ODDO BHF Convertibles Global

(hereinafter the "Sub-fund")

A sub-fund of SICAV ODDO BHF (hereinafter the "SICAV"), managed by ODDO BHF Asset Management SAS

Share class: CN-EUR - LU1752466141 - EUR - Accumulation

OBJECTIVES AND INVESTMENT POLICY

The Sub-fund's objective is to outperform the benchmark index, the Thomson Reuters Global Focus Hedged Convertible Bond Index, calculated with net coupons reinvested, over a minimum investment horizon of three years. The Sub-fund is managed on an active basis with reference to this benchmark index. The Sub-fund's composition may deviate significantly from that of the benchmark.

Between 66% and 100% of the Sub-fund's net assets may be invested in convertible bonds of all types and up to 34% of the net assets may be invested in other debt securities. Synthetic convertible bonds will be created in particular by combining (i) a listed call option with (ii) a traditional bond or cash sum.

These securities may be denominated in any currency and may be high yield securities, i.e. those with a rating of lower than BBB- (according to Standard & Poor's or another agency deemed equivalent by the investment manager, or using the investment manager's internal rating) with a limit of up to 50% of the Sub-fund's net assets.

The investment manager does not use the ratings issued by ratings agencies automatically or in isolation, as it also applies its own internal analysis. In the event of a rating downgrade, any easing of the rating limitations will take into account the interests of shareholders, market conditions and the investment manager's own analysis of the ratings of these fixed income products.

Unrated securities may make up a maximum of 75% of the Sub-fund's net assets. The Sub-fund may invest up to 5% of its net assets in shares resulting from the conversion of bonds. These shares will be held for a transitional period until such time as the investment manager deems the sale prices to be favourable. The Sub-fund is not subject to any restrictions regarding the business sector or geographical location of the issuers. The average duration of the portfolio will be between 0 and 5.

The Sub-fund will be hedged against currency risk up to 100%. Residual risk resulting from the time taken to automatically renew hedges will represent

less than 5% of net assets. The Sub-fund may use futures or options traded on French or foreign regulated markets in order to hedge against interest rate or equity risk. The Sub-fund may also use options traded on regulated French or foreign markets in order to gain exposure to equities using synthetic convertible bonds and options on equity indices, up to a limit of 100% of the net assets.

Any associated currency risk will be hedged. The Sub-fund may hedge currency risk using futures traded on regulated French or foreign markets and via FX forwards.

The Sub-fund may also use index credit default swaps (CDS) up to a limit of 10% and only to hedge against credit risk.

In addition, a maximum of 10% of the Sub-fund's net assets may be invested in equities or units of UCITS or European investment funds that meet the four criteria of article 41(1)(e) of the Law of 17 December 2010 on Undertakings for Collective Investment. These UCITS or investment funds may be managed by the investment manager, the management company (ODDO BHF Asset Management SAS) and/or ODDO BHF Asset Management GmbH. Investment in these funds shall be consistent with the Sub-fund's investment strategy.

Exposure to the various asset classes, including derivatives, must not exceed 130% of the Sub-fund's net assets (i.e. leverage of 1.3).

Subscription, conversion and redemption requests are centralised by the transfer agent (CACEIS Bank, Luxembourg Branch) every valuation day until 12:00, Luxembourg time, and executed on the basis of the net asset value of that day.

The CN-EUR share class is an accumulation class.

Recommended investment horizon: 3 years

This Sub-fund may not be appropriate for investors who plan to withdraw their money within this period.

RISK AND REWARD PROFILE

Historical data, such as is used to calculate the synthetic indicator, may not be a reliable indication of the future risk profile of the Sub-fund. The risk profile is not guaranteed to remain unchanged and may shift over time. The lowest category does not mean a risk-free investment. The capital initially invested is not guaranteed.

Why is the Sub-fund placed in category 5?

The Sub-fund presents a modest level of risk due to its policy of investing mainly in debt securities of all ratings and all geographical locations, the majority of which can be converted into shares.

Material risks to the Sub-fund that are not taken into account in the indicator:

Credit risk: this is the risk of a sudden downgrading of an issuer's credit rating or the risk of an issuer's insolvency.

Counterparty risk: risk of a counterparty's default, causing it to default on payment. The Sub-fund may be exposed to this risk resulting from the use of forward financial instruments or temporary purchases and sales of securities contracts negotiated over-the-counter with a credit institution if the latter is unable to honour its commitments.

Liquidity risk: the Sub-fund invests in markets that may be affected by a fall in liquidity. Low volumes of market transactions may have an impact on prices at which the manager opens or closes positions.

If one of these risks were to materialise, the Sub-fund's net asset value may fall.
