Average Duration	3.8
Average Maturity (Years)	7.5
Gross Exposure (%)	99.5
Net Exposure (%)	95.9
Current Yield	6.5
Yield to Worst	6.7
Yield to Maturity	6.9

Any yields quoted on the fact sheet are calculated at portfolio level gross of tax and expenses.

- Current Yield is the annual interest earned on the underlying bonds divided by the market price of the underlying portfolio of bonds. The figure is not the dividend yield received by the investors and is subject to change depending on the underlying portfolio of bonds.
- Yield to Worst is the lowest potential yield that can be received on a bond without the issuer actually defaulting. The yield to worst is calculated by making the worst-case scenario assumptions on the issue.
- Yield to Maturity is a concept used to determine the rate of return an investor will receive if a long-term, interest-bearing investment, such as a bond, is held to its maturity date. Please note that this is not the return or dividend to be received by investors in the fund.

Risk warnings

- The market value of debt securities is affected by changes in prevailing interest rates and the Fund may be exposed to credit risk by investing in debt securities.
- There are specific risks associated with the use of derivative instruments, including counterparty, position, liquidity, settlement, correlation and legal risk.
- Default risk and liquidity risk associated with investment in below investment grade securities.
- There are specific additional risks associated with investments in emerging markets, including legal, political, fiscal instability, settlement, liquidity, currency, accounting standards and custodial risk.
- There may be corporate governance and investor protection issues associated with Russian investments.
- Contingent Convertible Securities risk is due by the substantially greater risk that these instruments may have compared to other forms of securities in times of credit stress and may result in a material loss to the Fund.
- The value of an investment may fluctuate due to changes in exchange rates between currencies or the possible imposition of exchange control regulations.
- Currency hedging may reduce but will not remove risk. Hedging will incur more transaction costs and fees, which will affect overall return.

Performance note

This document presents the performance of this particular unit class of the Fund from the date of inception of the unit class in its unit class currency, as specified on the front page.
Prior to 31st December 2018, the data performance calculations reflect the month-end market close prices of the Fund's assets. After 1 January 2019, the performance data shown is based upon the Fund's Net Asset Value (NAV) prices of the last Irish business day of the month. For Funds not open for dealing on this day this will be an indicative NAV. As a result, it is possible that the stated performance and the actual investment returns available to investors will differ.
The performance data shown is net of fees and other charges but excludes any potential entry/exit charges – as such the returns an investor receives may be lower.

Disclosure
