash exposure of the Benchmark Index) is 560% based on an average level calculated from a track-record built by the Benchmark Index Sponsor, although higher levels might be observed.

Higher levels of leverage are possible depending on the application of the Benchmark Index Methodology which includes quantitative adjustments.

DEFINITIONS

“Business Day”, “Dealing Day” and “Valuation Day”: Please refer to the APPENDIX H – GLOSSARY OF TERMS.

“Dealing Deadline”: Please refer to the APPENDIX D – SUMMARY TABLE OF SUB-FUND'S DEALING TIMELINE.

LISTING

The Sub-Fund is a UCITS ETF. As a consequence, all its Shares shall be traded throughout the day on one or several regulated market or multilateral trading facilities with at least one market maker which takes action to ensure that the stock exchange value of the Shares does not significantly vary from its iNAV (as defined above).

In the event of Suspension of the Secondary Market (as defined above in the Prospectus) the following exit charges will apply (in replacement of the maximum redemption charges stated above): 1% of the Net Asset Value per Share multiplied by the number of shares redeemed.

A list of these stock exchanges and/or multilateral trading facilities can be obtained from the registered office of the Company.

Information on the iNAV of an exchange-traded share are also provided in section “Indicative Net Asset Value per Share” of the main part of the Prospectus and on the website www.amundiETF.com.

PUBLICATION OF THE NET ASSET VALUE

The Net Asset Value per Share will be available at the registered office of the Company and will be published on www.amundiETF.com.

RISKS WARNING

Among the different risks described in APPENDIX B - SPECIAL RISK CONSIDERATIONS AND RISK FACTORS, the Sub-Fund is more specifically exposed to the following risks:

Risks linked to future contracts composing the index / strategy, Interest Rate Risk, Credit Risk, Capital at Risk, Sub-Fund Liquidity Risk, Liquidity Risk on Secondary Market, Risk that the Sub-Fund's investment objective is only partially achieved, Risk of using financial derivative instruments, Counterparty Risk, Collateral Management Risk, Currency Risk, Class Currency Hedge Risk, Index Calculation Risk.

The Sub-Fund will also be exposed to the following risk:

Futures roll-over risk

The Benchmark Index is comprised of future contracts on government bonds. A rol of positions will be made on such future contracts. Such a roll consists in transferring a position on contracts close to their expiry (in any case, before the expiry date) to contracts with a longer maturity. Due to transaction costs and a potential lack of liquidity, investors are exposed to a risk of loss arising from the roll operation on the future contracts.

Leverage risk

By reflecting the performance of the Benchmark index, the Sub-Fund will be indirectly leveraged to US bond futures through its exposure the Benchmark Index. Leverage generates specific risks. It indeed amplifies both upside and downside movements of the underlying assets, hence increasing the Sub-Fund's volatility. A high level of leverage implies that a moderate loss on one or more underlying assets could lead to a large capital loss for the Sub-Fund. Finally, leverage leads to a proportional increase of Sub-Fund investment costs, especially transaction costs.

Daily leverage adjustment risk

Investors are exposed to the daily changes affecting the price or level of the long and short legs. The daily rebalancing of the Benchmark Index implies that for a period of more than one trading day (a "Period"), the total performance of the Benchmark Index may not be equal the performance of the long leg minus the performance of the short leg.

Please note all the simulated scenario below are for illustrative purpose only and don't take into account several factors such as cash performance transaction costs etc. Also, in these examples the multiplier is embedded in the performance of the short and long legs.

For example, in scenario 1 below, if the long leg increases by 3% and the short leg increases by 6% for one given day, then the long leg decreases by 5% and the short leg increases by 3% the next day, after these 2 days, the long leg will have decreased by 2.15% and the short leg increased by 9.18% over the Period (i.e. long leg – short leg = -11.33%), whereas the Benchmark Index will have decreased by 10.76% (before deductible fees) over the same Period.

Scenario 1 Case where the ratio Benchmark Index performance over (Performance long leg – Performance short leg) is below one.

	Long leg		Short leg		Benchmark Index		Benchmark Index Perf / (Perf long leg - short leg)
	performance day i	value day i	performance day i	value day i	performance day i	value day i	
	100		100		100		
Day 1	3%	103	6%	106	-3%	97.0	x1
Day 2	-5%	97.9	3%	109.2	-8%	89.2	x1
Period	-2.15%		9.18%		-10.76%		x0.95

For example, in scenario 2 below, if the long leg increases by 5% and the short leg increases by 1% for one given day, then the long leg decreases by 5% and the short leg decreases by 8% the next day, after these 2 days, the long leg will have decreased by 0.25% and the short leg decreased by 7.08% over the Period (i.e. long leg – short leg = 6.83%), whereas the Benchmark Index will have decreased by 7.12% (before deductible fees) over the same Period.

Scenario 2 Case where the ratio Benchmark Index performance over (Performance long leg – Performance short leg) is above one.

	Long leg		Short leg		Benchmark Index		Benchmark Index Perf / (Perf long leg - short leg)
	performance day i	value day i	performance day i	value day i	performance day i	value day i	
	100		100		100		
Day 1	5%	105	1%	101	4%	104.0	x1.0
Day 2	-5%	99.8	-8%	92.9	3%	107.1	x1.0
Period	-0.25%		-7.08%		7.12%		X1.04

For example, in scenario 3 below, this mechanism could lead to a negative performance of the Benchmark Index of 0.56% over the Period, while the long leg increased by 2.82% and the short leg increase by 1.37% (i.e. long leg – short leg = +1.45%).

Scenario 3 Case where the ratio Benchmark Index performance over (Performance long leg – Performance short leg) is negative.

	Long leg		Short leg		Benchmark Index		Benchmark Index Perf / (Perf long leg - short leg)
	performance day i	value day i	performance day i	value day i	performance day i	value day i	
	100		100		100		
Day 1	-3%	97	9%	109	-12%	88.0	x1.0
Day 2	6%	102.8	-7%	101.4	13%	99.4	x1.0
Period	2.82%		1.37%		-0.56%		x-0.39

SUSTAINABILITY RISKS

This Sub-Fund does not promote ESG characteristics and does not maximize portfolio alignment with Sustainability Factors, however it remains exposed to Sustainability Risks and the occurrence of such risks could cause a negative material impact on the value of the investments made by the Sub-Fund. Further information can be found in the “SUSTAINABLE INVESTING” Section of the Prospectus.

TAXONOMY REGULATION

In accordance of article 7 of the Taxonomy Regulation, the Management Company draws the attention of investors to the fact that the investments underlying this Sub-Fund do not take into account the European Union criteria for environmentally sustainable economic activities.

DISTRIBUTION OF INCOME

Please refer to the Distribution Policy section of the Prospectus.

DISCLAIMER

The Sub-Fund is not sponsored, promoted, sold or supported in any other manner by Solactive AG nor does Solactive AG offer any express or implicit guarantee or assurance either with regard to the results of using the Index and/or Index trade mark or the Index Price at any time or in any other respect. The Index is calculated and published by Solactive AG. Solactive AG uses its best efforts to ensure that the Index is calculated correctly. APPENDIX 72

MULTI UNITS LUXEMBOURG – Lyxor MSCI Europe ESG Climate Transition CTB (DR) UCITS ETF

The Sub-Fund is an index-tracking UCITS passively managed.

This Sub-Fund promotes environmental and/or social characteristics within the meaning of article 8 of SFDR, as further described in Appendix I – ESG Related Disclosures to this Prospectus.

The Reference Currency of the Sub-Fund is the Euro (EUR).

INVESTMENT OBJECTIVE

The investment objective of the MULTI UNITS LUXEMBOURG – Lyxor MSCI Europe ESG Climate Transition CTB (DR) UCITS ETF (the “**Sub-Fund**”) is to track both the upward and the downward evolution of the MSCI Europe ESG Climate Transition (EU CTB) Select Net Total Return Index (the “**Index**”) denominated in Euros and representative of the performance of an investment strategy constructed from the MSCI Europe Index (the “**Parent Index**”) and designed to exceed the minimum standards of the EU Climate Transition Benchmarks (the “**EU CTB**”) required under delegated acts supplementing Regulation (EU) 2019/2089 amending Regulation (EU) 2016/1011 (the “**Benchmark Regulation**”), while minimizing the volatility of the difference between the return of the Sub-Fund and the return of the Index (the “**Tracking Error**”).

For monthly hedged share classes mentioned in APPENDIX C - SUMMARY OF SHARES AND FEES, the Sub-Fund will also use a monthly currency-hedge strategy, in order to minimize the impact of the evolution of each respective share class currency against currencies of each Index component.

The anticipated level of the Tracking Error, under normal market conditions is expected to be up to 0.50%.

THE INDEX

• **Index Objectives**

The Index is based on the Parent Index and includes large and mid-cap securities of the European developed equity market. It aims to represent the performance of an investment strategy designed to exceed the minimum standards of the EU CTB under the Benchmark Regulation. It incorporates ESG criteria and a broad range of climate-related objectives covering transition risk, climate change opportunities and physical risk, as further described in Appendix I – ESG Related Disclosures to this Prospectus, while minimizing the volatility of the difference between the return of the Index and the return of the Parent Index.

• **Index Methodology**

The Index is an equity index calculated and published by the international index provider MSCI.

The MSCI methodology and calculation method are based on a variable number of companies in the Index.

The Index is a net total return index. A net total return index calculates the performance of the index constituents on the basis that any dividends or distributions are included in the index returns after withholding tax retention.

The complete methodology for the Index (including maintenance and rebalancing of the Index) is available for consultation on the MSCI website: <http://www.msci.com>.

The Index is rebalanced on a semi-annual basis, as of the close of the last business day of May and November, coinciding with the May and November Semi Annual Index Review of the MSCI Global Investable Market Indexes.

The rebalancing frequency as described above will have no impact in terms of costs in the context of the performance of the investment objective.

• **Additional Information on Index**

Additional information on the Index, its composition, calculation and rules for periodical review and rebalancing and on the general methodology behind the Index can be found on the index provider's website: <http://www.msci.com>.

For additional information on the Index please refer to paragraph B “Investment made by Index Sub-Fund” of Section I “Investment Objective / Investment Powers and Restrictions” of the main part of this Prospectus and on APPENDIX F – BENCHMARK REGULATION.

INVESTMENT POLICY

The Sub-Fund will carry out its investment objective via a Direct Replication as described and in compliance with the section INVESTMENT OBJECTIVES of the part I/ Investment Objectives/ Investment Powers and Restrictions of this Prospectus.

Within the limits set forth in this Prospectus and on an ancillary basis, the Sub-Fund may hold cash and cash equivalents.

The Sub-Fund will not invest more than 10% of its assets in units or shares of other UCITS. No investment will be made in any UCIs.

The Sub-Fund integrates Sustainability Risks and takes into account principal adverse impacts of investments on Sustainability Factors in its investment process as outlined in more detail in section “Sustainable Investing” of this Prospectus

and will not hold any securities of companies involved in the production or sale of controversial weapons, or companies in breach of international conventions on Human or Labor Rights, or companies involved in controversial industries: tobacco, Thermal coal, nuclear weapons or unconventional oil & gas as defined in section I "Investment Objectives/ Investment Powers and Restrictions".

More information on environmental and/or social characteristics can be found in Appendix I - ESG Related Disclosures to this Prospectus.

INVESTMENT TECHNIQUES

Information on the iNAV of an exchange-traded share are also provided in section "Indicative Net Asset Value per Share" of the main part of the Prospectus and on the website www.amundiETF.com.

PUBLICATION OF THE NET ASSET VALUE

The Net Asset Value per Share will be available at the registered office of the Company and will be published on www.amundiETF.com.

RISKS WARNING

Among the different risks described in APPENDIX B - SPECIAL RISK CONSIDERATIONS AND RISK FACTORS, the Sub-Fund is more specifically exposed to the following risks:

Equity Risk, Capital at Risk, Capital erosion risk, Risks linked to Sampling and Optimization techniques, Risks linked to the investment in Medium Capitalization Stocks, Lack of Reactivity to Changing Circumstances, Sub-Fund Liquidity Risk, Liquidity Risk on Secondary Market, Risk that the Sub-Fund's investment objective is only partially achieved, Risk of using financial derivative instruments, Counterparty Risk, Collateral Management Risk, Currency Risk, Class Currency Hedge Risk, Market Risk linked to a controversy, Risk linked to ESG Methodologies, Risk related to ESG Score computation, Index Calculation Risk.

The Sub-Fund will also be exposed to the following risks:

Risk of the EU CTB label withdrawal

The Index has been designed to qualify for the label "EU CTB". Therefore, it is intended to receive the associated label EU CTB. For the Index to meet the Benchmark Regulation, among other constraints the Index must reduce its carbon intensity at 7% year-on-year, using average weights throughout the period. The Index is designed to be compliant at each rebalance. However, the weights of companies, their carbon emissions and enterprise value (which is the denominator in the calculation of carbon intensity) can change between rebalances. To avoid window-dressing, the regulation ensures Index reporting is based on average weights between rebalances. Therefore, even if the Index is compliant at each rebalance, it may not necessarily maintain the label based on reports using average weights. Moreover, in a situation where too many companies of the Parent Index increase their absolute carbon emissions over a long period, the Index could fail to

fulfil some minimum standards of EU CTB and as a result lose its label.

Risk of unsolvable optimizations

The Index methodology is using an optimization methodology. With any use of optimization, it is not always possible to find a solution that meets all constraints simultaneously. It is prudent to be aware that increases in future relative carbon footprint reductions, or unforeseeable changes in the exclusions or other datasets may have the potential to cause unsolvable optimizations in the future. For this reason, a hierarchy of constraint relaxation has been set in the methodology of the Index to further minimize the risk of unsolvable solutions.

Risk of unlimited bound on the difference in constituent weights to the Parent Index

The objective function for the optimization is to minimize the difference in constituent weights to the Parent Index, which should minimize the decarbonization constraints' impact on tracking error between the Index and the Parent Index. However, with any 1.5°C scenario aligned strategy, there is an absolute decarbonization target which must be hit to fulfil this 1.5°C alignment. As the level of emission reduction required for a 1.5°C scenario is absolute (as laid out by the TEG (The EU Technical Expert Group on Sustainable Finance, 2019)), the Index is designed to decarbonize by 7.35% year-on-year. The relative carbon footprint reduction required, at any point in time, to hit this target will therefore be dependent on the decarbonization of the Parent Index. The required footprint reduction would be amplified by a lack of decarbonization (or increased carbon footprint) in the Parent Index. Such a scenario may require an increasing level of difference in constituent weights to the Parent Index through time to achieve the desired target. Therefore, historical, back-tested tracking error may not be fully indicative of future, realized tracking error if such a situation was to become particularly extreme. Since the upper bound on the difference in constituent weights to the Parent Index is not controlled to prevent the above decarbonization constraints from becoming infeasible, future tracking error between the Index and the Parent Index can never completely be explicitly capped.

Risk related to the carbon data used in methodology of the Index

The analysis of companies' current and future greenhouse gas emission is partly based on declarative data, models and estimates. In the current state of the available data, all greenhouse gas emission data are not available, and some are model based (in particular those related to scope 3 which includes all greenhouse gas emissions that are not directly related to manufacturing of a product).

Risk related the components of the Index

The methodology of the Index does not prevent to incorporate highly Greenhouse gas emitting companies' securities.

SUSTAINABILITY RISKS

In managing the Sustainability Risks of this Sub-Fund, the Management Company relies on MSCI as the administrator of the Index, which identifies and integrates relevant and significant Sustainable Risks in its methodology. Such integration has therefore a direct impact on the investment universe of the Index. However, no insurance can be given that Sustainability Risks will be totally removed and the occurrence of such risks could cause a negative material impact on the value of the assets comprising the Index tracked or reflected by the Sub-Fund. For further information on MSCI methodology, please refer to: <http://www.msci.com>. Further information can also be found in the "SUSTAINABLE INVESTING" Section of the Prospectus.

DISTRIBUTION OF INCOME

Please refer to the Distribution Policy section of the Prospectus.

APPENDIX 73**MULTI UNITS LUXEMBOURG – Lyxor Core US Government Bond (DR) UCITS ETF**

The Sub-Fund is an index-tracking UCITS passively managed.

The Reference Currency of the Sub-Fund is the US Dollar (USD).

INVESTMENT OBJECTIVE

The investment objective of MULTI UNITS LUXEMBOURG – **Lyxor Core US Government Bond (DR) UCITS ETF** (the “**Sub-Fund**”) is to reflect the performance of the FTSE US Government Bond Index (the “**Benchmark Index**”) denominated in US Dollar, while minimizing the volatility of the difference between the return of the Sub-Fund and the return of the Benchmark Index (the “**Tracking Error**”).

For monthly hedged share classes mentioned in APPENDIX C - SUMMARY OF SHARES AND FEES, the Sub-Fund will also use a monthly currency-hedge strategy, in order to minimize the impact of the evolution of each respective share class currency against currencies of each Benchmark Index component.

The anticipated level of the tracking error under normal market conditions is expected to be up to 1%.

THE BENCHMARK INDEX**Benchmark Index Objectives**

The Benchmark Index is a market-value weighted index that is designed to measure the performance of international investment-grade bonds issued in US Dollar by the government of the United States.

The Benchmark Index is representative of fixed-rate, investment-grade sovereign bonds issued in US Dollar by the government of the United States, providing a Core exposure i.e. a buy and hold investment.

Benchmark Index Methodology

The Benchmark Index is sponsored by international index provider FTSE Russell.

The Benchmark Index is comprised of international bonds issued in US Dollar by the government of the United States. As part of the World Government Bond Index (WGBI) family of indices, in order to be eligible for inclusion in the Benchmark Index, a bond must meet specific criteria pertaining to its coupon, maturity, market size, issue size and credit quality.

The Benchmark Index is a net total return index. A net total return index calculates the performance of the index constituents on the basis that any dividends or distributions are included in the index returns after withholding tax retention.

The complete methodology for the Benchmark Index (including maintenance and rebalancing of the Benchmark Index) is available for consultation on the website:

<https://www.yieldbook.com/m/indexes/fund/>.

The composition of the Benchmark Index is rebalanced monthly.

The rebalancing frequency as described above will have no impact in terms of costs in the context of the performance of the investment objective.

Additional Information on Benchmark Index

Additional information on the Benchmark Index, its composition, calculation and rules for periodical review and rebalancing and on the general methodology behind the Benchmark Index can be found on <https://www.yieldbook.com/m/indexes/fund>.

For additional information on the Index please refer to paragraph B “Investment made by Index Sub-Fund” of Section I “Investment Objective / Investment Powers and Restrictions” of the main part of this Prospectus and on APPENDIX F – BENCHMARK REGULATION.

INVESTMENT POLICY

The Sub-Fund will carry out its investment objective via a Direct Replication as described and in compliance with the section INVESTMENT OBJECTIVES of the part I/ Investment Objectives/ Investment Powers and Restrictions of this Prospectus.

Within the limits set forth in this Prospectus and on an ancillary basis, the Sub-Fund may hold cash and cash equivalents.

The Sub-Fund will not invest more than 10% of its assets in units or shares of other UCITS. No investment will be made in any UCIs.

INVESTMENT TECHNIQUES

The maximum and expected proportions of the Sub-Fund’s assets that can be subject to SFTs and TRS are disclosed in APPENDIX E - SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS.

ELIGIBILITY OF THE SUB-FUND

Please refer to Appendix APPENDIX G – SPECIFIC INVESTMENT RATIO for information regarding the Sub-Fund and the German Investment Funds Tax Act (InvStG-E) (“**GITA**”).

TARGETED INVESTORS

The Sub-Fund is available to all investors. Investors in this Sub-Fund are seeking a core exposure (i.e. a buy and hold investment) to the performance of international investment-grade bonds

issued in US Dollar by the government of the United States.

CLASSES OF SHARES AND FEES

The Sub-Fund will issue the Classes of Shares, subject to different terms and conditions described in APPENDIX C - SUMMARY OF SHARES AND FEES. Other Share Classes may be available. For a current listing of available Share Classes go to www.amundiETF.com.

DEFINITIONS

"Business Day", "Dealing Day" and "Valuation Day": Please refer to the APPENDIX H – GLOSSARY OF TERMS.

"Dealing Deadline": Please refer to the APPENDIX D – SUMMARY TABLE OF SUB-FUND'S DEALING TIMELINE.

LISTING

The Sub-Fund is a UCITS ETF. As a consequence all its Shares shall be traded throughout the day on one or several regulated market or multilateral trading facilities with at least one market maker which takes action to ensure that the stock exchange value of the Shares does not significantly vary from its iNAV (as defined above).

In the event of Suspension of the Secondary Market (as defined above in the Prospectus) the following exit charges will apply (in replacement of the maximum redemption charges stated above): 0.2% of the Net Asset Value per Share multiplied by the number of shares redeemed.

A list of these stock exchanges and/or multilateral trading facilities can be obtained from the registered office of the Company.

Information on the iNAV of an exchange-traded share are also provided in section "Indicative Net Asset Value per Share" of the main part of the Prospectus and on the website www.amundiETF.com.

PUBLICATION OF THE NET ASSET VALUE

The Net Asset Value per Share will be available at the registered office of the Company and will be published on www.amundiETF.com.

RISKS WARNING

Among the different risks described in APPENDIX B - SPECIAL RISK CONSIDERATIONS AND RISK FACTORS, the Sub-Fund is more specifically exposed to the following risks:

Interest Rate Risk, Credit risk, Capital at Risk, Risks linked to Sampling and Optimization techniques, Sub-Fund Liquidity Risk, Liquidity Risk on Secondary Market, Risk that the Sub-Fund's investment objective is only partially achieved, low diversification risk, Risk of using financial derivative instruments,

Counterparty Risk, Collateral Management Risk, Currency Risk, Class Currency Hedge Risk, Index Calculation Risk.

SUSTAINABILITY RISKS

This Sub-Fund does not promote ESG characteristics and does not maximize portfolio alignment with Sustainability Factors, however it remains exposed to Sustainability Risks and the occurrence of such risks could cause a negative material impact on the value of the investments made by the Sub-Fund. Further information can be found in the "SUSTAINABLE INVESTING" Section of the Prospectus.

TAXONOMY REGULATION

In accordance of article 7 of the Taxonomy Regulation, the Management Company draws the attention of investors to the fact that the investments underlying this Sub-Fund do not take into account the European Union criteria for environmentally sustainable economic activities.

DISTRIBUTION OF INCOME

The LSE Group makes no claim, prediction, warranty or representation either as to the results to be obtained from the Sub-Fund or the suitability of the Benchmark Index for the purpose to which it is being put by Amundi Asset Management.

APPENDIX 74

MULTI UNITS LUXEMBOURG – Amundi S&P Eurozone PAB Net Zero Ambition

The Sub-Fund is an index-tracking UCITS passively managed.

This Sub-Fund promotes environmental and/or social characteristics within the meaning of article 8 of SFDR, as further described in Appendix I – ESG Related Disclosures to this Prospectus.

The Reference Currency of the Sub-Fund is the Euro (EUR).

INVESTMENT OBJECTIVE

The investment objective of the MULTI UNITS LUXEMBOURG – **Amundi S&P Eurozone PAB Net Zero Ambition** (the “**Sub-Fund**”) is to track both the upward and the downward evolution of the S&P Eurozone LargeMidCap Net Zero 2050 Paris-Aligned ESG Net Total Return Index (the “**Index**”), denominated in Euros, and representative of the performance of eligible equity securities from the S&P Eurozone LargeMidCap Index (the “**Parent Index**”) selected and weighted to be collectively compatible with a 1.5°C global warming climate scenario, while minimizing the volatility of the difference between the return of the Sub-Fund and the return of the Index (the “**Tracking Error**”).

For daily hedged share classes mentioned in APPENDIX C – SUMMARY OF SHARES AND FEES, the Sub-Fund will also use a daily currency hedging strategy, in order to minimize the impact of the evolution of each respective share class currency against the currencies of each Index component.

The anticipated level of the Tracking Error, under normal market conditions is expected to be up to 0.50%.

THE INDEX

- **Index Objectives**

The Index is based on the Parent Index which is representative of large and mid-cap securities of the Eurozone equity markets. The Index measures the performance of eligible equity securities from the Parent Index, selected and weighted to be collectively compatible with a 1.5°C global warming climate scenario. It incorporates a broad range of climate-related objectives covering transition risk, climate change opportunities and physical risk, as further described in Appendix I – ESG Related Disclosures to this Prospectus.

The Index has been designed to align with the minimum standards as proposed in the Final Report of the European Union’s Technical Expert Group on Climate Benchmarks and ESG Disclosures (the “**TEG**”) and qualify for the label ‘EU Paris-aligned benchmarks’ (“**EU PAB**”). The proposals contained in the Final Report are not legally binding. The Final

Report will serve as the basis for the European Commission to draft delegated acts to implement the requirements of Regulation (EU) 2019/2089. Following publication of the final delegated acts, the methodology will be reviewed and updated if required to align with any relevant changes to the minimum standards for EU Paris-aligned benchmarks. Should a change to the methodology be required, S&P Dow Jones Indices will issue an announcement before the change is implemented (and in these circumstances, S&P Dow Jones Indices would not conduct a formal consultation).

- **Index Methodology**

The monitored performance is based on the closing prices of the Index.

The Index is calculated by S&P Dow Jones Indices.

The complete methodology for the Index (including maintenance and rebalancing of the Index) is available on the website: www.spindices.com.

The composition of the Index is reviewed and rebalanced on a quarterly basis (March, June, September and December).

The rebalancing frequency as described above will have no impact in terms of costs in the context of the performance of the investment objective.

The Index is a net total return index. A net total return index calculated the performance of the Index constituents on the basis that any dividends or distributions are included in the index returns after withholding tax retention.

- **Additional Information on Index**

Additional information on the Index, its composition, calculation and rules for periodical review and rebalancing and on the general methodology behind the Index can be found on the Index provider’s website: www.spindices.com.

For additional Information on the Index please refer to paragraph B “Investment made by Index Sub-Fund” of Section I “Investment Objective / Investment Powers and Restrictions” of the main part of this Prospectus and on APPENDIX F – BENCHMARK REGULATION.

INVESTMENT POLICY

The Sub-Fund will carry out its investment objective via a Direct Replication as described and in compliance with the section INVESTMENT OBJECTIVES of the part I/ Investment Objectives/ Investment Powers and Restrictions of this Prospectus.

Within the limits set forth in this Prospectus and on an ancillary basis, the Sub-Fund may hold cash and cash equivalents.

The Sub-Fund will not invest more than 10% of its assets in units or shares of other UCITS. No investment will be made in any other UCIs.

The Sub-Fund integrates Sustainability Risks and takes into account principal adverse impacts of investments on Sustainability Factors in its investment process as outlined in more detail in section "Sustainable Investing" of this Prospectus and will not hold any securities of companies involved in the production or sale of controversial weapons, or companies in breach of international conventions on Human or Labor Rights, or companies involved in controversial industries: tobacco, Thermal coal, nuclear weapons or unconventional oil & gas as defined in section I "Investment Objectives/ Investment Powers and Restrictions".

More information on environmental and/or social characteristics can be found in Appendix I - ESG Related Disclosures to this Prospectus.

INVESTMENT TECHNIQUES

The maximum and expected proportions of the Sub-Fund's assets that can be subject to SFTs and TRS are disclosed in APPENDIX E - SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS.

ELIGIBILITY OF THE SUB-FUND

The Sub-Fund is eligible to the French equity savings plans (PEA) which means that the Sub-Fund invests at least 75% of its assets in a diversified portfolio of equities issued by an issuer incorporated either in European Union member state or in a member state of the European Economic Area.

Please refer to Appendix APPENDIX G – SPECIFIC INVESTMENT RATIO for information regarding the Sub-Fund and the German Investment Funds Tax Act (InvStG-E) ("GITA").

TARGETED INVESTORS

The Sub-Fund is dedicated to both retail and institutional investors seeking exposure to Eurozone large and mid-cap equity securities selected and weighted to be collectively compatible with a 1.5°C global warming climate scenario.

CLASSES OF SHARES AND FEES

The Sub-Fund will issue the Classes of Shares, subject to different terms and conditions described in APPENDIX C - SUMMARY OF SHARES AND FEES. Other Share Classes may be available. For a current listing of available Share Classes go to www.amundiETF.com.

DEFINITIONS

The Sub-Fund will carry out its investment objective via a Direct Replication as described and in compliance with the section INVESTMENT OBJECTIVES of the part I/ Investment Objectives/ Investment Powers and Restrictions of this Prospectus.

Within the limits set forth in this Prospectus and on an ancillary basis, the Sub-Fund may hold cash and cash equivalents.

The Sub-Fund will not invest more than 10% of its assets in units or shares of other UCITS. No investment will be made in any other UCIs.

The Sub-Fund integrates Sustainability Risks and takes into account principal adverse impacts of investments on Sustainability Factors in its investment process as outlined in more detail in section "Sustainable Investing" of this Prospectus and will not hold any securities of companies involved in the production or sale of controversial weapons, or companies in breach of international conventions on Human or Labor Rights, or companies involved in controversial industries: tobacco, Thermal coal, nuclear weapons or unconventional oil & gas as defined in section I "Investment Objectives/ Investment Powers and Restrictions".

More information on environmental and/or social characteristics can be found in Appendix I - ESG Related Disclosures to this Prospectus.

INVESTMENT TECHNIQUES

The maximum and expected proportions of the Sub-Fund's assets that can be subject to SFTs and TRS are disclosed in APPENDIX E - SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS.

ELIGIBILITY OF THE SUB-FUND

Please refer to Appendix APPENDIX G – SPECIFIC INVESTMENT RATIO for information regarding the Sub-Fund and the German Investment Funds Tax Act (InvStG-E) ("GITA").

TARGETED INVESTORS

The Sub-Fund is dedicated to both retail and institutional investors seeking exposure to European large and mid-cap equity securities selected and weighted to be collectively compatible with a 1.5°C global warming climate scenario.

CLASSES OF SHARES AND FEES

The Sub-Fund will issue the Classes of Shares, subject to different terms and conditions described in APPENDIX C - SUMMARY OF SHARES AND FEES. Other Share Classes may be available. For a current listing of available Share Classes go to www.amundiETF.com.

DEFINITIONS

"Business Day", "Dealing Day" and "Valuation Day": Please refer to the APPENDIX H – GLOSSARY OF TERMS.

"Dealing Deadline": Please refer to the APPENDIX D – SUMMARY TABLE OF SUB-FUND'S DEALING TIMELINE.

LISTING

The Sub-Fund is a UCITS ETF. As a consequence all its Shares shall be traded throughout the day on one or several regulated market or multilateral trading facilities with at least one market maker which takes action to ensure that the stock exchange value of the Shares does not significantly vary from its iNAV (as defined above).

In the event of Suspension of the Secondary Market (as defined above in the Prospectus) the following exit charges will apply (in replacement of the maximum redemption charges stated above): 1% of the Net Asset Value per Share multiplied by the number of shares redeemed.

A list of these stock exchanges and/or multilateral trading facilities can be obtained from the registered office of the Company.

Information on the iNAV of an exchange-traded share are also provided in section "Indicative Net Asset Value per Share" of the main part of the Prospectus and on the website www.amundiETF.com.

PUBLICATION OF THE NET ASSET VALUE

The Net Asset Value per Share will be available at the registered office of the Company and will be published on www.amundiETF.com.

RISKS WARNING

Among the different risks described in APPENDIX B - SPECIAL RISK CONSIDERATIONS AND RISK FACTORS, the Sub-Fund is more specifically exposed to the following risks:

Capital at Risk, Equity Risk, Risks linked to the investment in Medium Capitalization Stocks, Risks linked to Sampling and Optimization techniques, Risk of using financial derivative instruments, Counterparty Risk, Collateral Management Risk, Sub-Fund Liquidity Risk, Liquidity Risk on Secondary Market, Class Currency Hedge Risk, Currency Risk, Lack of Reactivity to Changing Circumstances, Risk that the Sub-Fund's investment objective is only partially achieved, Lack of Operating History, Market Risk linked to a controversy, Risk linked to ESG Methodologies, Risk related to ESG Score computation, Index Calculation Risk.

The Sub-Fund will also be exposed to the following risk:

Risk of the EU PAB label withdrawal

The Index has been designed to qualify for the label 'EU Paris-aligned benchmarks ("EU PAB")'. Therefore, it is intended to receive the associated label EU PAB. For the Index to meet the regulation, among other constraints the Index must reduce its carbon intensity at 7% year-on-year, using average weights throughout the period. The Index is designed to be compliant at each rebalance. However, the weights of companies, their carbon emissions and enterprise value (which is the denominator in the

calculation of carbon intensity) can change between rebalances. To avoid window-dressing, the regulation ensures Index reporting is based on average weights between rebalances. Therefore, even if the Index is compliant at each rebalance, it may not necessarily maintain the label based on reports using average weights. Moreover, in a situation where too many companies of the Parent Index increase their absolute carbon emissions over a long period, the Index could fail to fulfil some minimum standards of EU Paris-aligned benchmarks and as a result lose its label.

Risk of unsolvable optimizations

The Index methodology is using an optimization methodology. With any use of optimization, it is not always possible to find a solution that meets all constraints simultaneously. It is prudent to be aware that increases in future relative carbon footprint reductions, or unforeseeable changes in the exclusions or other datasets may have the potential to cause unsolvable optimizations in the future. For this reason, a hierarchy of constraint relaxation has been set in the methodology of the Index to further minimize the risk of unsolvable solutions.

Risk of unlimited bound on the difference in constituent weights to the Parent Index

The objective function for the optimization is to minimize the difference in constituent weights to the Parent Index, which should minimize the decarbonization constraints' impact on tracking error between the Index and the Parent Index. However, with any 1.5°C scenario aligned strategy, there is an absolute decarbonization target which must be hit to fulfil this 1.5°C alignment. As the level of emission reduction required for a 1.5°C scenario is absolute (as laid out by the TEG (The EU Technical Expert Group on Sustainable Finance, 2019)), the Index is designed to decarbonize by 7% year-on-year. The relative carbon footprint reduction required, at any point in time, to hit this target will therefore be dependent on the decarbonization of the Parent Index. The required footprint reduction would be amplified by a lack of decarbonization (or increased carbon footprint) in the Parent Index. Such a scenario may require an increasing level of difference in constituent weights to the Parent Index through time to achieve the desired target. Therefore, historical, back-tested tracking error may not be fully indicative of future, realized tracking error if such a situation was to become particularly extreme. Since the upper bound on the difference in constituent weights to the Parent Index is not controlled to prevent the above decarbonization constraints from becoming infeasible, future tracking error between the Index and the Parent Index can never completely be explicitly capped.

Risk related to the carbon data used in methodology of the Index

The analysis of companies' current and future greenhouse gas emission is partly based on declarative data, models and estimates. In the current state of the available data, all greenhouse gas emission data are not available, and some are model based (in particular those related to scope 3

which includes all greenhouse gas emissions that are not directly related to manufacturing of a product).

Risk related the components of the Index

The methodology of the Index does not prevent to incorporate highly Greenhouse gas emitting companies' securities.

Sustainability Risks

In managing the Sustainability Risks of this Sub-Fund, the Management Company relies on S&P as the administrator of the Index, which identifies and integrates relevant and significant Sustainable Risks in its methodology designated to align with the minimum standards for EU Paris-aligned benchmarks. Such integration has therefore a direct impact on the investment universe of the Index. However, no insurance can be given that Sustainability Risks will be totally removed and the occurrence of such risks could cause a negative material impact on the value of the assets comprising the Index tracked or reflected by the Sub-Fund. For further information on the Index methodology, please refer to: www.spindices.com. Further information can also be found in the "SUSTAINABLE INVESTING" Section of the Prospectus.

DISTRIBUTION OF INCOME

Please refer to the Distribution Policy section of the Prospectus.

APPENDIX 76

MULTI UNITS LUXEMBOURG – Amundi Euro Government Green Bond

The Sub-Fund is an index-tracking UCITS passively managed.

This Sub-Fund has sustainable investment as its objective within the meaning of article 9 of SFDR, as further described in Appendix I – ESG Related Disclosures to this Prospectus.

The Reference Currency of the Sub-Fund is the Euro (EUR).

INVESTMENT OBJECTIVE

The investment objective of MULTI UNITS LUXEMBOURG – **Amundi Euro Government Green Bond** (the “**Sub-Fund**”) is to reflect the performance of the “Solactive Euro Government Green Bond Index” (the “**Benchmark Index**”) denominated in Euros, in order to offer an exposure to the European Government Green Bond market, while minimising the volatility of the difference between the return of the Sub-Fund and the return of the Benchmark Index (the “**Tracking Error**”).

For monthly hedged share classes mentioned in APPENDIX C - SUMMARY OF SHARES AND FEES, the Sub-Fund will also use a monthly currency-hedge strategy, in order to minimize the impact of the evolution of each respective share class currency against currencies of each Benchmark Index component.

The anticipated level of the tracking error under normal market conditions is expected to be up to 0.50%.

THE BENCHMARK INDEX

- **Benchmark Index Objectives**

The Benchmark Index is representative of the performance of investment grade rated Green Bonds issued by European countries and denominated in EUR. Green Bonds are issued in order to fund projects that have positive environmental outcomes, as further described in Appendix I – ESG Related Disclosures to this Prospectus.

- **Benchmark Index Methodology**

The Benchmark Index is based, in particular, on prices provided by Solactive and third-party pricing sources.

The Benchmark Index is calculated daily.

The Benchmark Index is compiled, administered and managed by Solactive.

The composition of the Benchmark Index is reviewed and rebalanced on the last business day of each month.

The rebalancing frequency as described above will have an impact in terms of costs in the context of the performance of the investment objective. Particular costs incurred as a result of such rebalancing of the Benchmark Index include additional transaction costs.

The Benchmark Index is a “total return index” (i.e. all coupons detached by the components of the Benchmark Index are reinvested in the Benchmark Index).

The complete methodology for the Benchmark Index (including maintenance, rebalancing of the Benchmark Index and its effects on the costs within the strategy) is available for consultation on the following website: <https://www.solactive.com>.

- **Additional Information on the Benchmark Index**

Additional information on the Benchmark Index, its composition, calculation and rules for periodical review and rebalancing and on the general methodology behind the Benchmark Index can be found on <https://www.solactive.com>.

For additional Information on the Benchmark Index please refer to paragraph B “Investment made by Index Sub-Fund” of Section I “Investment Objective / Investment Powers and Restrictions” of the main part of this Prospectus and on APPENDIX F – BENCHMARK REGULATION.

INVESTMENT POLICY

The Sub-Fund will carry out its investment objective via a Direct Replication as described and in compliance with the section INVESTMENT OBJECTIVES of the part I/ Investment Objectives/ Investment Powers and Restrictions of this Prospectus.

Within the limits set forth in this Prospectus and on an ancillary basis, the Sub-Fund may hold cash and cash equivalents.

The Sub-Fund will not invest more than 10% of its assets in units or shares of other UCITS. No investment will be made in any UCIs. More information on environmental and/or social characteristics can be found in Appendix I - ESG Related Disclosures to this Prospectus.

INVESTMENT TECHNIQUES

The maximum and expected proportions of the Sub-Fund’s assets that can be subject to SFTs and TRS are disclosed in APPENDIX E - SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS.

ELIGIBILITY OF THE SUB-FUND

Please refer to Appendix APPENDIX G – SPECIFIC INVESTMENT RATIO for information regarding the Sub-Fund and the German Investment Funds Tax Act (InvStG-E) (“GITA”).

TARGETED INVESTORS

The Sub-Fund is available to all investors. Investors in this Sub-Fund are seeking an exposure to the performance of investment grade rated Green Bonds issued by European countries and denominated in EUR.

CLASSES OF SHARES AND FEES

The Sub-Fund will issue the Classes of Shares, subject to different terms and conditions described in APPENDIX C - SUMMARY OF SHARES AND FEES. Other Share Classes may be available. For a current listing of available Share Classes go to www.amundiETF.com.

DEFINITIONS

“Business Day”, “Dealing Day” and “Valuation Day”: Please refer to the APPENDIX H – GLOSSARY OF TERMS.

“Dealing Deadline”: Please refer to the APPENDIX D – SUMMARY TABLE OF SUB-FUND’S DEALING TIMELINE.

LISTING

The Sub-Fund is a UCITS ETF. As a consequence all its Shares shall be traded throughout the day on one or several regulated market or multilateral trading facilities with at least one market maker which takes action to ensure that the stock exchange value of the Shares does not significantly vary from its iNAV (as defined above).

In the event of Suspension of the Secondary Market (as defined above in the Prospectus) the following exit charges will apply (in replacement of the maximum redemption charges stated above): 2% of the Net Asset Value per Share multiplied by the number of shares redeemed.

A list of these stock exchanges and/or multilateral trading facilities can be obtained from the registered office of the Company.

Information on the iNAV of an exchange-traded share are also provided in section “Indicative Net Asset Value per Share” of the main part of the Prospectus and on the website www.amundiETF.com.

PUBLICATION OF THE NET ASSET VALUE

The Net Asset Value per Share will be available at the registered office of the Company and will be published on www.amundiETF.com.

RISKS WARNING

Among the different risks described in APPENDIX B - SPECIAL RISK CONSIDERATIONS AND RISK

FACTORS, the Sub-Fund is more specifically exposed to the following risks:

Interest Rate Risk, Credit risk, Capital at Risk, Low Diversification Risk, Risks linked to Sampling and Optimization techniques, Sub-Fund Liquidity Risk, Liquidity Risk on Secondary Market, Risk that the Sub-Fund’s investment objective is only partially achieved, Risk of using financial derivative instruments, Counterparty Risk, Collateral Management Risk, Currency Risk, Class Currency Hedge Risk, Market Risk linked to a controversy, Index Calculation Risk.

LIMITS OF THE EXTRA-FINANCIAL APPROACH

The extra-financial approach implemented by the Sub-Fund is largely based on third party data that may be incomplete, inaccurate or unavailable from time to time. The Management Company is therefore dependent on the quality and reliability of such information. Finally, investments in Green Bonds may induce sectoral biases in the global bond market.

SUSTAINABILITY RISKS

In managing the Sustainability Risks of this Sub-Fund, the Management Company relies on Solactive as the administrator of the Benchmark Index, which identifies and integrates relevant and significant Sustainable Risks in its Benchmark Index methodology. Such integration has therefore a direct impact on the investment universe of the Benchmark Index. However, no insurance can be given that Sustainability Risks will be totally removed and the occurrence of such risks could cause a negative material impact on the value of the assets comprising the Benchmark Index tracked or reflected by the Sub-Fund. Further information can also be found in the “SUSTAINABLE INVESTING” Section of the Prospectus.

DISTRIBUTION OF INCOME

Please refer to the Distribution Policy section of the Prospectus.

DISCLAIMER

The Sub-Fund is not sponsored, promoted, sold or supported in any other manner by Solactive AG nor does Solactive AG offer any express or implicit guarantee or assurance either with regard to the results of using the Benchmark Index and/or Benchmark Index trade mark or the Benchmark Index Price at any time or in any other respect. The Benchmark Index is calculated and published by Solactive AG. Solactive AG uses its best efforts to ensure that the Benchmark Index is calculated correctly. Irrespective of its obligations towards the issuer, Solactive AG has no obligation to point out errors in the Benchmark Index to third parties including but not limited to investors and/or financial intermediaries of the Sub-Fund. Neither publication

of the Benchmark Index by Solactive AG nor the licensing of the Benchmark Index or Benchmark Index trade mark for the purpose of use in connection with the Sub-Fund constitutes a recommendation by Solactive AG to invest capital in the Sub-Fund

nor does it in any way represent an assurance or opinion of Solactive AG with regard to any investment in the Sub-Fund.

APPENDIX 77

APPENDIX 78

MULTI UNITS LUXEMBOURG – Amundi MSCI Emerging Markets II

The Sub-Fund is an index-tracking UCITS passively managed.

The Reference Currency of the Sub-Fund is the US dollar (USD).

INVESTMENT OBJECTIVE

The investment objective of **MULTI UNITS LUXEMBOURG – Amundi MSCI Emerging Markets II** (the “Sub-Fund”) is to track both the upward and the downward evolution of the MSCI Emerging Markets Net Total Return Index (the “Index”) denominated in USD and representative of the performance of large and mid-cap companies across emerging markets, while minimizing the volatility of the difference between the return of the Sub-Fund and the return of the Index (the “Tracking Error”).

The anticipated level of the Tracking Error under normal market conditions is expected to be up to 2%.

THE INDEX

- Index Objectives

The Index is a free float-adjusted market capitalization index that is designed to measure the performance of the large and mid-cap segments across the emerging market countries.

The Index’s aim is to represent 85% of the free float-adjusted market capitalisation of each group of industries in the emerging markets.

By targeting 85% representation for each industry group, the Index aims at reflecting 85% of the entire market capitalisation of the emerging markets, while also mirroring the economic diversity of these markets.

The performance tracked is that of the Index’s closing price.

- Index Methodology

The Index is an equity index calculated and published by the global index provider MSCI.

The Index is exclusively composed of emerging market equities and has the same basic characteristics as the MSCI indices, which include adjustment of the market capitalisation of stocks in the Index based on their free float and classification by sector using the Global Industry Classification Standard (GICS).

The Index is comprised solely of emerging market equities and captures large and mid-cap

representation across a number of emerging market countries worldwide.

The MSCI methodology and calculation method are based on a variable number of companies in the Index.

The Index is a net total return index. A net total return index calculates the performance of the index constituents on the basis that any dividends or distributions are included in the index returns after withholding tax retention.

A full description of the Index and its construction methodology and information on the composition and respective weightings of the Index components are available on the index provider’s website: www.msci.com.

The composition of the Index is reviewed and rebalanced every 6 months (on May and November) with quarterly reviews in February, May, August and November.

The rebalancing frequency as described above will have no impact in terms of costs in the context of the performance of the investment objective.

- Additional Information on Index

Additional information on the Index, its composition, calculation and rules for periodical review and rebalancing and on the general methodology behind the Index can be found on <http://www.msci.com>.

For additional Information on the Index please refer to paragraph B “Investment made by Index Sub-Fund” of Section I “Investment Objective / Investment Powers and Restrictions” of the main part of this Prospectus and on APPENDIX F – BENCHMARK REGULATION.

INVESTMENT POLICY

The Sub-Fund will carry out its investment objective via an Indirect Replication as described and in compliance with the section INVESTMENT OBJECTIVES of the part I/ Investment Objectives/ Investment Powers and Restrictions of this Prospectus.

Within the limits set forth in this Prospectus and on an ancillary basis, the Sub-Fund may hold cash and cash equivalents.

The Sub-Fund will not invest more than 10% of its assets in units or shares of other UCITS. No investment will be made in any UCIs.

INVESTMENT TECHNIQUES

The maximum and expected proportions of the Sub-Fund’s assets that can be subject to SFTs and TRS are disclosed in APPENDIX E - SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS.

ELIGIBILITY OF THE SUB-FUND

Please refer to Appendix APPENDIX G – SPECIFIC INVESTMENT RATIO for information regarding the Sub-Fund and the German Investment Funds Tax Act (InvStG-E) (“GITA”).

TARGETED INVESTORS

The Sub-Fund is dedicated to both retail and institutional investors wishing to have an exposure to the performance of large and mid-cap companies across emerging markets’ countries.

CLASSES OF SHARES AND FEES

The Sub-Fund will issue the Classes of Shares, subject to different terms and conditions described in APPENDIX C - SUMMARY OF SHARES AND FEES. Other Share Classes may be available. For a current listing of available Share Classes go to www.amundiETF.com.

RISK MANAGEMENT

The global exposure of this Sub-Fund is calculated using the commitment approach as detailed in applicable laws and regulations, including but not limited to CSSF Circular 11/512.

DEFINITIONS

“Business Day”, “Dealing Day” and “Valuation Day”: Please refer to the APPENDIX H – GLOSSARY OF TERMS.

“Dealing Deadline”: Please refer to the APPENDIX D – SUMMARY TABLE OF SUB-FUND’S DEALING TIMELINE.

LISTING

The Sub-Fund is a UCITS ETF. As a consequence, all its Shares shall be traded throughout the day on one or several regulated market or multilateral trading facilities with at least one market maker which takes action to ensure that the stock exchange value of the Shares does not significantly vary from its iNAV (as defined above).

In the event of Suspension of the Secondary Market (as defined above in the Prospectus) the following exit charges will apply (in replacement of the maximum redemption charges stated above): 1% of the Net Asset Value per Share multiplied by the number of shares redeemed.

A list of these stock exchanges and/or multilateral trading facilities can be obtained from the registered office of the Company.

Information on the iNAV of an exchange-traded share are also provided in section “Indicative Net Asset Value per Share” of the main part of the Prospectus and on the website www.amundiETF.com.

PUBLICATION OF THE NET ASSET VALUE

The Net Asset Value per Share will be available at the registered office of the Company and will be published on <http://www.amundiETF.com>.

RISKS WARNING

Among the different risks described in APPENDIX B - SPECIAL RISK CONSIDERATIONS AND RISK FACTORS, the Sub-Fund is more specifically exposed to the following risks:

Equity Risk, Stocks, Risk of investment in Emerging and Developing Markets, Risks linked to the investment in Medium Capitalization Stocks, Capital at Risk, Sub-Fund Liquidity Risk, Liquidity Risk on Secondary Market, Risk that the Sub-Fund’s investment objective is only partially achieved, Risk of using financial derivative instruments, Counterparty Risk, Collateral Management Risk, Currency Risk.

SUSTAINABILITY RISKS

This Sub-Fund does not promote ESG characteristics and does not maximize portfolio alignment with Sustainability Factors, however it remains exposed to Sustainability Risks and the occurrence of such risks could cause a negative material impact on the value of the investments made by the Sub-Fund. This Sub-Fund is significantly exposed to regions which might have relatively low governmental or regulatory oversight or less transparency or disclosure of Sustainability Factors and therefore may be subject to more Sustainability Risks. Further information can be found in the “SUSTAINABLE INVESTING” Section of the Prospectus.

TAXONOMY REGULATION

In accordance of article 7 of the Taxonomy Regulation, the Management Company draws the attention of investors to the fact that the investments underlying this Sub-Fund do not take into account the European Union criteria for environmentally sustainable economic activities.

DISTRIBUTION OF INCOME

Please refer to the Distribution Policy section of the Prospectus.

DISCLAIMER

The Sub-Fund is in no way sponsored, endorsed, sold or promoted by MSCI Inc. (“**MSCI**”), nor by any MSCI subsidiary, nor by any of the entities involved in establishing the MSCI indices. The MSCI indices are the sole property of MSCI, and the MSCI

indices are trademarks registered by MSCI and its subsidiaries and have been licensed, for specific purposes, by the Management Company. Neither MSCI, nor any subsidiary of MSCI, nor any of the entities involved in producing or calculating the MSCI indices have made any statement or any warranty, either expressed or implied, to holders of units in the Sub-Fund or, more generally, to the general public, concerning the merits of trading in units of investment funds in general or in units of this Fund in particular or the ability of any MSCI index to track the performance of the global equities market. MSCI and its subsidiaries are the owners of certain names, registered trademarks and the MSCI indices, which are determined, constructed and calculated by MSCI without any consultation with the Management Company or the Sub-Fund. Neither MSCI, nor any MSCI subsidiary, nor any of the entities involved in the production of the MSCI indices are obliged to take into consideration the needs of the Management Company or holders of the Sub-Fund's units when determining, constructing or calculating the MSCI indices. Neither MSCI, nor any MSCI subsidiary, nor any of the entities involved in the production of the MSCI indices make any decision concerning the launch date, pricing, quantity of the Sub-Fund's units or the determination and calculation of the formula used to establish the Sub-Fund's net asset value. Neither MSCI, nor any MSCI subsidiary, nor any of the entities involved in the production of the MSCI indices accept any responsibility for or obligations concerning the administration, management or marketing of the Sub-Fund.

Although MSCI obtains data incorporated or used in the calculation of indices originating from sources that MSCI believes to be reliable, neither MSCI, nor any other party involved in the creation or calculation of the MSCI indices guarantees the accuracy and/or the completeness of the indices or any incorporated data. Neither MSCI nor any party involved in the creation or calculation of the MSCI indices makes any warranties, expressed or implied, concerning the results that the holder of a MSCI license, customers of said licensee, counterparties, fund unit holders or any other person or entity will achieve from the use of the indices or any incorporated data in relation to the rights licensed or for any other purpose.

Neither MSCI nor any other party makes any warranties, expressed or implied, and MSCI disclaims any warranties concerning the commercial value or suitability for a specific purpose of the indices or incorporated data. Subject to the foregoing, under no circumstances shall MSCI or any other party be held liable for any loss, be it direct, indirect or other (including loss of earnings) even if it is aware of the possibility of such a loss.

APPENDIX 79**MULTI UNITS LUXEMBOURG – Amundi MSCI Europe Climate Action**

The Sub-Fund is an index-tracking UCITS passively managed.

This Sub-Fund promotes environmental and/or social characteristics within the meaning of article 8 of SFDR, as further described in Appendix I – ESG Related Disclosures to this Prospectus.

The Reference Currency of the Sub-Fund is the Euro (EUR).

INVESTMENT OBJECTIVE

The investment objective of the MULTI UNITS LUXEMBOURG – Amundi MSCI Europe Climate Action (the “Sub-Fund”) is to track both the upward and the downward evolution of the MSCI Europe Climate Action Net Total Return Index (the “Index”), denominated in Euros, and representative of the performance of large and mid-cap stocks, across developed European countries, issued by companies that have been assessed to lead their sector peers in terms of their positioning and actions relative to climate transition, while minimizing the volatility of the difference between the return of the Sub-Fund and the return of the Index (the “Tracking Error”).

The anticipated level of the Tracking Error, under normal market conditions is expected to be up to 1%.

THE INDEX**Index Objectives**

The Index is representative of the performance of large and mid-cap stocks, across developed European countries, issued by companies that have been assessed to lead their sector peers in terms of their positioning and actions relative to climate transition, as further described in Appendix I – ESG Related Disclosures to this Prospectus.

Index Methodology

The Index is an equity index calculated and published by the international index provider MSCI.

The complete methodology for the Index (including maintenance and rebalancing of the Index) is available on the website: <http://www.msci.com>.

The composition of the Index is reviewed and rebalanced on a monthly basis.

The rebalancing frequency as described above will have no impact in terms of costs in the context of the performance of the investment objective.

The Index is a net total return index. A net total return index calculated the performance of the Index

constituents on the basis that any dividends or distributions are included in the index returns after withholding tax retention.

- **Additional Information on Index**

Additional information on the Index, its composition, calculation and rules for periodical review and rebalancing and on the general methodology behind the Index can be found on the Index provider's website: <http://www.msci.com>.

For additional Information on the Index please refer to paragraph B “Investment made by Index Sub-Fund” of Section I “Investment Objective / Investment Powers and Restrictions” of the main part of this Prospectus and on APPENDIX F – BENCHMARK REGULATION.

INVESTMENT POLICY

The Sub-Fund will carry out its investment objective via a Direct Replication as described and in compliance with the section INVESTMENT OBJECTIVES of the part I/ Investment Objectives/ Investment Powers and Restrictions of this Prospectus.

Within the limits set forth in this Prospectus and on an ancillary basis, the Sub-Fund may hold cash and cash equivalents.

The Sub-Fund will not invest more than 10% of its assets in units or shares of other UCITS. No investment will be made in any other UCIs.

The Sub-Fund integrates Sustainability Risks and takes into account principal adverse impacts of investments on Sustainability Factors in its investment process as outlined in more detail in section "Sustainable Investing" of this Prospectus and will not hold any securities of companies involved in the production or sale of controversial weapons, or companies in breach of international conventions on Human or Labor Rights, or companies involved in controversial industries: tobacco, Thermal coal, nuclear weapons or unconventional oil & gas as defined in section I “Investment Objectives/ Investment Powers and Restrictions”.

More information on environmental and/or social characteristics can be found in Appendix I - ESG Related Disclosures to this Prospectus.

INVESTMENT TECHNIQUES

The maximum and expected proportions of the Sub-Fund's assets that can be subject to SFTs and TRS are disclosed in APPENDIX E - SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS.

ELIGIBILITY OF THE SUB-FUND

Please refer to Appendix APPENDIX G – SPECIFIC INVESTMENT RATIO for information regarding

the Sub-Fund and the German Investment Funds Tax Act (InvStG-E) (“GITA”).

TARGETED INVESTORS

The Sub-Fund is dedicated to both retail and institutional investors seeking exposure to European developed equity markets companies that have been assessed to lead their sector peers in terms of their positioning and actions relative to climate transition.

CLASSES OF SHARES AND FEES

The Sub-Fund will issue the Classes of Shares, subject to different terms and conditions described in APPENDIX C - SUMMARY OF SHARES AND FEES. Other Share Classes may be available. For a current listing of available Share Classes go to www.amundiETF.com.

DEFINITIONS

“Business Day”, “Dealing Day” and “Valuation Day”: Please refer to the APPENDIX H – GLOSSARY OF TERMS.

“Dealing Deadline”: Please refer to the APPENDIX D – SUMMARY TABLE OF SUB-FUND’S DEALING TIMELINE.

LISTING

The Sub-Fund is a UCITS ETF. As a consequence all its Shares shall be traded throughout the day on one or several regulated market or multilateral trading facilities with at least one market maker which takes action to ensure that the stock exchange value of the Shares does not significantly vary from its iNAV (as defined above).

In the event of Suspension of the Secondary Market (as defined above in the Prospectus) the following exit charges will apply (in replacement of the maximum redemption charges stated above): 1% of the Net Asset Value per Share multiplied by the number of shares redeemed.

A list of these stock exchanges and/or multilateral trading facilities can be obtained from the registered office of the Company.

Information on the iNAV of an exchange-traded share are also provided in section “Indicative Net Asset Value per Share” of the main part of the Prospectus and on the website www.amundiETF.com.

RISKS WARNING

Among the different risks described in APPENDIX B - SPECIAL RISK CONSIDERATIONS AND RISK FACTORS, the Sub-Fund is more specifically exposed to the following risks:

Equity Risk, Risks linked to the investment in Medium Capitalization Stocks, Risks linked to Sampling and Optimization techniques, Capital at Risk, Sub-Fund Liquidity Risk, Liquidity Risk on Secondary Market, Risk that the Sub-Fund’s investment objective is only partially achieved, Risk of using financial derivative instruments, Counterparty Risk, Collateral Management Risk, Currency Risk, Class Currency Hedge Risk, Market Risk linked to a controversy, Risk linked to ESG Methodologies, Risk related to ESG Score computation, Index Calculation Risk.

The Sub-Fund will also be exposed to the following risk:

Risk related to the carbon data used in methodology of the Index

The analysis of companies’ current and future greenhouse gas emission is partly based on declarative data, models and estimates. In the current state of the available data, all greenhouse gas emission data are not available, and some are model based (in particular those related to scope 3 which includes all greenhouse gas emissions that are not directly related to manufacturing of a product).

Risk related the components of the Index

The methodology of the Index does not prevent to incorporate highly Greenhouse gas emitting companies’ securities.

Sustainability Risks

In managing the Sustainability Risks of this Sub-Fund, the Management Company relies on MSCI as the administrator of the Index, which identifies and integrates relevant and significant Sustainable Risks in its methodology designated to align with the minimum standards for EU Paris-aligned benchmarks. Such integration has therefore a direct impact on the investment universe of the Index. However, no insurance can be given that Sustainability Risks will be totally removed and the occurrence of such risks could cause a negative material impact on the value of the assets comprising the Index tracked or reflected by the Sub-Fund. For further information on MSCI ESG Rating methodology and the Index, please refer to: <http://www.msci.com>. Further information can also be found in the “SUSTAINABILITY-RELATED DISCLOSURES” Section of the Prospectus.

DISTRIBUTION OF INCOME

Please refer to the Distribution Policy section of the Prospectus.

are the sole property of MSCI, and the MSCI indices are trademarks registered by MSCI and its subsidiaries and have been licensed, for specific purposes, by Amundi Asset Management. Neither MSCI, nor any subsidiary of MSCI, nor any of the entities involved in producing or calculating the MSCI indices have made any statement or any warranty, either expressed or implied, to holders of units in the Sub-Fund or, more generally, to the general public, concerning the merits of trading in units of investment funds in general or in units of this Fund in particular or the ability of any MSCI index to track the performance of the global equities market. MSCI and its subsidiaries are the owners of certain names, registered trademarks and the MSCI indices, which are determined, constructed and calculated by MSCI without any consultation with Amundi Asset Management or the Sub-Fund. Neither MSCI, nor any MSCI subsidiary, nor any of the entities involved in the production of the MSCI indices are obliged to take into consideration the needs of Amundi Asset Management or holders of the Sub-Fund's units when determining, constructing or calculating the MSCI indices. Neither MSCI, nor any MSCI subsidiary, nor any of the entities involved in the production of the MSCI indices make any decision concerning the launch date, pricing, quantity of the Sub-Fund's units or the determination and calculation of the formula used to establish the Sub-Fund's net asset value. Neither MSCI, nor any MSCI subsidiary, nor any of the entities involved in the production of the MSCI indices accept any responsibility for or obligations concerning the administration, management or marketing of the Sub-Fund.

Although MSCI obtains data incorporated or used in the calculation of indices originating from sources that MSCI believes to be reliable, neither MSCI, nor any other party involved in the creation or calculation of the MSCI indices guarantees the accuracy and/or the completeness of the indices or any incorporated data. Neither MSCI nor any party involved in the creation or calculation of the MSCI indices makes any warranties, expressed or implied, concerning the results that the holder of a MSCI license, customers of said licensee, counterparties, fund unit holders or any other person or entity will achieve from the use of the indices or any incorporated data in relation to the rights licensed or for any other purpose.

Neither MSCI nor any other party makes any warranties, expressed or implied, and MSCI disclaims any warranties concerning the commercial value or suitability for a specific purpose of the indices or incorporated data. Subject to the foregoing, under no circumstances shall MSCI or any other party be held liable for any loss, be it direct, indirect or other (including loss of earnings) even if it is aware of the possibility of such a loss.

The licensing Agreement between the Licensee and STOXX is solely for their benefit and not for the benefit of the owners of the Sub-Fund or any other third parties.

APPENDIX 90

MULTI UNITS LUXEMBOURG – Amundi STOXX Europe 600 Basic Materials

The Sub-Fund is an index-tracking UCITS passively managed.

The Reference Currency of the Sub-Fund is the Euro (EUR).

INVESTMENT OBJECTIVE

The investment objective of the MULTI UNITS LUXEMBOURG – Amundi STOXX Europe 600 Basic Materials (the “Sub-Fund”) is to track both the upward and the downward evolution of the STOXX Europe 600 Industry Basic Materials 30-15 Index (the “Index”), denominated in Euros, and representative of the performance of the European companies in the basic materials industry, while minimizing the volatility of the difference between the return of the Sub-Fund and the return of the Index (the “Tracking Error”).

The anticipated level of the Tracking Error, under normal market conditions is expected to be up to 1%.

THE INDEX

- **Index Objectives**

The Index is a market cap weighted index designed to represent the performance of securities from the STOXX Europe 600 Index (the “Initial Universe”) that belong to the basic materials industry as defined by the Industry Classification Benchmark (“ICB”). The Initial Universe provides exposure to the performance of the 600 most liquid large, mid and small caps stocks covering developed markets in Europe.

- **Index Methodology**

The Index is an equity index calculated and published by the international index provider STOXX Ltd. The weighting of each stock in the Index is adjusted in line with its free-floating market capitalization.

The Index is available in real time via Reuters and Bloomberg.

A full description of the Index and its construction methodology and information on the composition and respective weightings of the Index components are available on the index provider’s website: www.qontigo.com.

The performance tracked is that of the Index’s closing price.

The composition of the Index is reviewed and rebalanced on a quarterly basis in March, June, September and December.

The rebalancing frequency as described above will

have no impact in terms of costs in the context of the performance of the investment objective.

The Index is a net total return index. A net total return index calculates the performance of the Index constituents on the basis that any dividends or distributions are included in the index returns after withholding tax retention.

- **Additional Information on Index**

Additional information on the Index, its composition, calculation and rules for periodical review and rebalancing and on the general methodology behind the Index can be found on the Index provider’s website: <http://www.qontigo.com>.

For additional Information on the Index please refer to paragraph B “Investment made by Index Sub-Fund” of Section I “Investment Objective / Investment Powers and Restrictions” of the main part of this Prospectus and on APPENDIX F – BENCHMARK REGULATION.

INVESTMENT POLICY

The Sub-Fund will carry out its investment objective via an Indirect Replication as described and in compliance with the section INVESTMENT OBJECTIVES of the part I/ Investment Objectives/ Investment Powers and Restrictions of this Prospectus.

Within the limits set forth in this Prospectus and on an ancillary basis, the Sub-Fund may hold cash and cash equivalents.

The Sub-Fund will not invest more than 10% of its assets in units or shares of other UCITS. No investment will be made in any other UCIs.

INVESTMENT TECHNIQUES

The maximum and expected proportions of the Sub-Fund’s assets that can be subject to SFTs and TRS are disclosed in APPENDIX E - SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS.

ELIGIBILITY OF THE SUB-FUND

The Sub-Fund is eligible to the French equity savings plans (PEA) which means that the Sub-Fund invests at least 75% of its assets in a diversified portfolio of equities issued by an issuer incorporated either in European Union member state or in a member state of the European Economic Area.

Please refer to Appendix APPENDIX G – SPECIFIC INVESTMENT RATIO for information regarding the Sub-Fund and the German Investment Funds Tax Act (InvStG-E) (“GITA”).

Among the different risks described in APPENDIX B - SPECIAL RISK CONSIDERATIONS AND RISK FACTORS, the Sub-Fund is more specifically exposed to the following risks:

Equity Risk, Capital at Risk, Currency Risk, Counterparty Risk, Low Diversification Risk, Risk that the Sub-Fund's investment objective is only partially achieved, Sub-Fund Liquidity Risk, Liquidity Risk on Secondary Market, Risk of using financial derivative instruments, Risk on Investments in Emerging and Developing Markets, Currency Hedge Risk, Risks

linked to Sampling and Optimization techniques, Securities Lending Risk, Market Risk linked to a controversy, Risk linked to ESG Methodologies, Risk related to ESG Score computation, Risks linked to the investment in Medium Capitalization Stocks, Index Calculation Risk.

SUSTAINABILITY RISKS

In managing the Sustainability Risks of this Sub-Fund, the Management Company relies on Solactive as the administrator of the Index, which identifies and integrates relevant and significant Sustainable Risks in its ESG Rating methodology. Such integration has therefore a direct impact on the investment universe of the Index. However, no insurance can be given that Sustainability Risks will be totally removed and the occurrence of such risks could cause a negative material impact on the value of the assets comprising the Index tracked or reflected by the Sub-Fund. For further information on Solactive methodology, please refer to: <http://www.solactive.com>.

Further information can also be found in the "SUSTAINABLE INVESTING" Section of the Prospectus.

DISTRIBUTION OF INCOME

Please refer to the Distribution Policy section of the Prospectus.

DISCLAIMER

The Sub-fund is not sponsored, promoted, sold or supported in any other manner by Solactive AG nor does Solactive AG offer any express or implicit guarantee or assurance either with regard to the results of using the Index and/or Index trade mark or the Index Price at any time or in any other respect. The Index is calculated and published by Solactive AG. Solactive AG uses its best efforts to ensure that the Index is calculated correctly. Irrespective of its obligations towards the issuer, Solactive AG has no obligation to point out errors in the Index to third parties including but not limited to investors and/or financial intermediaries of the Sub-Fund. Neither publication of the Index by Solactive AG nor the licensing of the Index or Index trade mark for the purpose of use in connection with the Sub-Fund constitutes a recommendation by Solactive AG to invest capital in the Sub-Fund nor does it in any way represent an assurance or opinion of Solactive AG with regard to any investment in the Sub-Fund.

APPENDIX 94

MULTI UNITS LUXEMBOURG – Amundi MSCI Digital Economy ESG Screened

The Sub-Fund is an index-tracking UCITS passively managed.

This Sub-Fund promotes environmental and/or social characteristics within the meaning of article 8 of SFDR, as further described in Appendix I – ESG Related Disclosures to this Prospectus.

The Reference Currency of the Sub-Fund is the US dollar (USD).

INVESTMENT OBJECTIVE

The investment objective of the MULTI UNITS LUXEMBOURG – Amundi MSCI Digital Economy ESG Screened (the “**Sub-Fund**”) is to track both the upward and the downward evolution of the MSCI ACWI IMI Digital Economy & Metaverse ESG Filtered Index (the “**Index**”), denominated in US dollar (USD) and representative of the performance of a select set of companies from the MSCI ACWI Investable Market Index (IMI) (the “**Parent Index**”) that are expected to derive significant revenues from the digital economy value chain including the metaverse ecosystem, after excluding companies which are Environmental, Social and Governance (“ESG”) laggards relative to the theme universe, while minimizing the volatility of the difference between the return of the Sub-Fund and the return of the Index (the “**Tracking Error**”).

The anticipated level of the Tracking Error under normal market conditions is expected to be up to 2%.

THE INDEX**Index Objectives**

The Index is representative of the performance of companies selected from the Parent Index (which provides exposure to large, mid and small cap stocks across developed and emerging countries), which are expected to derive significant revenues from the digital economy value chain such as: metaverse ecosystem (digital payments, e-commerce, social media, blockchain, artificial intelligence), cybersecurity, cloud computing, robots and automation and sharing economy. The Index excludes companies which are ESG laggards relative to the theme universe, as further described in Appendix I – ESG Related Disclosures to this Prospectus.

Index Methodology

The Index is an equity index calculated and published by the international index provider MSCI.

The Index is available in real time via Bloomberg.

A full description of the Index and its construction methodology and information on the composition and respective weightings of the Index components are available on the index provider's website: <https://www.msci.com>.

The performance tracked is that of the Index's closing price using the official closing stock market prices for

the constituent stocks.

The Index is reviewed and rebalanced on a Semi-Annual basis in May and November to coincide with the May and November Index reviews of the Parent Index.

The rebalancing frequency as described above will have no impact in terms of costs in the context of the performance of the investment objective.

The Index is a net total return index. A net total return index calculates the performance of the Index constituents on the basis that any dividends or distributions are included in the index returns after withholding tax retention.

- **Additional Information on Index**

Additional information on the Index, its composition, calculation and rules for periodical review and rebalancing and on the general methodology behind the Index can be found on the Index provider's website: <https://www.msci.com>.

For additional information on the Index please refer to paragraph B “Investment made by Index Sub-Fund” of Section I “Investment Objective / Investment Powers and Restrictions” of the main part of this Prospectus and on APPENDIX F – BENCHMARK REGULATION.

INVESTMENT POLICY

The Sub-Fund will carry out its investment objective via a Direct Replication as described and in compliance with the section INVESTMENT OBJECTIVES of the part I/ Investment Objectives/ Investment Powers and Restrictions of this Prospectus.

Within the limits set forth in this Prospectus and on an ancillary basis, the Sub-Fund may hold cash and cash equivalents.

The Sub-Fund will not invest more than 10% of its assets in units or shares of other UCITS. No investment will be made in any other UCIs.

The Sub-Fund integrates Sustainability Risks and takes into account principal adverse impacts of investments on Sustainability Factors in its investment process as outlined in more detail in section “Sustainable Investing” of this Prospectus and will not hold any securities of companies involved in the production or sale of controversial weapons, or companies in breach of international conventions on Human or Labor Rights, or companies involved in controversial industries: tobacco, Thermal coal, nuclear weapons or unconventional oil & gas as defined in section I “Investment Objectives/ Investment Powers and Restrictions”.

More information on environmental and/or social characteristics can be found in Appendix I - ESG Related Disclosures to this Prospectus.

INVESTMENT TECHNIQUES

The maximum and expected proportions of the Sub-Fund's assets that can be subject to SFTs and TRS are disclosed in APPENDIX E - SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS.

Neither MSCI, nor any MSCI subsidiary, nor any of the entities involved in the production of the MSCI indices accept any responsibility for or obligations concerning the administration, management or marketing of the Sub-Fund.

Although MSCI obtains data incorporated or used in the calculation of indices originating from sources that MSCI believes to be reliable, neither MSCI, nor any other party involved in the creation or calculation of the MSCI indices guarantees the accuracy and/or the completeness of the indices or any incorporated data. Neither MSCI nor any party involved in the creation or calculation of the MSCI indices makes any warranties, expressed or implied, concerning the results that the holder of a MSCI license, customers of said licensee, counterparties, fund unit holders or any other person or entity will achieve from the use of the indices or any incorporated data in relation to the rights licensed or for any other purpose.

Neither MSCI nor any other party makes any warranties, expressed or implied, and MSCI disclaims any warranties concerning the commercial value or suitability for a specific purpose of the indices or incorporated data. Subject to the foregoing, under no circumstances shall MSCI or any other party be held liable for any loss, be it direct, indirect or other (including loss of earnings) even if it is aware of the possibility of such a loss.

APPENDIX 97

MULTI UNITS LUXEMBOURG – Amundi MSCI Millennials ESG Screened

The Sub-Fund is an index-tracking UCITS passively managed.

This Sub-Fund promotes environmental and/or social characteristics within the meaning of article 8 of SFDR, as further described in Appendix I – ESG Related Disclosures to this Prospectus.

The Reference Currency of the Sub-Fund is the US dollar (USD).

INVESTMENT OBJECTIVE

The investment objective of the MULTI UNITS LUXEMBOURG – Amundi MSCI Millennials ESG Screened (the “**Sub-Fund**”) is to track both the upward and the downward evolution of the MSCI ACWI IMI Millennials ESG Filtered Index (the “**Index**”), denominated in US dollar (USD) and representative of the performance of a select set of companies from the MSCI ACWI Investable Market Index (IMI) (the “**Parent Index**”) that are expected to derive significant revenues from industries that target the preferences of the “millennial” generation after excluding companies which are Environmental, Social and Governance (“ESG”) laggards relative to the theme universe, while minimizing the volatility of the difference between the return of the Sub-Fund and the return of the Index (the “**Tracking Error**”). The anticipated level of the Tracking Error, under normal market conditions is expected to be up to 2%.

THE INDEX**Index Objectives**

The Index is representative of the performance of companies selected from the Parent Index) (which provides exposure to large, mid and small cap stocks across developed and emerging countries), and which are expected to derive significant revenues from industries that target the preferences of the “millennial” generation, with a high exposure to business activities such as: popular brands, health and fitness, travel and leisure, social media and entertainment, housing and home goods, financial services, food and dining, clothing and apparel. The Index excludes companies which are ESG laggards relative to the theme universe, as further described in Appendix I – ESG Related Disclosures to this Prospectus.

Index Methodology

The Index is an equity index calculated and published by the international index provider MSCI.

The Index is available in real time via Bloomberg. A full description of the Index and its construction methodology and information on the composition and respective weightings of the Index components are

available on the index provider’s website: <https://www.msci.com>.

The performance tracked is that of the Index’s closing price using the official closing stock market prices for the constituent stocks.

The Index is reviewed and rebalanced on a Semi-Annual basis in May and November to coincide with the May and November Index reviews of the Parent Index.

The rebalancing frequency as described above will have no impact in terms of costs in the context of the performance of the investment objective.

The Index is a net total return index. A net total return index calculates the performance of the Index constituents on the basis that any dividends or distributions are included in the index returns after withholding tax retention.

- **Additional Information on Index**

Additional information on the Index, its composition, calculation and rules for periodical review and rebalancing and on the general methodology behind the Index can be found on the Index provider’s website: <https://www.msci.com>.

For additional Information on the Index please refer to paragraph B “Investment made by Index Sub-Fund” of Section I “Investment Objective / Investment Powers and Restrictions” of the main part of this Prospectus and on APPENDIX F – BENCHMARK REGULATION.

INVESTMENT POLICY

The Sub-Fund will carry out its investment objective via a Direct Replication as described and in compliance with the section INVESTMENT OBJECTIVES of the part I/ Investment Objectives/ Investment Powers and Restrictions of this Prospectus.

Within the limits set forth in this Prospectus and on an ancillary basis, the Sub-Fund may hold cash and cash equivalents.

The Sub-Fund will not invest more than 10% of its assets in units or shares of other UCITS. No investment will be made in any other UCIs.

The Sub-Fund integrates Sustainability Risks and takes into account principal adverse impacts of investments on Sustainability Factors in its investment process as outlined in more detail in section “Sustainable Investing” of this Prospectus and will not hold any securities of companies involved in the production or sale of controversial weapons, or companies in breach of international conventions on Human or Labor Rights, or companies involved in controversial industries: tobacco, Thermal coal, nuclear weapons or unconventional oil & gas as defined in section I “Investment Objectives/ Investment Powers and Restrictions”.

More information on environmental and/or social characteristics can be found in Appendix I - ESG Related Disclosures to this Prospectus.

INVESTMENT TECHNIQUES

The maximum and expected proportions of the Sub-Fund’s assets that can be subject to SFTs and TRS

are disclosed in APPENDIX E - SECURITIES FINANCING TRANSACTIONS AND TOTAL RETURN SWAPS.

ELIGIBILITY OF THE SUB-FUND

Please refer to Appendix APPENDIX G – SPECIFIC INVESTMENT RATIO for information regarding the Sub-Fund and the German Investment Funds Tax Act (InvStG-E) (“GITA”).

TARGETED INVESTORS

The Sub-Fund is dedicated to both retail and institutional investors seeking exposure to companies across both developed and emerging countries expected to derive significant revenues from industries that target the preferences of the “millennial” generation, with environmental, social and governance (ESG) characteristics.

CLASSES OF SHARES AND FEES

The Sub-Fund will issue the Classes of Shares, subject to different terms and conditions described in APPENDIX C - SUMMARY OF SHARES AND FEES. Other Share Classes may be available. For a current listing of available Share Classes go to www.amundiETF.com.

DEFINITIONS

“Business Day”, “Dealing Day” and “Valuation Day”: Please refer to the APPENDIX H – GLOSSARY OF TERMS.

“Dealing Deadline”: please refer to the APPENDIX D – SUMMARY TABLE OF SUB-FUND’S DEALING TIMELINE.

LISTING

The Sub-Fund is a UCITS ETF. As a consequence, all its Shares shall be traded throughout the day on one or several regulated market or multilateral trading facilities with at least one market maker which takes action to ensure that the stock exchange value of the Shares does not significantly vary from its iNAV (as defined above).

In the event of Suspension of the Secondary Market (as defined above in the Prospectus) the following exit charges will apply (in replacement of the maximum redemption charges stated above): 1% of the Net Asset Value per Share multiplied by the number of shares redeemed.

A list of these stock exchanges and/or multilateral trading facilities can be obtained from the registered office of the Company.

Information on the iNAV of an exchange-traded share are also provided in section “Indicative Net Asset Value per Share” of the main part of the Prospectus and on the website www.amundiETF.com.

PUBLICATION OF THE NET ASSET VALUE

The Net Asset Value per Share will be available at

the registered office of the Company and will be published on www.amundiETF.com.

RISKS WARNING

Among the different risks described in APPENDIX B - SPECIAL RISK CONSIDERATIONS AND RISK FACTORS, the Sub-Fund is more specifically exposed to the following risks:

Equity Risk, Capital at risk, Risk of Investments in Emerging and Developing Markets, Risks linked to Sampling and Optimization techniques, Index Disruption Risk, Low diversification Risk, Sub-Fund Liquidity Risk, Liquidity Risk on Secondary Market, Counterparty Risk, Risk of using financial derivative instruments, Risk that the Sub-Fund’s investment objective is only partially achieved, Currency Risk, Operational Risk, Corporate Action Risk, Capital Erosion Risk, Risks linked to the investment in Medium Capitalization Stocks, Risk of Investing in small and mid-cap companies, Risk linked to Securities Lending, Collateral Management Risk, Specific risks linked to GDR and ADR, Market Risk linked to a controversy, Risk linked to ESG Methodologies, Risk related to ESG Score computation, Index Calculation Risk.

SUSTAINABILITY RISKS

In managing the Sustainability Risks of this Sub-Fund, the Management Company relies on MSCI as the administrator of the Index, which identifies and integrates relevant and significant Sustainable Risks in its ESG Rating methodology. Such integration has therefore a direct impact on the investment universe of the Index. However, no insurance can be given that Sustainability Risks will be totally removed and the occurrence of such risks could cause a negative material impact on the value of the assets comprising the Index tracked or reflected by the Sub-Fund. For further information on MSCI ESG Rating methodology, please refer to: <http://www.msci.com>. Further information can also be found in the “SUSTAINABLE INVESTING” Section of the Prospectus.

DISTRIBUTION OF INCOME

Please refer to the Distribution Policy section of the Prospectus.

DISCLAIMER

The Sub-Fund is in no way sponsored, endorsed, sold or promoted by MSCI Inc. (“MSCI”), nor by any MSCI subsidiary, nor by any of the entities involved in establishing the MSCI indices. The MSCI indices are the sole property of MSCI, and the MSCI indices are trademarks registered by MSCI and its subsidiaries and have been licensed, for specific purposes, by Amundi Asset Management. Neither MSCI, nor any subsidiary of MSCI, nor any of the entities involved in producing or calculating the MSCI indices have made any statement or any warranty, either expressed or implied, to holders of units in the Sub-Fund or, more generally, to the general public, concerning the merits of trading in units of investment

funds in general or in units of this Fund in particular or the ability of any MSCI index to track the performance of the global equities market. MSCI and its subsidiaries are the owners of certain names, registered trademarks and the MSCI indices, which are determined, constructed and calculated by MSCI without any consultation with Amundi Asset Management or the Sub-Fund. Neither MSCI, nor any MSCI subsidiary, nor any of the entities involved in the production of the MSCI indices are obliged to take into consideration the needs of Amundi Asset Management or holders of the Sub-Fund's units when determining, constructing or calculating the MSCI indices. Neither MSCI, nor any MSCI subsidiary, nor any of the entities involved in the production of the MSCI indices make any decision concerning the launch date, pricing, quantity of the Sub-Fund's units or the determination and calculation of the formula used to establish the Sub-Fund's net asset value. Neither MSCI, nor any MSCI subsidiary, nor any of the entities involved in the production of the MSCI indices accept any responsibility for or obligations concerning the administration, management or marketing of the Sub-Fund.

Although MSCI obtains data incorporated or used in the calculation of indices originating from sources that MSCI believes to be reliable, neither MSCI, nor any other party involved in the creation or calculation of the MSCI indices guarantees the accuracy and/or the completeness of the indices or any incorporated data. Neither MSCI nor any party involved in the creation or calculation of the MSCI indices makes any warranties, expressed or implied, concerning the results that the holder of a MSCI license, customers of said licensee, counterparties, fund unit holders or any other person or entity will achieve from the use of the indices or any incorporated data in relation to the rights licensed or for any other purpose.

Neither MSCI nor any other party makes any warranties, expressed or implied, and MSCI disclaims any warranties concerning the commercial value or suitability for a specific purpose of the indices or incorporated data. Subject to the foregoing, under no circumstances shall MSCI or any other party be held liable for any loss, be it direct, indirect or other (including loss of earnings) even if it is aware of the possibility of such a loss.

APPENDIX B - SPECIAL RISK CONSIDERATIONS AND RISK FACTORS

Investment in an investment company with variable capital such as the Company carries with it a degree of risk including, but not limited to, the risks referred to below. The investment risks described below are not purported to be exhaustive and potential investors should review this Prospectus in its entirety, and consult with their professional advisors, before making an application for Shares in any Sub-Fund. Changes in rates of currency exchange between the value of the currency of an investor's domicile and of the currency of the Shares may cause the value of Shares to go up or down in terms of the currency of an investor's domicile. Shareholders, who are subject to an Upfront Subscription Sale Charge payable at the time of the subscription as described under the chapter entitled Investing in the Company on the Primary Market, should view their investment as medium to long-term given the difference between the subscription price and the redemption price for their Shares.

Equity Risk

The price of an equity security can increase or decrease in accordance with changes in the issuing company's risk exposure or in the economic conditions of the main equity markets, in particular the market in which the security is traded. The price of an equity security can also fluctuate along with the anticipations of the different market participants. Equity markets may be highly volatile and notably, more volatile than fixed income markets, as on equity markets revenues over a given period of time cannot be estimated with reasonable accuracy under stable macroeconomic conditions.

Risks linked to the investment in Medium Capitalization Stocks

A Sub-Fund may be exposed to stocks of medium-capitalization companies, which may increase market and liquidity risks. The prices of these securities therefore increase and decrease more sharply than those of large capitalization stocks. The Sub-Fund's net asset value could behave similarly and therefore fall more sharply than the value of a similar investment in large capitalization equities.

Risk of Investing in small and mid-cap companies

The Sub-Fund is exposed to small and medium-capitalization companies and more specifically to the equity securities of small, medium and intermediate sized enterprises, which may increase market and liquidity risks. The prices of these securities therefore increase and decrease more sharply than those of large-cap stocks. The Sub-Fund's net asset value could behave similarly and therefore fall more sharply than that of a similar investment in large-capitalization equities.

Commodities risk

The commodity markets are generally subject to greater and more variable risks than other markets. Commodity prices may hence be highly volatile. They are determined by forces of supply and demand in the commodity markets and these forces are themselves influenced without limitation by consumption patterns, macro economic factors, weather conditions, natural disasters or other unforeseeable events, controls of governments and fiscal, monetary and trade policies. Moreover, the geographical distribution and concentration of commodities (commodities are often produced in emerging market countries) may expose a Sub-Fund to issues such as heightened political risks, acts of war, sovereign intervention and the potential for sovereign States to claim to output, or increase in resources-related rents and taxes. Industrial production may also fluctuate widely, which may adversely affect the performance of the relevant Sub-Fund.

Risks linked to future contracts composing the index / strategy

The underlying index / strategy of certain Sub-Funds is comprised of future contracts. These Sub-Funds may therefore be exposed to a liquidity risk specific to trading in such instruments, whose daily trading volume may be limited. The exposure to the relevant Index / strategy is maintained by rolling positions on such future contracts. Such a roll consists in transferring a position on contracts close to their expiry (in any case, before the expiry date) to contracts with a longer maturity. Futures contracts generally include a carry, where the carry is the cost or benefit of owning a financial instrument. If the carry is negative, i.e. the futures price is higher than the underlying spot price, the Index / strategy may experience systematic losses from keeping long exposures or rolling long positions on these futures. If the carry is positive, i.e. the futures price is lower than the underlying spot price, the Index / strategy may experience systematic losses from keeping short exposures or rolling short positions on these futures. Investors may also be exposed to a risk of loss due to transaction costs and a potential lack of liquidity when rolling operation on future contracts. The Sub-Funds' performance could therefore be progressively and negatively impacted by these effects, notably in case of long term investment made in these Sub-Funds.

Risk related to investments in Futures on VIX

A Sub-Fund may engage in futures transactions on the VIX index, which is representative of the volatility of the S&P 500 Index. This Sub-Fund may be therefore exposed to a liquidity risk specific to trading in such instruments, whose daily trading volume may be limited. On a historical basis, the VIX Index has demonstrated a high volatility level, even drastically higher than the volatility of S&P 500 Index during specific periods.

VIX Index futures contracts may include a very negative carry (where the carry is the cost or benefit of owning a financial instrument, without any consideration of performance of the underlying market), i.e. the futures price may be much higher than the VIX spot price during long periods. The Sub-Fund may then experience strong losses from keeping long exposures or rolling long positions on futures on VIX, irrespective of any market change in the VIX Index level. The Sub-Fund may however record heavy losses even when taking short positions on futures on VIX as the carry may suddenly turn positive (i.e. the futures prices are lower than the spot), generally when volatility experiences significant upward shocks.

Low Diversification Risk

Investors may be exposed to an index / strategy concentrated on a limited number of underlying securities and/or representing a specific region/sector/strategy, which may provide a lesser diversification of assets compared to a broader index / strategy which will be exposed to various regions/sectors/strategies and/or a larger number of underlying securities. Hence, exposure to such a concentrated index / strategy may result in higher volatility than a diversified index / strategy and heightened liquidity risk in the event that one or more constituents of the index / strategy are impacted by impaired liquidity or suspension of quotation.

Capital at Risk

The capital invested is not guaranteed. Investors therefore may not recover all or part of their initial investment, particularly in the event that the relevant Benchmark Index / strategy posts a negative return over the investment period.

Capital erosion risk

Through a Sub-Fund, Shareholders may be exposed to the risk of potential capital erosion due to a general increase of inflation as this Sub-Fund performance does not account for inflation.

Risk of using financial derivative instruments

A Sub-Fund's use of financial derivative instruments ("FDI"), such but not limited to futures, options, forwards and swaps, involves increased risks.

Some FDI may require an initial amount to establish a position in such derivative instrument which is much smaller than the exposure obtained through this derivative, so that the transaction is "leveraged" or "geared". A relatively small movement of market prices may then result in a potentially substantial impact, which can prove beneficial or detrimental to the Sub-Fund. However, unless otherwise specified in the relevant Sub-Fund documentation, leveraged derivatives are not used to create leverage at the Sub-Fund level.

FDI are highly volatile instruments and their market values may be subject to wide fluctuations. If the FDI do not work as anticipated, the Sub-Fund could suffer greater losses than if the Sub-Fund had not used the FDI.

A Sub-Fund may enter into over-the-counter ("OTC") FDI (cf. the section INVESTMENT OBJECTIVES of the part I/ Investment Objectives/ Investment Powers and Restrictions of this Prospectus). Instruments traded in OTC markets may trade in smaller volumes and their price may be more volatile than those of instruments traded in regulated markets.

Trading in those FDI may imply a range of risks including (but not limited to) counterparty risk, hedging disruption risk, index disruption risk, taxation risk, regulatory risk, operational risk, and liquidity risk. These risks can materially affect a FDI and could lead to an adjustment or even the early termination of the FDI transaction.

Counterparty risk

A Sub-Fund may be exposed to a counterparty risk resulting from the use of OTC FDI or efficient portfolio management techniques. The relevant Sub-Fund may be exposed to the risk of bankruptcy, settlement default or any other type of default of the counterparty related to any trading transaction or agreement entered into by the Sub-Fund.

In case of default of the counterparty, the relevant transaction or agreement can be early terminated. With respect to OTC FDI and/or efficient portfolio management techniques, the Sub-Fund will then endeavour its best efforts to reach its investment objective by entering into, if necessary, another equivalent transaction or agreement, in the market conditions which will prevail during the occurrence of such event. The realisation of this risk could in particular have impacts on the capacity of the Sub-Fund to reach its investment objective.

In the case of Securities Lending, should the counterparty default in returning the securities lent to the Fund, the Fund will seek to realize the collateral held as financial guarantee. Such realization of the collateral could however yield less income than the securities initially lent to the counterparty and reduce the Fund targeted portfolio exposure until the collateral is converted back into the original security.

The Management Company supervises these risks of conflicts of interests by the implementation of procedures intended to identify them, to limit them and to assure their fair resolution if necessary.

Collateral Management Risk

Counterparty risk arising from investments in OTC financial derivative instruments or efficient portfolio management techniques, as further describe under section E. "Investment Techniques" of the general part of the Prospectus is generally mitigated by the transfer or pledge of collateral in favour of the Sub-Fund. However, transactions may not be fully collateralised. Fees and returns due to the Sub-Fund may not be collateralised. If a counterparty defaults, the Sub-Fund may need to sell non-cash collateral received at prevailing market prices. In such a case, the Sub-Fund could realise a loss due, inter alia, to inaccurate pricing or monitoring of the collateral, adverse market movements, deterioration in the credit rating of issuers of the collateral or illiquidity of the market on which the collateral is traded. Difficulties in selling collateral may delay or restrict the ability of the Sub-Fund to meet redemption requests.

Collateral management risk also involves (i) operational risk, being the risk that operational processes, including those related to the safekeeping of assets, valuation and transaction processing may fail, resulting in losses, due to human errors, physical and electronic system failures and other business execution risks as well as external events and (ii) custody risk, where the assets of the Fund are safe-kept by the Depositary and Paying Agent and investors are exposed to the risk of the Depositary and Paying Agent not being able to fully meet its obligation to reconstitute in a short timeframe all of the Fund's assets in the case of bankruptcy of the Depositary and Paying Agent. The Fund's assets will be identified in the Depositary and Paying Agent's books as belonging to the Fund. Securities and debt obligations (including loan assignments and loan participations) held by the Depositary and Paying Agent will be segregated from other assets of the Depositary and Paying Agent which mitigates but does not exclude the risk of non-restitution in case of bankruptcy. However, no such segregation applies to cash which increases the risk of non-restitution in case of bankruptcy.

Interest Rate Risk

Global risk

Interest rate risk refers to fluctuations in the value of a fixed-income security resulting from changes in the general level of interest rates. When the general level of interest rates rises, the prices of most fixed-income securities fall. When the general level of interest rates decreases, the prices of most fixed-income securities increase. Interest rate risk is generally greater for investments with long durations or maturities. Interest rates' fluctuations may therefore impact positively or adversely the Sub-Fund's net asset value.

Sub-Funds designed to provide returns linked to money markets rates

A Sub-Fund may be exposed to moves in money markets related to a decision from a Central Bank. As a result, a decrease in the monetary interest rates under the level of the Management fee and Administrative fee of the Sub-Fund could lead to a decrease in the net asset value of the Sub-Fund. The monetary market reference rate may be negative for a given period, which could result in a negative performance of the Sub-Fund for this period.

Sub-Funds using a duration-neutral strategy (such as those designed to provide returns linked to inflation expectations)

A Sub-Fund may follow a duration-neutral strategy, i.e. a strategy designed to minimize the influence of interest rates variations. However, the Sub-Fund could be exposed to moves in interest rates due to imperfect matching between fixed-income securities maturities in both long and short legs. Additionally, a residual exposure to interest rates risk may exist due to the price changes of the underlying fixed-income securities since the last rebalancing. Interest rates' fluctuations may therefore impact positively or adversely the Sub-Fund's net asset value.

Credit Risk*General*

Being exposed to bonds and other fixed income securities, a Sub-Fund may be subject to the risk that some issuers may go bankrupt or may not make timely payment of interest and/or principal on such securities. Furthermore, an issuer may suffer adverse changes in its financial conditions that could lower the credit quality of the securities issued by this issuer, which implies an increased risk of default of that issuer, leading to a depreciation of the value of the securities concerned. Deterioration of the credit quality of an issuer may also cause a greater volatility in the price of the securities issued by this issuer and thus in the value of the Sub-Fund.

Sub-Funds using a credit-neutral strategy (such as those designed to provide returns linked to inflation expectations)

The Sub-Fund could be exposed to an evolution in the credit quality of a fixed income security in the Benchmark Index / strategy due to imperfect matching between fixed income securities in both the short and long legs. An actual or perceived change in the ability of an issuer to meet its obligations will likely have an adverse effect on the Sub-Fund.

Risks linked to Sampling and Optimization techniques

Reflecting the Index / strategy performance by investing in all of its constituents may prove to be very difficult or costly to implement. Some constituents may even not be traded, for instance because of international embargos or market suspensions. The Sub-Fund's Manager may therefore use various sampling and/or optimization techniques. These sampling techniques consist in investing in a selection of representative securities (and not all securities) that constitute the Index / strategy, in proportions that differ from those of the Index / strategy. Regarding optimization techniques, the Sub-Fund may invest in securities that are not Index / strategy constituents or in derivatives. The use of such techniques may increase the ex-post tracking error and cause the Sub-Fund to perform differently from that Index / strategy.

Lack of Reactivity to Changing Circumstances

The Index tracked by certain Sub-Funds rebalances on a low frequency basis in accordance with the concerned Index methodology. In the event that circumstances change and affect the realization of the Index Objectives between two rebalancing dates, including shortly after a rebalancing date, neither the constituents of the Index nor their weights will change until the next rebalancing date. As a result, the Index may not react to changing circumstances as quickly as an actively managed strategy.

Lack of Operating History

The Index / strategy tracked by certain Sub-Funds has been recently established and therefore has a limited history for the purposes of evaluating its performance. Any back-testing or similar analysis performed by any person in respect of the relevant Index / strategy must be considered illustrative and may be based only on estimates or assumptions.

Risk Warning on the use of financial derivative instruments

A Sub-Fund's use of financial derivative instruments such as futures, options, warrants, forwards and swaps (including TRS) involves increased risks. A Sub-Fund's ability to use such instruments successfully depends on its Manager's ability to accurately anticipate movements in stock prices, interest rates, currency exchange rates or other economic factors and the availability of liquid markets. If the Manager's anticipations are wrong, or if the derivatives do not work as anticipated, the Sub-Fund could suffer greater losses than if the Sub-Fund had not used the derivatives. Some financial derivative instruments may require an initial amount to establish a position in such derivative instrument which is much smaller than the exposure obtained through this derivative, so that the transaction is "leveraged" or "geared". A relatively small movement of market prices may then result in a potentially substantial impact, which can prove beneficial or detrimental to the Sub-Fund. However, unless otherwise specified in the relevant Sub-Fund documentation, leveraged derivatives are not used to create leverage at the Sub-Fund level.

Financial derivative instruments are highly volatile instruments and their market values may be subject to wide fluctuations. If the financial derivative instruments do not work as anticipated, the Sub-Fund could suffer greater losses than if the Sub-Fund had not used the financial derivative instruments.

Instruments traded in over-the-counter markets may trade in smaller volumes and their price may be more volatile than those of instruments traded in regulated markets.

Each Sub-Fund may enter into over-the-counter (“OTC”) financial derivative instruments (cf. the section INVESTMENT OBJECTIVES / INVESTMENT POWERS AND RESTRICTIONS of the part I of this Prospectus). Trading in those financial derivative instruments may imply a range of risks including (but not limited to) counterparty risk, hedging disruption, Index disruption, taxation risk, regulatory risk, operational risk, and liquidity risk. These risks can materially affect a financial derivative instrument and could lead to an adjustment or even the early termination of the financial derivative instrument transaction.

Legal Risk – OTC Derivatives, Reverse Repurchase Transactions, Securities Lending and Re-used Collateral

Certain transactions are entered into on the basis of complex legal documents. Such documents may be difficult to enforce or may be the subject of a dispute as to interpretation in certain circumstances. Whilst the rights and obligations of the parties to a legal document may be governed by English law, in certain circumstances (for example insolvency proceedings) other legal systems may take priority which may affect the enforceability of existing transactions.

Risk of investment in Emerging and Developing Markets

Exposure to emerging markets carries a greater risk of potential loss than investment in developed markets. Specifically, market operating and supervision rules may differ from standards applicable in developed markets. In particular, exposure to emerging markets is subject to factors such as: market's greater volatility, lower trading volumes, a risk of economic and/or political instability, an uncertain or variable tax regime and regulatory environment, market closure risks, government restrictions on foreign investments, interruption or limitation of convertibility or transferability of the currency of an emerging country.

Currency Risk

For Sub-Funds whose investment objective is to track an Index or to reflect the performance of a Benchmark Index or a Reference Strategy

A Sub-Fund may be exposed to currency risk if i) the constituents of the Benchmark Index / strategy are denominated in another currency than the currency of the Class held by the investor, or ii) certain classes of the Sub-Fund are listed on certain stock exchanges and/or multilateral trading facilities in a currency different from the currency of the constituents of the Benchmark Index / strategy. Each investor may be hence exposed to variations in exchange rates between his/her investment currency and each currency of the constituents of the Benchmark Index / strategy; these fluctuations may therefore adversely affect the performance of each Shareholder's investment.

Investors should be aware that, when their investment currency is different from the base currency of the Benchmark Index, their investment performance may diverge from the Benchmark Index performance due to variations in exchange rates. For instance, the performance of each Shareholder's investment may be negative despite of an appreciation of the Benchmark Index value.

For Sub-Funds whose investment objective is not linked to an Index, a Benchmark Index or a Reference Portfolio

A Sub-Fund may be exposed to currency risk if i) assets to which the Sub-Fund is exposed are denominated in another currency than the currency of the Class held by the investor, or ii) the Sub-Fund is listed on certain stock exchanges and/or multilateral trading facilities in a currency different from the currency of assets to which the Sub-Fund is exposed. Each investor may be hence exposed to variations in exchange rates between his/her investment currency and each currency of assets to which the Sub-Fund is exposed; these fluctuations may therefore adversely affect the performance of each Shareholder's investment.

Class Currency Hedge Risk

In order to hedge (or partially hedge) the currency risk for hedged currency Classes, a Sub-Fund may use a hedging strategy which attempts to minimize the impact of fluctuations of the relevant Class currency against the currency of each (or some) of the Benchmark Index / strategy components. However, the hedging strategy used by the Sub-Fund may remain imperfect due to the rebalancing frequency and instruments used. The Net Asset Value of the relevant Class can then be impacted by Foreign Exchange market upwards and downwards. Moreover, the hedging costs can negatively impact the Net Asset Value of the concerned Class. The adoption of a currency hedging strategy for a Class may substantially limit the ability of holders of such Class to benefit from an upward of one or several currencies of Benchmark Index / strategy components against the currency of such Class.

Sub-Fund Liquidity Risk (Primary Market)

The Sub-Fund's liquidity and/or value may be adversely affected if, when the Sub-Fund (or a counterparty to a financial derivative instrument) is rebalancing its exposure, the underlying financial markets are restricted, closed, or subject to wide bid/offer spreads. An inability to execute trades due to low trading volumes may also affect the process of subscriptions, conversions and redemptions of Shares.

Liquidity Risk on Secondary Market

Investors should consult section V. "Secondary Market for UCITS ETF Share Class/Sub-Fund" of the main part of this prospectus.

Risk that the Sub-Fund's investment objective is only partially achieved

There is no guarantee that the investment objective will be achieved, as no asset or financial instrument can ensure that the Benchmark Index will be automatically and continuously replicated, particularly in the event of one or more of the following risks.

(a) Risk due to a shift in tax policy

Any change in the taxation legislation in any jurisdiction where a Sub-Fund is domiciled, registered for sale or listed, could adversely affect the tax treatment of the Shareholders of each Sub-Fund. In the case of such an event, the Sub-Fund's Management Company shall not be liable to any investor for any payment required to be made to any competent fiscal authority.

(b) Risk due to a shift in the underlying assets' tax policy

Any change in the taxation legislation applicable to the underlying assets of a Sub-Fund could adversely affect the tax treatment of this Sub-Fund. As a result, in case of a discrepancy between the estimated and effective tax treatment applied to this Sub-Fund and/or to the Sub-Fund's counterparty to the OTC swap (for Sub-Funds implementing an Indirect Replication), the net asset value of the Sub-Fund may be affected.

The net asset value may also be adversely affected in circumstances where the Sub-Fund may refund unexpected taxes in connection with any hedge position entered by a past or present FDI counterparty of the Sub-Fund with respect to an OTC swap.

(c) Regulatory Risk affecting the Sub-Fund

In the event of a change in the regulatory regime in any jurisdiction where a Sub-Fund is domiciled, registered for sale or listed, the process of subscriptions, conversions and redemptions of Shares may be affected.

(d) Regulatory Risk affecting the underlying assets of the Sub-Fund

In the event of a change in the regulatory regime in any jurisdiction of the underlying assets of a Sub-Fund, the Sub-Fund's net asset value as well as the process of subscriptions, conversions and redemptions of Shares may be affected. A Sub-Fund may not be able to achieve exposure to certain securities included in the underlying index or do so in the exact proportions they represent due to regulatory, policy, or legal restrictions or other reasons of the same nature. Such or similar restrictions may also lead the index provider to change a Sub-Fund's target index by removing securities from an index or implementing caps on the securities of certain issuers that have been subject to such measures. This may also have an adverse effect on a sub-fund's ability to adjust its exposure to the value of a basket of transferable securities or other eligible assets corresponding to its investment objective and, as the case may be, may result in increased transaction costs and tracking error risk.

(e) Index Disruption Risk

In the event of an Index disruption, the Company acting in accordance with applicable laws and regulations may have to suspend the calculation of the Sub-Fund's net asset value. If the Index disruption persists, the Company will determine the appropriate measures to be carried out. Index disruption notably covers situations where:

- i) the Index is deemed to be inaccurate or does not reflect actual market developments,
- ii) the Index is permanently cancelled by the Index provider;
- iii) the Index provider fails to calculate and announce the Index level;

iv) the Index provider makes a material change in the calculation formula or the methodology of the Index (other than a modification already prescribed in that formula or methodology in the event of standard changes in the constituent components and weightings and other routine events) which cannot be efficiently replicated with reasonable costs by a Sub-Fund.

v) one or several constituents of the Index become illiquid, either on a regulated stock exchange (suspension of quotation) or negotiated over the counter.

vi) the constituents of the Index are impacted by transaction costs in relation to the execution or the settlement, or costs resulting from specific tax constraints, except if those costs are reflected in the performance of the Index.

(f) Operational Risk

In the event of an operational failure of the Management Company, or one of its representatives, investors could experience delays, loss in the processing of subscriptions, conversions and redemptions of Shares, or other disruptions.

(g) Corporate Action Risk

A corporate action impacting a component of a Benchmark Index / strategy and which has already been announced officially may be subject to a contradictory, unforeseen change. As the Sub-Fund's valuation of the corporate action is based on this initial announcement, the Sub-Fund's net asset value can be adversely affected by such an unforeseen change. Besides, the Sub-Fund's performance may diverge from the Benchmark Index performance if the Sub-Fund's treatment of a corporate action differs from the one specified in the Benchmark Index methodology.

Securities Lending

In relation to securities lending transactions, investors must notably be aware that (A) in case of default of the borrower of securities or instruments lent by a Sub-Fund, if the Lending Agent fails to return these securities or instruments or indemnify the Sub-Fund under the Borrower Default Indemnification conditions provided in the Lending Agent Agreement, there is a risk that the realizable value of the collateral received may be lower than the value of the securities or instruments lent out, whether due to inaccurate pricing, adverse market movements, a deterioration in the credit rating of issuers of the collateral, or the illiquidity of the market in which the collateral is traded; that (B) in case of reinvestment of cash collateral, such reinvestment may (i) create leverage with corresponding risks of losses and volatility, (ii) introduce market exposures inconsistent with the objectives of a Sub-Fund, or (iii) yield a sum less than the amount of collateral to be returned; and that (C) delays in the return of lent securities or instruments may restrict the ability of a Sub-Fund to meet its delivery obligations under security sales.

Quantitative risk (minimum variance)

The "minimum variance" methodology includes a constrained variance optimization algorithm. In some cases, it might not offer the lowest or the most optimal variance and the Index might have a different risk profile than the initial investment universe.

Model risk

Certain Index methodologies may use systematic investment processes that consist of quantitative mathematical models or systematic investment rules relying on patterns inferred from historical prices or performances, observed risk events and other financial data or indicators. These models and their underlying assumptions can reveal erroneous and therefore the objectives of the Index may be not fully achieved.

Inflation-linked instruments risk

An inflation-linked bond offers a fixed real interest rate (i.e., net of the inflation rate) and all its cash flows (coupons and principal) are indexed on the inflation rate of the country or the zone of issue. Besides the interest rate risk presented above and applied to the real interest rates, this bond is thus exposed to the variations in the realized inflation and in the inflation anticipated up to the maturity date of the security. A decrease of the inflation rate will result in a decrease of the value of the inflation-linked bond. The variation in the inflation rate can thus have an impact on the Sub-Fund's net asset value. The inflation rate to which the bonds are indexed is generally associated to a consumer price index in the country or the zone of issuance and thus linked to the economic situation of this country or this zone. Certain Sub-Funds may also enter into inflation swaps which allow to get a direct exposure to the inflation, long or short, without dependence to the real interest rates.

Specific risk due to seasonality, carry and retroactivity on inflation

Inflation may be subject to seasonal fluctuations which may have an impact on Inflation-Linked Bonds return and may generate either positive or negative carry (where the carry of any asset is the cost or benefit of owning that

asset). There is positive carry when the monthly inflation accretion earned is higher than the cost of financing the trade through the repurchase market; there is negative carry otherwise. Inflation accretion can be negative and amplify the negative carry. The Inflation figures are generated retrospectively, which results in a time lag of several months between the collection of prices data and the indexation application.

Inflation expectation risk

Certain Sub-Funds may be exposed to a long/short strategy which is sensitive to changes in inflation expectations, which may go down as well as up, and reflect the market's macroeconomic view at a given date. Thus, the relevant Benchmark Index is not designed to measure or predict the realized rate of inflation, nor does it seek to replicate the returns of any price index or any measure of actual consumer price levels. The "breakeven rate of inflation" (BEI), which is the difference in yield between a nominal bond and its equivalent inflation-linked bond at a given maturity, and can be captured by a long investment in the inflation-linked bond associated with a short position in the nominal bond, is considered to be a measure of the market's expectations for inflation over the relevant period. For the avoidance of doubt, the daily Benchmark Index performance will not be the daily percentage change of the BEI, nor a multiplier of the daily change of the BEI, but the daily overperformance of the long inflation-linked basket versus the short nominal basket, which is in theory correlated to the changes in the inflation expected by the market at the bonds maturity, represented by the BEI for such maturity. Nevertheless, there is no guarantee that the relevant Benchmark Index would be correlated to the BEI as the strategy underlying the Benchmark Index is also sensitive to additional factors and risks including (but not limited to) price movements due to supply and demand discrepancies between inflation-linked bonds and corresponding nominal bonds, interest rates, credit risk, inflation seasonality effects, and transactions costs applicable to the Benchmark Index components. These additional factors will lead to deviations between the Benchmark Index performance and inflation expectations variations. As a result, an investment in these Sub-Funds can serve neither as an effective hedge against inflation, nor as an accurate tracker of the BEI.

Leverage Risk

Certain Sub-Funds may be directly or indirectly (e.g. through their exposure to the Index they replicate) leveraged to underlying assets or markets. Leverage generates specific risks. It indeed amplifies both upside and downside movements of the underlying assets, hence increasing the Sub-Fund's volatility. A high level of leverage implies that a moderate loss on one or more underlying assets could lead to a large capital loss for the Sub-Fund. Finally, leverage leads to a proportional increase of Sub-Fund investment costs, especially replication and transaction costs.

Risk related to the deleveraging of the Sub-Fund's assets

A Sub-Fund may reduce its exposure to the Index (or to any other assets it is exposed to) at any time in order to eliminate any risk of the maximum acceptable loss being exceeded. Deleveraging of the Sub-Fund's exposure after losses involves a potential significant opportunity cost. The Sub-Fund could indeed be prevented from being exposed or fully exposed during what could otherwise have been highly profitable periods, and consequently substantially underperform an otherwise identical portfolio not subject to such risk control policy. Deleveraging the Sub-Fund's assets may correspondingly reduce its potential profit.

Specific risks linked to Global Depositary Receipts ("GDR") and American Depositary Receipts ("ADR")

Exposure to GDR and ADR may generate additional risks compared to a direct exposure to the corresponding underlying stocks:

(i) as the market price of a GDR or ADR can deviate from its theoretical price, which is equal to the market price of the underlying stock converted in USD or GBP using the respective FX spot rate. This deviation may have different causes such as trading quotas or legal limitations applicable to the local underlying stocks, a discrepancy between the trading volumes of GDRs or ADRs and of the local underlying stocks or other disruptions on the concerned stock markets;

(ii) because of the intervention of the depositary bank which issues the GDR or ADR. Under applicable law, the depositary bank, which holds the underlying stocks as a hedge, may not segregate these underlying stocks from its own assets. Even where segregation is an integral part of the depositary agreement regulating the issuance of the aforesaid ADRs and GDRs, there may be a risk that underlying shares would not be attributed to holders of ADRs and GDRs in case of bankruptcy of the depositary bank. In such case, the likeliest scenario would be the trading suspension and thereafter a freeze of the price of the ADRs and GDRs impacted by such bankruptcy event. Bankruptcy events in respect of the depositary banks issuing the GDRs and ADRs may negatively affect the performance and/or the liquidity of the relevant Sub-Fund.

The performance of an Index composed of GDRs or ADRs may then diverge from the performance of the corresponding portfolio composed of the underlying local securities.

Risks associated with the high cost of investing into a long/short and/or leveraged strategy

The cost of investing into a long/short and/or leveraged strategy is significantly higher than the cost of investing into simple traditional strategies. Such cost notably reflects the financing cost of the leverage and the borrowing cost of synthetic short exposures. Investors in a Sub-Fund following such a strategy ultimately bear those costs and then experience a significant negative impact from keeping a long term investment in the Sub-Fund, irrespective of the performance of the underlying strategy.

Specific risk due to credit rating by different agencies

According to the methodology of the Index / strategy tracked by certain Sub-Funds, a bond will be eligible for inclusion depending on credit ratings published by several rating agencies (if available). Taking into account the rating given by a single agency (including an agency different from agencies specified in the Index / strategy methodology), one or several Index / strategy constituents would have been non-eligible because of a different level of credit quality.

Specific Risk due to the PIR Law

The Sub-Fund intends to comply with the requirements of the PIR Law, the long-term individual savings plan framework introduced in Italy through the 2017 Budget Act, by tracking the Index.

Factors that may affect the Sub-Fund's ability to comply with the PIR Law include updates to the Index provider's methodology, the delisting or changes in the incorporation of the securities held by the Sub-Fund, or the securities no longer meeting the criteria prescribed by the PIR Law. Where securities are existing constituents of the Index, they will remain in the Index and therefore could continue to be held by the Sub-Fund until they are removed from the Index at the next scheduled rebalancing. The Sub-Fund may also hold other securities in extenuating circumstances in addition to the constituents within the Index. The Management Company may manage these events at its discretion. Additionally, the regulatory framework of the PIR Law may be subject to change from time to time which may in turn result in a change to the Index or investment policy to be made, subject to the approval of the CSSF.

Market Risk linked to a controversy

Companies which have previously met the screening criteria of a benchmark index, and have therefore been included in a benchmark index and the relevant Sub-Fund, may unexpectedly or suddenly be impacted by an event of serious controversy which negatively impacts their price and, hence, the performance of the Sub-Fund. This could occur when activities or practices of companies which have previously been hidden suddenly come to light and the resulting negative investor sentiment could drive down their price. Where these companies are existing constituents of the benchmark index, they could remain in the benchmark index and therefore continue to be held by the Sub-Fund until the next scheduled rebalancing. At the time that the benchmark index excludes the affected securities, the price of the securities may have already dropped and not yet recovered, and the Sub-Fund could therefore be selling the affected securities at a relatively low price point.

Risk linked to ESG methodologies

Indices with an Environmental, Social and Governance ("ESG") component are usually using a best in class approach or an ESG rating improvement approach. Both approaches are relative to an investment universe. It may occur however that companies with low ESG rating may be included in the index composition and that the overall ESG scoring of the index would be lower than the overall ESG rating of a non-ESG index based on a different investment universe.

Risk related to ESG Score computation

It should be noted that most ESG scores and ratings are not defined in absolute terms, but in relative terms, comparing a company to a peer group. As a result, companies generally perceived by the market as having mediocre ESG practices could be potentially well rated if the other companies of their peer group had lower standards than theirs in terms of ESG practices. Companies' ESG score is computed by an ESG rating agency based on raw data, models and estimates which are collected/computed according to methods specific to each player. Most of them use a variety of information vectors and channels: questionnaires sent to companies, use of information published by the entities concerned by the data or by trusted third parties (press agencies, non-governmental agencies), use of data produced by other suppliers of the sector through subscriptions or partnerships. The information collected may be supplemented, specified or corrected through discussions with the companies to which the data pertains. Rating agencies publish guidance on their methodology and provide additional information on request. However, there is a lack of standardization, and since the methodologies are proprietary, the information provided can be incomplete, especially with regard to the precise description of the

variables used in calculating the scores, the processing of data gaps and the weighting of the various variables and components of the score as well as the calculation methods.

Index Calculation Risk

The Sub-Funds track indices which are determined, calculated and maintained by index sponsors. Index sponsors may experience operational risks that may generate errors in the determination, composition or calculation of the relevant index that Sub-Funds track, leading to losses in the Sub-Funds' investments or deviation with the index objective as described in the index methodology and the Sub-Funds' description. Operational risks may not be identified immediately and last a certain period of time, and even in case of identification, it may be impractical to recover the losses nor entitle the Sub-Fund for adequate compensation from the index sponsor.

APPENDIX I - ESG RELATED DISCLOSURES TO THIS PROSPECTUS

Template pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes

No

It will make a minimum of **sustainable investments with an environmental objective**: ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It will make a minimum of **sustainable investments with a social objective**: ___%

It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 30% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promotes E/S characteristics, but **will not make any sustainable investments**

What environmental and/or social characteristics are promoted by this financial product?

The Sub-Fund promotes environmental and/or social characteristics through among others, replicating an Index integrating an environmental, social and governance (“ESG”) rating.

The Index methodology is constructed using a “Best-in-class approach”: best ranked companies are selected to construct the Index.

“Best-in-class” is an approach where leading or best-performing investments are selected within a universe, industry sector or class. Using such Best-in-class approach, the Index follows an extra-financial approach significantly engaging that permits the reduction by at least 20% of the initial investment universe (expressed in number of issuers).

Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

● **What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?**

The S&P DJI ESG Scores is used to measure the attainment of each of the environmental and or social characteristic promoted by this financial product.

S&P Dow Jones Indices (S&P DJI), in association with S&P Global Sustainable¹ Research, together provide Environmental, Social, and Governance (ESG) scores, (collectively known as S&P DJI ESG Scores), which measure companies' overall performance relating to financially material ESG factors. The S&P Global ESG scores dataset contains a total company-level ESG score for one financial year and consists of individual environmental (E), social (S), and governance (G) dimension scores, beneath which are (on average) more than 20 industry-specific criteria scores that can be used as signals of ESG risks and repercussions.

More detailed on S&P DJI ESG Scores can be found on the following link:

<https://www.spglobal.com/spdji/en/documents/methodologies/methodology-sp-dji-esg-score.pdf>

More precisely, S&P Euro ESG High Yield Dividend Aristocrats Net Total Return Index (the "Index") features the following characteristics:

a) Exclusions based on an ESG score: to be eligible, companies must have an S&P DJI ESG Score (as defined in the methodology of the Index). S&P DJI ESG Score methodology provides Environmental, Social, and Governance ("ESG") scores that robustly measure companies' financially material ESG factors. Through an analysis of ESG factors, the methodology aims to identify companies within the Eligible Universe that are well-equipped to recognize and respond to emerging sustainability opportunities and challenges in the global market. A full set of ESG indicators including but not limited to corporate governance, environmental reporting and labor practice indicators are calculated for each company covering various sustainability topics. Within each industry, each indicator has a different weight in the final ESG score calculation. For any information about S&P DJI ESG Score methodology, please refer to <https://www.spglobal.com/spdji/en/landing/investment-themes/esg-scores/>.

The lowest 25% companies ranked in term of S&P DJI ESG Score within the Eligible Universe are excluded from the Index.

Using such best-in-universe approach, the Sub-Fund follows an extra-financial approach significantly engaging.

The extra financial data coverage is at least 90% of the eligible equity securities of the Index.

b) Value-based exclusions from the following activities: controversial weapons, thermal coal and tobacco products .

c) Exclusions based on a United Nations Global Compact score: Arabesque's S-Ray universe is used to assess very poor performers in relation to the United Nations Global Compact ("UNGC") principles. Assessed companies are assigned a Global Compact (GC) Score (as defined in the methodology of the Index). The global S-Ray universe is ranked according to GC Score. All companies at or below the bottom 5% of the global S-Ray universe by GC Score rank are ineligible. Eligible Companies that do not have a GC Score are excluded. For more information regarding Arabesque's S-Ray, please refer to <https://arabesque.com/s-ray/>.

d) Additionally, the methodology of the Index monitors companies' sustainability performance on an ongoing basis, by assessing current controversies with potentially negative reputational or financial impacts. The latter includes issues such as economic crime or corruption, fraud, illegal commercial

practices, human rights issues, labour disputes, workplace safety, catastrophic accidents or environmental violations.

● ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

- 1) follow best environmental and social practices; and
- 2) avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a “best performer” within its sector of activity on at least one of its material environmental or social factors.

The definition of “best performer” relies on Amundi’s proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a “best performer”, an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g. tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

By applying the Amundi’s above described Sustainable Investment definition to the Index constituents of this passively managed ETF Product, Amundi has determined that this Product has the minimum proportion of sustainable investments stated in page 1 above. However, please note that Amundi Sustainable Investment definition is not implemented at the Index methodology level.

● ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm (‘DNSH’), Amundi utilises two filters:

The first DNSH test filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g. GHG intensity of investee companies) via a combination of indicators (e.g. carbon intensity) and specific thresholds or rules (e.g. that the investee company’s carbon intensity does not belong to the last decile of the sector).

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi’s Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi’s ESG rating.

– How have the indicators for adverse impacts on sustainability factors been taken into account?

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above:

The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors’ diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi’s Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

– How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called “Community Involvement & Human Rights” which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labor relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts will evaluate the situation and apply a score to the controversy (using our proprietary scoring

methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

Yes, The Sub-Fund considers Principal Adverse Impacts as per Annex 1, Table 1 of the RTS applying to the Sub-Fund’s strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches.

- Exclusion: Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.

- Engagement: Engagement is a continuous and purpose driven process aimed at influencing the activities or behavior of investee companies. The aim of engagement activities can fall into two categories : to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.

- Vote: Amundi’s voting policy responds to an holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information please refer to Amundi’s Voting Policy .

- Controversies monitoring: Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi’s funds.

For any indication on how mandatory Principal Adverse Impact indicators are used, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

No

What investment strategy does this financial product follow?

The Sub-Fund tracks the performance of “S&P Euro ESG High Yield Dividend Aristocrats Net Total Return Index” (the “Index”) denominated in Euros - while minimising the volatility of the difference between the return of the Sub-Fund and the return of the Index.

S&P Euro ESG High Yield Dividend Aristocrats Net Total Return Index measures the performance of 40 high dividend-yielding and ESG-scoring companies from the S&P Europe BMI (the “Parent Index”) with an Eurozone country classification.

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

- ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

This is a passively managed ETF. Its investment strategy is to replicate the Index while minimizing the related tracking error.

S&P Euro ESG High Yield Dividend Aristocrats Net Total Return Index (the “Index”) features the following characteristics:

a) Exclusions based on an ESG score: to be eligible, companies must have an S&P DJI ESG Score (as defined in the methodology of the Index). S&P DJI ESG Score methodology provides Environmental, Social, and Governance (“ESG”) scores that robustly measure companies’ financially material ESG factors. Through an analysis of ESG factors, the methodology aims to identify companies within the Eligible Universe that are well-equipped to recognize and respond to emerging sustainability opportunities and challenges in the global market. A full set of ESG indicators including but not limited to corporate governance, environmental reporting and labor practice indicators are calculated for each company covering various sustainability topics. Within each industry, each indicator has a different weight in the final ESG score calculation. For any information about S&P DJI ESG Score methodology, please refer to <https://www.spglobal.com/spdji/en/landing/investment-themes/esg-scores/>.

The lowest 25% companies ranked in term of S&P DJI ESG Score within the Eligible Universe are excluded from the Index.

Using such best-in-universe approach, the Sub-Fund follows an extra-financial approach significantly engaging.

The extra financial data coverage is at least 90% of the eligible equity securities of the Index.

b) Value-based exclusions from the following activities: controversial weapons, thermal coal and tobacco products .

c) Exclusions based on a United Nations Global Compact score: Arabesque’s S-Ray universe is used to assess very poor performers in relation to the United Nations Global Compact (“UNGC”) principles. Assessed companies are assigned a Global Compact (GC) Score (as defined in the methodology of the Index). The global S-Ray universe is ranked according to GC Score. All companies at or below the bottom 5% of the global S-Ray universe by GC Score rank are ineligible. Eligible Companies that do not have a GC Score are excluded. For more information regarding Arabesque’s S-Ray, please refer to

<https://arabesque.com/s-ray/>.

d) Additionally, the methodology of the Index monitors companies' sustainability performance on an ongoing basis, by assessing current controversies with potentially negative reputational or financial impacts. The latter includes issues such as economic crime or corruption, fraud, illegal commercial practices, human rights issues, labour disputes, workplace safety, catastrophic accidents or environmental violations.

The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

● ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***

There is no committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy.

● ***What is the policy to assess good governance practices of the investee companies?***

To assess good governance practices of the investee companies, we rely on Amundi ESG scoring methodology. Amundi's ESG scoring is based on a proprietary ESG analysis framework, which accounts for 38 general and sector-specific criteria, including governance criteria. In the Governance dimension, we assess an issuer's ability to ensure an effective corporate governance framework that guarantees it will meet its long-term objectives (e.g., guaranteeing the issuer's value over the long term). The governance sub-criteria considered are: board structure, audit and control, remuneration, shareholders' rights, ethics, tax practices and ESG strategy. Amundi ESG Rating scale contains seven grades, ranging from A to G, where A is the best and G the worst rating. G-rated companies are excluded from our investment universe.

Each corporate security (shares, bonds, single name derivatives, ESG equity and fixed income ETFs) included in investment portfolios has been assessed for good governance practices applying a normative screen against UN Global Compact (UN GC) principles on the associated issuer.

The assessment is performed on an ongoing basis. Amundi's ESG ratings Committee monthly reviews lists of companies in breach of the UN GC leading to rating downgrades to G. Divestment from securities downgraded to G is carried out by default within 90 days.

Amundi Stewardship Policy (engagement and voting) related to governance complements this approach.

What is the asset allocation planned for this financial product?

Asset allocation describes the share of investments in specific assets.

At least 90% of the Sub-Fund's securities and instruments will meet the promoted environmental or social characteristics in accordance with the binding elements of the Index methodology. Furthermore, the Sub-Fund commits to have a minimum of 30% of sustainable investments as per the below chart. Investments aligned with other E/S characteristics (#1B) will represent the difference between the actual proportion of investments aligned with environmental or social characteristics (#1) and the actual proportion of sustainable investments (#1A).

The planned proportion of other environmental investment represents a minimum of 30% (i) and may

change as the actual proportions of Taxonomy-aligned and/or Social investments increase.

Taxonomy-aligned activities are expressed as a share of:

- turnover** reflecting the share of revenue from green activities of investee companies
- capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

● **How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?**

Derivatives are not used to attain the environmental and social characteristics promoted by the Sub-Fund.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund has no minimum share of investments with an environmental objective that are aligned with the EU Taxonomy.

- **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹ ?**

- Yes:
- In fossil gas In nuclear energy
- No

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures
 ** This percentage is purely indicative and may vary.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **What is the minimum share of investments in transitional and enabling activities?**

The funds has no minimum proportion of investment in transitional or enabling activities.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

- **What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?**

The Sub-Fund will have a minimum commitment of 30% of Sustainable Investments with an environmental objective as indicated in this Annex with no commitment on their alignment with the EU Taxonomy.

- **What is the minimum share of socially sustainable investments?**

The Sub-Fund has no minimum share of socially sustainable investments.

- **What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?**

Included in “#2 Other” are cash and instruments for the purpose of liquidity and portfolio risk management. It may also include ESG unrated securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

- **Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?**

Yes, the Index has been designated as a reference benchmark to determine whether the Sub-Fund is aligned with the environmental and/or social characteristics that it promotes.

- **How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?**

According to applicable regulations to index sponsors (including BMR), index sponsors should define appropriate controls/diligence when defining and/or operating index methodologies of regulated indexes.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***

The investment objective of the Sub-Fund is to track both the upward and downward evolution of the Index, while minimising the difference between the return of the Sub-Fund and the return of the Index.

- ***How does the designated index differ from a relevant broad market index?***

S&P Euro ESG High Yield Dividend Aristocrats Net Total Return Index measures the performance of 40 high dividend-yielding and ESG-scoring companies from the S&P Europe BMI (the “Parent Index”) with an Eurozone country classification.

- ***Where can the methodology used for the calculation of the designated index be found?***

Additional information on the Index can be found at <https://www.spglobal.com/spdji/en/index-family/esg/core-esg/sp-esg/#overview>

Where can I find more product specific information online?

More product-specific information can be found on the website: Additional information on the Sub-Fund can be found at www.amundiETF.com.

What environmental and/or social characteristics are promoted by this financial product?

The Sub-Fund promotes environmental and/or social characteristics through among others, replicating an Index composed of Green Bonds. To be eligible a bond must be considered as a “Green Bond” by the Climate Bonds Initiative.

Climate Bonds Initiative is an investor-focused- not-for-profit organization promoting large-scale investments that will deliver a global low carbon and climate resilient economy (more information is available on the website: <http://www.climatebonds.net/>). Climate Bonds Initiative has developed and implemented a set of criteria to define Green Bonds which are eligible for the Index.

Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

● **What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?**

The use of proceeds of the bonds is used to measure the attainment of each of the environmental and or social characteristic promoted by this financial product.

More precisely, to be eligible for inclusion in the “Solactive Green Bond EUR USD IG Index” (the “Index”), a bond must be considered as a “Green Bond” by the Climate Bonds Initiative.

Climate Bonds Initiative is an investor-focused- not-for-profit organization promoting large-scale investments that will deliver a global low carbon and climate resilient economy (more information is available on the website: <http://www.climatebonds.net/>). Climate Bonds Initiative has developed and implemented the following set of criteria to define Green Bonds which are eligible for the Index:

i) Environmentally themed (self-labeled) bonds: to be eligible, green bonds must be publicly declared by their issuers as intended to be environmentally beneficial through labelling. Common eligible labels include, but are not limited to, ‘green’, ‘climate-awareness’, ‘climate’, ‘environmental’, ‘carbon’, ‘sustainability’ and ‘ESG’ (Environment, Social, and Governance). The issuer must use the label or description in a public document for the label to be valid (e.g., in a press release, in a statement, in the bond prospectus or supporting bond offering documents).

ii) Eligible bond structures, which include: Asset-linked structures or ‘use of proceeds’ bonds, whereby proceeds raised by bond sale are earmarked for eligible green projects; and Asset-backed structures consisting in (a) Project bonds, which are eligible if they are backed by a green project and the proceeds from bond sale are used solely to finance that same green project; and (b) Securitized bonds, which are eligible if proceeds go towards green projects or assets.

iii) Use of proceeds: issuers must commit to use proceeds from the bond sale in full (net of any bond arrangement fees) to finance eligible green projects or assets. For instance, bonds where more than 5% of the proceeds are used for ‘general corporate purposes’ or projects that are not defined as green, or bonds where proceeds are to be split across different projects (e.g., an ESG Bond with social projects and separate green projects) are not eligible for inclusion in the Index.

iv) Adherence with the “Climate Bonds Taxonomy”: proceeds of an eligible green bond must be used to finance eligible green assets or projects which are typically related to one of the following sectors (as described in the Climate Bonds Taxonomy):

- Renewable and Alternative Energy
- Energy efficiency
- Low-Carbon Transport
- Sustainable Water
- Waste, recycling and pollution
- Sustainable agriculture and forestry
- Climate resilient infrastructure and climate adaptation

As further described in the Climate Bonds Taxonomy, areas of the above sectors can be excluded (e.g., energy savings in fossil fuel extraction activities - for the energy efficiency category -, or the landfill without gas capture - for the waste category -) and related bonds are ineligible for inclusion in the Index.

More information can be found on the website: <http://www.climatebonds.net/> and <https://www.climatebonds.net/standard/taxonomy>.

The Sub-Fund follows an extra-financial approach significantly engaging that contributes to and has positive impacts on the energy and ecological transition by investing permanently at least 90% of the net asset value of the Sub-Fund in Green Bonds comprising the Index. To be eligible in the Index, Green Bonds shall meet the criteria defined by the Climate Bonds Initiative (as mentioned above).

The Sub-Fund has obtained the Greenfin label.

Through its methodology and the manner it is constructed (as described above), the Index is aligned with the sustainable investment objective of the Sub-Fund and differs from a broad market index. Limits of the extra-financial approach are mentioned in the section “Risks Warning” of the prospectus.

● ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

- 1) follow best environmental and social practices; and
- 2) avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a “best performer” within its sector of activity on at least one of its material environmental or social factors.

The definition of “best performer” relies on Amundi’s proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a “best performer”, an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g. tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

By applying the Amundi’s above described Sustainable Investment definition to the Index constituents of this passively managed ETF Product, Amundi has determined that this Product has the minimum proportion of sustainable investments stated in page 1 above. However, please note that Amundi Sustainable Investment definition is not implemented at the Index methodology level.

● ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?***

Principal adverse impacts are the most significant

negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH test filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g. GHG intensity of investee companies) via a combination of indicators (e.g. carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

– How have the indicators for adverse impacts on sustainability factors been taken into account?

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above:

The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

– How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called “Community Involvement & Human Rights” which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labor relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts will evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

Yes, The Sub-Fund considers Principal Adverse Impacts as per Annex 1, Table 1 of the RTS applying to the Sub-Fund’s strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches.

- Exclusion: Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.

- Engagement: Engagement is a continuous and purpose driven process aimed at influencing the activities or behavior of investee companies. The aim of engagement activities can fall into two categories : to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.

- Vote: Amundi’s voting policy responds to an holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information please refer to Amundi’s Voting Policy .

- Controversies monitoring: Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi’s funds.

What investment strategy does this financial product follow?

The investment objective of the Sub-Fund is to track both the upward and the downward evolution of the “Solactive Green Bond EUR USD IG Index” (the “Index”) denominated in Euros, in order to offer an exposure to the Green Bonds market - while minimising the volatility of the difference between the return of the Sub-Fund and the return of the Index (the “Tracking Error”).

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

- ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

This is a passively managed ETF. Its investment strategy is to replicate the Index while minimizing the related tracking error.

To be eligible for inclusion in the “Solactive Green Bond EUR USD IG Index” (the “Index”), a bond must be considered as a “Green Bond” by the Climate Bonds Initiative.

Climate Bonds Initiative is an investor-focused- not-for-profit organization promoting large-scale investments that will deliver a global low carbon and climate resilient economy (more information is available on the website: <http://www.climatebonds.net/>). Climate Bonds Initiative has developed and implemented the following set of criteria to define Green Bonds which are eligible for the Index:.

i) Environmentally themed (self-labeled) bonds: to be eligible, green bonds must be publicly declared by their issuers as intended to be environmentally beneficial through labelling. Common eligible labels include, but are not limited to, ‘green’, ‘climate-awareness’, ‘climate’, ‘environmental’, ‘carbon’, ‘sustainability’ and ‘ESG’ (Environment, Social, and Governance). The issuer must use the label or description in a public document for the label to be valid (e.g., in a press release, in a statement, in the bond prospectus or supporting bond offering documents).

ii) Eligible bond structures, which include: Asset-linked structures or ‘use of proceeds’ bonds, whereby proceeds raised by bond sale are earmarked for eligible green projects; and Asset-backed structures consisting in (a) Project bonds, which are eligible if they are backed by a green project and the proceeds from bond sale are used solely to finance that same green project; and (b) Securitized bonds, which are eligible if proceeds go towards green projects or assets.

iii) Use of proceeds: issuers must commit to use proceeds from the bond sale in full (net of any bond arrangement fees) to finance eligible green projects or assets. For instance, bonds where more than

5% of the proceeds are used for 'general corporate purposes' or projects that are not defined as green, or bonds where proceeds are to be split across different projects (e.g., an ESG Bond with social projects and separate green projects) are not eligible for inclusion in the Index.

iv) Adherence with the "Climate Bonds Taxonomy": proceeds of an eligible green bond must be used to finance eligible green assets or projects which are typically related to one of the following sectors (as described in the Climate Bonds Taxonomy):

- Renewable and Alternative Energy
- Energy efficiency
- Low-Carbon Transport
- Sustainable Water
- Waste, recycling and pollution
- Sustainable agriculture and forestry
- Climate resilient infrastructure and climate adaptation

As further described in the Climate Bonds Taxonomy, areas of the above sectors can be excluded (e.g., energy savings in fossil fuel extraction activities - for the energy efficiency category -, or the landfill without gas capture - for the waste category -) and related bonds are ineligible for inclusion in the Index.

More information can be found on the website: <http://www.climatebonds.net/> and <https://www.climatebonds.net/standard/taxonomy>.

The Sub-Fund follows an extra-financial approach significantly engaging that contributes to and has positive impacts on the energy and ecological transition by investing permanently at least 90% of the net asset value of the Sub-Fund in Green Bonds comprising the Index. To be eligible in the Index, Green Bonds shall meet the criteria defined by the Climate Bonds Initiative (as mentioned above).

The Sub-Fund has obtained the Greenfin label.

Through its methodology and the manner it is constructed (as described above), the Index is aligned with the sustainable investment objective of the Sub-Fund and differs from a broad market index. Limits of the extra-financial approach are mentioned in the section "Risks Warning" of the prospectus.

The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

● ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***

There is no committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy.

● ***What is the policy to assess good governance practices of the investee companies?***

To assess good governance practices of the investee companies, we rely on Amundi ESG scoring methodology. Amundi's ESG scoring is based on a proprietary ESG analysis framework, which accounts for 38 general and sector-specific criteria, including governance criteria. In the Governance dimension, we assess an issuer's ability to ensure an effective corporate governance framework that guarantees it will meet its long-term objectives (e.g., guaranteeing the issuer's value over the long term). The

governance sub-criteria considered are: board structure, audit and control, remuneration, shareholders' rights, ethics, tax practices and ESG strategy. Amundi ESG Rating scale contains seven grades, ranging from A to G, where A is the best and G the worst rating. G-rated companies are excluded from our investment universe.

Each corporate security (shares, bonds, single name derivatives, ESG equity and fixed income ETFs) included in investment portfolios has been assessed for good governance practices applying a normative screen against UN Global Compact (UN GC) principles on the associated issuer.

The assessment is performed on an ongoing basis. Amundi's ESG ratings Committee monthly reviews lists of companies in breach of the UN GC leading to rating downgrades to G. Divestment from securities downgraded to G is carried out by default within 90 days.

Amundi Stewardship Policy (engagement and voting) related to governance complements this approach.

What is the asset allocation planned for this financial product?

Asset allocation describes the share of investments in specific assets.

At least 90% of the Sub-Fund's securities and instruments will meet the promoted environmental or social characteristics in accordance with the binding elements of the Index methodology. Furthermore, the Sub-Fund commits to have a minimum of 60% of sustainable investments as per the below chart. Investments aligned with other E/S characteristics (#1B) will represent the difference between the actual proportion of investments aligned with environmental or social characteristics (#1) and the actual proportion of sustainable investments (#1A).

The planned proportion of other environmental investment represents a minimum of 60% (i) and may change as the actual proportions of Taxonomy-aligned and/or Social investments increase.

Taxonomy-aligned activities are expressed as a share of:

-turnover reflecting the share of revenue from green activities of investee companies

-capital expenditure (CapEx) showing

the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2Other includes the remaining investments of the financial product, which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?**

Derivatives are not used to attain the environmental and social characteristics promoted by the Sub-Fund.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund has no minimum share of investments with an environmental objective that are aligned with the EU Taxonomy.

● **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹ ?**

- Yes:
 - In fossil gas
 - In nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures
 ** This percentage is purely indicative and may vary.

- **What is the minimum share of investments in transitional and enabling activities?**

The funds has no minimum proportion of investment in transitional or enabling activities.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The Sub-Fund will have a minimum commitment of 60% of Sustainable Investments with an environmental objective as indicated in this Annex with no commitment on their alignment with the EU Taxonomy.

What is the minimum share of socially sustainable investments?

The Sub-Fund has no minimum share of socially sustainable investments.

What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

Included in “#2 Other” are cash and instruments for the purpose of liquidity and portfolio risk management. It may also include ESG unrated securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Yes, the Index has been designated as a reference benchmark to determine whether the Sub-Fund is aligned with the environmental and/or social characteristics that it promotes.

- **How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?**

According to applicable regulations to index sponsors (including BMR), index sponsors should define appropriate controls/diligence when defining and/or operating index methodologies of regulated indexes.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***

The investment objective of the Sub-Fund is to track both the upward and downward evolution of the Index, while minimising the difference between the return of the Sub-Fund and the return of the Index.

- ***How does the designated index differ from a relevant broad market index?***

The “Solactive Green Bond EUR USD IG Index” (the “Index”) offers an exposure to the Green Bonds market.

- ***Where can the methodology used for the calculation of the designated index be found?***

Additional information on the Index can be found at <https://www.solactive.com/indices/>

Where can I find more product specific information online?

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes

No

It will make a minimum of **sustainable investments with an environmental objective**: ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It will make a minimum of **sustainable investments with a social objective**: ___%

It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 20% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promotes E/S characteristics, but **will not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

What environmental and/or social characteristics are promoted by this financial product?

The Sub-Fund promotes environmental and/or social characteristics through among others, replicating an Index that is meeting the minimum standards for EU Paris Aligned Benchmarks (EU PABs) under Regulation (EU) 2019/2089 amending Regulation (EU) 2016/1011. The law proposes the definitions of minimum standards for the methodology of any 'EU Paris Aligned' benchmark indices that would be aligned with the objectives of the Paris Agreement. The Index methodology align with certain criteria such as:

- A minimum reduction in Greenhouse Gas (GHG) emissions relative to Parent Index of 50%.
- A minimum self-decarbonization rate of GHG emissions in accordance with the trajectory implied by Intergovernmental Panel on Climate Change's (IPCC) most ambitious 1.5°C scenario, equating to at least 7% GHG intensity reduction on average per annum.

Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

● ***What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?***

The weighted average greenhouse gas (GHG) emissions is used to measure the attainment of each of the environmental or social characteristics promoted by this financial product. The GHG emissions are divided into Scope 1, Scope 2, and Scope 3 emissions. - Scope 1 emissions: those from sources owned or controlled by the company. - Scope 2 emissions: those caused by the generation of electricity purchased by the company. - Scope 3 emissions: include all other indirect emissions that occur in a company's value chain.

More precisely, Bloomberg MSCI Euro Corporate Paris Aligned Green Tilted Index ("The Index") intends to be representative of the Euro denominated investment grade corporate bond market while meeting and exceeding the minimum standards of the EU PAB. The index uses an optimization approach that aims to minimize the active total risk with respect to the Parent Index under constraints.

Among the universe of Euro denominated investment grade bonds issued by companies in developed markets (the "Universe"), the index methodology selects bonds using criteria such as but not limited to:

- 1) Minimum amount outstanding at bond level;
- 2) Remaining time to maturity;
- 3) Seniority of Debt: Senior and subordinated issues are included.
- 4) Issuers being attributed an "ESG Rating" (as defined by MSCI). MSCI ESG Rating provides an overall company ESG rating – a seven-point scale from 'AAA' to 'CCC'. MSCI ESG Rating methodology uses a rules-based methodology designed to measure a company's resilience to long-term, industry material ESG risks. It is based on extra-financial ESG key issues that focus on the intersection between a company's core business and the industry-specific issues that may create significant risks and opportunities for the company. The ESG key issues are weighted according to impact and time horizon of the risk or opportunity. The ESG key issues include for instance, but are not limited to, water stress, carbon emissions, labor management or business. For the avoidance of doubt, companies with no ESG Ratings are excluded;

The application of eligibility criteria 1 to 4 leads to a narrowed investment universe (the "Eligible Universe");

The Eligible Universe is screened to exclude issuers:

- Involved in activities such as Alcohol, Gambling, Tobacco, Thermal Coal, Oil & Gas, Unconventional Oil & Gas, Power Generation, Nuclear Weapons, Controversial Weapons, Conventional Weapons, or Civilian Firearms activities based on revenue thresholds as defined in the methodology of the Index;
- Involved in a major ESG controversy (based on the MSCI ESG Controversy score);
- Involved in environmental controversies (based on the MSCI Environmental Controversy Score);
- Identified as UNGC violator;
- With an "MSCI ESG Rating" lower than BB;

Once the Eligible Universe has been screened, an optimization process is then performed to select and weight each security in the Index in order to minimize the active total risk versus the Parent Index and comply with the EU PAB standards. The optimization process takes into account, among others, the

following constraints :

- Climate constraints such as but not limited to:
 - o A reduction in weighted average absolute GHG emissions relative to the Parent index at inception date;
 - o A minimal annual reduction in weighted average absolute GHG emissions relative to the Parent Index;
 - o A reduction in weighted average carbon intensity / sales relative to the Parent index at inception date;
 - o A minimal annual reduction in weighted average carbon intensity / sales relative to the Parent Index.
- Green bond constraints such as a minimum increase in Green Bond security weight relative to their weight in Parent Index.
- Investability constraints aiming at maintaining a similar risk profile with respect to the Parent Index (such as bond weight, yield and duration, sector, country of risk constraints) as defined in the methodology of the index.

● ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

- 1) follow best environmental and social practices; and
- 2) avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a “best performer” within its sector of activity on at least one of its material environmental or social factors.

The definition of “best performer” relies on Amundi’s proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a “best performer”, an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g. tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

By applying the Amundi’s above described Sustainable Investment definition to the Index constituents of this passively managed ETF Product, Amundi has determined that this Product has the minimum proportion of sustainable investments stated in page 1 above. However, please note that Amundi

Sustainable Investment definition is not implemented at the Index methodology level.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH test filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g. GHG intensity of investee companies) via a combination of indicators (e.g. carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

– *How have the indicators for adverse impacts on sustainability factors been taken into account?*

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above:

The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN

Global Compact principles, coal and tobacco.

– *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called “Community Involvement & Human Rights” which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labor relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts will evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

Yes, The Sub-Fund considers Principal Adverse Impacts as per Annex 1, Table 1 of the RTS applying to the Sub-Fund’s strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches.

- Exclusion: Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.

- Engagement: Engagement is a continuous and purpose driven process aimed at influencing the activities or behavior of investee companies. The aim of engagement activities can fall into two categories : to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.

- Vote: Amundi’s voting policy responds to an holistic analysis of all the long-term issues

that may influence value creation, including material ESG issues. For more information please refer to Amundi's Voting Policy .

- Controversies monitoring: Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

What investment strategy does this financial product follow?

The Sub-Fund tracks the performance of Bloomberg MSCI Euro Corporate Paris Aligned Green Tilted Index (the "Index"), and to minimize the tracking error between the net asset value of the sub-fund and the performance of the Index. Bloomberg MSCI Euro Corporate Paris Aligned Green Tilted Index is constructed from the Bloomberg Euro Corporate Index (the "Parent Index") and intends to be representative of the Euro denominated investment grade corporate bond market while meeting and exceeding the minimum standards of the EU PAB. The index uses an optimization approach that aims to minimize the active total risk with respect to the Parent Index under constraints.

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

What is the asset allocation planned for this financial product?

Asset allocation describes the share of investments in specific assets.

At least 90% of the Sub-Fund's securities and instruments will meet the promoted environmental or social characteristics in accordance with the binding elements of the Index methodology. Furthermore, the Sub-Fund commits to have a minimum of 20% of sustainable investments as per the below chart. Investments aligned with other E/S characteristics (#1B) will represent the difference between the actual proportion of investments aligned with environmental or social characteristics (#1) and the actual proportion of sustainable investments (#1A). The planned proportion of other environmental investment represents a minimum of 20% (i) and may change as the actual proportions of Taxonomy-aligned and/or Social investments increase.

Taxonomy-aligned activities are expressed as a share of:

- turnover** reflecting the share of revenue from green activities of investee companies
- capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

● **How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?**

Derivatives are not used to attain the environmental and social characteristics promoted by the Sub-Fund.

 **To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?**

The Sub-Fund has no minimum share of investments with an environmental objective that are aligned with the EU Taxonomy.

● **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹ ?**

Yes:

In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures
 ** This percentage is purely indicative and may vary.

- **What is the minimum share of investments in transitional and enabling activities?**

The funds has no minimum proportion of investment in transitional or enabling activities.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

- **What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?**

The Sub-Fund will have a minimum commitment of 20% of Sustainable Investments with an environmental objective as indicated in this Annex with no commitment on their alignment with the EU Taxonomy.

- **What is the minimum share of socially sustainable investments?**

The Sub-Fund has no minimum share of socially sustainable investments.

- **What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?**

Included in “#2 Other” are cash and instruments for the purpose of liquidity and portfolio risk management. It may also include ESG unrated securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

- **Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?**

Yes, the Index has been designated as a reference benchmark to determine whether the Sub-Fund is aligned with the environmental and/or social characteristics that it promotes.

- **How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?**

According to applicable regulations to index sponsors (including BMR), index sponsors should define appropriate controls/diligence when defining and/or operating index methodologies of regulated indexes.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***

The investment objective of the Sub-Fund is to track both the upward and downward evolution of the Index, while minimising the difference between the return of the Sub-Fund and the return of the Index.

- ***How does the designated index differ from a relevant broad market index?***

Bloomberg MSCI Euro Corporate Paris Aligned Green Tilted Index is constructed from the Bloomberg Euro Corporate Index (the “Parent Index”) and intends to be representative of the Euro denominated investment grade corporate bond market while meeting and exceeding the minimum standards of the EU PAB. The index uses an optimization approach that aims to minimize the active total risk with respect to the Parent Index under constraints.

- ***Where can the methodology used for the calculation of the designated index be found?***

Template pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

What environmental and/or social characteristics are promoted by this financial product?

The Sub-Fund promotes environmental and/or social characteristics through among others, replicating an Index integrating an environmental, social and governance (“ESG”) rating.

The Index methodology is constructed using a “Best-in-class approach”: best ranked companies are selected to construct the Index.

“Best-in-class” is an approach where leading or best-performing investments are selected within a universe, industry sector or class. Using such Best-in-class approach, the Index follows an extra-financial approach significantly engaging that permits the reduction by at least 20% of the initial investment universe (expressed in number of issuers).

Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

- ***What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?***

The MSCI ESG Rating is used to measure the attainment of each of the environmental and or social characteristic promoted by this financial product.

MSCI ESG Rating methodology uses a rules-based methodology designed to measure a company's resilience to long-term, industry material ESG risks. It is based on extra-financial ESG key issues that focus on the intersection between a company's core business and the industry-specific issues that may create significant risks and opportunities for the company. The ESG key issues are weighted according to impact and time horizon of the risk or opportunity. The ESG key issues include for instance, but are not limited to, water stress, carbon emissions, labor management or business ethics.

More precisely, Bloomberg Barclays MSCI EUR Corporate Liquid ex Financial SRI Sustainable Index (the "Index") is a bond index, calculated, maintained and published by Bloomberg Barclays Indices.

Among the universe of Euro denominated investment grade bonds issued by non-financial companies in developed markets (the "Universe"), Bloomberg Barclays Indices selects bonds using rules on criteria such as but not limited to:

1) Minimum amount outstanding at bond level

2) Minimum bond outstanding at issuer level

3) Remaining time to maturity

4) Issuers being attributed an "ESG Rating" (as defined by MSCI). MSCI ESG Rating provides an overall company ESG rating – a seven-point scale from 'AAA' to 'CCC'. MSCI ESG Rating methodology uses a rules-based methodology designed to measure a company's resilience to long-term, industry material ESG risks. It is based on extra-financial ESG key issues that focus on the intersection between a company's core business and the industry-specific issues that may create significant risks and opportunities for the company. The ESG key issues are weighted according to impact and time horizon of the risk or opportunity. The ESG key issues include for instance, but are not limited to, water stress, carbon emissions, labor management or business. For the avoidance of doubt, companies with no ESG Ratings are excluded;

The application of eligibility criteria 1 to 4 leads to a narrowed investment universe (the "Eligible Universe");

5) The Eligible Universe is screened to exclude issuers:

- Involved in activities such as Alcohol, Tobacco, Gambling, Adult Entertainment, Genetically Modified organisms (GMO), Nuclear Power, Civilian Firearms, Military Weapons (as per the standard Bloomberg Barclays MSCI SRI screen), Thermal Coal, Generation of Thermal Coal, or Unconventional Oil and Gas;

- Involved in a major ESG controversy (based on the MSCI ESG Controversy score);

- With an "ESG Rating" lower than BBB

The Index uses a "Best-in-class" approach, i.e., an approach where leading or best-performing

investments are selected within a universe, industry sector or class. Using such Best-in-class approach, the Sub-Fund follows an extra-financial approach significantly engaging that permits the reduction by at least 20% of the Eligible Universe (expressed in number of issuers).

● ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

- 1) follow best environmental and social practices; and
- 2) avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a “best performer” within its sector of activity on at least one of its material environmental or social factors.

The definition of “best performer” relies on Amundi’s proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a “best performer”, an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g. tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

By applying the Amundi’s above described Sustainable Investment definition to the Index constituents of this passively managed ETF Product, Amundi has determined that this Product has the minimum proportion of sustainable investments stated in page 1 above. However, please note that Amundi Sustainable Investment definition is not implemented at the Index methodology level.

● ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm (‘DNSH’), Amundi utilises two filters:

The first DNSH test filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g. GHG intensity of investee companies)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and

employee matters, respect for human rights, anti-corruption and anti-bribery matters.

via a combination of indicators (e.g. carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector). Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

– How have the indicators for adverse impacts on sustainability factors been taken into account?

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above:

The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

– How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labor relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise,

analysts will evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

Yes, The Sub-Fund considers Principal Adverse Impacts as per Annex 1, Table 1 of the RTS applying to the Sub-Fund’s strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches.

- Exclusion: Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.

- Engagement: Engagement is a continuous and purpose driven process aimed at influencing the activities or behavior of investee companies. The aim of engagement activities can fall into two categories : to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.

- Vote: Amundi’s voting policy responds to an holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information please refer to Amundi’s Voting Policy .

- Controversies monitoring: Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi’s funds.

For any indication on how mandatory Principal Adverse Impact indicators are used, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

What investment strategy does this financial product follow?

The investment objective of the Sub-Fund is to track both the upward and the downward evolution of the Bloomberg Barclays MSCI EUR Corporate Liquid ex Financial SRI Sustainable Index (the “Index”) denominated in Euros and representative of the performance of the non-financial investment grade corporate bond market denominated in Euros, while minimizing the volatility of the difference between the return of the Sub-Fund and the return of the Index (the “Tracking Error”).

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

- ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

This is a passively managed ETF. Its investment strategy is to replicate the Index while minimizing the related tracking error.

Bloomberg Barclays MSCI EUR Corporate Liquid ex Financial SRI Sustainable Index (the “Index”) is a bond index, calculated, maintained and published by Bloomberg Barclays Indices.

Among the universe of Euro denominated investment grade bonds issued by non-financial companies in developed markets (the “Universe”), Bloomberg Barclays Indices selects bonds using rules on criteria such as but not limited to:

1) Minimum amount outstanding at bond level

2) Minimum bond outstanding at issuer level

3) Remaining time to maturity

4) Issuers being attributed an “ESG Rating” (as defined by MSCI). MSCI ESG Rating provides an overall company ESG rating – a seven-point scale from ‘AAA’ to ‘CCC’. MSCI ESG Rating methodology uses a rules-based methodology designed to measure a company’s resilience to long-term, industry material ESG risks. It is based on extra-financial ESG key issues that focus on the intersection between a company’s core business and the industry-specific issues that may create significant risks and opportunities for the company. The ESG key issues are weighted according to impact and time horizon of the risk or opportunity. The ESG key issues include for instance, but are not limited to, water stress, carbon emissions, labor management or business. For the avoidance of doubt, companies with no ESG Ratings are excluded;

The application of eligibility criteria 1 to 4 leads to a narrowed investment universe (the “Eligible Universe”);

5) The Eligible Universe is screened to exclude issuers:

- Involved in activities such as Alcohol, Tobacco, Gambling, Adult Entertainment, Genetically Modified organisms (GMO), Nuclear Power, Civilian Firearms, Military Weapons (as per the standard Bloomberg Barclays MSCI SRI screen), Thermal Coal, Generation of Thermal Coal, or Unconventional Oil and Gas;
- Involved in a major ESG controversy (based on the MSCI ESG Controversy score);
- With an “ESG Rating” lower than BBB

The Index uses a “Best-in-class” approach, i.e., an approach where leading or best-performing investments are selected within a universe, industry sector or class. Using such Best-in-class approach, the Sub-Fund follows an extra-financial approach significantly engaging that permits the reduction by at least 20% of the Eligible Universe (expressed in number of issuers).

The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

● ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***

There is no committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy.

● ***What is the policy to assess good governance practices of the investee companies?***

To assess good governance practices of the investee companies, we rely on Amundi ESG scoring methodology. Amundi’s ESG scoring is based on a proprietary ESG analysis framework, which accounts for 38 general and sector-specific criteria, including governance criteria. In the Governance dimension, we assess an issuer’s ability to ensure an effective corporate governance framework that guarantees it will meet its long-term objectives (e.g., guaranteeing the issuer’s value over the long term). The governance sub-criteria considered are: board structure, audit and control, remuneration, shareholders’ rights, ethics, tax practices and ESG strategy. Amundi ESG Rating scale contains seven grades, ranging from A to G, where A is the best and G the worst rating. G-rated companies are excluded from our investment universe.

Each corporate security (shares, bonds, single name derivatives, ESG equity and fixed income ETFs) included in investment portfolios has been assessed for good governance practices applying a normative screen against UN Global Compact (UN GC) principles on the associated issuer.

The assessment is performed on an ongoing basis. Amundi’s ESG ratings Committee monthly reviews lists of companies in breach of the UN GC leading to rating downgrades to G. Divestment from securities downgraded to G is carried out by default within 90 days.

Amundi Stewardship Policy (engagement and voting) related to governance complements this approach.

What is the asset allocation planned for this financial product?

Asset allocation describes the share of investments in specific assets.

At least 90% of the Sub-Fund's securities and instruments will meet the promoted environmental or social characteristics in accordance with the binding elements of the Index methodology. Furthermore, the Sub-Fund commits to have a minimum of 25% of sustainable investments as per the below chart. Investments aligned with other E/S characteristics (#1B) will represent the difference between the actual proportion of investments aligned with environmental or social characteristics (#1) and the actual proportion of sustainable investments (#1A).

The planned proportion of other environmental investment represents a minimum of 25% (i) and may change as the actual proportions of Taxonomy-aligned and/or Social investments increase.

Taxonomy-aligned activities are expressed as a share of:

-turnover reflecting the share of revenue from green activities of investee companies

-capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- operational expenditure (OpEx) reflecting green operational activities of investee companies.

● **How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?**

Derivatives are not used to attain the environmental and social characteristics promoted by the Sub-Fund.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund has no minimum share of investments with an environmental objective that are aligned with the EU Taxonomy.

- **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹ ?**

- Yes:
- In fossil gas In nuclear energy
- No

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

 ** This percentage is purely indicative and may vary.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **What is the minimum share of investments in transitional and enabling activities?**

The funds has no minimum proportion of investment in transitional or enabling activities.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The Sub-Fund will have a minimum commitment of 25% of Sustainable Investments with an environmental objective as indicated in this Annex with no commitment on their alignment with the EU Taxonomy.

What is the minimum share of socially sustainable investments?

The Sub-Fund has no minimum share of socially sustainable investments.

What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

Included in “#2 Other” are cash and instruments for the purpose of liquidity and portfolio risk management. It may also include ESG unrated securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Yes, the Index has been designated as a reference benchmark to determine whether the Sub-Fund is aligned with the environmental and/or social characteristics that it promotes.

- **How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?**

According to applicable regulations to index sponsors (including BMR), index sponsors should define appropriate controls/diligence when defining and/or operating index methodologies of regulated indexes.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***

The investment objective of the Sub-Fund is to track both the upward and downward evolution of the Index, while minimising the difference between the return of the Sub-Fund and the return of the Index.

- ***How does the designated index differ from a relevant broad market index?***

The index is representative of the performance of EUR denominated, investment grade corporate bonds issued by European and non-European corporates, with maturities of at least 1 year. The index only includes issuers with an MSCI ESG Rating of BBB or higher, and negatively screens issuers involved in certain values-based business involvement criteria, including activities related to controversial military weapons, and those with a “red” MSCI ESG Controversy Score.

Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

● **What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?**

The MSCI ESG Rating is used to measure the attainment of each of the environmental and or social characteristic promoted by this financial product.

MSCI ESG Rating methodology uses a rules-based methodology designed to measure a company's resilience to long-term, industry material ESG risks. It is based on extra-financial ESG key issues that focus on the intersection between a company's core business and the industry-specific issues that may create significant risks and opportunities for the company. The ESG key issues are weighted according to impact and time horizon of the risk or opportunity. The ESG key issues include for instance, but are not limited to, water stress, carbon emissions, labor management or business ethics.

More precisely, MSCI China Select ESG Rating and Trend Leaders Net Total Return Index (the "Index") features the following characteristics:

- a) Same investment universe of securities as the MSCI China Index (the "Parent Index");
- b) ESG value-based exclusions from the following activities: alcohol, gambling, tobacco, civilian firearms, nuclear power, adult entertainment, genetically modified organisms, conventional and controversial weapons;
- c) Climate change-based exclusions from the following activities: fossil fuel reserves ownership, extraction and production of thermal coal/unconventional oil and gas/conventional oil and gas/uranium mining, fossil fuel/nuclear/thermal coal-based power generation, oil and gas downstream activities;
- d) Exclusion of companies involved in a major ESG controversy (based on the MSCI ESG Controversy score);
- e) Companies are ranked based on their ESG ratings and trends (yearly improvement or degradation of ESG ratings). MSCI ESG Rating methodology uses a rules-based methodology designed to measure a company's resilience to long-term, industry material ESG risks. It is based on extra-financial ESG key issues that focus on the intersection between a company's core business and the industry-specific issues that may create significant risks and opportunities for the company. The ESG key issues are weighted according to impact and time horizon of the risk or opportunity. The ESG key issues include for instance, but are not limited to, water stress, carbon emissions, labor management or business ethics. The Index is constructed using a "Best-in-class" approach: best ranked companies in each sector (in accordance with the Global Industry Classification Standard (GICS)) are selected to construct the Index. Filters are less restrictive for stocks already in the Index in order to reduce the turnover on a rebalancing date. "Best-in-class" is an approach where leading or best-performing investments are selected within a universe, industry sector or class. Using such Best-in-class approach, the Sub-Fund follows an extra-financial approach significantly engaging that permits the reduction by at least 20% of the initial investment universe (expressed in number of issuers). The extra financial data coverage is above 90% of the eligible securities of the Index.

f) The Index is free float-adjusted market capitalization weighted and the cumulated free-float adjusted market capitalization by GICS sector is overall proportional to the one of the Parent Index;

g) An iterative downweighting ensures that the carbon intensity and the weighted average of board independence of the Index are respectively lower and higher than the ones of the Parent Index.

● ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

- 1) follow best environmental and social practices; and
- 2) avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a “best performer” within its sector of activity on at least one of its material environmental or social factors.

The definition of “best performer” relies on Amundi’s proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a “best performer”, an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g. tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

By applying the Amundi’s above described Sustainable Investment definition to the Index constituents of this passively managed ETF Product, Amundi has determined that this Product has the minimum proportion of sustainable investments stated in page 1 above. However, please note that Amundi Sustainable Investment definition is not implemented at the Index methodology level.

● ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm (‘DNSH’), Amundi utilises two filters:

The first DNSH test filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g. GHG intensity of investee companies) via a combination of indicators (e.g. carbon intensity) and specific thresholds or rules (e.g. that the

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters,

investee company's carbon intensity does not belong to the last decile of the sector). Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

– *How have the indicators for adverse impacts on sustainability factors been taken into account?*

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above:

The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

– *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labor relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts will evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

Yes, The Sub-Fund considers Principal Adverse Impacts as per Annex 1, Table 1 of the RTS applying to the Sub-Fund’s strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches.

- Exclusion: Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.

- Engagement: Engagement is a continuous and purpose driven process aimed at influencing the activities or behavior of investee companies. The aim of engagement activities can fall into two categories : to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.

- Vote: Amundi’s voting policy responds to an holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information please refer to Amundi’s Voting Policy .

- Controversies monitoring: Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi’s funds.

For any indication on how mandatory Principal Adverse Impact indicators are used, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

What investment strategy does this financial product follow?

The Sub-Fund tracks both the upward and the downward evolution of the MSCI China Select ESG Rating and Trend Leaders Net Total Return Index (the "Index")denominated in US Dollars, and representative of the performance of large and mid cap stocks, across the Chinese economy, issued by companies with robust Environmental, Social and Governance (ESG) ratings, while minimizing the volatility of the difference between the return of the Sub-Fund and the return of the Index.

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

- ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

This is a passively managed ETF. Its investment strategy is to replicate the Index while minimizing the related tracking error.

MSCI China Select ESG Rating and Trend Leaders Net Total Return Index (the "Index") features the following characteristics:

- a) Same investment universe of securities as the MSCI China Index (the "Parent Index");
- b) ESG value-based exclusions from the following activities: alcohol, gambling, tobacco, civilian firearms, nuclear power, adult entertainment, genetically modified organisms, conventional and controversial weapons;
- c) Climate change-based exclusions from the following activities: fossil fuel reserves ownership, extraction and production of thermal coal/unconventional oil and gas/conventional oil and gas/uranium mining, fossil fuel/nuclear/thermal coal-based power generation, oil and gas downstream activities;
- d) Exclusion of companies involved in a major ESG controversy (based on the MSCI ESG Controversy score);
- e) Companies are ranked based on their ESG ratings and trends (yearly improvement or degradation of ESG ratings). MSCI ESG Rating methodology uses a rules-based methodology designed to measure a company's resilience to long-term, industry material ESG risks. It is based on extra-financial ESG key issues that focus on the intersection between a company's core business and the industry-specific issues that may create significant risks and opportunities for the company. The ESG key issues are weighted according to impact and time horizon of the risk or opportunity. The ESG key issues include for instance, but are not limited to, water stress, carbon emissions, labor management or business ethics.

The Index is constructed using a "Best-in-class" approach: best ranked companies in each sector (in accordance with the Global Industry Classification Standard (GICS)) are selected to construct the Index. Filters are less restrictive for stocks already in the Index in order to reduce the turnover on a rebalancing date.

"Best-in-class" is an approach where leading or best-performing investments are selected within a universe, industry sector or class.

Using such Best-in-class approach, the Sub-Fund follows an extra-financial approach significantly

engaging that permits the reduction by at least 20% of the initial investment universe (expressed in number of issuers).

The extra financial data coverage is above 90% of the eligible securities of the Index.

f) The Index is free float-adjusted market capitalization weighted and the cumulated free-float adjusted market capitalization by GICS sector is overall proportional to the one of the Parent Index;

g) An iterative downweighting ensures that the carbon intensity and the weighted average of board independence of the Index are respectively lower and higher than the ones of the Parent Index.

The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

● ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***

There is no committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy.

● ***What is the policy to assess good governance practices of the investee companies?***

To assess good governance practices of the investee companies, we rely on Amundi ESG scoring methodology. Amundi's ESG scoring is based on a proprietary ESG analysis framework, which accounts for 38 general and sector-specific criteria, including governance criteria. In the Governance dimension, we assess an issuer's ability to ensure an effective corporate governance framework that guarantees it will meet its long-term objectives (e.g., guaranteeing the issuer's value over the long term). The governance sub-criteria considered are: board structure, audit and control, remuneration, shareholders' rights, ethics, tax practices and ESG strategy. Amundi ESG Rating scale contains seven grades, ranging from A to G, where A is the best and G the worst rating. G-rated companies are excluded from our investment universe.

Each corporate security (shares, bonds, single name derivatives, ESG equity and fixed income ETFs) included in investment portfolios has been assessed for good governance practices applying a normative screen against UN Global Compact (UN GC) principles on the associated issuer.

The assessment is performed on an ongoing basis. Amundi's ESG ratings Committee monthly reviews lists of companies in breach of the UN GC leading to rating downgrades to G. Divestment from securities downgraded to G is carried out by default within 90 days.

Amundi Stewardship Policy (engagement and voting) related to governance complements this approach.

What is the asset allocation planned for this financial product?

Asset allocation describes the share of investments in specific assets.

At least 90% of the Sub-Fund's securities and instruments will meet the promoted environmental or social characteristics in accordance with the binding elements of the Index methodology. Furthermore, the Sub-Fund commits to have a minimum of 10% of sustainable investments as per the below chart. Investments aligned with other E/S characteristics (#1B) will represent the difference between the actual proportion of investments aligned with environmental or social characteristics (#1) and the actual proportion of sustainable investments (#1A).

The planned proportion of other environmental investment represents a minimum of 10% (i) and may change as the actual proportions of Taxonomy-aligned and/or Social investments increase.

Taxonomy-aligned activities are expressed as a share of:

-turnover reflecting the share of revenue from green activities of investee companies

-capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- operational expenditure (OpEx) reflecting green operational activities of investee companies.

● **How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?**

Derivatives are not used to attain the environmental and social characteristics promoted by the Sub-Fund.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund currently has no minimum commitment to sustainable investments with an environmental objective aligned with the EU Taxonomy. The Sub-Fund does not commit to make taxonomy-compliant investments in fossil gas and/or nuclear energy as illustrated below. Nevertheless, as part of the investment

strategy, it may invest in companies that are also active in these industries. Such investments may or may not be taxonomy aligned.

- **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹ ?**

- Yes:
- In fossil gas In nuclear energy
- No

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures
 ** This percentage is purely indicative and may vary.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **What is the minimum share of investments in transitional and enabling activities?**

The funds has no minimum proportion of investment in transitional or enabling activities.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

- **What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?**

The Sub-Fund will have a minimum commitment of 10% of Sustainable Investments with an environmental objective as indicated in this Annex with no commitment on their alignment with the EU Taxonomy.

- **What is the minimum share of socially sustainable investments?**

The Sub-Fund has no minimum share of socially sustainable investments.

- **What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?**

Included in “#2 Other” are cash and instruments for the purpose of liquidity and portfolio risk management. It may also include ESG unrated securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

- **Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?**

Yes, the Index has been designated as a reference benchmark to determine whether the Sub-Fund is aligned with the environmental and/or social characteristics that it promotes.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?**

According to applicable regulations to index sponsors (including BMR), index sponsors should define appropriate controls/diligence when defining and/or operating index methodologies of regulated indexes.

- **How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?**

The investment objective of the Sub-Fund is to track both the upward and downward evolution of the Index, while minimising the difference between the return of the Sub-Fund and the return of the Index.

- ***How does the designated index differ from a relevant broad market index?***

The MSCI China Select ESG Rating and Trend Leaders Net Total Return Index (the "Index") is denominated in US Dollars, and representative of the performance of large and mid cap stocks, across the Chinese economy, issued by companies with robust Environmental, Social and Governance (ESG) ratings

- ***Where can the methodology used for the calculation of the designated index be found?***

Additional information on the Index can be found at <https://www.msci.com/index-methodology>

Where can I find more product specific information online?

More product-specific information can be found on the website: Additional information on the Sub-Fund can be found at www.amundiETF.com.

Template pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes

No

It will make a minimum of **sustainable investments with an environmental objective**: ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It will make a minimum of **sustainable investments with a social objective**: ___%

It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 10,00 % of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promotes E/S characteristics, but **will not make any sustainable investments**

What environmental and/or social characteristics are promoted by this financial product?

The Sub-Fund promotes environmental and/or social characteristics through among others, replicating an Index integrating an environmental, social and governance (“ESG”) rating.

The Index methodology is constructed using a “Best-in-class approach”: best ranked companies are selected to construct the Index.

“Best-in-class” is an approach where leading or best-performing investments are selected within a universe, industry sector or class. Using such Best-in-class approach, the Index follows an extra-financial approach significantly engaging that permits the reduction by at least 20% of the initial investment universe.

Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

● **What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?**

The MSCI ESG Rating is used to measure the attainment of each of the environmental and or social characteristic promoted by this financial product.

MSCI ESG Rating methodology uses a rules-based methodology designed to measure a company's resilience to long-term, industry material ESG risks. It is based on extra-financial ESG key issues that focus on the intersection between a company's core business and the industry-specific issues that may create significant risks and opportunities for the company. The ESG key issues are weighted according to impact and time horizon of the risk or opportunity. The ESG key issues include for instance, but are not limited to, water stress, carbon emissions, labor management or business ethics.

More precisely, MSCI ACWI Semiconductors & Semiconductor Equipment ESG Filtered Net Total Return Index (the "Index") features the following characteristics:

a) The Index is constructed by selecting stocks from the Parent Index including large and mid cap stocks across developed and emerging countries.

b) An ESG negative screening is performed on the Parent Index securities as defined in the methodology in order to exclude:

- Companies with exposure to controversial businesses such as controversial weapons, conventional weapons, tobacco, thermal coal, civilian firearms, oil sands, nuclear weapons or companies in violation of United Nations Global Compact (UNGC) principles;

- Companies involved in very severe business controversies as defined by the MSCI ESG Controversies;

- Companies with no "ESG Rating" or Controversy Score (as defined by MSCI).

Additionally, an "emerging markets securities filter" is applied to finalize the "Eligible Universe".

c) The selected universe ("Selected Universe") is constructed based on the Eligible Universe by using a "Best-in-class" approach: bottom quartile companies by an industry-adjusted ESG Rating (as defined by MSCI) are excluded from the Eligible Universe. "Best-in-class" approach is an approach where leading or best-performing investments are selected within a universe, industry sector or class.

MSCI ESG Rating methodology uses a rules-based methodology designed to measure a company's resilience to longterm, industry material ESG risks. It is based on extra-financial ESG key issues that focus on the intersection between a company's core business and the industry-specific issues that may create significant risks and opportunities for the company. The ESG key issues are weighted according to impact and time horizon of the risk or opportunity. The ESG key issues include for instance, but are not limited to, water stress, carbon emissions, labor management or business ethics.

Using such Best-in-class approach, the Sub-Fund follows an extra-financial approach significantly engaging that permits the reduction by at least 20% of the initial investment universe (expressed in number of issuers). Limits of the extra-financial approach are mentioned in the section "Principal risks" of the prospectus. The extra-financial data coverage is 100% of the eligible securities of the Index. Non

ESG rated companies are excluded from the selection process of the Index.

d) Liquidity and size filters are applied to fulfil the Selected Universe.

e) At each rebalancing, securities in the selected universe are weighted in proportion to their float-adjusted market capitalization.

f) An iterative downweighting ensure that the carbon emission intensity and the weighted average of board independence of the Index are respectively lower and higher than the ones of the Parent Index.

g) Finally, the index constrains the weight of the largest group entity at 35%, and all other group entities at 20%, with a buffer of 10% applied on these limits at each index rebalancing.

Environmental and/or social characteristics promoted by the Sub-Fund are met through the MSCI ESG Rating methodology (as described above).

● ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

- 1) follow best environmental and social practices; and
- 2) avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a “best performer” within its sector of activity on at least one of its material environmental or social factors.

The definition of “best performer” relies on Amundi’s proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a “best performer”, an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g. tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

By applying the Amundi’s above described Sustainable Investment definition to the Index constituents of this passively managed ETF Product, Amundi has determined that this Product has the minimum

proportion of sustainable investments stated in page 1 above. However, please note that Amundi Sustainable Investment definition is not implemented at the Index methodology level.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH test filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g. GHG intensity of investee companies) via a combination of indicators (e.g. carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

– *How have the indicators for adverse impacts on sustainability factors been taken into account?*

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above:

The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

- *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called “Community Involvement & Human Rights” which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labor relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts will evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

Yes, The Sub-Fund considers Principal Adverse Impacts as per Annex 1, Table 1 of the RTS applying to the Sub-Fund’s strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches.

- Exclusion: Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.

- Engagement: Engagement is a continuous and purpose driven process aimed at influencing the activities or behavior of investee companies. The aim of engagement activities can fall into two categories : to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.

- Vote: Amundi’s voting policy responds to an holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information please refer to Amundi’s Voting Policy .

- Controversies monitoring: Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level

of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

What investment strategy does this financial product follow?

The investment objective of the MULTI UNITS LUXEMBOURG Amundi MSCI Semiconductors ESG Screened (the "Sub-Fund") is to track both the upward and the downward evolution of the MSCI ACWI Semiconductors & Semiconductor Equipment ESG Filtered Net Total Return Index (the "Index") denominated in US Dollars and representative of a select set of companies from the MSCI ACWI Semiconductors and Semiconductor Equipment Index (the "Parent Index") that excludes companies which are Environmental, Social and Governance (ESG) laggards relative to the Parent Index, while minimizing the volatility of the difference between the return of the Sub-Fund and the return of the Index (the "Tracking Error").

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

● ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

This is a passively managed ETF. Its investment strategy is to replicate the Index while minimizing the related tracking error.

MSCI ACWI Semiconductors & Semiconductor Equipment ESG Filtered Net Total Return Index (the "Index") features the following characteristics:

a) The Index is constructed by selecting stocks from the Parent Index including large and mid cap stocks across developed and emerging countries.

b) An ESG negative screening is performed on the Parent Index securities as defined in the methodology in order to exclude:

- Companies with exposure to controversial businesses such as controversial weapons, conventional weapons, tobacco, thermal coal, civilian firearms, oil sands, nuclear weapons or companies in violation of United Nations Global Compact (UNGC) principles;
- Companies involved in very severe business controversies as defined by the MSCI ESG Controversies;
- Companies with no "ESG Rating" or Controversy Score (as defined by MSCI).

Additionally, an "emerging markets securities filter" is applied to finalize the "Eligible Universe".

c) The selected universe ("Selected Universe") is constructed based on the Eligible Universe by using a "Best-in-class" approach: bottom quartile companies by an industry-adjusted ESG Rating (as defined

by MSCI) are excluded from the Eligible Universe. “Best-in-class” approach is an approach where leading or best-performing investments are selected within a universe, industry sector or class.

MSCI ESG Rating methodology uses a rules-based methodology designed to measure a company’s resilience to longterm, industry material ESG risks. Limits of the extra-financial approach are mentioned in the section “Principal risks” of the prospectus. The extra-financial data coverage is 100% of the eligible securities of the Index. Non ESG rated companies are excluded from the selection process of the Index.

d) Liquidity and size filters are applied to fulfil the Selected Universe.

e) At each rebalancing, securities in the selected universe are weighted in proportion to their float-adjusted market capitalization.

f) An iterative downweighting ensure that the carbon emission intensity and the weighted average of board independence of the Index are respectively lower and higher than the ones of the Parent Index.

g) Finally, the index contrains the weight of the largest group entity at 35%, and all other group entities at 20%, with a buffer of 10% applied on these limits at each index rebalancing.

Environmental and/or social characteristics promoted by the Sub-Fund are met through the MSCI ESG Rating methodology (as described above).

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

● ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***

There is no committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy.

● ***What is the policy to assess good governance practices of the investee companies?***

To assess good governance practices of the investee companies, we rely on Amundi ESG scoring methodology. Amundi’s ESG scoring is based on a proprietary ESG analysis framework, which accounts for 38 general and sector-specific criteria, including governance criteria. In the Governance dimension, we assess an issuer’s ability to ensure an effective corporate governance framework that guarantees it will meet its long-term objectives (e.g., guaranteeing the issuer’s value over the long term). The governance sub-criteria considered are: board structure, audit and control, remuneration, shareholders’ rights, ethics, tax practices and ESG strategy. Amundi ESG Rating scale contains seven grades, ranging from A to G, where A is the best and G the worst rating. G-rated companies are excluded from our investment universe.

Each corporate security (shares, bonds, single name derivatives, ESG equity and fixed income ETFs) included in investment portfolios has been assessed for good governance practices applying a normative screen against UN Global Compact (UN GC) principles on the associated issuer.

The assessment is performed on an ongoing basis. Amundi's ESG ratings Committee monthly reviews lists of companies in breach of the UN GC leading to rating downgrades to G. Divestment from securities downgraded to G is carried out by default within 90 days.

Amundi Stewardship Policy (engagement and voting) related to governance complements this approach.

What is the asset allocation planned for this financial product?

Asset allocation describes the share of investments in specific assets.

At least 90% of the Sub-Fund's securities and instruments will meet the promoted environmental or social characteristics in accordance with the binding elements of the Index methodology. Furthermore, the Sub-Fund commits to have a minimum of 10% of sustainable investments as per the below chart. Investments aligned with other E/S characteristics (#1B) will represent the difference between the actual proportion of investments aligned with environmental or social characteristics (#1) and the actual proportion of sustainable investments (#1A).

The planned proportion of other environmental investment represents a minimum of 10% (i) and may change as the actual proportions of Taxonomy-aligned and/or Social investments increase.

Taxonomy-aligned activities are expressed as a share of:

- turnover reflecting the share of revenue from green activities of investee companies
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

● **How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?**

The environmental or social characteristics promoted by the Sub-Fund are attained through the use of total return swap(s). Indeed the Sub-Fund carries out its investment objective via an Direct Replication as described in the Prospectus. As such the exposure to the performance of the Index will be achieved by way of derivatives i.e. total return swap(s).

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund currently has no minimum commitment to sustainable investments with an environmental objective aligned with the EU Taxonomy. The Sub-Fund does not commit to make taxonomy-compliant investments in fossil gas and/or nuclear energy as illustrated below. Nevertheless, as part of the investment strategy, it may invest in companies that are also active in these industries. Such investments may or may not be taxonomy aligned.

● **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹ ?**

- Yes:
- In fossil gas In nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

** This percentage is purely indicative and may vary.

● **What is the minimum share of investments in transitional and enabling activities?**

The funds has no minimum proportion of investment in transitional or enabling activities.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The Sub-Fund will have a minimum commitment of 10% of Sustainable Investments with an environmental objective as indicated in this Annex with no commitment on their alignment with the EU Taxonomy.

What is the minimum share of socially sustainable investments?

The Sub-Fund has no minimum share of socially sustainable investments.

What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

Included in “#2 Other” are cash and instruments for the purpose of liquidity and portfolio risk management. It may also include ESG unrated securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Yes, the Index has been designated as a reference benchmark to determine whether the Sub-Fund is aligned with the environmental and/or social characteristics that it promotes.

- ***How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?***

According to applicable regulations to index sponsors (including BMR), index sponsors should define appropriate controls/diligence when defining and/or operating index methodologies of regulated indexes.

- ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***

The investment objective of the Sub-Fund is to track both the upward and downward evolution of the Index, while minimising the difference between the return of the Sub-Fund and the return of the Index.

- ***How does the designated index differ from a relevant broad market index?***

The MSCI ACWI Semiconductors & Semiconductor Equipment ESG Filtered Net Total Return Index (the "Index") is denominated in US Dollars and representative of a select set of companies from the MSCI ACWI Semiconductors and Semiconductor Equipment Index (the "Parent Index") that excludes companies which are Environmental, Social and Governance (ESG) laggards relative to the Parent Index

- ***Where can the methodology used for the calculation of the designated index be found?***

Template pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

What environmental and/or social characteristics are promoted by this financial product?

The Sub-Fund promotes environmental and/or social characteristics through among others, replicating an Index integrating an environmental, social and governance (“ESG”) rating.

The Index methodology is constructed using a “Best-in-class approach”: best ranked companies are selected to construct the Index.

“Best-in-class” is an approach where leading or best-performing investments are selected within a universe, industry sector or class. Using such Best-in-class approach, the Index follows an extra-financial approach significantly engaging that permits the reduction by at least 20% of the initial investment universe (expressed in number of issuers).

Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

- **What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?**

The MSCI ESG Rating is used to measure the attainment of each of the environmental and or social characteristic promoted by this financial product.

MSCI ESG Rating methodology uses a rules-based methodology designed to measure a company's resilience to long-term, industry material ESG risks. It is based on extra-financial ESG key issues that focus on the intersection between a company's core business and the industry-specific issues that may create significant risks and opportunities for the company. The ESG key issues are weighted according to impact and time horizon of the risk or opportunity. The ESG key issues include for instance, but are not limited to, water stress, carbon emissions, labor management or business ethics.

More detailed on MSCI ESG Rating can be found on the following link:

More precisely, MSCI Europe ESG Leaders Net Total Return Index (the "Index") features the following characteristics:

- a) Same investment universe of securities as the MSCI Europe Index (the "Parent Index");
- b) Exclusions from the following controversial activities: alcohol, gambling, tobacco, civilian firearms, nuclear power, conventional, nuclear and controversial weapons, fossil fuel extraction and thermal coal power;
- c) Exclusion of companies involved in very severe ESG controversy (based on the MSCI ESG Controversy score);
- d) Exclusion of companies with no "ESG Rating" (as defined by MSCI) or with an ESG Rating lower than 'BB'. MSCI ESG Rating provides an overall company ESG rating – a sevenpoint scale from 'AAA' to 'CCC'. MSCI ESG Rating methodology uses a rules-based methodology designed to measure a company's resilience to long-term, industry material ESG risks. It is based on extra-financial ESG key issues that focus on the intersection between a company's core business and the industry-specific issues that may create significant risks and opportunities for the company. The ESG key issues are weighted according to impact and time horizon of the risk or opportunity. The ESG key issues include for instance, but are not limited to, water stress, carbon emissions, labor management or business ethics;

"Best-in-class" is an approach where leading or best-performing investments are selected within a universe, industry sector or class. Using such Best-in-class approach, the Sub-Fund follows an extra-financial approach significantly engaging that permits the reduction by at least 20% of the initial investment universe (expressed in number of issuers).

The extra financial data coverage is above 90% of the eligible securities of the Index. Filters are less restrictive for stocks already in the Index in order to reduce the turnover on a rebalancing date; and

f) The Index is free float-adjusted market capitalization weighted and the cumulated free-float adjusted market capitalization by GICS sector is overall proportional to the one of the MSCI Europe Index.

● ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

- 1) follow best environmental and social practices; and
- 2) avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a “best performer” within its sector of activity on at least one of its material environmental or social factors.

The definition of “best performer” relies on Amundi’s proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a “best performer”, an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g. tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

By applying the Amundi’s above described Sustainable Investment definition to the Index constituents of this passively managed ETF Product, Amundi has determined that this Product has the minimum proportion of sustainable investments stated in page 1 above. However, please note that Amundi Sustainable Investment definition is not implemented at the Index methodology level.

● ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm (‘DNSH’), Amundi utilises two filters:

The first DNSH test filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g. GHG intensity of investee companies)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and

employee matters, respect for human rights, anti-corruption and anti-bribery matters.

via a combination of indicators (e.g. carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector). Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

– How have the indicators for adverse impacts on sustainability factors been taken into account?

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above:

The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

– How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labor relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise,

analysts will evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

Yes, The Sub-Fund considers Principal Adverse Impacts as per Annex 1, Table 1 of the RTS applying to the Sub-Fund’s strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches.

- Exclusion: Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.

- Engagement: Engagement is a continuous and purpose driven process aimed at influencing the activities or behavior of investee companies. The aim of engagement activities can fall into two categories : to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.

- Vote: Amundi’s voting policy responds to an holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information please refer to Amundi’s Voting Policy .

- Controversies monitoring: Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi’s funds.

For any indication on how mandatory Principal Adverse Impact indicators are used, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

What investment strategy does this financial product follow?

The Sub-Fund tracks both the upward and the downward evolution of the MSCI Europe ESG Leaders Net Total Return Index (the "Index") denominated in Euros in order to offer an exposure to the performance of large and mid-cap stocks, across developed European countries, issued by companies having a high Environmental, Social and Governance (ESG) ratings – while minimizing the volatility of the difference between the return of the Sub-Fund and the return of the Index.

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

- ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

This is a passively managed ETF. Its investment strategy is to replicate the Index while minimizing the related tracking error.

MSCI Europe ESG Leaders Net Total Return Index (the "Index") features the following characteristics:

- a) Same investment universe of securities as the MSCI Europe Index (the "Parent Index");
- b) Exclusions from the following controversial activities: alcohol, gambling, tobacco, civilian firearms, nuclear power, conventional, nuclear and controversial weapons, fossil fuel extraction and thermal coal power;
- c) Exclusion of companies involved in very severe ESG controversy (based on the MSCI ESG Controversy score);

- e) The Index is constructed using a "Best-inclass" approach: best ranked companies in each universe, industry, sector or class (in accordance with the Global Industry Classification Standard (GICS)) are selected to construct the Index.

“Best-in-class” is an approach where leading or best-performing investments are selected within a universe, industry sector or class. Using such Best-in-class approach, the Sub-Fund follows an extra-financial approach significantly engaging that permits the reduction by at least 20% of the initial investment universe (expressed in number of issuers).

The extra financial data coverage is above 90% of the eligible securities of the Index. Filters are less restrictive for stocks already in the Index in order to reduce the turnover on a rebalancing date; and

f) The Index is free float-adjusted market capitalization weighted and the cumulated free-float adjusted market capitalization by GICS sector is overall proportional to the one of the MSCI Europe Index.

The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the asset allocation planned for this financial product?

Asset allocation describes the share of investments in specific assets.

At least 90% of the Sub-Fund's securities and instruments will meet the promoted environmental or social characteristics in accordance with the binding elements of the Index methodology. Furthermore, the Sub-Fund commits to have a minimum of 30% of sustainable investments as per the below chart. Investments aligned with other E/S characteristics (#1B) will represent the difference between the actual proportion of investments aligned with environmental or social characteristics (#1) and the actual proportion of sustainable investments (#1A).

The planned proportion of other environmental investment represents a minimum of 30% (i) and may change as the actual proportions of Taxonomy-aligned and/or Social investments increase.

Taxonomy-aligned activities are expressed as a share of:

-turnover reflecting the share of revenue from green activities of investee companies

-capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- operational expenditure (OpEx) reflecting green operational activities of investee companies.

characteristics promoted by the financial product are attained.

The use of proceeds of the bonds is used to measure the attainment of each of the environmental and or social characteristic promoted by this financial product.

More precisely, to be eligible for inclusion in the “Bloomberg MSCI Global Green Bond 1-10 Year Index” (the “Index”), a bond must be deemed eligible as a “Green Bond” by MSCI ESG Research (as detailed hereafter). MSCI ESG Research provides in-depth research, ratings and analysis of the environmental, social and governance-related business practices of thousands of companies worldwide. It consists of an integrated suite of tools and products to efficiently manage research, analysis and compliance tasks across the spectrum of ESG factors. An independent research-driven methodology is used to evaluate green bonds to ensure they adhere to established Green Bond principles and are classified by their environmental use of proceeds. MSCI ESG Research has developed and implemented the following set of criteria to defined Green Bonds which are eligible to the index.

Green bonds are fixed income securities in which the proceeds will be exclusively and formally applied to projects or activities that promote climate or other environmental sustainability purposes through their use of proceeds.

Securities (both self-labeled green bonds and unlabeled bonds) are independently evaluated by MSCI ESG Research along four dimensions to determine whether they should be classified as a green bond:

i) Stated use of proceeds: project bonds are considered eligible if the use of proceeds falls within at least one of six eligible environmental categories defined by MSCI ESG Research: Alternative Energy; Energy Efficiency; Pollution Prevention and Control; Sustainable Water; Green Building; and Climate Adaptation.

ii) Process for green project evaluation and selection: Bonds are considered eligible if the issuer clearly delineates the specific criteria and process for determining eligible projects or investments in the bond prospectus or supporting documentation. Project criteria must outline either specific projects or the specific categories of activities to be financed.

iii) Process for management of proceeds: A formal process to ring-fence net proceeds to the eligible use of proceeds must be disclosed in the bond prospectus or supporting documentation. Eligible mechanisms to ring-fence net proceeds include:

- Direct recourse to eligible revenues or assets (e.g., a green securitized bond, green project bond, or green revenue bond);
- Creation of a separate legal entity;
- Creation of a sub-portfolio linked to the issuer’s investment operations for eligible projects;
- Other auditable mechanism whereby the balance of tracked proceeds is reduced periodically by amounts matching investments made in eligible projects during that period.

iv) Commitment to ongoing reporting of the environmental performance of the use of proceeds : At issuance, issuers of index eligible green bonds must either report on projects financed by the bonds’ proceeds, or commit to doing so within one year. This reporting obligation will continue until bond proceeds have been fully dispersed or for the life of the bond, as circumstances necessitate. For reporting to be considered eligible, it must include one or more of the following:

- A list of specific projects/investments, including amount disbursed to each individual project;
- Aggregate project/investment categories, including amount disbursed to each project type;
- Quantitative or qualitative reporting on the environmental impact of the project pool (e.g., greenhouse gas emissions savings, reduction in water consumption, increased energy efficiency per unit of output, etc.).

The Sub-Fund follows an extra-financial approach significantly engaging that contributes to and has

positive impacts on the energy and ecological transition by investing permanently at least 90% of the net asset value of the Sub-Fund in Green Bonds comprising the Index. To be eligible in the Index, Green Bonds shall meet the criteria defined by MSCI ESG Research (as mentioned above).

Through its methodology and the manner it is constructed (as described above), the Index is aligned with the sustainable investment objective of the Sub-Fund and differs from a broad market index. Limits of the extra-financial approach are mentioned in the section “Limits of the extra-financial approach” of the prospectus.

● ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

- 1) follow best environmental and social practices; and
- 2) avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a “best performer” within its sector of activity on at least one of its material environmental or social factors.

The definition of “best performer” relies on Amundi’s proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a “best performer”, an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g. tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

By applying the Amundi’s above described Sustainable Investment definition to the Index constituents of this passively managed ETF Product, Amundi has determined that this Product has the minimum proportion of sustainable investments stated in page 1 above. However, please note that Amundi Sustainable Investment definition is not implemented at the Index methodology level.

● ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?***

Principal adverse impacts are the most significant

negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH test filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g. GHG intensity of investee companies) via a combination of indicators (e.g. carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

– How have the indicators for adverse impacts on sustainability factors been taken into account?

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above:

The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

– How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called “Community Involvement & Human Rights” which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labor relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts will evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

Yes, The Sub-Fund considers Principal Adverse Impacts as per Annex 1, Table 1 of the RTS applying to the Sub-Fund’s strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches.

- Exclusion: Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.

- Engagement: Engagement is a continuous and purpose driven process aimed at influencing the activities or behavior of investee companies. The aim of engagement activities can fall into two categories : to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.

- Vote: Amundi’s voting policy responds to an holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information please refer to Amundi’s Voting Policy .

- Controversies monitoring: Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi’s funds.

For any indication on how mandatory Principal Adverse Impact indicators are used, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

What investment strategy does this financial product follow?

The investment objective of the Sub-Fund is to track both the upward and the downward evolution of the “Bloomberg MSCI Global Green Bond 1-10 Year Index” (the “Index”) denominated in Euros, in order to offer an exposure to the Green Bonds market issued by investment grade entities and denominated in multiple currencies – while minimising the volatility of the difference between the return of the Sub-Fund and the return of the Index (the “Tracking Error”).

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

- ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

This is a passively managed ETF. Its investment strategy is to replicate the Index while minimizing the related tracking error.

To be eligible for inclusion in the “Bloomberg MSCI Global Green Bond 1-10 Year Index” (the “Index”), a bond must be deemed eligible as a “Green Bond” by MSCI ESG Research (as detailed hereafter). MSCI ESG Research provides in-depth research, ratings and analysis of the environmental, social and governance-related business practices of thousands of companies worldwide. It consists of an integrated suite of tools and products to efficiently manage research, analysis and compliance tasks across the spectrum of ESG factors. An independent research-driven methodology is used to evaluate green bonds to ensure they adhere to established Green Bond principles and are classified by their environmental use of proceeds. MSCI ESG Research has developed and implemented the following set of criteria to defined Green Bonds which are eligible to the index.

Green bonds are fixed income securities in which the proceeds will be exclusively and formally applied to projects or activities that promote climate or other environmental sustainability purposes through their use of proceeds.

Securities (both self-labeled green bonds and unlabeled bonds) are independently evaluated by MSCI ESG Research along four dimensions to determine whether they should be classified as a green bond:

i) Stated use of proceeds: project bonds are considered eligible if the use of proceeds falls within at least one of six eligible environmental categories defined by MSCI ESG Research: Alternative Energy; Energy Efficiency; Pollution Prevention and Control; Sustainable Water; Green Building; and Climate Adaptation.

ii) Process for green project evaluation and selection: Bonds are considered eligible if the issuer clearly delineates the specific criteria and process for determining eligible projects or investments in the bond prospectus or supporting documentation. Project criteria must outline either specific projects or the specific categories of activities to be financed.

iii) Process for management of proceeds: A formal process to ring-fence net proceeds to the eligible use of proceeds must be disclosed in the bond prospectus or supporting documentation. Eligible mechanisms to ring-fence net proceeds include:

- Direct recourse to eligible revenues or assets (e.g., a green securitized bond, green project bond, or green revenue bond);
- Creation of a separate legal entity;
- Creation of a sub-portfolio linked to the issuer's investment operations for eligible projects;
- Other auditable mechanism whereby the balance of tracked proceeds is reduced periodically by amounts matching investments made in eligible projects during that period.

iv) Commitment to ongoing reporting of the environmental performance of the use of proceeds : At issuance, issuers of index eligible green bonds must either report on projects financed by the bonds' proceeds, or commit to doing so within one year. This reporting obligation will continue until bond proceeds have been fully dispersed or for the life of the bond, as circumstances necessitate. For reporting to be considered eligible, it must include one or more of the following:

- A list of specific projects/investments, including amount disbursed to each individual project;
- Aggregate project/investment categories, including amount disbursed to each project type;
- Quantitative or qualitative reporting on the environmental impact of the project pool (e.g., greenhouse gas emissions savings, reduction in water consumption, increased energy efficiency per unit of output, etc.).

More information can be found on the website: <https://www.msci.com/>.

The Sub-Fund follows an extra-financial approach significantly engaging that contributes to and has positive impacts on the energy and ecological transition by investing permanently at least 90% of the net asset value of the Sub-Fund in Green Bonds comprising the Index. To be eligible in the Index, Green Bonds shall meet the criteria defined by MSCI ESG Research (as mentioned above).

Through its methodology and the manner it is constructed (as described above), the Index is aligned with the sustainable investment objective of the Sub-Fund and differs from a broad market index. Limits of the extra-financial approach are mentioned in the section "Limits of the extra-financial approach" of the prospectus.

The Product strategy is also relying on systematic exclusions policies (normative and sectorials) as further described in Amundi Responsible Investment policy.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

● ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***

There is no committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy.

● ***What is the policy to assess good governance practices of the investee companies?***

To assess good governance practices of the investee companies, we rely on Amundi ESG scoring methodology. Amundi's ESG scoring is based on a proprietary ESG analysis framework, which accounts for 38 general and sector-specific criteria, including governance criteria. In the Governance dimension, we assess an issuer's ability to ensure an effective corporate governance framework that guarantees it will meet its long-term objectives (e.g., guaranteeing the issuer's value over the long term). The governance sub-criteria considered are: board structure, audit and control, remuneration, shareholders' rights, ethics, tax practices and ESG strategy. Amundi ESG Rating scale contains seven grades, ranging from A to G, where A is the best and G the worst rating. G-rated companies are excluded from our investment universe.

Each corporate security (shares, bonds, single name derivatives, ESG equity and fixed income ETFs) included in investment portfolios has been assessed for good governance practices applying a normative screen against UN Global Compact (UN GC) principles on the associated issuer.

The assessment is performed on an ongoing basis. Amundi's ESG ratings Committee monthly reviews lists of companies in breach of the UN GC leading to rating downgrades to G. Divestment from securities downgraded to G is carried out by default within 90 days.

Amundi Stewardship Policy (engagement and voting) related to governance complements this approach.

What is the asset allocation planned for this financial product?

Asset allocation describes the share of investments in specific assets.

At least 90% of the Sub-Fund's securities and instruments will meet the promoted environmental or social characteristics in accordance with the binding elements of the Index methodology. Furthermore, the Sub-Fund commits to have a minimum of 60% of sustainable investments as per the below chart. Investments aligned with other E/S characteristics (#1B) will represent the difference between the actual proportion of investments aligned with environmental or social characteristics (#1) and the actual proportion of sustainable investments (#1A).

The planned proportion of other environmental investment represents a minimum of 60% (i) and may change as the actual proportions of Taxonomy-aligned and/or Social investments increase.

Taxonomy-aligned activities are expressed as a share of:

- turnover reflecting the share of revenue from green activities of investee companies
- capital expenditure (CapEx) showing

the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2Other includes the remaining investments of the financial product, which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● ***How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?***

Derivatives are not used to attain the environmental and social characteristics promoted by the Sub-Fund.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund has no minimum share of investments with an environmental objective that are aligned with the EU Taxonomy.

● ***Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹ ?***

- Yes:
 - In fossil gas
 - In nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures
 ** This percentage is purely indicative and may vary.

- **What is the minimum share of investments in transitional and enabling activities?**

The funds has no minimum proportion of investment in transitional or enabling activities.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

- **What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?**

The Sub-Fund will have a minimum commitment of 60% of Sustainable Investments with an environmental objective as indicated in this Annex with no commitment on their alignment with the EU Taxonomy.

- **What is the minimum share of socially sustainable investments?**

The Sub-Fund has no minimum share of socially sustainable investments.

- **What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?**

Included in “#2 Other” are cash and instruments for the purpose of liquidity and portfolio risk management. It may also include ESG unrated securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

- **Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?**

Yes, the Index has been designated as a reference benchmark to determine whether the Sub-Fund is aligned with the environmental and/or social characteristics that it promotes.

- **How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?**

According to applicable regulations to index sponsors (including BMR), index sponsors should define appropriate controls/diligence when defining and/or operating index methodologies of regulated indexes.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***

The investment objective of the Sub-Fund is to track both the upward and downward evolution of the Index, while minimising the difference between the return of the Sub-Fund and the return of the Index.

- ***How does the designated index differ from a relevant broad market index?***

The “Bloomberg MSCI Global Green Bond 1-10 Year Index” (the “Index”) offers an exposure to the Green Bonds market issued by investment grade entities and denominated in multiple currencies

- ***Where can the methodology used for the calculation of the designated index be found?***

Additional information on the Index can be found at <https://www.bloomberg.com/professional/product/indices/bloomberg-fixed-income-indices/#/ucits>

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes

No

It will make a minimum of **sustainable investments with an environmental objective**: ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It will make a minimum of **sustainable investments with a social objective**: ___%

It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 35% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promotes E/S characteristics, but **will not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

What environmental and/or social characteristics are promoted by this financial product?

The Sub-Fund promotes environmental and/or social characteristics through among others, replicating an Index that is meeting the minimum standards for EU Climate Transition Benchmarks (EU CTBs) under Regulation (EU) 2019/2089 amending Regulation (EU) 2016/1011. The law proposes the definitions of minimum standards for the methodology of any 'EU Climate Transition' benchmark indices that would be aligned with the objectives of the Paris Agreement. The Index methodology align with certain criteria such as:

- A minimum reduction in Greenhouse Gas (GHG) intensity relative to Parent Index of 30%.
- A minimum self-decarbonization rate of GHG emissions intensity in accordance with the trajectory implied by Intergovernmental Panel on Climate Change's (IPCC) most ambitious 1.5°C scenario, equating to at least 7% GHG intensity reduction on average per annum.

Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

● **What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?**

The weighted average greenhouse gas (GHG) intensity (the “WACI”) is used to measure the attainment of each of the environmental or social characteristics promoted by this financial product.

The WACI is the weighted average of the Index components’ greenhouse gas (GHG) emissions (expressed in tCO₂) divided by the enterprise value including cash.

The GHG emissions are divided into Scope 1, Scope 2, and Scope 3 emissions.

-Scope 1 emissions: those from sources owned or controlled by the company.

-Scope 2 emissions: those caused by the generation of electricity purchased by the company.

-Scope 3 emissions: include all other indirect emissions that occur in a company’s value chain.

More precisely, MSCI Europe ESG Climate Transition (EU CTB) Select Net Total Return Index (the “Index”) is based on the Parent Index and includes large and mid-cap securities of the European developed equity market. It aims to represent the performance of an investment strategy designed to exceed the minimum standards of the EU CTB under the Benchmark Regulation. It incorporates ESG criteria and a broad range of climate-related objectives covering transition risk, climate change opportunities and physical risk while minimizing the volatility of the difference between the return of the Index and the return of the Parent Index.

The Index is an equity index calculated and published by the international index provider MSCI which features the following characteristics:

1) Eligible Universe:

a) Same investment universe as the Parent Index;

b) ESG value-based exclusions from the following activities: controversial, conventional, civilian and nuclear weapons, tobacco, thermal coal and soil sands extraction;

c) Exclusion of companies not in compliance with the United Nations Global Compact (UNGC) principles;

d) Exclusion of companies involved in a major ESG controversy (based on the MSCI ESG Controversy score);

e) ESG Score Based Exclusions: All companies in the bottom 25% of the cumulative security free float market capitalization of the Parent Index in descending order of their ESG Score.

2) Optimization constraints: at each SemiAnnual Index Review of the MSCI Global Investable Market Indexes, the Index is constructed using an optimization process that aims to achieve replicability and investability as well as minimize ex-ante tracking error relative to the Parent Index subject to the following constraints:

a) Minimum reduction in Greenhouse Gas (GHG) intensity (Scope 1+2+3, based on Annex III of the Benchmark Regulation) relative to Parent Index of 30%;

b) Minimum average reduction (per annum) in GHG intensity relative to GHG intensity at the Base Date (defined as June 1st, 2020) of 7.35%;

- c) Minimum active weight in High Climate Impact Sector (as defined in the methodology of the Index) relative to Parent Index of 0%;
- d) Minimum increase in aggregate weight in companies setting targets relative to the aggregate weight of such companies in the Parent Index of 20%;
- e) Minimum reduction in Weighted Average Potential Emissions Intensity (as defined in the methodology of the Index) relative to Parent Index of 30%;
- f) Improving the Aggregate Climate Value-At-Risk (as defined in the methodology of the Index) under 1.5 degree scenario relative to the Parent Index;
- g) Minimum reduction in Weighted Average Extreme Weather Climate Value-At-Risk (Aggressive Scenario) (as defined in the methodology of the Index) relative to Parent Index of 50%;
- h) Minimum ratio of Weighted Average Green Revenue/ Weighted Average Brown Revenue (as defined in the methodology of the Index) relative to Parent Index of 4;
- i) Minimum increase in Weighted Average Green Revenue (as defined in the methodology of the Index) relative to the Parent Index of 100%.
- j) Minimum increase in weighted average board independence percent (as defined in the methodology of the Index) relative to Parent Index.

● ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

- 1) follow best environmental and social practices; and
- 2) avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a “best performer” within its sector of activity on at least one of its material environmental or social factors.

The definition of “best performer” relies on Amundi’s proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a “best performer”, an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g. tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide

manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

By applying the Amundi's above described Sustainable Investment definition to the Index constituents of this passively managed ETF Product, Amundi has determined that this Product has the minimum proportion of sustainable investments stated in page 1 above. However, please note that Amundi Sustainable Investment definition is not implemented at the Index methodology level.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH test filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g. GHG intensity of investee companies) via a combination of indicators (e.g. carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

– *How have the indicators for adverse impacts on sustainability factors been taken into account?*

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above:

The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

– *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labor relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts will evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

Yes, The Sub-Fund considers Principal Adverse Impacts as per Annex 1, Table 1 of the RTS applying to the Sub-Fund's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches.

- Exclusion: Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.

- Engagement: Engagement is a continuous and purpose driven process aimed at influencing the activities or behavior of investee companies. The aim of engagement activities can fall into two categories : to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.

- Vote: Amundi's voting policy responds to an holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information please refer to Amundi's Voting Policy .

- Controversies monitoring: Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

What investment strategy does this financial product follow?

The investment objective of the MULTI UNITS LUXEMBOURG – Lyxor MSCI Europe ESG Climate Transition CTB (DR) UCITS ETF (the “Sub-Fund”) is to track both the upward and the downward evolution of the MSCI Europe ESG Climate Transition (EU CTB) Select Net Total Return Index (the “Index”) denominated in Euros and representative of the performance of an investment strategy constructed from the MSCI Europe Index (the "Parent Index") and designed to exceed the minimum standards of the EU Climate Transition Benchmarks (the “EU CTB”) required under delegated acts supplementing Regulation (EU) 2019/2089 amending Regulation (EU) 2016/1011 (the “Benchmark Regulation”), while minimizing the volatility of the difference between the return of the Sub-Fund and the return of the Index (the “Tracking Error”).

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

- ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

This is a passively managed ETF. Its investment strategy is to replicate the Index while minimizing the related tracking error.

MSCI Europe ESG Climate Transition (EU CTB) Select Net Total Return Index (the “Index”) is based on the Parent Index and includes large and mid-cap securities of the European developed equity market. It aims to represent the performance of an investment strategy designed to exceed the minimum standards of the EU CTB under the Benchmark Regulation. It incorporates ESG criteria and a broad range of climate-related objectives covering transition risk, climate change opportunities and physical risk while minimizing the volatility of the difference between the return of the Index and the return of the Parent Index.

The Index is an equity index calculated and published by the international index provider MSCI which features the following characteristics:

1) Eligible Universe:

- a) Same investment universe as the Parent Index;
- b) ESG value-based exclusions from the following activities: controversial, conventional, civilian and nuclear weapons, tobacco, thermal coal and soil sands extraction;
- c) Exclusion of companies not in compliance with the United Nations Global Compact (UNGC) principles;
- d) Exclusion of companies involved in a major ESG controversy (based on the MSCI ESG Controversy score);
- e) ESG Score Based Exclusions: All companies in the bottom 25% of the cumulative security free float market capitalization of the Parent Index in descending order of their ESG Score.

2) Optimization constraints: at each SemiAnnual Index Review of the MSCI Global Investable Market Indexes, the Index is constructed using an optimization process that aims to achieve replicability and investability as well as minimize ex-ante tracking error relative to the Parent Index subject to the following constraints:

- a) Minimum reduction in Greenhouse Gas (GHG) intensity (Scope 1+2+3, based on Annex III of the Benchmark Regulation) relative to Parent Index of 30%;
- b) Minimum average reduction (per annum) in GHG intensity relative to GHG intensity at the Base Date (defined as June 1st, 2020) of 7.35%;
- c) Minimum active weight in High Climate Impact Sector (as defined in the methodology of the Index) relative to Parent Index of 0%;
- d) Minimum increase in aggregate weight in companies setting targets relative to the aggregate weight of such companies in the Parent Index of 20%;
- e) Minimum reduction in Weighted Average Potential Emissions Intensity (as defined in the methodology of the Index) relative to Parent Index of 30%;
- f) Improving the Aggregate Climate Value-At-Risk (as defined in the methodology of the Index) under 1.5 degree scenario relative to the Parent Index;
- g) Minimum reduction in Weighted Average Extreme Weather Climate Value-At-Risk (Aggressive Scenario) (as defined in the methodology of the Index) relative to Parent Index of 50%;
- h) Minimum ratio of Weighted Average Green Revenue/ Weighted Average Brown Revenue (as defined in the methodology of the Index) relative to Parent Index of 4;
- i) Minimum increase in Weighted Average Green Revenue (as defined in the methodology of the Index) relative to the Parent Index of 100%.
- j) Minimum increase in weighted average board independence percent (as defined in the methodology of the Index) relative to Parent Index.

The Product strategy is also relying on systematic exclusions policies (normative and sectorials) as further described in Amundi Responsible Investment policy.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

- ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***

There is no committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy.

- ***What is the policy to assess good governance practices of the investee companies?***

To assess good governance practices of the investee companies, we rely on Amundi ESG scoring methodology. Amundi's ESG scoring is based on a proprietary ESG analysis framework, which accounts for 38 general and sector-specific criteria, including governance criteria. In the Governance dimension, we assess an issuer's ability to ensure an effective corporate governance framework that guarantees it will meet its long-term objectives (e.g., guaranteeing the issuer's value over the long term). The governance sub-criteria considered are: board structure, audit and control, remuneration, shareholders' rights, ethics, tax practices and ESG strategy. Amundi ESG Rating scale contains seven grades, ranging from A to G, where A is the best and G the worst rating. G-rated companies are excluded from our investment universe.

Each corporate security (shares, bonds, single name derivatives, ESG equity and fixed income ETFs) included in investment portfolios has been assessed for good governance practices applying a normative screen against UN Global Compact (UN GC) principles on the associated issuer.

The assessment is performed on an ongoing basis. Amundi's ESG ratings Committee monthly reviews lists of companies in breach of the UN GC leading to rating downgrades to G. Divestment from securities downgraded to G is carried out by default within 90 days.

Amundi Stewardship Policy (engagement and voting) related to governance complements this approach.

What is the asset allocation planned for this financial product?

Asset allocation describes the share of investments in specific assets.

At least 90% of the Sub-Fund's securities and instruments will meet the promoted environmental or social characteristics in accordance with the binding elements of the Index methodology. Furthermore, the Sub-Fund commits to have a minimum of 35% of sustainable investments as per the below chart. Investments aligned with other E/S characteristics (#1B) will represent the difference between the actual proportion of investments aligned with environmental or social characteristics (#1) and the actual proportion of sustainable investments (#1A).

The planned proportion of other environmental investment represents a minimum of 35% (i) and may change as the actual proportions of Taxonomy-aligned and/or Social investments increase.

Taxonomy-aligned activities are expressed as a share of:

-turnover reflecting the share of revenue from green activities of investee companies

-capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- operational expenditure (OpEx) reflecting green operational activities of investee companies.

● **How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?**

Derivatives are not used to attain the environmental and social characteristics promoted by the Sub-Fund.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund currently has no minimum commitment to sustainable investments with an environmental objective aligned with the EU Taxonomy. The Sub-Fund does not commit to make taxonomy-compliant investments in fossil gas and/or nuclear energy as illustrated below. Nevertheless, as part of the investment strategy, it may invest in companies that are also active in these industries. Such investments may or may not be taxonomy aligned.

● **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹ ?**

- Yes:
- In fossil gas In nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures
 ** This percentage is purely indicative and may vary.

● **What is the minimum share of investments in transitional and enabling activities?**

The funds has no minimum proportion of investment in transitional or enabling activities.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The Sub-Fund will have a minimum commitment of 35% of Sustainable Investments with an environmental objective as indicated in this Annex with no commitment on their alignment with the EU Taxonomy.

 **What is the minimum share of socially sustainable investments?**

The Sub-Fund has no minimum share of socially sustainable investments.

 **What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?**

Included in “#2 Other” are cash and instruments for the purpose of liquidity and portfolio risk management. It may also include ESG unrated securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Yes, the Index has been designated as a reference benchmark to determine whether the Sub-Fund is aligned with the environmental and/or social characteristics that it promotes.

- ***How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?***

According to applicable regulations to index sponsors (including BMR), index sponsors should define appropriate controls/diligence when defining and/or operating index methodologies of regulated indexes.

- ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***

The investment objective of the Sub-Fund is to track both the upward and downward evolution of the Index, while minimising the difference between the return of the Sub-Fund and the return of the Index.

- ***How does the designated index differ from a relevant broad market index?***

The MSCI Europe ESG Climate Transition (EU CTB) Select Net Total Return Index (the "Index") is denominated in Euros and representative of the performance of an investment strategy constructed from the MSCI Europe Index (the "Parent Index") and designed to exceed the minimum standards of the EU Climate Transition Benchmarks (the "EU CTB") required under delegated acts supplementing Regulation (EU) 2019/2089 amending Regulation (EU) 2016/1011 (the "Benchmark Regulation")

- ***Where can the methodology used for the calculation of the designated index be found?***

Additional information on the Index can be found at <https://www.msci.com/index-methodology>

Where can I find more product specific information online?

More product-specific information can be found on the website: Additional information on the Sub-Fund can be found at www.amundiETF.com.

Template pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes

No

It will make a minimum of **sustainable investments with an environmental objective**: ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It will make a minimum of **sustainable investments with a social objective**: ___%

It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 40% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promotes E/S characteristics, but **will not make any sustainable investments**

What environmental and/or social characteristics are promoted by this financial product?

The Sub-Fund promotes environmental and/or social characteristics through among others, replicating an Index that is meeting the minimum standards for EU Paris Aligned Benchmarks (EU PABs) under Regulation (EU) 2019/2089 amending Regulation (EU) 2016/1011. The law proposes the definitions of minimum standards for the methodology of any 'EU Paris Aligned' benchmark indices that would be aligned with the objectives of the Paris Agreement. The Index methodology align with certain criteria such as:

- A minimum reduction in Greenhouse Gas (GHG) intensity relative to Parent Index of 50%.
- A minimum self-decarbonization rate of GHG emissions intensity in accordance with the trajectory implied by Intergovernmental Panel on Climate Change's (IPCC) most ambitious 1.5°C scenario, equating to at least 7% GHG intensity reduction on average per annum

Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

● **What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?**

The weighted average greenhouse gas (GHG) intensity (the “WACI”) is used to measure the attainment of each of the environmental or social characteristics promoted by this financial product.

The WACI is the weighted average of the Index components’ greenhouse gas (GHG) emissions (expressed in tCO₂) divided by the enterprise value including cash.

The GHG emissions are divided into Scope 1, Scope 2, and Scope 3 emissions.

- Scope 1 emissions: those from sources owned or controlled by the company.
- Scope 2 emissions: those caused by the generation of electricity purchased by the company.
- Scope 3 emissions: include all other indirect emissions that occur in a company’s value chain.

More precisely, S&P Eurozone LargeMidCap Net Zero 2050 Paris-Aligned ESG Net Total Return Index (the “Index”) is based on the Parent Index which is representative of large and mid-cap securities of the Eurozone equity markets. The Index measures the performance of eligible equity securities from the Parent Index, selected and weighted to be collectively compatible with a 1.5°C global warming climate scenario. It incorporates a broad range of climate-related objectives covering transition risk, climate change opportunities and physical risk.

The Index has been designed to align with the minimum standards as proposed in the Final Report of the European Union’s Technical Expert Group on Climate Benchmarks and ESG Disclosures (the “TEG”) and qualify for the label ‘EU Paris-aligned benchmarks’ (“EU PAB”). The proposals contained in the Final Report are not legally binding. The Final Report will serve as the basis for the European Commission to draft delegated acts to implement the requirements of Regulation (EU) 2019/2089. Following publication of the final delegated acts, the methodology will be reviewed and updated if required to align with any relevant changes to the minimum standards for EU Paris-aligned benchmarks. Should a change to the methodology be required, S&P Dow Jones Indices will issue an announcement before the change is implemented (and in these circumstances, S&P Dow Jones Indices would not conduct a formal consultation).

The weighting strategy of the Index aims to minimize the difference in constituent weights to the Parent Index while simultaneously delivering objectives through optimization constraints, including:

- a) alignment to 1.5°C climate scenario using Trucost’s Transition Pathway Model as defined in the methodology of the Index;
- b) reduced overall greenhouse gas (GHG expressed in CO₂ equivalents) emissions intensity compared to the Parent Index by at least 50%;
- c) minimum self-decarbonization rate of greenhouse gas emissions intensity in accordance with the trajectory implied by IPCC’s most ambitious 1.5°C scenario, equating to at least 7% GHG intensity reduction on average per annum;
- d) increased exposure to companies with Science Based Targets from the Science Based Target Initiative (SBTI) that are credible and consistent with the above decarbonization trajectory;
- e) improved S&P DJI ESG Score (as defined in the methodology of the Index) with regard to the S&P DJI

ESG Score of the Parent Index after 20% of the worst ESG score performing companies by count are removed and weight redistributed;

f) exposure to sectors with high impact to climate change at least equivalent to the Parent Index;

g) capped exposure to non-disclosing carbon companies;

h) constituent-level weight capping to address liquidity and diversification as defined in the methodology of the Index;

i) reduced exposure to physical risks from climate change using Trucost's Physical Risk dataset as defined in the methodology of the Index;

j) improved exposure to potential climate change opportunities through substantially higher green-to-brown revenue share; and

k) reduced exposure to fossil fuel reserves.

The Index features exclusions for companies from the Parent Index with:

i) controversial weapons, tobacco, small arms, military contracting, thermal coal, oil sands, shale energy, gambling and alcohol business activities based on revenue thresholds as defined in the methodology of the Index;

ii) an impact on stakeholders deemed by Sustainalytics to be non-compliant with international norms; and

iii) public, ESG-related, controversial news (Media & Stakeholder Analysis or MSA) as defined in the methodology of the Index.

The Sub-Fund follows an extra-financial approach significantly engaging that permits the reduction of overall greenhouse gas emissions intensity compared to the Parent Index by at least 50%.

For further information in relation to the general and specific environmental, social and governance (ESG) objectives targeted by the Sub-Fund, please refer to the Transparency Code of the Sub-Fund available on <https://www.amundiETF.com/>.

The extra financial data coverage is at least 90% of the eligible equity securities of the Index.

The Index features additional exclusions for companies that exceed derived revenue thresholds in coal/oil/natural gas exploration or processing activities and electricity generation subject to certain GHG intensities.

● ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1) follow best environmental and social practices; and

2) avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a “best performer” within its sector of activity on at least one of its material environmental or social factors.

The definition of “best performer” relies on Amundi’s proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a “best performer”, an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g. tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

By applying the Amundi’s above described Sustainable Investment definition to the Index constituents of this passively managed ETF Product, Amundi has determined that this Product has the minimum proportion of sustainable investments stated in page 1 above. However, please note that Amundi Sustainable Investment definition is not implemented at the Index methodology level.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm (‘DNSH’), Amundi utilises two filters:

The first DNSH test filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g. GHG intensity of investee companies) via a combination of indicators (e.g. carbon intensity) and specific thresholds or rules (e.g. that the investee company’s carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi’s Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi’s ESG rating.

- *How have the indicators for adverse impacts on sustainability factors been taken into account?*

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above:

The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

- *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labor relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts will evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial

product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

Yes, The Sub-Fund considers Principal Adverse Impacts as per Annex 1, Table 1 of the RTS applying to the Sub-Fund's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches.

- Exclusion: Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.

- Engagement: Engagement is a continuous and purpose driven process aimed at influencing the activities or behavior of investee companies. The aim of engagement activities can fall into two categories : to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.

- Vote: Amundi's voting policy responds to an holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information please refer to Amundi's Voting Policy .

- Controversies monitoring: Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

What is the asset allocation planned for this financial product?

Asset allocation describes the share of investments in specific assets.

At least 90% of the Sub-Fund's securities and instruments will meet the promoted environmental or social characteristics in accordance with the binding elements of the Index methodology. Furthermore, the Sub-Fund commits to have a minimum of 40% of sustainable investments as per the below chart. Investments aligned with other E/S characteristics (#1B) will represent the difference between the actual proportion of investments aligned with environmental or social characteristics (#1) and the actual proportion of sustainable investments (#1A).

The planned proportion of other environmental investment represents a minimum of 40% (i) and may change as the actual proportions of Taxonomy-aligned and/or Social investments increase.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

● **How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?**

Derivatives are not used to attain the environmental and social characteristics promoted by the Sub-Fund.

 **To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?**

The Sub-Fund has no minimum share of investments with an environmental objective that are aligned with the EU Taxonomy.

● **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹ ?**

Yes:

In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures
 ** This percentage is purely indicative and may vary.

- **What is the minimum share of investments in transitional and enabling activities?**

The Sub-Fund has no minimum proportion of investment in transitional or enabling activities.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

- **What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?**

The Sub-Fund will have a minimum commitment of 40% of Sustainable Investments with an environmental objective as indicated in this Annex with no commitment on their alignment with the EU Taxonomy.

- **What is the minimum share of socially sustainable investments?**

The Sub-Fund has no minimum share of socially sustainable investments.

- **What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?**

Included in “#2 Other” are cash and instruments for the purpose of liquidity and portfolio risk management. It may also include ESG unrated securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

- **Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?**

Yes, the Index has been designated as a reference benchmark to determine whether the Sub-Fund is aligned with the environmental and/or social characteristics that it promotes.

- **How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?**

According to applicable regulations to index sponsors (including BMR), index sponsors should define appropriate controls/diligence when defining and/or operating index methodologies of regulated indexes.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***

The investment objective of the Sub-Fund is to track both the upward and downward evolution of the Index, while minimising the difference between the return of the Sub-Fund and the return of the Index.

- ***How does the designated index differ from a relevant broad market index?***

The S&P Eurozone LargeMidCap Net Zero 2050 Paris-Aligned ESG Net Total Return Index (the “Index”), denominated in Euros, and representative of the performance of eligible equity securities from the S&P Eurozone LargeMidCap Index (the “Parent Index”) selected and weighted to be collectively compatible with a 1.5°C global warming climate scenario.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes

No

It will make a minimum of **sustainable investments with an environmental objective**: ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It will make a minimum of **sustainable investments with a social objective**: ___%

It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 35% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promotes E/S characteristics, but **will not make any sustainable investments**

What environmental and/or social characteristics are promoted by this financial product?

The Sub-Fund promotes environmental and/or social characteristics through among others, replicating an Index that is meeting the minimum standards for EU Paris Aligned Benchmarks (EU PABs) under Regulation (EU) 2019/2089 amending Regulation (EU) 2016/1011. The law proposes the definitions of minimum standards for the methodology of any 'EU Paris Aligned' benchmark indices that would be aligned with the objectives of the Paris Agreement. The Index methodology align with certain criteria such as:

- A minimum reduction in Greenhouse Gas (GHG) intensity relative to Parent Index of 50%.
- A minimum self-decarbonization rate of GHG emissions intensity in accordance with the trajectory implied by Intergovernmental Panel on Climate Change's (IPCC) most ambitious 1.5°C scenario, equating to at least 7% GHG intensity reduction on average per annum

Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

● **What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?**

The weighted average greenhouse gas (GHG) intensity (the “WACI”) is used to measure the attainment of each of the environmental or social characteristics promoted by this financial product.

The WACI is the weighted average of the Index components’ greenhouse gas (GHG) emissions (expressed in tCO₂) divided by the enterprise value including cash.

The GHG emissions are divided into Scope 1, Scope 2, and Scope 3 emissions.

- Scope 1 emissions: those from sources owned or controlled by the company.
- Scope 2 emissions: those caused by the generation of electricity purchased by the company.
- Scope 3 emissions: include all other indirect emissions that occur in a company’s value chain.

More precisely, S&P Europe LargeMidCap Net Zero 2050 Paris-Aligned ESG Net Total Return Index (the “Index”) is based on the Parent Index which is representative of large and mid-cap securities of the European equity markets. The Index measures the performance of eligible equity securities from the Parent Index, selected and weighted to be collectively compatible with a 1.5°C global warming climate scenario. It incorporates a broad range of climate-related objectives covering transition risk, climate change opportunities and physical risk.

The Index has been designed to align with the minimum standards as proposed in the Final Report of the European Union’s Technical Expert Group on Climate Benchmarks and ESG Disclosures (the “TEG”) and qualify for the label ‘EU Paris-aligned benchmarks (“EU PAB”). The proposals contained in the Final Report are not legally binding. The Final Report will serve as the basis for the European Commission to draft delegated acts to implement the requirements of Regulation (EU) 2019/2089. Following publication of the final delegated acts, the methodology will be reviewed and updated if required to align with any relevant changes to the minimum standards for EU Paris-aligned benchmarks. Should a change to the methodology be required, S&P Dow Jones Indices will issue an announcement before the change is implemented (and in these circumstances, S&P Dow Jones Indices would not conduct a formal consultation).

The weighting strategy of the Index aims to minimize the difference in constituent weights to the Parent Index while simultaneously delivering objectives through optimization constraints, including:

- a) alignment to 1.5°C climate scenario using Trucost’s Transition Pathway Model as defined in the methodology of the Index;
- b) reduced overall greenhouse gas (GHG expressed in CO₂ equivalents) emissions intensity compared to the Parent Index by at least 50%;
- c) minimum self-decarbonization rate of greenhouse gas emissions intensity in accordance with the trajectory implied by IPCC’s most ambitious 1.5°C scenario, equating to at least 7% GHG intensity reduction on average per annum;
- d) increased exposure to companies with Science Based Targets from the Science Based Target Initiative (SBTI) that are credible and consistent with the above decarbonization trajectory;
- e) improved S&P DJI ESG Score (as defined in the methodology of the Index) with regard to the S&P DJI ESG Score of the Parent Index after 20% of the worst ESG score performing companies by count are

removed and weight redistributed;

f) exposure to sectors with high impact to climate change at least equivalent to the Parent Index;

g) capped exposure to non-disclosing carbon companies;

h) constituent-level weigh capping to address liquidity and diversification as defined in the methodology of the Index;

i) reduced exposure to physical risks from climate change using Trucost's Physical Risk dataset as defined in the methodology of the Index;

j) improved exposure to potential climate change opportunities through substantially higher green-to-brown revenue share; and

k) reduced exposure to fossil fuel reserves.

The Index features exclusions for companies from the Parent Index with:

i) controversial weapons, tobacco, small arms, military contracting, thermal coal, oil sands, shale energy, gambling and alcohol business activities based on revenue thresholds as defined in the methodology of the Index;

ii) an impact on stakeholders deemed by Sustainalytics to be non-compliant with international norms ; and

iii) public, ESG-related, controversial news (Media & Stakeholder Analysis or MSA) as defined in the methodology of the Index.

The Sub-Fund follows an extra-financial approach significantly engaging that permits the reduction of overall greenhouse gas emissions intensity compared to the Parent Index by at least 50%.

For further information in relation to the general and specific environmental, social and governance (ESG) objectives targeted by the Sub-Fund, please refer to the Transparency Code of the Sub-Fund available on <https://www.amundiETF.com/>.

The extra financial data coverage is at least 90% of the eligible equity securities of the Index.

The Index features additional exclusions for companies that exceed derived revenue thresholds in coal/oil/natural gas exploration or processing activities and electricity generation subject to certain GHG intensities.

● ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1) follow best environmental and social practices; and

2) avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a “best performer” within its sector of activity on at least one of its material environmental or social factors.

The definition of “best performer” relies on Amundi’s proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a “best performer”, an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g. tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

By applying the Amundi’s above described Sustainable Investment definition to the Index constituents of this passively managed ETF Product, Amundi has determined that this Product has the minimum proportion of sustainable investments stated in page 1 above. However, please note that Amundi Sustainable Investment definition is not implemented at the Index methodology level.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm (‘DNSH’), Amundi utilises two filters:

The first DNSH test filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g. GHG intensity of investee companies) via a combination of indicators (e.g. carbon intensity) and specific thresholds or rules (e.g. that the investee company’s carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi’s Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi’s ESG rating.

- *How have the indicators for adverse impacts on sustainability factors been taken into account?*

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above:

The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

- *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labor relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts will evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

Yes, The Sub-Fund considers Principal Adverse Impacts as per Annex 1, Table 1 of the RTS applying to the Sub-Fund’s strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches.

- Exclusion: Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.

- Engagement: Engagement is a continuous and purpose driven process aimed at influencing the activities or behavior of investee companies. The aim of engagement activities can fall into two categories : to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.

- Vote: Amundi’s voting policy responds to an holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information please refer to Amundi’s Voting Policy .

- Controversies monitoring: Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi’s funds.

For any indication on how mandatory Principal Adverse Impact indicators are used, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

What investment strategy does this financial product follow?

The investment objective of the MULTI UNITS LUXEMBOURG – Lyxor Net Zero 2050 S&P Europe Climate PAB (DR) UCITS ETF (the “Sub-Fund”) is to track both the upward and the downward evolution of the S&P Europe LargeMidCap Net Zero 2050 Paris-Aligned ESG Net Total Return Index (the “Index”), denominated in Euros, and representative of the performance of eligible equity securities from the S&P Europe LargeMidCap Index (the “Parent Index”) selected and weighted to be collectively compatible with a 1.5°C global warming climate scenario, while minimizing the volatility of the difference between the return of the Sub-Fund and the return of the Index (the “Tracking Error”).

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

- ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

This is a passively managed ETF. Its investment strategy is to replicate the Index while minimizing the related tracking error.

S&P Europe LargeMidCap Net Zero 2050 Paris-Aligned ESG Net Total Return Index (the “Index”) is based on the Parent Index which is representative of large and mid-cap securities of the European equity markets. The Index measures the performance of eligible equity securities from the Parent Index, selected and weighted to be collectively compatible with a 1.5°C global warming climate scenario. It incorporates a broad range of climate-related objectives covering transition risk, climate change opportunities and physical risk.

The Index has been designed to align with the minimum standards as proposed in the Final Report of the European Union’s Technical Expert Group on Climate Benchmarks and ESG Disclosures (the “TEG”) and qualify for the label ‘EU Paris-aligned benchmarks (“EU PAB”). The proposals contained in the Final Report are not legally binding. The Final Report will serve as the basis for the European Commission to draft delegated acts to implement the requirements of Regulation (EU) 2019/2089. Following publication of the final delegated acts, the methodology will be reviewed and updated if required to align with any relevant changes to the minimum standards for EU Paris-aligned benchmarks. Should a change to the methodology be required, S&P Dow Jones Indices will issue an announcement before the change is implemented (and in these circumstances, S&P Dow Jones Indices would not conduct a formal consultation).

The weighting strategy of the Index aims to minimize the difference in constituent weights to the Parent Index while simultaneously delivering objectives through optimization constraints, including:

- a) alignment to 1.5°C climate scenario using Trucost’s Transition Pathway Model as defined in the methodology of the Index;
- b) reduced overall greenhouse gas (GHG expressed in CO₂ equivalents) emissions intensity compared to the Parent Index by at least 50%;
- c) minimum self-decarbonization rate of greenhouse gas emissions intensity in accordance with the trajectory implied by IPCC’s most ambitious 1.5°C scenario, equating to at least 7% GHG intensity reduction on average per annum;

- d) increased exposure to companies with Science Based Targets from the Science Based Target Initiative (SBTI) that are credible and consistent with the above decarbonization trajectory;
- e) improved S&P DJI ESG Score (as defined in the methodology of the Index) with regard to the S&P DJI ESG Score of the Parent Index after 20% of the worst ESG score performing companies by count are removed and weight redistributed;
- f) exposure to sectors with high impact to climate change at least equivalent to the Parent Index;
- g) capped exposure to non-disclosing carbon companies;
- h) constituent-level weigh capping to address liquidity and diversification as defined in the methodology of the Index;
- i) reduced exposure to physical risks from climate change using Trucost's Physical Risk dataset as defined in the methodology of the Index;
- j) improved exposure to potential climate change opportunities through substantially higher green-to-brown revenue share; and
- k) reduced exposure to fossil fuel reserves.

The Index features exclusions for companies from the Parent Index with:

- i) controversial weapons, tobacco, small arms, military contracting, thermal coal, oil sands, shale energy, gambling and alcohol business activities based on revenue thresholds as defined in the methodology of the Index;
- ii) an impact on stakeholders deemed by Sustainalytics to be non-compliant with international norms ; and
- iii) public, ESG-related, controversial news (Media & Stakeholder Analysis or MSA) as defined in the methodology of the Index.

The Sub-Fund follows an extra-financial approach significantly engaging that permits the reduction of overall greenhouse gas emissions intensity compared to the Parent Index by at least 50%.

For further information in relation to the general and specific environmental, social and governance (ESG) objectives targeted by the Sub-Fund, please refer to the Transparency Code of the Sub-Fund available on <https://www.amundiETF.com/>.

The extra financial data coverage is at least 90% of the eligible equity securities of the Index. The Index features additional exclusions for companies that exceed derived revenue thresholds in coal/oil/natural gas exploration or processing activities and electricity generation subject to certain GHG intensities.

The Product strategy is also relying on systematic exclusions policies (normative and sectorials) as further described in Amundi Responsible Investment policy.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

- ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***

There is no committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy.

- ***What is the policy to assess good governance practices of the investee companies?***

To assess good governance practices of the investee companies, we rely on Amundi ESG scoring methodology. Amundi's ESG scoring is based on a proprietary ESG analysis framework, which accounts for 38 general and sector-specific criteria, including governance criteria. In the Governance dimension, we assess an issuer's ability to ensure an effective corporate governance framework that guarantees it will meet its long-term objectives (e.g., guaranteeing the issuer's value over the long term). The governance sub-criteria considered are: board structure, audit and control, remuneration, shareholders' rights, ethics, tax practices and ESG strategy. Amundi ESG Rating scale contains seven grades, ranging from A to G, where A is the best and G the worst rating. G-rated companies are excluded from our investment universe.

Each corporate security (shares, bonds, single name derivatives, ESG equity and fixed income ETFs) included in investment portfolios has been assessed for good governance practices applying a normative screen against UN Global Compact (UN GC) principles on the associated issuer.

The assessment is performed on an ongoing basis. Amundi's ESG ratings Committee monthly reviews lists of companies in breach of the UN GC leading to rating downgrades to G. Divestment from securities downgraded to G is carried out by default within 90 days.

Amundi Stewardship Policy (engagement and voting) related to governance complements this approach.

What is the asset allocation planned for this financial product?

Asset allocation describes the share of investments in specific assets.

At least 90% of the Sub-Fund's securities and instruments will meet the promoted environmental or social characteristics in accordance with the binding elements of the Index methodology. Furthermore, the Sub-Fund commits to have a minimum of 35% of sustainable investments as per the below chart. Investments aligned with other E/S characteristics (#1B) will represent the difference between the actual proportion of investments aligned with environmental or social characteristics (#1) and the actual proportion of sustainable investments (#1A).

The planned proportion of other environmental investment represents a minimum of 35% (i) and may change as the actual proportions of Taxonomy-aligned and/or Social investments increase.

Taxonomy-aligned activities are expressed as a share of:

- turnover reflecting the share of revenue from green activities of investee companies
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

● **How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?**

The Sub-Fund currently has no minimum commitment to sustainable investments with an environmental objective aligned with the EU Taxonomy. The Sub-Fund does not commit to make taxonomy-compliant investments in fossil gas and/or nuclear energy as illustrated below. Nevertheless, as part of the investment strategy, it may invest in companies that are also active in these industries. Such investments may or may not be taxonomy aligned.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund has no minimum share of investments with an environmental objective that are aligned with the EU Taxonomy.

● **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹ ?**

- Yes:
- In fossil gas In nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective. Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Yes, the Index has been designated as a reference benchmark to determine whether the Sub-Fund is aligned with the environmental and/or social characteristics that it promotes.

- ***How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?***

According to applicable regulations to index sponsors (including BMR), index sponsors should define appropriate controls/diligence when defining and/or operating index methodologies of regulated indexes.

- ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***

What is the sustainable investment objective of this financial product?

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

The sub-fund is passively managed. Its investment objective is to replicate the Solactive Euro Government Green Bond Index (the "Index") which has the sustainable investment objective of being representative of the performance of investment grade rated Green Bonds issued by European Monetary Union countries. Green Bonds are issued in order to fund projects that have positive environmental outcomes.

More precisely, to be eligible for inclusion in the Index, a bond must be considered as a "Green Bond" by the Climate Bonds Initiative. Climate Bonds Initiative is an investor-focused not-for-profit organization promoting large-scale investments that will deliver a global low carbon and climate resilient economy (more information is available on the website: <http://www.climatebonds.net/>). Climate Bonds Initiative has developed and implemented the following set of criteria to define Green Bonds which are eligible for the Index:

i) Environmentally themed (self-labelled) bonds: to be eligible, green bonds must be publicly declared by their issuers as intended to be environmentally beneficial through labelling. Common

eligible labels include, but are not limited to, 'green', 'climate-awareness', 'climate', 'environmental', 'carbon', 'sustainability' and 'ESG' (Environment, Social, and Governance). The issuer must use the label or description in a public document for the label to be valid (e.g., in a press release, in a statement, in the bond prospectus or supporting bond offering documents).

ii) Eligible bond structures, which include:

- Asset-linked structures or 'use of proceeds' bonds, whereby proceeds raised by bond sale are earmarked for eligible green projects; and
- Asset-backed structures consisting in:
 - a. Project bonds, which are eligible if they are backed by a green project and the proceeds from bond sale are used solely to finance that same green project; and
 - b. Securitized bonds, which are eligible if proceeds go towards green projects or assets.

iii) Use of proceeds: issuers must commit to use proceeds from the bond sale in full (net of any bond arrangement fees) to finance eligible green projects or assets. For instance, bonds where more than 5% of the proceeds are used for 'general corporate purposes' or projects that are not defined as green, or bonds where proceeds are to be split across different projects (e.g., an ESG Bond with social projects and separate green projects) are not eligible for inclusion in the Index.

iv) Adherence with the "Climate Bonds Taxonomy": proceeds of an eligible green bond must be used to finance eligible green assets or projects which are typically related to one of the following sectors (as described in the Climate Bonds Taxonomy):

- Renewable and Alternative Energy;
- Energy efficiency;
- Low-Carbon Transport;
- Sustainable Water;
- Waste, recycling and pollution;
- Sustainable agriculture and forestry;
- Climate resilient infrastructure and climate adaptation.

As further described in the Climate Bonds Taxonomy, areas of the above sectors can be excluded (e.g. energy savings in fossil fuel extraction activities - for the energy efficiency category -, or the landfill without gas capture - for the waste category -) and related bonds are ineligible for inclusion in the Index.

More information can be found on the website: <http://www.climatebonds.net/> and <https://www.climatebonds.net/standard/taxonomy>.

● ***What sustainability indicators are used to measure the attainment of the sustainable investment objective of this financial product?***

Sustainability indicator used to measure the attainment of the sustainable investment objective of this financial product is the percentage of bonds considered as "Green Bond" by the climate bond initiative in the Index composition.

● ***How do sustainable investments not cause significant harm to any environmental or social sustainable investment objective?***

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The eligible green bonds as selected under the product taxonomy cannot finance projects or assets from the following activities:

Energy:

- Uranium mining for nuclear power;
- Any fossil fuel-based power generation including gas, 'clean' coal and other coal.

Energy efficiency:

- Efficiency upgrades to GHG intensive power sources – e.g. cleaner coal technology;
- Energy savings in fossil fuel extraction activities - emission reduction requirements require a rapid phase out of all fossil fuel usage. Anything that helps to extend the life of fossil fuel usage is excluded.

Waste:

- Landfill without gas capture;
- Waste incineration without energy capture.

Transport:

- Rail lines where fossil fuels account for more than >50% of freight.

– How have the indicators for adverse impacts on sustainability factors been taken into account?

The PAI 15 “GHG intensity” is taken into account through the exclusion in the Index of projects or assets from the following activities:

Energy:

- Uranium mining for nuclear power;
- Any fossil fuel-based power generation including gas, 'clean' coal and other coal.

Energy efficiency:

- Efficiency upgrades to GHG intensive power sources – e.g. cleaner coal technology;
- Energy savings in fossil fuel extraction activities - emission reduction requirements require a rapid phase out of all fossil fuel usage. Anything that helps to extend the life of fossil fuel usage is excluded.

Waste:

- Landfill without gas capture;
- Waste incineration without energy capture.

Transport:

- Rail lines where fossil fuels account for more than >50% of freight.

The PAI 16 “Investee countries subject to social violations” is taken into account through the exclusion from the sub-fund of countries on the European Union (EU) sanction list with a sanction consisting of asset freezing, and a sanction index at the highest level (considering both United States and EU sanctions), after formal review and validation from Amundi’s Rating Committee.

– How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The sustainable investments considered are restricted to sovereign issuers. The OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are not applicable for sovereigns.

Does this financial product consider principal adverse impacts on sustainability factors?

Yes, the PAI 15 “GHG intensity” is taken into account through the exclusion in the Index of projects or assets from the following activities:

Energy:

- Uranium mining for nuclear power;
- Any fossil fuel-based power generation including gas, ‘clean’ coal and other coal.

Energy efficiency:

- Efficiency upgrades to GHG intensive power sources – e.g. cleaner coal technology;
- Energy savings in fossil fuel extraction activities - emission reduction requirements require a rapid phase out of all fossil fuel usage. Anything that helps to extend the life of fossil fuel usage is excluded.

Waste:

- Landfill without gas capture;
- Waste incineration without energy capture.

Transport:

- Rail lines where fossil fuels account for more than >50% of freight.

The PAI 16 “Investee countries subject to social violations” is taken into account through the exclusion from the sub-fund of countries on the European Union (EU) sanction list with a sanction consisting of asset freezing, and a sanction index at the highest level (considering both United States and EU sanctions), after formal review and validation from Amundi’s Rating Committee.

What investment strategy does this financial product follow?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

The investment objective of the Sub-Fund is to reflect the performance of the “Solactive Euro Government Green Bond Index” (the “Index”), while minimising the volatility of the difference between the return of the Sub-Fund and the return of the Benchmark Index (the “Tracking Error”).

The Index is representative of the performance of investment grade rated Green Bonds issued by European countries and denominated in EUR. Green Bonds are issued in order to fund projects that have positive environmental outcomes.

- ***What are the binding elements of the investment strategy used to select the investments to attain the sustainable investment objective?***

This is a passively managed ETF. Its investment strategy is to replicate the Index while minimizing the related tracking error.

To be eligible for inclusion in the Index, a bond must be considered as a “Green Bond” by the Climate Bonds Initiative. Climate Bonds Initiative is an investor-focused not-for-profit organization promoting large-scale investments that will deliver a global low carbon and climate resilient economy (more information is available on the website: <http://www.climatebonds.net/>). Climate Bonds Initiative has developed and implemented the following set of criteria to define Green Bonds which are eligible for the Index:

i) Environmentally themed (self-labelled) bonds: to be eligible, green bonds must be publicly declared by their issuers as intended to be environmentally beneficial through labelling. Common eligible labels include, but are not limited to, ‘green’, ‘climate-awareness’, ‘climate’, ‘environmental’, ‘carbon’, ‘sustainability’ and ‘ESG’ (Environment, Social, and Governance). The issuer must use the

label or description in a public document for the label to be valid (e.g., in a press release, in a statement, in the bond prospectus or supporting bond offering documents).

ii) Eligible bond structures, which include:

- Asset-linked structures or 'use of proceeds' bonds, whereby proceeds raised by bond sale are earmarked for eligible green projects; and
- Asset-backed structures consisting in:
 - a. Project bonds, which are eligible if they are backed by a green project and the proceeds from bond sale are used solely to finance that same green project; and
 - b. Securitized bonds, which are eligible if proceeds go towards green projects or assets.

iii) Use of proceeds: issuers must commit to use proceeds from the bond sale in full (net of any bond arrangement fees) to finance eligible green projects or assets. For instance, bonds where more than 5% of the proceeds are used for 'general corporate purposes' or projects that are not defined as green, or bonds where proceeds are to be split across different projects (e.g., an ESG Bond with social projects and separate green projects) are not eligible for inclusion in the Index.

iv) Adherence with the "Climate Bonds Taxonomy": proceeds of an eligible green bond must be used to finance eligible green assets or projects which are typically related to one of the following sectors (as described in the Climate Bonds Taxonomy):

- Renewable and Alternative Energy;
- Energy efficiency;
- Low-Carbon Transport;
- Sustainable Water;
- Waste, recycling and pollution;
- Sustainable agriculture and forestry;
- Climate resilient infrastructure and climate adaptation.

As further described in the Climate Bonds Taxonomy, areas of the above sectors can be excluded (e.g. energy savings in fossil fuel extraction activities - for the energy efficiency category -, or the landfill without gas capture - for the waste category -) and related bonds are ineligible for inclusion in the Index.

More information can be found on the website: <http://www.climatebonds.net/> and <https://www.climatebonds.net/standard/taxonomy>.

The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

● ***What is the policy to assess good governance practices of the investee companies?***

The Index is composed of sovereign issuers. The question is applicable for corporates.

Asset allocation describes the share of investments in specific assets.

What is the asset allocation and the minimum share of sustainable investments?

The sub-fund commits to invest permanently at least 90% the net asset value of the Sub-Fund in Green Bonds comprising the Index (ie an EMU Government Green Bond)
 The Sub-Fund commits to have a minimum of 90% of sustainable investments as per the below chart. The Sustainable investment of the Sub Fund are supporting Environmental objective.

The planned proportion of other Environmental investment may change as the actual proportions of Taxonomy-aligned investments increase.

● **How does the use of derivatives attain the sustainable investment objective?**

Derivatives are not used to attain the sustainable investment objective.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund currently has no minimum commitment to sustainable investments with an environmental objective aligned with the EU Taxonomy. The Sub-Fund does not commit to make taxonomy-compliant investments in fossil gas and/or nuclear energy as illustrated below. Nevertheless, as part of the investment strategy, it may invest in companies that are also active in these industries. Such investments may or may not be taxonomy aligned.

- **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹ ?**

- Yes
 In fossil gas
 In nuclear energy
 No

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures
 ** This percentage is purely indicative and may vary.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **What is the minimum share of investments in transitional and enabling activities?**

The Sub-Fund has no minimum proportion of investment in transitional or enabling activities

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The Sub-Fund will have a minimum commitment of 90% of Sustainable Investments with an environmental objective as indicated in this Annex with no commitment on their alignment with the EU Taxonomy.

What is the minimum share of sustainable investments with a social objective?

The Sub-Fund has no minimum share of socially sustainable investments.

What investments are included under “#2 Not sustainable”, what is their purpose and are there any minimum environmental or social safeguards?

The investments are cash and instruments for the purpose of liquidity and portfolio risk management. There are no minimum environmental or social safeguards for these assets.

Is a specific index designated as a reference benchmark to meet the sustainable investment objective?

Reference benchmarks are indexes to measure whether the financial product attains the sustainable investment objective.

Yes, the Index has been designated as a reference benchmark to determine whether the Sub-Fund is aligned with its sustainable investment objective.

- ***How does the reference benchmark take into account sustainability factors in a way that is continuously aligned with the sustainable investment objective?***

According to applicable regulations to index sponsors (including BMR), index sponsors should define appropriate controls/diligence when defining and/or operating index methodologies of regulated indexes.

- ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***

The investment objective of the Sub-Fund is to track both the upward and downward evolution of the Index, while minimising the difference between the return of the Sub-Fund and the return of the Index.

- ***How does the designated index differ from a relevant broad market index?***

The Index is representative of the performance of investment grade rated Green Bonds issued by European countries and denominated in EUR. Green Bonds are issued in order to fund projects that have positive environmental outcomes.

- ***Where can the methodology used for the calculation of the designated index be found?***

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes

No

It will make a minimum of **sustainable investments with an environmental objective**: ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It will make a minimum of **sustainable investments with a social objective**: ___%

It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 40% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promotes E/S characteristics, but **will not make any sustainable investments**

What environmental and/or social characteristics are promoted by this financial product?

The Sub-Fund promotes environmental and/or social characteristics through among others, replicating an Index composed of Green Bonds. To be eligible a bond must be considered as a “Green Bond” by the Climate Bonds Initiative.

Climate Bonds Initiative is an investor-focused- not-for-profit organization promoting large-scale investments that will deliver a global low carbon and climate resilient economy (more information is available on the website: <http://www.climatebonds.net/>). Climate Bonds Initiative has developed and implemented a set of criteria to define Green Bonds which are eligible for the Index.

Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

● **What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?**

The use of proceeds of the bonds is used to measure the attainment of each of the environmental and or social characteristic promoted by this financial product.

More precisely, to be eligible for inclusion in the Solactive EUR USD IG Corporate Green Bond TR Index[®] (the "Index"), a bond must be considered as a "Green Bond" by the Climate Bonds Initiative.

Furthermore, the investment universe of the Index is based on the following criteria:

- a) The Index constituents must be constituents of the Solactive Green Bond EUR USD IG Index (the "Parent Index");
- b) ESG-value based exclusions from the following activities: controversial weapons, civilian firearms, adult entertainment, alcohol, gambling, genetic engineering, stem cell, tobacco, thermal coal. These exclusions are determined based on criteria and thresholds (e.g., maximum percentage of revenues related to these activities) which are further described in the Index methodology;
- c) Exclusion of issuers which are subject to UN Sanctions and/or "Non-Compliant" with regard to the Overall Global Compact Compliance.

The Sub-Fund follows an extra-financial approach significantly engaging that contributes to and has positive impacts on the energy and ecological transition by investing permanently at least 90% of the net asset value of the Sub-Fund in Green Bonds comprising the Index. Through its methodology and the manner it is constructed (as described above), the Index is aligned with the sustainable investment objective of the Sub-Fund and differs from a broad market index. Limits of the extra-financial approach are mentioned in the section “Limits of the extra-financial approach” of the prospectus.

● ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

- 1) follow best environmental and social practices; and
- 2) avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a “best performer” within its sector of activity on at least one of its material environmental or social factors.

The definition of “best performer” relies on Amundi’s proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a “best performer”, an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g. tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

By applying the Amundi’s above described Sustainable Investment definition to the Index constituents of this passively managed ETF Product, Amundi has determined that this Product has the minimum proportion of sustainable investments stated in page 1 above. However, please note that Amundi Sustainable Investment definition is not implemented at the Index methodology level.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH test filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g. GHG intensity of investee companies) via a combination of indicators (e.g. carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector). Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

– *How have the indicators for adverse impacts on sustainability factors been taken into account?*

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above:

The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

- *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called “Community Involvement & Human Rights” which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labor relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts will evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

Yes, The Sub-Fund considers Principal Adverse Impacts as per Annex 1, Table 1 of the RTS applying to the Sub-Fund’s strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches.

- Exclusion: Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.

- Engagement: Engagement is a continuous and purpose driven process aimed at influencing the activities or behavior of investee companies. The aim of engagement activities can fall into two categories : to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.

- Vote: Amundi’s voting policy responds to an holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information please refer to Amundi’s Voting Policy .

- Controversies monitoring: Amundi has developed a controversy tracking system that

relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

For any indication on how mandatory Principal Adverse Impact indicators are used, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

What investment strategy does this financial product follow?

The investment objective of the Sub-Fund is to track both the upward and the downward evolution of the "Solactive EUR USD IG Corporate Green Bond TR Index" (the "Index") denominated in Euros, in order to offer an exposure to investment grade rated Green Bonds denominated in EUR and USD issued by companies, while minimising the volatility of the difference between the return of the Sub-Fund and the return of the Index (the "Tracking Error").

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

● ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

This is a passively managed ETF. Its investment strategy is to replicate the Index while minimizing the related tracking error.

To be eligible for inclusion in the Solactive EUR USD IG Corporate Green Bond TR Index" (the "Index"), a bond must be considered as a "Green Bond" by the Climate Bonds Initiative.

Furthermore, the investment universe of the Index is based on the following criteria:

- a) The Index constituents must be constituents of the Solactive Green Bond EUR USD IG Index (the "Parent Index");
- b) ESG-value based exclusions from the following activities: controversial weapons, civilian firearms, adult entertainment, alcohol, gambling, genetic engineering, stem cell, tobacco, thermal coal. These exclusions are determined based on criteria and thresholds (e.g., maximum percentage of revenues related to these activities) which are further described in the Index methodology;
- c) Exclusion of issuers which are subject to UN Sanctions and/or "Non-Compliant" with regard to the Overall Global Compact Compliance.

Climate Bonds Initiative is an investor-focused not-for-profit organization promoting large-scale investments that will deliver a global low carbon and climate resilient economy (more information is

available on the website: <http://www.climatebonds.net/>). Climate Bonds Initiative has developed and implemented the following set of criteria to define Green Bonds which are eligible for the Index:

c) i) Environmentally themed (self-labelled) bonds: to be eligible, green bonds must be publicly declared by their issuers as intended to be environmentally beneficial through labelling. Common eligible labels include, but are not limited to, 'green', 'climate-awareness', 'climate', 'environmental', 'carbon', 'sustainability' and 'ESG' (Environment, Social, and Governance). The issuer must use the label or description in a public document for the label to be valid (e.g., in a press release, in a statement, in the bond prospectus or supporting bond offering documents).

c) ii) Eligible bond structures, which include: asset-linked structures or 'use of proceeds' bonds, whereby proceeds raised by bond sale are earmarked for eligible green projects; and asset-backed structures consisting in (a) project bonds, which are eligible if they are backed by a green project and the proceeds from bond sale are used solely to finance that same green project; and (b) securitized bonds, which are eligible if proceeds go towards green projects or assets.

c) iii) Use of proceeds: issuers must commit to use proceeds from the bond sale in full (net of any bond arrangement fees) to finance eligible green projects or assets. For instance, bonds where more than 5% of the proceeds are used for 'general corporate purposes' or projects that are not defined as green, or bonds where proceeds are to be split across different projects (e.g., an ESG Bond with social projects and separate green projects) are not eligible for inclusion in the Index.

c) iv) Adherence with the "Climate Bonds Taxonomy": proceeds of an eligible green bond must be used to finance eligible green assets or projects which are typically related to one of the following sectors (as described in the Climate Bonds Taxonomy): Renewable and Alternative Energy, Energy efficiency, Low-Carbon Transport, Sustainable Water, Waste, recycling and pollution, Sustainable agriculture and forestry, Climate resilient infrastructure and climate adaptation

As further described in the Climate Bonds Taxonomy, areas of the above sectors can be excluded (e.g. energy savings in fossil fuel extraction activities - for the energy efficiency category -, or the landfill without gas capture - for the waste category -) and related bonds are ineligible for inclusion in the Index. More information can be found on the website: <http://www.climatebonds.net/> and <https://www.climatebonds.net/standard/taxonomy>.

The Sub-Fund follows an extra-financial approach significantly engaging that contributes to and has positive impacts on the energy and ecological transition by investing permanently at least 90% of the net asset value of the Sub-Fund in Green Bonds comprising the Index. Through its methodology and the manner it is constructed (as described above), the Index is aligned with the sustainable investment objective of the Sub-Fund and differs from a broad market index. Limits of the extra-financial approach are mentioned in the section "Limits of the extra-financial approach" of the prospectus.

The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

● ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***

There is no committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy.

● **What is the policy to assess good governance practices of the investee companies?**

To assess good governance practices of the investee companies, we rely on Amundi ESG scoring methodology. Amundi's ESG scoring is based on a proprietary ESG analysis framework, which accounts for 38 general and sector-specific criteria, including governance criteria. In the Governance dimension, we assess an issuer's ability to ensure an effective corporate governance framework that guarantees it will meet its long-term objectives (e.g., guaranteeing the issuer's value over the long term). The governance sub-criteria considered are: board structure, audit and control, remuneration, shareholders' rights, ethics, tax practices and ESG strategy. Amundi ESG Rating scale contains seven grades, ranging from A to G, where A is the best and G the worst rating. G-rated companies are excluded from our investment universe.

Each corporate security (shares, bonds, single name derivatives, ESG equity and fixed income ETFs) included in investment portfolios has been assessed for good governance practices applying a normative screen against UN Global Compact (UN GC) principles on the associated issuer.

The assessment is performed on an ongoing basis. Amundi's ESG ratings Committee monthly reviews lists of companies in breach of the UN GC leading to rating downgrades to G. Divestment from securities downgraded to G is carried out by default within 90 days.

Amundi Stewardship Policy (engagement and voting) related to governance complements this approach.

What is the asset allocation planned for this financial product?

At least 90% of the Sub-Fund's securities and instruments will meet the promoted environmental or social characteristics in accordance with the binding elements of the Index methodology. Furthermore, the Sub-Fund commits to have a minimum of 40% of sustainable investments as per the below chart. Investments aligned with other E/S characteristics (#1B) will represent the difference between the actual proportion of investments aligned with environmental or social characteristics (#1) and the actual proportion of sustainable investments (#1A).

The planned proportion of other environmental investment represents a minimum of 40% (i) and may change as the actual proportions of Taxonomy-aligned and/or Social investments increase.

Asset allocation describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

-turnover reflecting the share of revenue from green activities of investee companies

-capital expenditure

(CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

● **How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?**

Derivatives are not used to attain the environmental and social characteristics promoted by the Sub-Fund.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund has no minimum share of investments with an environmental objective that are aligned with the EU Taxonomy.

● **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹ ?**

- Yes:
- In fossil gas In nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures
 ** This percentage is purely indicative and may vary.

● **What is the minimum share of investments in transitional and enabling activities?**

The funds has no minimum proportion of investment in transitional or enabling activities.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The Sub-Fund will have a minimum commitment of 40% of Sustainable Investments with an environmental objective as indicated in this Annex with no commitment on their alignment with the EU Taxonomy.

What is the minimum share of socially sustainable investments?

The Sub-Fund has no minimum share of socially sustainable investments.

What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

Included in “#2 Other” are cash and instruments for the purpose of liquidity and portfolio risk management. It may also include ESG unrated securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Yes, the Index has been designated as a reference benchmark to determine whether the Sub-Fund is aligned with the environmental and/or social characteristics that it promotes.

● **How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?**

According to applicable regulations to index sponsors (including BMR), index sponsors should define appropriate controls/diligence when defining and/or operating index methodologies of regulated indexes.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***

The investment objective of the Sub-Fund is to track both the upward and downward evolution of the Index, while minimising the difference between the return of the Sub-Fund and the return of the Index.

- ***How does the designated index differ from a relevant broad market index?***

The “Solactive EUR USD IG Corporate Green Bond TR Index” (the “Index”) offers an exposure to investment grade rated Green Bonds denominated in EUR and USD issued by companies

- ***Where can the methodology used for the calculation of the designated index be found?***

Additional information on the Index can be found at <https://www.solactive.com/indices/>

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Does this financial product have a sustainable investment objective?

Yes

No

It will make a minimum of **sustainable investments with an environmental objective**: ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It will make a minimum of **sustainable investments with a social objective**: ___%

It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 5% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promotes E/S characteristics, but **will not make any sustainable investments**

What environmental and/or social characteristics are promoted by this financial product?

The Sub-Fund promotes environmental and/or social characteristics through among others, replicating an Index integrating a Climate Risk Management Score.

The Index methodology is constructed using a “Best-in-class approach”: best-ranked companies are selected to construct the Index.

“Best-in-class” is an approach where leading or best-performing investments are selected within a universe, industry sector or class. Using such Best-in-class approach, the Index follows an extra-financial approach significantly engaging that permits the reduction by at least 20% of the initial investment universe (expressed in number of issuers).

Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

● **What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?**

The MSCI “Climate Risk Management Weighted Average Score” is used to measure the attainment of each of the environmental and or social characteristic promoted by this financial product.

The MSCI Climate Risk Management Weighted Average Score is calculated using the following key issue management scores from MSCI ESG Ratings methodology related to management of Climate Change Risk and Environmental Opportunities:

- Carbon Emissions Management Score ;
- Product Carbon Footprint Management Score;
- Climate Change Vulnerability Management Score;
- Biodiversity and Land use Management Score;
- Opportunities in Clean Tech Management Score;
- Opportunities in Green Building Management Score;
- Opportunities in Renewable Energy Management Score.

More detailed on MSCI ESG Rating methodology can be found on the following link: <https://www.msci.com/documents/1296102/21901542/ESG-Ratings-Methodology-Exec-Summary.pdf>

More details on MSCI ESG Controversy score can be found on the following link: <https://www.msci.com/documents/1296102/14524248/MSCI+ESG+Research+Controversies+Executive+Summary+Methodology+July+2020.pdf/b0a2bb88-2360-1728-b70e-2f0a889b6bd4>

More precisely, the MSCI Europe Climate Action Net Total Return Index (the “Index”) is based on the MSCI Europe Index (the “Parent Index”) and is representative of the performance of large and mid cap stocks, across developed European countries, issued by companies that have been assessed to lead their sector peers in terms of their positioning and actions relative to climate transition, based on, among others, the “Climate Risk Management Weighted Average Score”, while minimizing the volatility of the difference between the return of the Index and the return of the Parent Index.

The Index is an equity index calculated and published by the international index provider MSCI which features the following characteristics: 1) Eligible Universe

- a) Same investment universe as the the Parent Index;
- b) an ESG negative screening is performed on the investment universe as defined in the methodology in order to exclude:
 - companies with exposure to controversial business activities and which meet the business involvement exclusions criteria (as detailed in the methodology) such as: tobacco, nuclear weapons, thermal coal mining, oil sands extraction, controversial weapons;
 - companies involved in a very severe ESG controversy (based on the MSCI ESG Controversy score);
 - securities which either have higher emission intensity than the high emission threshold as defined in the index methodology or do not yet have approved science-based targets;
 - companies which are in the lowest quartile of their GICS sector based on their Climate Risk Management Score.

2) Selection of companies in the index

Companies from the eligible universe are assigned to a quartile based on their Scope 1+2+3 Greenhouse Gas Intensity, Climate Management Weighted Average score, emissions reduction commitments, and their green business revenues.

Then securities are classified by descending order of float adjusted market capitalization.

Finally, for each GICS sector, securities are selected from the top by quartile until the number of selected

stocks correspond to 50% of the number of securities in the Parent Index. For more detail on this selection process please refer to the index methodology.

● ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

- 1) follow best environmental and social practices; and
- 2) avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a “best performer” within its sector of activity on at least one of its material environmental or social factors.

The definition of “best performer” relies on Amundi’s proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a “best performer”, an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g. tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

By applying the Amundi’s above described Sustainable Investment definition to the Index constituents of this passively managed ETF Product, Amundi has determined that this Product has the minimum proportion of sustainable investments stated in page 1 above. However, please note that Amundi Sustainable Investment definition is not implemented at the Index methodology level.

● ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm (‘DNSH’), Amundi utilises two filters:

The first DNSH test filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g. GHG intensity of investee companies) via a combination of indicators (e.g. carbon intensity) and specific thresholds or rules (e.g. that the investee company’s carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-

Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

– *How have the indicators for adverse impacts on sustainability factors been taken into account?*

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above:

The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

– *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labor relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts will evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

Yes, The Sub-Fund considers Principal Adverse Impacts as per Annex 1, Table 1 of the RTS applying to the Sub-Fund’s strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches.

- Exclusion: Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.

- Engagement: Engagement is a continuous and purpose driven process aimed at influencing the activities or behavior of investee companies. The aim of engagement activities can fall into two categories : to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.

- Vote: Amundi’s voting policy responds to an holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information please refer to Amundi’s Voting Policy .

- Controversies monitoring: Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi’s funds.

For any indication on how mandatory Principal Adverse Impact indicators are used, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

What investment strategy does this financial product follow?

The investment objective of the MULTI UNITS LUXEMBOURG – Amundi MSCI Europe Climate Action (the “Sub-Fund”) is to track both the upward and the downward evolution of the MSCI Europe Climate Action Net Total Return Index (the “Index”) denominated in Euros and representative of the performance of large and mid-cap stocks, across developed European countries, issued by companies that have been assessed to lead their sector peers in terms of their positioning and actions relative to climate transition, while minimizing the volatility of the difference between the return of the Sub-Fund and the return of the Index (the “Tracking Error”).

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

- ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

The Sub-Fund is a passively managed ETF. Its investment strategy is to replicate the Index while minimizing the related tracking error.

The Index is based on the Parent Index and includes large and mid-cap securities of the European developed equity market.

It aims to represent the performance of large and mid-cap stocks, across developed European countries, issued by companies that have been assessed to lead their sector peers in terms of their positioning and actions relative to climate transition while minimizing the volatility of the difference between the return of the Index and the return of the Parent Index. The Index is an equity index calculated and published by the international index provider MSCI which features the following characteristics:

1) Eligible Universe

- a) Same investment universe as the Parent Index);
- b) an ESG negative screening is performed on the investment universe as defined in the methodology in order to exclude:
 - companies with exposure to controversial business activities and which meet the business involvement exclusions criteria (as detailed in the methodology) such as: tobacco, nuclear weapons, thermal coal mining, oil sands extraction, controversial weapons;
 - companies involved in a very severe ESG controversy (based on the MSCI ESG Controversy score);
 - securities which either have higher emission intensity than the high emission threshold as defined in the index methodology or do not yet have approved science-based targets
 - companies which are in the lowest quartile of their GICS sector based on their Climate Risk Management Score (as defined in the methodology).

2) Selection of companies in the index

Companies from the eligible universe are assigned to a quartile based on their Scope 1+2+3 Greenhouse Gas Intensity, climate management weighted average score, emissions reduction commitments, and their green business revenues.

Then securities are classified by descending order of float adjusted market capitalization. Finally, for

each GICS sector, securities are selected from the top by quartile until the number of selected stocks correspond to 50% of the number of securities in the Parent Index. For more detail on this selection process please refer to the index methodology

The Product strategy is also relying on systematic exclusions policies (normative and sectorials) as further described in Amundi Responsible Investment policy.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

● ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***

There is no committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy.

● ***What is the policy to assess good governance practices of the investee companies?***

To assess good governance practices of the investee companies, we rely on Amundi ESG scoring methodology. Amundi's ESG scoring is based on a proprietary ESG analysis framework, which accounts for 38 general and sector-specific criteria, including governance criteria. In the Governance dimension, we assess an issuer's ability to ensure an effective corporate governance framework that guarantees it will meet its long-term objectives (e.g., guaranteeing the issuer's value over the long term). The governance sub-criteria considered are: board structure, audit and control, remuneration, shareholders' rights, ethics, tax practices and ESG strategy. Amundi ESG Rating scale contains seven grades, ranging from A to G, where A is the best and G the worst rating. G-rated companies are excluded from our investment universe.

Each corporate security (shares, bonds, single name derivatives, ESG equity and fixed income ETFs) included in investment portfolios has been assessed for good governance practices applying a normative screen against UN Global Compact (UN GC) principles on the associated issuer.

The assessment is performed on an ongoing basis. Amundi's ESG ratings Committee monthly reviews lists of companies in breach of the UN GC leading to rating downgrades to G. Divestment from securities downgraded to G is carried out by default within 90 days.

Amundi Stewardship Policy (engagement and voting) related to governance complements this approach.

What is the asset allocation planned for this financial product?

Asset allocation describes the share of investments in specific assets.

At least 90% of the Sub-Fund's, securities and instruments will meet the promoted environmental or social characteristics in accordance with the binding elements of the Index methodology. Furthermore, the Sub-Fund commits to have a minimum of 5% of sustainable investments as per the below chart. Investments aligned with other E/S characteristics (#1B) will represent the difference between the actual proportion of investments aligned with environmental or social characteristics (#1) and the actual proportion of sustainable investments (#1A).

The planned proportion of other environmental investment represents a minimum of 5% and may change as the actual proportions of Taxonomy-aligned and/or Social investments increase.

Taxonomy-aligned activities are expressed as a share of:

- turnover** reflecting the share of revenue from green activities of investee companies
- capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

● **How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?**

Derivatives are not used to attain the environmental and social characteristics promoted by the Sub-Fund.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund currently has no minimum commitment to sustainable investments with an environmental objective aligned with the EU Taxonomy. The Sub-Fund does not commit to make taxonomy-compliant investments in fossil gas and/or nuclear energy as illustrated below. Nevertheless, as part of the investment strategy, it may invest in companies that are also active in these industries. Such investments may or may not be taxonomy aligned.

● **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹ ?**

- Yes:
 - In fossil gas
 - In nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.
 **This percentage is purely indicative and may vary.

● **What is the minimum share of investments in transitional and enabling activities?**

The funds has no minimum proportion of investment in transitional or enabling activities.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The Sub-Fund will have a minimum commitment of 1% of Sustainable Investments with an environmental objective as indicated in this Annex with no commitment on their alignment with the EU Taxonomy.

What is the minimum share of socially sustainable investments?

The Sub-Fund will have a minimum commitment of 5% of Sustainable Investments with an environmental objective as indicated in this Annex with no commitment on their alignment with the EU Taxonomy.

What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

Included in “#2 Other” are cash and instruments for the purpose of liquidity and portfolio risk management. It may also include ESG unrated securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Yes, the Index has been designated as a reference benchmark to determine whether the Sub-Fund is aligned with the environmental and/or social characteristics that it promotes.

- ***How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?***

According to applicable regulations to index sponsors (including BMR), index sponsors should define appropriate controls/diligence when defining and/or operating index methodologies of regulated indexes.

- ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***

The investment objective of the Sub-Fund is to track both the upward and downward evolution of the Index, while minimising the difference between the return of the Sub-Fund and the return of the Index.

Does this financial product have a sustainable investment objective?

Yes

No

X

It will make a minimum of **sustainable investments with an environmental objective**: _____%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It will make a minimum of **sustainable investments with a social objective**: _____%

It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 0 % of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promotes E/S characteristics, but **will not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

What environmental and/or social characteristics are promoted by this financial product?

The Sub-Fund promotes environmental and/or social characteristics through among others, replicating an Index "integrating an environmental, social and governance ("ESG") negative screening approach.

The negative screening approach consists in excluding at least 20% of companies from the parent index (expressed in number of constituents) based on:

- Controversial business activities
- ESG controversies
- An ESG rating if less than 20% of the parent index has been excluded based on controversial business activities and ESG controversies.

- **What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?**

Sustainability indicators measure how the environmental or social characteristics promoted by the

financial product are attained.

The Sustainalytics ESG Risk Rating is used to measure the attainment of each of the environmental and or social characteristic promoted by this financial product. The Sustainalytics ESG Risk Ratings (the "ESG score") measures a company's exposure to industry-specific material ESG risks and how well a company is managing those risks. Exposure refers to the extent to which a company is exposed to different material ESG issues. It takes into consideration subindustry and company-specific factors such as its business model. Management refers to how well a company is managing its relevant ESG issues. It assesses the robustness of a company's ESG programs, practices and policies. More precisely, the STOXX Europe 600 Energy ESG+ Index is constructed from the securities from the STOXX Europe 600 belonging to the ICB Energy Industry (the "Eligible Universe"). Then, the following filters apply:

- Companies that are non-compliant based on the ISS-ESG Norms Based Screening, as defined by ISS-ESG, assessment are excluded.
- Norms Based Screening identifies companies that violate or are at risk of violating commonly accepted international norms on human rights, labor standards, environmental protection and anti-corruption established in the UN Global Compact and the OECD Guidelines.
- Companies that ISS-ESG identified to be involved in Controversial Weapons are not eligible for selection.
- Additional exclusion filters are applied, screening companies for involvement in Tobacco, Thermal Coal, Unconventional Oil & Gas, Civilian Firearms, and Military Contracting, as defined by ISS-ESG.

If less than 20% of the companies belonging to the Eligible Universe are excluded by the screens above, the worst companies in terms of ESG performance, as defined by ISS-ESG, are excluded until the number of selected securities reaches 80% of the number of securities of the Eligible Universe. In case two companies have the same ESG Performance score, the company with the larger free-float market capitalization is selected.

The weighting of each stock in the Index is adjusted in line with its free-floating market capitalization. All components are subject to a 30% capping for the largest company and a 15% capping for the other remaining companies. An intra-quarter capping will be triggered if the largest company exceeds 35% or any other company exceeds 20%.

● ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g. tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

By applying the Amundi's above described Sustainable Investment definition to the Index constituents of this passively managed ETF Product, Amundi has determined that this Product has the minimum proportion of sustainable investments stated in page 1 above. However, please note that Amundi Sustainable Investment definition is not implemented at the Index methodology level.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

- The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g. GHG intensity of investee companies) via a combination of indicators (e.g. carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector). Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.
- Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

– ***How have the indicators for adverse impacts on sustainability factors been taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above:

The first DNSH relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO₂ intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

– *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example, the model has a dedicated criteria called “Community Involvement & Human Rights” which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labor relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts will evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

- Yes, the Sub-Fund considers Principal Adverse Impacts as per Annex 1, Table 1 of the RTS applying to the Sub-Fund’s strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:
- **Exclusion:** Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
 - **Engagement:** Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
 - **Vote:** Amundi’s voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi’s Voting Policy¹.
 - **Controversies monitoring:** Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG

analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

For any indication on how mandatory Principal Adverse Impact indicators are used, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu.

What investment strategy does this financial product follow?

The investment objective of the Sub-Fund is to track the performance of the STOXX Europe 600 Energy ESG+ Index (the "Index"). The Index is an equity index that tracks the performance of the companies of the STOXX Europe 600 (which represents the 600 leading securities of European developed countries) belonging to the Energy Industry as determined by the Industry Classification Benchmark ("ICB") after a set of compliance, involvement and ESG performance screens are applied.

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

● ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

This is a passively managed ETF. Its investment strategy is to replicate the Index while minimizing the related tracking error.

The Index is constructed from the securities from the STOXX Europe 600 belonging to the Energy Industry as determined by the ICB. Then, the following filters apply:

- Companies that are non-compliant based on the ISS-ESG Norms Based Screening assessment are excluded.
- Norms Based Screening identifies companies that violate or are at risk of violating commonly accepted international norms on human rights, labor standards, environmental protection and anti-corruption established in the UN Global Compact and the OECD Guidelines.
- Companies that ISS-ESG identified to be involved in Controversial Weapons are not eligible for selection.
- Additional exclusion filters are applied, screening companies for involvement in Tobacco, Thermal Coal, Unconventional Oil & Gas, Civilian Firearms, and Military Contracting, as defined by ISS-ESG.

If less than 20% of the companies belonging to the Eligible Universe are excluded by the screens above, the worst companies in terms of ESG performance, as defined by ISS-ESG, are excluded until the number of selected securities reaches 80% of the number of securities of the Eligible Universe. In case two companies have the same ESG Performance score, the company with the larger free-float market capitalization is selected.

The weighting of each stock in the Index is adjusted in line with its free-floating market capitalization. All components are subject to a 30% capping for the largest company and a 15% capping for the other

remaining companies. An intra-quarter capping will be triggered if the largest company exceeds 35% or any other company exceeds 20%.

The Product strategy is also relying on systematic exclusions policies (normative and sectorials) as further described in Amundi Responsible Investment policy.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

● ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***

There is no committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy.

● ***What is the policy to assess good governance practices of the investee companies?***

To assess good governance practices of the investee companies, we rely on Amundi ESG scoring methodology. Amundi's ESG scoring is based on a proprietary ESG analysis framework, which accounts for 38 general and sector-specific criteria, including governance criteria. In the Governance dimension, we assess an issuer's ability to ensure an effective corporate governance framework that guarantees it will meet its long-term objectives (e.g. guaranteeing the issuer's value over the long term).

The governance sub-criteria considered are: board structure, audit and control, remuneration, shareholders' rights, ethics, tax practices and ESG strategy.

Amundi ESG Rating scale contains seven grades, ranging from A to G, where A is the best and G the worst rating. G-rated companies are excluded from our investment universe.

Each corporate security (shares, bonds, single name derivatives, ESG equity and fixed income ETFs) included in investment portfolios has been assessed for good governance practices applying a normative screen against UN Global Compact (UN GC) principles on the associated issuer. The assessment is performed on an ongoing basis. Amundi's ESG ratings Committee monthly reviews lists of companies in breach of the UN GC leading to rating downgrades to G. Divestment from securities downgraded to G is carried out by default within 90 days.

Amundi Stewardship Policy (engagement and voting) related to governance complements this approach.

What is the asset allocation planned for this financial product?

At least 90% of the Sub-Fund's securities and instruments will meet the promoted environmental or social characteristics in accordance with the binding elements of the Index methodology, Furthermore, the Sub-Fund commits to have a minimum of 0% of Sustainable Investments as per the below chart.

The planned proportion of other environmental investment represents a minimum of 0% and may change as the actual proportions of Taxonomy-aligned and/or Social investments increase.

Asset allocation describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

-turnover
reflecting the share of revenue from green activities of investee companies

-capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- operational expenditure (OpEx) reflecting green operational activities of investee companies.

● **How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?**

Derivatives are not used to attain the environmental and social characteristics promoted by the Sub-Fund.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund currently has no minimum commitment to sustainable investments with an environmental objective aligned with the EU Taxonomy.

The Fund does not commit to make taxonomy-compliant investments in fossil gas and/or nuclear energy as illustrated below. Nevertheless, as part of the investment strategy, it may invest in companies that are also active in these industries. Such investments may or may not be taxonomy aligned.

● **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy² ?**

- Yes:
- In fossil gas In nuclear energy
- No

² Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What is the minimum share of investments in transitional and enabling activities?**

The Sub-Fund has no minimum proportion of investment in transitional or enabling activities.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The Sub-Fund has no minimum share of investments with an environmental objective that are not aligned with the EU Taxonomy.

What is the minimum share of socially sustainable investments?

The Sub-Fund has no minimum share of socially sustainable investments.

What investments are included under “#2 Other, what is their purpose and are there any minimum environmental or social safeguards?”

Included in “#2 Other” are cash and instruments for the purpose of liquidity and portfolio risk management. It may also include ESG unrated securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

There are no minimum environmental or social safeguards.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Yes, the Index has been designated as a reference benchmark to determine whether the Sub-Fund is aligned with the environmental and/or social characteristics that it promotes.

- **How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?**

According to applicable regulations to index sponsors (including BMR), index sponsors should define appropriate controls/diligence when defining and/or operating index methodologies of regulated indexes.

- **How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?**

The investment objective of the Sub-Fund is to track both the upward and downward evolution of the Index, while minimising the difference between the return of the Sub-Fund and the return of the Index.

- **How does the designated index differ from a relevant broad market index?**

The Index is an equity index that tracks the performance of the companies of the STOXX Europe 600 (which represents the 600 leading securities of European developed countries) belonging to the Energy Industry as determined by the ICB after a set of compliance, involvement and ESG performance screens are applied.

- **Where can the methodology used for the calculation of the designated index be found?**

Additional information on the Index can be found at <https://www.qontigo.com/>

Where can I find more product specific information online?

More product-specific information can be found on the website: Additional information on the Sub-Fund can be found at www.amundiETF.com.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Product name:
Amundi Global Gender Equality

Legal entity identifier:

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes

No

It will make a minimum of sustainable investments with an environmental objective: _____%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It will make a minimum of sustainable investments with a social objective: _____%

It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 30 % of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promotes E/S characteristics, but will not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

What environmental and/or social characteristics are promoted by this financial product?

The Sub-Fund promotes environmental and/or social characteristics through among others, replicating the Index, integrating an environmental, social and governance (“ESG”) rating.

The Index methodology is constructed using a “Best-in-class approach”: best ranked companies are selected to construct the Index. “Best-in-class” is an approach where leading or best-performing investments are selected within a universe, industry sector or class. Using such Best-in-class approach, the Index follows an extra-financial approach significantly engaging that permits the reduction by at least 20% of the initial investment universe (expressed in number of issuers).

Sustainability indicators measure how the environmental or

social characteristics promoted by the financial product are attained.

The Equileap Gender Diversity Score is used to measure the attainment of each of the environmental or social characteristics promoted by this financial product. The Equileap Gender Diversity Score (the “**Equileap Score**”) is calculated based on criteria which are grouped in categories such as gender balance in leadership and workforce; equal compensation and worklife balance; policies promoting gender equality; commitment to transparency and accountability.

For further information in relation to the general and specific environmental, social and governance (ESG) objectives targeted by the Sub-Fund, please refer to the Transparency Code of the Sub-Fund available on <https://www.amundiETF.com/>.

More precisely, the starting universe is made of all securities belonging to one of the below Solactive benchmarks:

- Solactive GBS Developed Markets Large&Mid Cap Index
- Solactive Europe 600 Index
- Solactive GBS United States 1000 Index

To be included in the Index, components need to pass:

- Standard liquidity criteria: Minimum market capitalization and average daily value traded thresholds;
- A light ESG screening: exclusion of companies with exposure to activities such as Gambling, Adult Entertainment, Alcoholic Beverages, Tobacco Products, Military Equipment, Nuclear Energy and Unconventional Fossil Fuels. Companies with verified infringement of established international initiatives and guidelines (such as UN Principles and OECD Guidelines) are also excluded.
- An additional ESG screening applied by Equileap, a leading expert in gender equality research which provides gender-related data on companies: screen out of companies which have engaged in known unethical business practices in the last 2 years.
- An in-depth gender equality screening as defined by Equileap: companies are ranked according to the Equileap Score.

Index constituents are selected according to their Equileap Score , based on a “Best-in-class” approach. “Best-inclass” is an approach where leading or best-performing investments are selected within a universe, industry sector or class.

Such process results in selecting the top 150 companies, including at least 50% of US listed companies and a maximum of 10% for any other country.

● ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a “best performer” within its sector of activity on at least one of its material environmental or social factors.

The definition of “best performer” relies on Amundi’s proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a “best performer”, an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g. tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

By applying the Amundi’s above described Sustainable Investment definition to the Index constituents of this passively managed ETF Product, Amundi has determined that this Product has the minimum proportion of sustainable investments stated in page 1 above. However, please note that Amundi Sustainable Investment definition is not implemented at the Index methodology level.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm (‘DNSH’), Amundi utilises two filters:

- The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g. GHG intensity of investee companies) via a combination of indicators (e.g. carbon intensity) and specific thresholds or rules (e.g. that the investee company’s carbon intensity does not belong to the last decile of the sector). Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi’s Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.
- Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi’s ESG rating.

– ***How have the indicators for adverse impacts on sustainability factors been taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above:

The first DNSH relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO₂ intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors),

- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector,
- Be cleared of any controversy in relation to work conditions and human rights, and
- Be cleared of any controversy in relation to biodiversity and pollution.

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

– How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example, the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labor relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts will evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

Yes, the financial product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the RTS applying to the financial product's strategy and relies on a combination of exclusion policies (normative and sectorial), ESG rating integration into the investment process, engagement and voting approaches:

- **Exclusion:** Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- **ESG factors integration:** Amundi has adopted minimum ESG integration standards applied by default to its actively managed open-ended funds (exclusion of G rated issuers and better weighted average ESG score higher than the applicable benchmark). The 38 criteria used in Amundi ESG rating approach were also designed to consider key impacts on sustainability factors,

as well as quality of the mitigation undertaken are also considered in that respect.

- **Engagement:** Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- **Vote:** Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy¹.
- **Controversies monitoring:** Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

For any indication on how mandatory Principal Adverse Impact indicators are used, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu.

What investment strategy does this financial product follow?

The Sub-Fund objective is to track the performance of Solactive Equileap Global Gender Equality Index (the "Index"), and to minimize the tracking error between the net asset value of the sub-fund and the performance of the Index.

This Index is an equity index that provides exposure to the leading companies in the fields of gender equality where components meet ESG requirements as further described in this Appendix I – ESG Related Disclosures to the Sub-Fund's Prospectus.

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

- ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

This is a passively managed ETF. Its investment strategy is to replicate the Index while minimizing the related tracking error.

For further information in relation to the general and specific environmental, social and governance (ESG) objectives targeted by the Sub-Fund, please refer to the Transparency Code of the Sub-Fund available on <https://www.amundiETF.com/>.

There is no committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy.

● ***What is the policy to assess good governance practices of the investee companies?***

We rely on Amundi ESG scoring methodology. Amundi’s ESG scoring is based on a proprietary ESG analysis framework, which accounts for 38 general and sector-specific criteria, including governance criteria. In the Governance dimension, we assess an issuer’s ability to ensure an effective corporate governance framework that guarantees it will meet its long-term objectives (e.g. guaranteeing the issuer’s value over the long term). The governance sub-criteria considered are: board structure, audit and control, remuneration, shareholders’ rights, ethics, tax practices and ESG strategy.

Amundi ESG Rating scale contains seven grades, ranging from A to G, where A is the best and G the worst rating. G-rated companies are excluded from our investment universe.

Each corporate security (shares, bonds, single name derivatives, ESG equity and fixed income ETFs) included in investment portfolios has been assessed for good governance practices applying a normative screen against UN Global Compact (UN GC) principles on the associated issuer. The assessment is performed on an ongoing basis. Amundi’s ESG ratings Committee monthly reviews lists

of companies in breach of the UN GC leading to rating downgrades to G. Divestment from securities downgraded to G is carried out by default within 90 days.

Amundi Stewardship Policy (engagement and voting) related to governance complements this approach.

What is the asset allocation planned for this financial product?

Asset allocation describes the share of investments in specific assets.

At least 90% of the Sub-Fund's securities and instruments will meet the promoted environmental or social characteristics in accordance with the binding elements of the Index methodology. Furthermore, the Sub-Fund commits to have a minimum of 30 % of sustainable investments as per the below chart. Investments aligned with other E/S characteristics (#1B) will represent the difference between the actual proportion of investments aligned with environmental or social characteristics (#1) and the actual proportion of sustainable investments (#1A). The planned proportion of other environmental investment represents a minimum of 30 % and may change as the actual proportions of Taxonomy-aligned and/or Social investments increase.

Taxonomy-aligned activities are expressed as a share of:

-turnover reflecting the share of revenue from green activities of investee companies

-capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- operational expenditure (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2Other includes the remaining investments of the financial product, which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.

-The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

- **How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?**

Derivatives are not used to attain the environmental and social characteristics promoted by the Sub-Fund.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

There is currently no minimum commitment to sustainable investments with an environmental objective aligned with the EU Taxonomy.

There is no commitment to make taxonomy-compliant investments in fossil gas and/or nuclear energy as illustrated below. Nevertheless, as part of the investment strategy, investments may be done in companies that are also active in these industries. Such investments may or may not be taxonomy aligned.

● **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy² ?**

Yes:

In fossil gas

In nuclear energy

No

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

**This percentage is purely indicative and may vary.

² Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **What is the minimum share of investments in transitional and enabling activities?**

There is no minimum proportion of investment in transitional or enabling activities.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The Sub-Fund will have a minimum commitment of 30 % of Sustainable Investments with an environmental objective as indicated in this Annex with no commitment on their alignment with the EU Taxonomy.

What is the minimum share of socially sustainable investments?

The Sub-Fund has no minimum share of socially sustainable investments.

What investments are included under “#2 Other, what is their purpose and are there any minimum environmental or social safeguards?

Included in “#2 Other” are cash and instruments for the purpose of liquidity and portfolio risk management. It may also include ESG unrated securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

There are no minimum environmental or social safeguards.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Yes, the Index Solactive Equileap Global Gender Equality Index has been designated as a reference benchmark to determine whether the Sub-Fund is aligned with the environmental and/or social characteristics that it promotes.

● **How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?**

According to applicable regulations to index sponsors (including BMR), index sponsors should define appropriate controls/diligence when defining and/or operating index methodologies of regulated indexes.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***

The investment objective of the Sub-Fund is to track both the upward and downward evolution of the Index, while minimising the difference between the return of the Sub-Fund and the return of the Index.

- ***How does the designated index differ from a relevant broad market index?***

Solactive Equileap Global Gender Equality Index is an equity index that provides exposure to the leading companies in the fields of gender equality where components meet ESG requirements.

- ***Where can the methodology used for the calculation of the designated index be found?***

Additional information on the Index can be found at: www.solactive.com.

with a social objective

It promotes E/S characteristics, but will not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

What environmental and/or social characteristics are promoted by this financial product?

The Sub-Fund promotes environmental and/or social characteristics through, among others, replicating the Index integrating an environmental, social and governance (“ESG”) rating.

The Index methodology is constructed using a “Best-in-class approach”: best ranked companies are selected to construct the Index. “Best-in-class” is an approach where leading or best-performing investments are selected within a universe, industry sector or class. Using such Best-in-class approach, the Index follows an extra-financial approach significantly engaging that permits the reduction by at least 20% of the initial investment universe (expressed in number of issuers).

- **What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?**

Sustainability indicators measure how the environmental or social characteristics promoted by the

financial product are attained.

The MSCI ESG Rating is used to measure the attainment of each of the environmental and or social characteristic promoted by this financial product.

MSCI ESG Rating methodology uses a rules-based methodology designed to measure a company's resilience to long-term, industry material ESG risks. It is based on extra-financial ESG key issues that focus on the intersection between a company's core business and the industry-specific issues that may create significant risks and opportunities for the company. The ESG key issues are weighted according to impact and time horizon of the risk or opportunity. The ESG key issues include for instance, but are not limited to, water stress, carbon emissions, labor management or business ethics.

More precisely, the MSCI ACWI IMI Digital Economy & Metaverse ESG Filtered objective is to measure the performance of companies that are expected to derive significant revenues from the digital economy value chain including the metaverse ecosystem, after excluding companies which are ESG laggards relative to the theme universe.

It selects companies which are assessed to have high exposure to business activities such as:

- Metaverse Ecosystem (e.g. Digital Payments, Blockchain, Artificial Intelligence)
- Cybersecurity
- Cloud Computing
- Robots and Automation
- Sharing Economy

The Index features the following characteristics:

- a) Same investment universe as the MSCI ACWI Investable Market Index (IMI) (the "**Parent Index**"); i.e. including large, mid and small cap stocks across developed and emerging countries.
- b) A set of relevant words and phrases derived from the above business activities is used to identify companies (the "**Eligible Universe**") which could benefit from the increased adoption and utilization of products and services focused on digital technology.
- c) Companies from the Eligible Universe with a "**Relevance Score**" (as defined by MSCI) above 25% constitute the "Selected Universe".
- d) Further liquidity/size/country/sectorial filters are applied to the Selected Universe.
- e) An ESG negative screening is performed on the Selected Universe as defined in the methodology in order to exclude:
 - Companies with exposure to controversial businesses such as controversial weapons, conventional weapons, tobacco, thermal coal, civilian firearms, oil sands, nuclear weapons or companies in violation of UN Global Compact; and
 - Companies with no "ESG Rating" (as defined by MSCI).
- f) filtered universe is constructed using a "Best-in-class" approach (the "**Filtered Universe**"): bottom quartile companies by an industry-adjusted ESG Rating (as defined by MSCI) are excluded from the filtered Selected Universe.

“Best-in-class” approach is an approach where leading or best-performing investments are selected within a universe, industry sector or class. MSCI ESG Rating methodology uses a rules-based methodology designed to measure a company’s resilience to longterm, industry material ESG risks. It is based on extra-financial ESG key issues that focus on the intersection between a company’s core business and the industry-specific issues that may create significant risks and opportunities for the company. The ESG key issues are weighted according to impact and time horizon of the risk or opportunity. The ESG key issues include for instance, but are not limited to, water stress, carbon emissions, labor management or business ethics.

Using such Best-in-class approach, the Sub-Fund follows an extra-financial approach significantly engaging that permits the reduction by at least 20% of the initial investment universe (expressed in number of issuers). Limits of the extra-financial approach are mentioned in the section “Principal risks” of the Sub-Fund’s prospectus. The extra-financial data coverage is 100% of the eligible securities of the Parent Index. Non ESG rated companies are excluded from the selection process of the Index.

- g) The top half in terms of Relevance Score of the Filtered Universe constitutes the Index composition.
- h) The Index is weighted in proportion of an aggregate score combining the normalized value of three fundamental criteria: the percentage of sales spent on R&D and capex, return on invested capital and one year sales growth.
- i) An iterative downweighing ensure that the carbon intensity and the weighted average of board independence of the Index are respectively lower and higher than the ones of the MSCI ACWI IMI Digital Economy Index.

For further information in relation to the general and specific environmental, social and governance (ESG) objectives targeted by the Sub-Fund, please refer to the Transparency Code of the Sub-Fund available on <https://www.amundiETF.com/>.

Environmental and/or social characteristics promoted by the Sub-Fund are met through the MSCI ESG Rating methodology (as described above).

● ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a “best performer” within its sector of activity on at least one of its material environmental or social factors.

The definition of “best performer” relies on Amundi’s proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a “best performer”, an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions

and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g. tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

By applying the Amundi's above described Sustainable Investment definition to the Index constituents of this passively managed ETF Product, Amundi has determined that this Product has the minimum proportion of sustainable investments stated in page 1 above. However, please note that Amundi Sustainable Investment definition is not implemented at the Index methodology level.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

- The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g. GHG intensity of investee companies) via a combination of indicators (e.g. carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector). Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.
- Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

– ***How have the indicators for adverse impacts on sustainability factors been taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above:

The first DNSH relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO₂ intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights, and
- Be cleared of any controversy in relation to biodiversity and pollution.

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the

tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

– *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example, the model has a dedicated criteria called “Community Involvement & Human Rights” which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labor relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts will evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

Yes, the financial product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the RTS applying to the financial product’s strategy and relies on a combination of exclusion policies (normative and sectorial), ESG rating integration into the investment process, engagement and voting approaches:

- **Exclusion:** Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- **ESG factors integration:** Amundi has adopted minimum ESG integration standards applied by default to its actively managed open-ended funds (exclusion of G rated issuers and better weighted average ESG score higher than the applicable benchmark). The 38 criteria used in Amundi ESG rating approach were also designed to consider key impacts on sustainability factors, as well as quality of the mitigation undertaken are also considered in that respect.
- **Engagement:** Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human

rights-related or other sustainability matters that are material to society and the global economy.

- **Vote:** Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy¹.
- **Controversies monitoring:** Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

For any indication on how mandatory Principal Adverse Impact indicators are used, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu.

What investment strategy does this financial product follow?

The Sub-Fund objective is to track the performance of MSCI ACWI IMI Digital Economy & Metaverse ESG Filtered Index ("the Index"), and to minimize the tracking error between the net asset value of the sub-fund and the performance of the Index.

The Index aims to represent the performance of companies that are expected to derive significant revenues from the digital economy value chain including the metaverse ecosystem and to exclude companies which are Environmental, Social and Governance ("ESG") laggards relative to the theme universe.

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

- ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

This is a passively managed ETF. Its investment strategy is to replicate the Index while minimizing the related tracking error.

MSCI ACWI IMI Digital Economy & Metaverse ESG Filtered objective is to measure the performance of companies that are expected to derive significant revenues from the digital economy value chain including the metaverse ecosystem, after excluding companies which are ESG laggards relative to the theme universe. The Index is constructed by selecting stocks from the MSCI ACWI Investable Market Index (IMI) (the "Parent Index").

It selects companies which are assessed to have high exposure to business activities such as:

- Metaverse Ecosystem (e.g. Digital Payments, Blockchain, Artificial Intelligence)
- Cybersecurity
- Cloud Computing
- Robots and Automation

For further information in relation to the general and specific environmental, social and governance (ESG) objectives targeted by the Sub-Fund, please refer to the Transparency Code of the Sub-Fund available on <https://www.amundiETF.com/>.

Environmental and/or social characteristics promoted by the Sub-Fund are met through the MSCI ESG Rating methodology (as described above).

The Product strategy is also relying on systematic exclusions policies (normative and sectorials) as further described in Amundi Responsible Investment policy.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

● ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***

There is no committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy.

● ***What is the policy to assess good governance practices of the investee companies?***

We rely on Amundi ESG scoring methodology. Amundi's ESG scoring is based on a proprietary ESG analysis framework, which accounts for 38 general and sector-specific criteria, including governance criteria. In the Governance dimension, we assess an issuer's ability to ensure an effective corporate governance framework that guarantees it will meet its long-term objectives (e.g. guaranteeing the issuer's value over the long term) The governance sub-criteria considered are: board structure, audit and control, remuneration, shareholders' rights, ethics, tax practices and ESG strategy. Amundi ESG Rating scale contains seven grades, ranging from A to G, where A is the best and G the worst rating. G-rated companies are excluded from our investment universe.

Each corporate security (shares, bonds, single name derivatives, ESG equity and fixed income ETFs) included in investment portfolios has been assessed for good governance practices applying a normative screen against UN Global Compact (UN GC) principles on the associated issuer. The assessment is performed on an ongoing basis. Amundi's ESG ratings Committee monthly reviews lists of companies in breach of the UN GC leading to rating downgrades to G. Divestment from securities downgraded to G is carried out by default within 90 days.

Amundi Stewardship Policy (engagement and voting) related to governance complements this approach.

What is the asset allocation planned for this financial product?

At least 90% of the Sub-Fund's securities and instruments will meet the promoted environmental or social characteristics in accordance with the binding elements of the Index methodology. Furthermore, the Sub-Fund commits to have a minimum of 15 % of sustainable investments as per the below chart. Investments aligned with

Asset allocation describes the share

of investments in specific assets.

other E/S characteristics (#1B) will represent the difference between the actual proportion of investments aligned with environmental or social characteristics (#1) and the actual proportion of sustainable investments (#1A). The planned proportion of other environmental investment represents a minimum of 15 % (i) and may change as the actual proportions of Taxonomy-aligned and/or Social investments increase.

Taxonomy-aligned activities are expressed as a share of:

- turnover** reflecting the share of revenue from green activities of investee companies
- capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

● **How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?**

Derivatives are not used to attain the environmental and social characteristics promoted by the Sub-Fund.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

There is currently no minimum commitment to sustainable investments with an environmental objective aligned with the EU Taxonomy.

There is no commitment to make taxonomy-compliant investments in fossil gas and/or nuclear energy as illustrated below. Nevertheless, as part of the investment strategy, investments may be done in companies that are also active in these industries. Such investments may or may not be taxonomy aligned.

● **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy² ?**

- Yes:
 In fossil gas In nuclear energy
- No

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The Sub-Fund will have a minimum commitment of 15 % of Sustainable Investments with an environmental objective as indicated in this Annex with no commitment on their alignment with the EU Taxonomy.

What is the minimum share of socially sustainable investments?

The Sub-Fund has no minimum share of socially sustainable investments.

What investments are included under “#2 Other, what is their purpose and are there any minimum environmental or social safeguards?”

Included in “#2 Other” are cash and instruments for the purpose of liquidity and portfolio risk management. It may also include ESG unrated securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

There are no minimum environmental or social safeguards.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Yes, the MSCI ACWI IMI Digital Economy & Metaverse ESG Filtered Index has been designated as a reference benchmark to determine whether the Sub-Fund is aligned with the environmental and/or social characteristics that it promotes.

● *How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?*

According to applicable regulations to index sponsors (including BMR), index sponsors should define appropriate controls/diligence when defining and/or operating index methodologies of regulated indexes.

More precisely, the MSCI ACWI IMI Disruptive Technology ESG Filtered objective is to measure the performance of companies aligned to themes commonly associated with or described as disruptive technology after excluding companies which are ESG laggards relative to the theme universe. It selects companies which are assessed to have high exposure to business activities such as:

- 3D Printing
- Internet of Things
- Cloud Computing
- Fintech
- Digital Payments
- Healthcare Innovation
- Robotics
- Cybersecurity
- Clean Energy and Smart Grids.

The Index is an equity index calculated and published by the international index provider MSCI.

The Index features the following characteristics:

- a) Same investment universe as the MSCI ACWI Investable Market Index (IMI) (the "**Parent Index**"); i.e. including large, mid and small cap stocks across developed and emerging countries.
- b) A set of relevant words and phrases derived from the above business activities is used to identify companies (the "**Eligible Universe**") aligned to themes commonly associated with or described as "disruptive technology".
- c) Companies from the Eligible Universe with a "**Relevance Score**" (as defined by MSCI) above 25% constitutes the "**Selected Universe**".
- d) Further liquidity/size/country/sectorial filters are applied to the Selected Universe.
- e) An ESG negative screening is performed on the Selected Universe as defined in the methodology in order to exclude:
 - Companies with exposure to controversial businesses such as controversial weapons, conventional weapons, tobacco, thermal coal, civilian firearms, oil sands, nuclear weapons or companies in violation of UN Global Compact; and
 - Companies with no "ESG Rating" (as defined by MSCI).

f) A Filtered Universe is constructed using a “Best-in-class” approach (the “**Filtered Universe**”): bottom quartile companies by an industry-adjusted ESG Rating (as defined by MSCI) are excluded from the filtered Selected Universe. “Best-in-class” approach is an approach where leading or best-performing investments are selected within a universe, industry sector or class. MSCI ESG Rating methodology uses a rules-based methodology designed to measure a company’s resilience to longterm, industry material ESG risks.

It is based on extra-financial ESG key issues that focus on the intersection between a company’s core business and the industry-specific issues that may create significant risks and opportunities for the company. The ESG key issues are weighted according to impact and time horizon of the risk or opportunity. The ESG key issues include for instance, but are not limited to, water stress, carbon emissions, labor management or business ethics.

Using such Best-in-class approach, the Sub- Fund follows an extra-financial approach significantly engaging that permits the reduction by at least 20% of the initial investment universe (expressed in number of issuers).

Limits of the extra-financial approach are mentioned in the section “Principal risks” of the prospectus. The extra-financial data coverage is 100% of the eligible securities of the Parent Index. Non ESG rated companies are excluded from the selection process of the Index.

g) The top half in terms of Relevance Score of the Filtered Universe constitutes the Index composition.

h) The Index is weighted in proportion of an aggregate score combining the normalized value of three fundamental criteria: the percentage of sales spent on R&D and capex, return on invested capital and one year sales growth.

i) An iterative downweighing ensure that the carbon intensity and the weighted average of board independence of the Index are respectively lower and higher than the ones of the MSCI ACWI IMI Disruptive Technology Index.

For further information in relation to the general and specific environmental, social and governance (ESG) objectives targeted by the Sub-Fund, please refer to the Transparency Code of the Sub-Fund available on <https://www.amundi-etf.com/>.

Environmental and/or social characteristics promoted by the Sub-Fund are met through the MSCI ESG Rating methodology (as described above).

● ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a “best performer” within its sector of activity on at least one of its material environmental or social factors.

The definition of “best performer” relies on Amundi’s proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a “best performer”, an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis

of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g. tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

By applying the Amundi's above described Sustainable Investment definition to the Index constituents of this passively managed ETF Product, Amundi has determined that this Product has the minimum proportion of sustainable investments stated in page 1 above. However, please note that Amundi Sustainable Investment definition is not implemented at the Index methodology level.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

- The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g. GHG intensity of investee companies) via a combination of indicators (e.g. carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector). Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.
- Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

– ***How have the indicators for adverse impacts on sustainability factors been taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above:

The first DNSH relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO₂ intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors),
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector,
- Be cleared of any controversy in relation to work conditions and human rights, and
- Be cleared of any controversy in relation to biodiversity and pollution.

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

– *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example, the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labor relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts will evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

1 Yes, the financial product considers Principal Adverse Impacts as per Annex 1, Table of the RTS applying to the financial product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- **Exclusion:** Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- **Engagement:** Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- **Vote:** Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy¹.

1 <https://about.amundi.com/files/nuxeo/dl/0522366c-29d3-471d-85fd-7ec363c20646>

- **Controversies monitoring:** Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi’s funds.

For any indication on how mandatory Principal Adverse Impact indicators are used, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu.

What investment strategy does this financial product follow?

The Sub-Fund objective is to track the performance of MSCI ACWI IMI Disruptive Technology ESG Filtered Index (“the Index”), and to minimize the tracking error between the net asset value of the sub-fund and the performance of the Index.

The Index aims to represent the performance of companies aligned to themes commonly associated with or described as disruptive technology and to exclude companies which are Environmental, Social and Governance (“ESG”) laggards relative to the theme universe.

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

- ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

This is a passively managed ETF. Its investment strategy is to replicate the Index while minimizing the related tracking error.

MSCI ACWI IMI Disruptive Technology ESG Filtered objective is to measure the performance of companies aligned to themes commonly associated with or described as disruptive technology after excluding companies which are Environmental, Social and Governance (“ESG”) laggards relative to the theme universe. The Index is constructed by selecting stocks from the MSCI ACWI Investable Market Index (IMI) (the “Parent Index”).

It selects companies which are assessed to have high exposure to business activities such as:

- 3D Printing
- Internet of Things
- Cloud Computing
- Fintech
- Digital Payments
- Healthcare Innovation
- Robotics
- Cybersecurity
- Clean Energy and Smart Grids.

The Index is an equity index calculated and published by the international index provider MSCI.

The Index features the following characteristics:

a) Same investment universe as the MSCI ACWI Investable Market Index (IMI) (the "Parent Index"); i.e. including large, mid and small cap stocks across developed and emerging countries.

b) A set of relevant words and phrases derived from the above business activities is used to identify companies (the "Eligible Universe") aligned to themes commonly associated with or described as "disruptive technology".

c) Companies from the Eligible Universe with a "Relevance Score" (as defined by MSCI) above 25% constitutes the "Selected Universe".

d) Further liquidity/size/country/sectorial filters are applied to the Selected Universe.

e) An ESG negative screening is performed on the Selected Universe as defined in the methodology in order to exclude:

- Companies with exposure to controversial businesses such as controversial weapons, conventional weapons, tobacco, thermal coal, civilian firearms, oil sands, nuclear weapons or companies in violation of UN Global Compact; and

- Companies with no "ESG Rating" (as defined by MSCI).

f) A Filtered Universe is constructed using a "Best-in-class" approach (the "Filtered Universe"): bottom quartile companies by an industry-adjusted ESG Rating (as defined by MSCI) are excluded from the filtered Selected Universe. "Best-in-class" approach is an approach where leading or best-performing investments are selected within a universe, industry sector or class. MSCI ESG Rating methodology uses a rules-based methodology designed to measure a company's resilience to longterm, industry material ESG risks. Limits of the extra-financial approach are mentioned in the section "Principal risks" of the prospectus. The extra-financial data coverage is 100% of the eligible securities of the Parent Index. Non ESG rated companies are excluded from the selection process of the Index.

g) The top half in terms of Relevance Score of the Filtered Universe constitutes the Index composition.

h) The Index is weighted in proportion of an aggregate score combining the normalized value of three fundamental criteria: the percentage of sales spent on R&D and capex, return on invested capital and one year sales growth.

i) An iterative downweighing ensure that the carbon intensity and the weighted average of board independence of the Index are respectively lower and higher than the ones of the MSCI ACWI IMI Disruptive Technology Index.

For further information in relation to the general and specific environmental, social and governance (ESG) objectives targeted by the Sub-Fund, please refer to the Transparency Code of the Sub-Fund available on <https://www.amundiETF.com/>.

Environmental and/or social characteristics promoted by the Sub-Fund are met through the MSCI ESG Rating methodology (as described above).

The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy.

Good governance

practices include sound management structures, employee relations, remuneration of staff and tax compliance.

- ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***

There is no committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy.

- ***What is the policy to assess good governance practices of the investee companies?***

We rely on Amundi ESG scoring methodology. Amundi's ESG scoring is based on a proprietary ESG analysis framework, which accounts for 38 general and sector-specific criteria, including governance criteria. In the Governance dimension, we assess an issuer's ability to ensure an effective corporate governance framework that guarantees it will meet its long-term objectives (e.g. guaranteeing the issuer's value over the long term) The governance sub-criteria considered are: board structure, audit and control, remuneration, shareholders' rights, ethics, tax practices and ESG strategy.

Amundi ESG Rating scale contains seven grades, ranging from A to G, where A is the best and G the worst rating. G-rated companies are excluded from our investment universe.

Each corporate security (shares, bonds, single name derivatives, ESG equity and fixed income ETFs) included in investment portfolios has been assessed for good governance practices applying a normative screen against UN Global Compact (UN GC) principles on the associated issuer. The assessment is performed on an ongoing basis. Amundi's ESG ratings Committee monthly reviews lists of companies in breach of the UN GC leading to rating downgrades to G. Divestment from securities downgraded to G is carried out by default within 90 days.

Amundi Stewardship Policy (engagement and voting) related to governance complements this approach.

What is the asset allocation planned for this financial product?

Asset allocation

describes the share of investments in specific assets.

At least 90% of the Sub-Fund's securities and instruments will meet the promoted environmental or social characteristics in accordance with the binding elements of the Index methodology. Furthermore, the Sub-Fund commits to have a minimum of 20 % of sustainable investments as per the below chart. Investments aligned with other E/S characteristics (#1B) will represent the difference between the actual proportion of investments aligned with environmental or social characteristics (#1) and the actual proportion of sustainable investments (#1A).

The planned proportion of other environmental investment represents a minimum of 20% (i) and may change as the actual proportions of Taxonomy-aligned and/or Social investments increase.

Taxonomy-aligned activities are expressed as a share of:

-turnover reflecting the share of revenue from green activities of investee companies

-capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- operational expenditure (OpEx) reflecting green operational activities of investee companies.

● **How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?**

Derivatives are not used to attain the environmental and social characteristics promoted by the Sub-Fund.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

There is currently no minimum commitment to sustainable investments with an environmental objective aligned with the EU Taxonomy.

There is no commitment to make taxonomy-compliant investments in fossil gas and/or nuclear energy as illustrated below. Nevertheless, as part of the investment strategy, investments may be done in companies that are also active in these industries. Such investments may or may not be taxonomy aligned.

● **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy² ?**

- Yes:
- In fossil gas In nuclear energy
- No

² Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures
 **This percentage is purely indicative and may vary.

● **What is the minimum share of investments in transitional and enabling activities?**

There is no minimum proportion of investment in transitional or enabling activities.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The Sub-Fund will have a minimum commitment of 20 % of Sustainable Investments with an environmental objective as indicated in this Annex with no commitment on their alignment with the EU Taxonomy.

What is the minimum share of socially sustainable investments?

The Sub-Fund has no minimum share of socially sustainable investments.

What investments are included under “#2 Other, what is their purpose and are there any minimum environmental or social safeguards?

Included in “#2 Other” are cash and instruments for the purpose of liquidity and portfolio risk management. It may also include ESG unrated securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

There are no minimum environmental or social safeguards.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Yes, the Index has been designated as a reference benchmark to determine whether the financial product is aligned with the environmental and/or social characteristics that it promotes.

- **How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?**

According to applicable regulations to index sponsors (including BMR), index sponsors should define appropriate controls/diligence when defining and/or operating index methodologies of regulated indexes.

- **How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?**

The investment objective of the financial product is to track both the upward and downward evolution of the Index, while minimising the difference between the return of the financial product and the return of the Index.

- **How does the designated index differ from a relevant broad market index?**

The Index aims to represent the performance of companies aligned to themes commonly associated with or described as disruptive technology and to exclude companies which are Environmental, Social and Governance (“ESG”) laggards relative to the theme universe.

- **Where can the methodology used for the calculation of the designated index be found?**

Additional information on the Index can be found at : <https://www.msci.com/>

Where can I find more product specific information online?

More product-specific information can be found on the website: Additional information on the Sub-Fund can be found at <https://www.amundiETF.com>.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:
Amundi MSCI Future Mobility ESG Screened

Legal entity identifier:

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes

No

It will make a minimum of **sustainable investments with an environmental objective:** _____%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It will make a minimum of **sustainable investments with a social objective:** _____%

It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 20 % of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promotes E/S characteristics, but **will not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

What environmental and/or social characteristics are promoted by this financial product?

The Sub-Fund promotes environmental and/or social characteristics through among others, replicating the Index integrating an environmental, social and governance (“ESG”) rating.

The Index methodology is constructed using a “Best-in-class approach”: best ranked companies are selected to construct the Index. “Best-in-class” is an approach where leading or best-performing investments are selected within a universe, industry sector or class. Using such Best-in-class approach, the Index follows an extra-financial approach significantly engaging that permits the reduction by at least 20% of the initial investment universe (expressed in number of issuers).

- **What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?**

Sustainability indicators measure how the environmental or

social characteristics promoted by the financial product are attained.

The MSCI ESG Rating is used to measure the attainment of each of the environmental and or social characteristic promoted by this financial product.

MSCI ESG Rating methodology uses a rules-based methodology designed to measure a company's resilience to long-term, industry material ESG risks. It is based on extra-financial ESG key issues that focus on the intersection between a company's core business and the industry-specific issues that may create significant risks and opportunities for the company. The ESG key issues are weighted according to impact and time horizon of the risk or opportunity. The ESG key issues include for instance, but are not limited to, water stress, carbon emissions, labor management or business ethics.

More precisely, the MSCI ACWI IMI Future Mobility ESG Filtered Index objective is to measure the performance of companies which are expected to derive significant revenues from energy storage technologies, autonomous vehicles, shared mobility and new transportation methods after excluding companies which are ESG laggards relative to the theme universe.

It selects companies which are assessed to have high exposure to business activities such as:

- Electro-chemical energy storage technologies;
- Mining companies that produce metals used to manufacture batteries;
- Autonomous vehicles and related technologies;
- Electric vehicles ("EVs"), and EV components and materials;
- New transportation methods, passenger and freight, including electric vehicles, autonomous vehicle;
- Shared mobility (Sharing Economy).

The Index is an equity index calculated and published by the international index provider MSCI. The Index features the following characteristics:

- a) Same investment universe as the MSCI ACWI Investable Market Index (IMI) (the "Parent Index"); i.e. including large, mid and small cap stocks across developed and emerging countries.
- b) A set of relevant words and phrases derived from the above business activities is used to identify companies (the "Eligible Universe") engaged in the production of electric and autonomous vehicles or their components, battery technologies and battery metals, and sharing economy including ridesharing and micro mobility.
- c) Companies from the Eligible Universe with a "Relevance Score" (as defined by MSCI) above 25% constitute the "Selected Universe".
- d) Further liquidity/size/country/sectorial filters are applied to the Selected Universe.
- e) An ESG negative screening is performed on the Selected Universe as defined in the methodology in order to exclude:
 - Companies with exposure to controversial businesses such as controversial weapons, conventional weapons, tobacco, thermal coal, civilian firearms, oil sands, nuclear weapons or companies in violation of UN Global Compact; and
 - Companies with no "ESG Rating" (as defined by MSCI).

- f) A Filtered Universe is constructed using a “Best-in-class” approach (the “Filtered Universe”): bottom quartile companies by an industry-adjusted ESG Rating (as defined by MSCI) are excluded from the filtered Selected Universe.

● ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a “best performer” within its sector of activity on at least one of its material environmental or social factors.

The definition of “best performer” relies on Amundi’s proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a “best performer”, an investee company must perform with the best top three rating (A, B or C, out of a rating scale going

from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g. tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

By applying the Amundi's above described Sustainable Investment definition to the Index constituents of this passively managed ETF Product, Amundi has determined that this Product has the minimum proportion of sustainable investments stated in page 1 above. Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.
- Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

– ***How have the indicators for adverse impacts on sustainability factors been taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above:

The first DNSH relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO₂ intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors),
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector,
- Be cleared of any controversy in relation to work conditions and human rights, and

- Be cleared of any controversy in relation to biodiversity and pollution.

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

- *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example, the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labor relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts will evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

1 Yes, the financial product considers Principal Adverse Impacts as per Annex 1, Table of the RTS applying to the financial product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- **Exclusion:** Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- **Engagement:** Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.

- **Vote:** Amundi’s voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi’s Voting Policy¹.
- **Controversies monitoring:** Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi’s funds.

For any indication on how mandatory Principal Adverse Impact indicators are used, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu.

What investment strategy does this financial product follow?

The Sub-Fund objective is to track the performance of MSCI ACWI IMI Future Mobility ESG Filtered Index (“the Index”), and to minimize the tracking error between the net asset value of the sub-fund and the performance of the Index.

The Index aims to represent the performance of companies that are expected to derive significant revenues from energy storage technologies, autonomous vehicles, shared mobility and new transportation methods and to exclude companies which are Environmental, Social and Governance (“ESG”) laggards relative to the theme universe.

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

- ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

This is a passively managed ETF. Its investment strategy is to replicate the Index while minimizing the related tracking error.

MSCI ACWI IMI Future Mobility ESG Filtered Index objective is to measure the performance of companies which are expected to derive significant revenues from energy storage technologies, autonomous vehicles, shared mobility and new transportation methods after excluding companies which are Environmental, Social and Governance (“ESG”) laggards relative to the theme universe. The Index is constructed by selecting stocks from the MSCI ACWI Investable Market Index (IMI) (the “Parent Index”).

It selects companies which are assessed to have high exposure to business activities such as:

- Electro-chemical energy storage technologies;
- Mining companies that produce metals used to manufacture batteries;
- Autonomous vehicles and related technologies;
- Electric vehicles (“EVs”), and EV components and materials;
- New transportation methods, passenger and freight, including electric vehicles, autonomous vehicle;
- Shared mobility (Sharing Economy).

¹ <https://about.amundi.com/files/nuxeo/dl/0522366c-29d3-471d-85fd-7ec363c20646>

The Index is an equity index calculated and published by the international index provider MSCI. The Index features the following characteristics:

- a) Same investment universe as the MSCI ACWI Investable Market Index (IMI) (the "Parent Index"); i.e. including large, mid and small cap stocks across developed and emerging countries.
- b) A set of relevant words and phrases derived from the above business activities is used to identify companies (the "Eligible Universe") engaged in the production of electric and autonomous vehicles or their components, battery technologies and battery metals, and sharing economy including ridesharing and micro mobility.
- c) Companies from the Eligible Universe with a "Relevance Score" (as defined by MSCI) above 25% constitute the "Selected Universe".
- d) Further liquidity/size/country/sectorial filters are applied to the Selected Universe.
- e) An ESG negative screening is performed on the Selected Universe as defined in the methodology in order to exclude:
 - Companies with exposure to controversial businesses such as controversial weapons, conventional weapons, tobacco, thermal coal, civilian firearms, oil sands, nuclear weapons or companies in violation of UN Global Compact; and
 - Companies with no "ESG Rating" (as defined by MSCI).
- f) A Filtered Universe is constructed using a "Best-in-class" approach (the "Filtered Universe"): bottom quartile companies by an industry-adjusted ESG Rating (as defined by MSCI) are excluded from the filtered Selected Universe.

"Best-in-class" approach is an approach where leading or best-performing investments are selected within a universe, industry sector or class. MSCI ESG Rating methodology uses a rules-based methodology designed to measure a company's resilience to longterm, industry material ESG risks. It is based on extra-financial ESG key issues that focus on the intersection between a company's core business and the industry-specific issues that may create significant risks and opportunities for the company.

The ESG key issues are weighted according to impact and time horizon of the risk or opportunity. The ESG key issues include for instance, but are not limited to, water stress, carbon emissions, labor management or business ethics.

Using such Best-in-class approach, the Sub-Fund follows an extra-financial approach significantly engaging that permits the reduction by at least 20% of the initial investment universe (expressed in number of issuers). Limits of the extra-financial approach are mentioned in the section "Principal risks" of the prospectus. The extra-financial data coverage is 100% of the eligible securities of the Parent Index. Non ESG rated companies are excluded from the selection process of the Index.

- g) The top half in terms of Relevance Score of the Filtered Universe constitutes the Index composition.
- h) The Index is weighted in proportion of an aggregate score combining the normalized value of three fundamental criteria: the percentage of sales spent on R&D and capex, return on invested capital and one year sales growth.

- i) An iterative downweighting ensure that the carbon intensity and the weighted average of board independence of the Index are respectively lower and higher than the ones of the MSCI ACWI IMI Future Mobility Index.

For further information in relation to the general and specific environmental, social and governance (ESG) objectives targeted by the Sub-Fund, please refer to the Transparency Code of the Sub-Fund available on <https://www.amundiETF.com/>.

Environmental and/or social characteristics promoted by the Sub-Fund are met through the MSCI ESG Rating methodology (as described above).

The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

- ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***

There is no committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy.

- ***What is the policy to assess good governance practices of the investee companies?***

We rely on Amundi ESG scoring methodology. Amundi's ESG scoring is based on a proprietary ESG analysis framework, which accounts for 38 general and sector-specific criteria, including governance criteria. In the Governance dimension, we assess an issuer's ability to ensure an effective corporate governance framework that guarantees it will meet its long-term objectives (e.g. guaranteeing the issuer's value over the long term) The governance sub-criteria considered are: board structure, audit and control, remuneration, shareholders' rights, ethics, tax practices and ESG strategy. Amundi ESG Rating scale contains seven grades, ranging from A to G, where A is the best and G the worst rating. G-rated companies are excluded from our investment universe.

Each corporate security (shares, bonds, single name derivatives, ESG equity and fixed income ETFs) included in investment portfolios has been assessed for good governance practices applying a normative screen against UN Global Compact (UN GC) principles on the associated issuer. The assessment is performed on an ongoing basis. Amundi's ESG ratings Committee monthly reviews lists of companies in breach of the UN GC leading to rating downgrades to G. Divestment from securities downgraded to G is carried out by default within 90 days.

Amundi Stewardship Policy (engagement and voting) related to governance complements this approach.

What is the asset allocation planned for this financial product?

At least 90% of the Sub-Fund's securities and instruments will meet the promoted environmental or social characteristics in accordance with the binding elements of the Index methodology. Furthermore, the Sub-Fund commits to have a minimum of 20 % of sustainable investments as per the below chart. Investments aligned with

Asset allocation describes the share

of investments in specific assets.

other E/S characteristics (#1B) will represent the difference between the actual proportion of investments aligned with environmental or social characteristics (#1) and the actual proportion of sustainable investments (#1A). The planned proportion of other environmental investment represents a minimum of 20% and may change as the actual proportions of Taxonomy-aligned and/or Social investments increase.

Taxonomy-aligned activities are expressed as a share of:

- turnover reflecting the share of revenue from green activities of investee companies
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

● **How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?**

Derivatives are not used to attain the environmental and social characteristics promoted by the Sub-Fund.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

There is currently no minimum commitment to sustainable investments with an environmental objective aligned with the EU Taxonomy.

There is no commitment to make taxonomy-compliant investments in fossil gas and/or nuclear energy as illustrated below. Nevertheless, as part of the investment strategy, investments may be done in companies that are also active in these industries. Such investments may or may not be taxonomy aligned.

● **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy² ?**

- Yes:
 In fossil gas In nuclear energy
- No

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures
 **This percentage is purely indicative and may vary.

● **What is the minimum share of investments in transitional and enabling activities?**

There is no minimum proportion of investment in transitional or enabling activities.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

² Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

The Sub-Fund will have a minimum commitment of 20 % of Sustainable Investments with an environmental objective as indicated in this Annex with no commitment on their alignment with the EU Taxonomy.

What is the minimum share of socially sustainable investments?

The Sub-Fund has no minimum share of socially sustainable investments.

What investments are included under “#2 Other, what is their purpose and are there any minimum environmental or social safeguards?

Included in “#2 Other” are cash and instruments for the purpose of liquidity and portfolio risk management. It may also include ESG unrated securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

There are no minimum environmental or social safeguards.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Yes, the Index has been designated as a reference benchmark to determine whether the financial product is aligned with the environmental and/or social characteristics that it promotes.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?***

According to applicable regulations to index sponsors (including BMR), index sponsors should define appropriate controls/diligence when defining and/or operating index methodologies of regulated indexes.

- ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***

The investment objective of the financial product is to track both the upward and downward evolution of the Index, while minimising the difference between the return of the financial product and the return of the Index.

- ***How does the designated index differ from a relevant broad market index?***

The Index aims to represent the performance of companies that are expected to derive significant revenues from energy storage technologies, autonomous vehicles, shared mobility and new transportation methods and to exclude companies which are Environmental, Social and Governance (“ESG”) laggards relative to the theme universe.

- ***Where can the methodology used for the calculation of the designated index be found?***

Additional information on the Index can be found at : <https://www.msci.com/>

Where can I find more product specific information online?

More product-specific information can be found on the website: Additional information on the Sub-Fund can be found at <https://www.amundiETF.com>.

Template pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:
Amundi MSCI Millennials ESG Screened

Legal entity identifier:

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes

No

It will make a minimum of sustainable investments with an environmental objective: _____%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It will make a minimum of sustainable investments with a social objective: _____%

It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 15 % of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promotes E/S characteristics, but will not make any sustainable investments

What environmental and/or social characteristics are promoted by this financial product?

The Sub-Fund promotes environmental and/or social characteristics through among others, replicating the Index, integrating an environmental, social and governance (“ESG”) rating.

The Index methodology is constructed using a “Best-in-class approach”: best ranked companies are selected to construct the Index. “Best-in-class” is an approach where leading or best-performing investments are selected within a universe, industry sector or class. Using such Best-in-class approach, the Index follows an extra-financial approach significantly engaging that permits the reduction by at least 20% of the initial investment universe (expressed in number of issuers).

- **What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?**

Sustainable investment

means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators

measure how the environmental or

social characteristics promoted by the financial product are attained.

The MSCI ESG Rating is used to measure the attainment of each of the environmental and or social characteristic promoted by this financial product.

MSCI ESG Rating methodology uses a rules-based methodology designed to measure a company's resilience to long-term, industry material ESG risks. It is based on extra-financial ESG key issues that focus on the intersection between a company's core business and the industry-specific issues that may create significant risks and opportunities for the company. The ESG key issues are weighted according to impact and time horizon of the risk or opportunity. The ESG key issues include for instance, but are not limited to, water stress, carbon emissions, labor management or business ethics.

More precisely, the Index objective is to measure the performance of companies that are expected to derive significant revenues from industries that target the preferences of the "millennial" generation and to exclude companies which are Environmental, Social and Governance ("ESG") laggards relative to the theme universe. It selects companies which are assessed to have high exposure to business activities such as:

- Popular Brands,
- Health and Fitness,
- Travel and Leisure,
- Social Media and Entertainment,
- Housing and home goods,
- Financial services,
- Food and Dining,
- Clothing and Apparel.

The Index features the following characteristics:

- a) Same investment universe as the MSCI ACWI Investable Market Index (IMI) (the "**Parent Index**"); i.e., including large, mid and small cap stocks across developed and emerging countries.
- b) A set of relevant words and phrases derived from the above business activities is used to identify companies (the "**Eligible Universe**") whose products and services cater to the "millennial" generation
- c) Companies from the Eligible Universe with a "Relevance Score" (as defined by MSCI) above 25% constitute the "**Selected Universe**".
- d) Further liquidity/size/country/sectorial filters are applied to the Selected Universe.
- e) An ESG negative screening is performed on the Selected Universe as defined in the methodology in order to exclude:
 - Companies with exposure to controversial businesses such as controversial weapons, conventional weapons, tobacco, thermal coal, civilian firearms, oil sands, nuclear weapons or companies in violation of UN Global Compact; and
 - Companies with no "ESG Rating" (as defined by MSCI).

f) A Filtered Universe is constructed using a “Best-in-class” approach (the “**Filtered Universe**”): bottom quartile companies by an industry-adjusted ESG Rating (as defined by MSCI) are excluded from the filtered Selected Universe. “Best-in-class” approach is an approach where leading or best-performing investments are selected within a universe, industry sector or class. MSCI ESG Rating methodology uses a rules-based methodology designed to measure a company’s resilience to longterm, industry material ESG risks. It is based on extra-financial ESG key issues that focus on the intersection between a company’s core business and the industry-specific issues that may create significant risks and 430 opportunities for the company.

The ESG key issues are weighted according to impact and time horizon of the risk or opportunity. The ESG key issues include for instance, but are not limited to, water stress, carbon emissions, labor management or business ethics. Using such Best-in-class approach, the Sub-Fund follows an extra-financial approach significantly engaging that permits the reduction by at least 20% of the initial investment universe (expressed in number of issuers).

Limits of the extra-financial approach are mentioned in the section “Principal risks” of the prospectus. The extra-financial data coverage is 100% of the eligible securities of the Parent Index. Non ESG rated companies are excluded from the selection process of the Index.

g) The top half in terms of Relevance Score of the Filtered Universe constitutes the Index composition

h) The Index is weighted in proportion of an aggregate score combining the normalized value of three fundamental criteria: the percentage of sales spent on R&D and capex, return on invested capital and one year sales growth.

i) An iterative downweighting ensure that the carbon intensity and the weighted average of board independence of the Index are respectively lower and higher than the ones of the MSCI ACWI IMI Millennials Index.

For further information in relation to the general and specific environmental, social and governance (ESG) objectives targeted by the Sub-Fund, please refer to the Transparency Code of the Sub-Fund available on <https://www.amundiETF.com/>.

Environmental and/or social characteristics promoted by the Sub-Fund are met through the MSCI ESG Rating methodology (as described above).

● ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a “best performer” within its sector of activity on at least one of its material environmental or social factors.

The definition of “best performer” relies on Amundi’s proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a “best performer”, an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of

more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g. tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

By applying the Amundi's above described Sustainable Investment definition to the Index constituents of this passively managed ETF Product, Amundi has determined that this Product has the minimum proportion of sustainable investments stated in page 1 above. However, please note that Amundi Sustainable Investment definition is not implemented at the Index methodology level.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

- The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g. GHG intensity of investee companies) via a combination of indicators (e.g. carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector). Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.
- Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

– ***How have the indicators for adverse impacts on sustainability factors been taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above:

The first DNSH relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO₂ intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors),
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector,
- Be cleared of any controversy in relation to work conditions and human rights, and
- Be cleared of any controversy in relation to biodiversity and pollution.

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the

tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

– *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example, the model has a dedicated criteria called “Community Involvement & Human Rights” which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labor relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts will evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

Yes, the financial product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the RTS applying to the financial product’s strategy and relies on a combination of exclusion policies (normative and sectorial), ESG rating integration into the investment process, engagement and voting approaches:

- **Exclusion:** Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- **ESG factors integration:** Amundi has adopted minimum ESG integration standards applied by default to its actively managed open-ended funds (exclusion of G rated issuers and better weighted average ESG score higher than the applicable benchmark). The 38 criteria used in Amundi ESG rating approach were also designed to consider key impacts on sustainability factors, as well as quality of the mitigation undertaken are also considered in that respect.
- **Engagement:** Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human

rights-related or other sustainability matters that are material to society and the global economy.

- **Vote:** Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy¹.
- **Controversies monitoring:** Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

For any indication on how mandatory Principal Adverse Impact indicators are used, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu.

e) An ESG negative screening is performed on the Selected Universe as defined in the methodology in order to exclude:

- Companies with exposure to controversial businesses such as controversial weapons, conventional weapons, tobacco, thermal coal, civilian firearms, oil sands, nuclear weapons or companies in violation of UN Global Compact; and
- Companies with no “ESG Rating” (as defined by MSCI).

f) A Filtered Universe is constructed using a “Best-in-class” approach (the “**Filtered Universe**”): bottom quartile companies by an industry-adjusted ESG Rating (as defined by MSCI) are excluded from the filtered Selected Universe. “Best-in-class” approach is an approach where leading or best-performing investments are selected within a universe, industry sector or class. MSCI ESG Rating methodology uses a rules-based methodology designed to measure a company’s resilience to longterm, industry material ESG risks. It is based on extra-financial ESG key issues that focus on the intersection between a company’s core business and the industry-specific issues that may create significant risks and 430 opportunities for the company.

The ESG key issues are weighted according to impact and time horizon of the risk or opportunity. The ESG key issues include for instance, but are not limited to, water stress, carbon emissions, labor management or business ethics. Using such Best-in-class approach, the Sub-Fund follows an extra-financial approach significantly engaging that permits the reduction by at least 20% of the initial investment universe (expressed in number of issuers).

Limits of the extra-financial approach are mentioned in the section “Principal risks” of the prospectus. The extra-financial data coverage is 100% of the eligible securities of the Parent Index. Non ESG rated companies are excluded from the selection process of the Index.

g) The top half in terms of Relevance Score of the Filtered Universe constitutes the Index composition

h) The Index is weighted in proportion of an aggregate score combining the normalized value of three fundamental criteria: the percentage of sales spent on R&D and capex, return on invested capital and one year sales growth.

i) An iterative downweighing ensure that the carbon intensity and the weighted average of board independence of the Index are respectively lower and higher than the ones of the MSCI ACWI IMI Millennials Index.

For further information in relation to the general and specific environmental, social and governance (ESG) objectives targeted by the Sub-Fund, please refer to the Transparency Code of the Sub-Fund available on <https://www.amundiETF.com/>.

Environmental and/or social characteristics promoted by the Sub-Fund are met through the MSCI ESG Rating methodology (as described above).

The Product strategy is also relying on systematic exclusions policies (normative and sectorials) as further described in Amundi Responsible Investment policy.

Good governance

practices include sound management structures, employee relations, remuneration of staff and tax compliance.

● **What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?**

There is no committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy.

● **What is the policy to assess good governance practices of the investee companies?**

We rely on Amundi ESG scoring methodology. Amundi's ESG scoring is based on a proprietary ESG analysis framework, which accounts for 38 general and sector-specific criteria, including governance criteria. In the Governance dimension, we assess an issuer's ability to ensure an effective corporate governance framework that guarantees it will meet its long-term objectives (e.g. guaranteeing the issuer's value over the long term) The governance sub-criteria considered are: board structure, audit and control, remuneration, shareholders' rights, ethics, tax practices and ESG strategy.

Amundi ESG Rating scale contains seven grades, ranging from A to G, where A is the best and G the worst rating. G-rated companies are excluded from our investment universe.

Each corporate security (shares, bonds, single name derivatives, ESG equity and fixed income ETFs) included in investment portfolios has been assessed for good governance practices applying a normative screen against UN Global Compact (UN GC) principles on the associated issuer. The assessment is performed on an ongoing basis. Amundi's ESG ratings Committee monthly reviews lists of companies in breach of the UN GC leading to rating downgrades to G. Divestment from securities downgraded to G is carried out by default within 90 days.

Amundi Stewardship Policy (engagement and voting) related to governance complements this approach.

What is the asset allocation planned for this financial product?

At least 90% of the Sub-Fund's securities and instruments will meet the promoted environmental or social characteristics in accordance with the binding elements of the Index methodology. Furthermore, the Sub-Fund commits to have a minimum of 15 % of sustainable investments as per the below chart. Investments aligned with other E/S characteristics (#1B) will represent the difference between the actual proportion of investments aligned with environmental or social characteristics (#1) and the actual proportion of sustainable investments (#1A). The planned proportion of other environmental investment represents a minimum of 15 % and may change as the actual proportions of Taxonomy-aligned and/or Social investments increase.

Asset allocation

describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- turnover reflecting the share of revenue from green activities of investee companies
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

● **How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?**

Derivatives are not used to attain the environmental and social characteristics promoted by the Sub-Fund.

 **To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?**

The Sub-Fund currently has no minimum commitment to sustainable investments with an environmental objective aligned with the EU Taxonomy.

The Sub-Fund does not commit to make taxonomy-compliant investments in fossil gas and/or nuclear energy as illustrated below. Nevertheless, as part of the investment strategy, investments may be done in companies that are also active in these industries. Such investments may or may not be taxonomy aligned.

● **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy² ?**

Yes:

In fossil gas In nuclear energy

X

² Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

No

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures
**This percentage is purely indicative and may vary.

● **What is the minimum share of investments in transitional and enabling activities?**

The Sub-Fund has no minimum proportion of investment in transitional or enabling activities.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

What is the minimum share of socially sustainable investments?

The Sub-Fund has no minimum share of socially sustainable investments.

What investments are included under “#2 Other, what is their purpose and are there any minimum environmental or social safeguards?

Included in “#2 Other” are cash and instruments for the purpose of liquidity and portfolio risk management. It may also include ESG unrated securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

There are no minimum environmental or social safeguards.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Yes, the MSCI ACWI IMI Millennials ESG Filtered Index has been designated as a reference benchmark to determine whether the Sub-Fund is aligned with the environmental and/or social characteristics that it promotes.

- **How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?**

According to applicable regulations to index sponsors (including BMR), index sponsors should define appropriate controls/diligence when defining and/or operating index methodologies of regulated indexes.

- **How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?**

The investment objective of the Sub-Fund is to track both the upward and downward evolution of the Index, while minimising the difference between the return of the Sub-Fund and the return of the Index.

- **How does the designated index differ from a relevant broad market index?**

The Index objective is to measure the performance of companies that are expected to derive significant revenues from industries that target the preferences of the “millennial” generation and to exclude companies which are Environmental, Social and Governance (“ESG”) laggards relative to the theme universe as further described in this Annex 1 - ESG Related Disclosures to the Sub-Fund’s Prospectus.

- **Where can the methodology used for the calculation of the designated index be found?**
