

Sustainable Emerging Markets Debt

ISIN	LU2145397134	a sub-fund of Vontobel Fund
Share Class	A	This fund is managed by Vontobel Asset Management S.A., which is part of Vontobel Group.
Currency	USD	This fund is authorised in Luxembourg and regulated by the Commission de Surveillance du Secteur Financier (CSSF).

Objectives and investment policy

- The sub-fund aims to outperform the J.P. Morgan ESG EMBI Global Diversified Index (the “Benchmark”) over a three-year rolling period. It promotes environmental or social characteristics, but does not have as its objective a sustainable investment. It is categorized as Article 8 SFDR.
- It mainly invests in the fixed-income asset class, with up to 100% of its net assets in the non-investment grade (high yield) sector, up to 10% in distressed securities. Limits: 25% convertibles and warrant bonds; 20% contingent convertible bonds (CoCo-bonds) and 10% asset-backed and mortgage-backed securities. The sub-fund may also hold cash.
 - The environmental and/or social characteristics promoted by the sub-fund consist of integrating ESG criteria in the investment process by directing investments into securities of more sustainable governmental and corporate issuers that meet the investment manager's ESG criteria. In addition, the sub-fund aims to provide at least the same ESG score as the Benchmark. The ESG investment process consists of a quantitative screening based on third-party and in-house provider data followed by a qualitative analysis of the material sustainability risks. The sub-fund further applies minimum exclusion criteria to avoid companies that do not comply with the UN Global Compact criteria or are e.g. engaged in or derive a certain percentage of their revenues from alcohol, weapons, tobacco, gambling, coal mining, coal-based utilities or thermal coal. At least 90% of the securities in the sub-fund and the Benchmark have the sustainability scoring, as described above. The sub-fund excludes 20% of the investment universe which consists of the emerging markets debt market. **Main methodological limits:** potential inconsistency, inaccuracy or lack of availability of ESG data issued by external third party providers. **More details on the above can be found in the prospectus.**
 - The sub-fund may use derivatives to achieve the investment objective and for hedging purposes. Currency, credit and interest rate risks may be actively managed through the use of derivative financial instruments.
 - The sub-fund is managed with reference to a benchmark by aiming to outperform it over a three-year rolling period.
 - Income may be paid out each year.
 - Buying and selling securities entails transaction costs payable in addition to the charges listed.
 - Redemption of shares: daily when banks in Luxembourg are open for normal business (see prospectus for details and exceptions).

The indicator above does not signal the risk of a potential loss, but indicates the fluctuations in the sub-fund's share price in the past.

- The share class is assigned to this category because its share price can fluctuate sharply due to the investment policy applied.
- The historical data used to calculate the profile cannot be used as a reliable guide to the future risk profile of the sub-fund.
- The risk category shown is not guaranteed and may change.
- Even the lowest risk category is not entirely free of risk.

When assigning a sub-fund's share class to a risk category, it may be the case that not all risks are taken into account. Such risks include risks in connection with exceptional market events, operational errors, legal and political events. You can find a detailed list of the risks in the "Notice regarding special risks" section in the general part of the sales prospectus. The following risks have no direct influence on this category, but may still be important:

- Securities with a lower credit quality means a higher risk that an issuer may fail to meet its obligations. The investment value may fall if an issuer's credit rating is downgraded.
- Using derivatives generally creates leverage and entails valuation risks and operational risks. Leverage magnifies gains but also losses. Over-the-counter derivatives involve corresponding counterparty risks.
- Asset-backed and mortgage-backed securities, and their underlying receivables are often intransparent. The sub-fund may also be subject to a higher credit and/or prepayment risk.
- CoCo-Bonds may entail significant risks such as coupon cancellation risk, capital structure inversion risk, call extension risk.
- The sub-fund also includes sustainability criteria in its investment process. This may mean that the sub-fund's performance is more positive or negative than a conventionally managed portfolio.
- Distressed securities have a higher credit and liquidity risk as well as uncertainty in any potential bankruptcy proceedings.
- Investments in emerging markets entail increased liquidity and operational risks as these markets tend to be underdeveloped and more exposed to political, legal, tax and foreign exchange control risks.

Charges

The charges you pay are used to pay the costs of running the fund, including the costs for managing, marketing and distributing it. These charges reduce the return on your investment.

One-off charges taken before or after you invest

Entry charge	5.00%
Exit charge	0.30%
Conversion fee	1.00%

This is the maximum that might be taken out of your money before it is invested / before the proceeds of your investment are paid out.

Charges taken from the fund over a year

Ongoing charges	1.38%

Charges taken from the fund under certain specific conditions

Performance fee

not charged

Past performance

The chart shows past performance based on full calendar years. One-off charges are not included when calculating performance.

- Past performance is not an indicator of current or future returns.
- The stated performance of the share class includes ongoing charges, but excludes one-off charges.
- Shares were first issued for this share class in 2020.
- The share class uses the benchmark J.P. Morgan ESG EMBI Global Diversified Index.
- Past performance of the fund is shown in the currency of the share class (USD).

The one-off charges shown are maximum figures. In some cases, you might pay less – you can find this out from your financial advisor.

The figure for ongoing charges is based on the past twelve months as at 28/02/2022. This figure may vary from year to year. It does not include:

- The fund's transaction costs except for those paid by the fund when buying or selling shares of other collective investment schemes.

You can find more information on costs in the "Fees and expenses" section of the general part of the sales prospectus, available at www.vontobel.com/AM.
