INVESTMENT STRATEGY (Source: Amundi Group)

The compartment's investment objective is to outperform global equity markets over a minimum five-year investment horizon by investing in international equities involved in the entire food value chain (agriculture, forest, water, food and beverage production and distribution, restaurants and all related activities). The investment process takes into account a sustainable approach by excluding certain companies with high Environmental Social and Governance controversies.

Portfolio Manager

MANAGER'S COMMENT

Equity markets continued to progress in March on the back of an upward revision of economic growth in the United States and the anticipation of a reduction in interest rates by central banks. Cyclical sectors such as financials, materials and energy made strong progress. The information technology sector progressed slightly after a very good start to the year. Defensive sectors such as consumer staples and healthcare rose moderately.

Food for Generations was up over the month and outperformed the MSCI World index thanks to the good performance of cyclical sectors such as Water, Restaurants and Agriculture. The Water sector made strong progress, particularly industrial stocks with a cyclical profile such as Pentair. Restaurants was supported by the sharp increase in contract catering (Compass, Sodexo). Agriculture rebounded, particularly farm machinery (Deere, CNH Industrial) while the price of cereals rebounded slightly. Despite its defensive nature, the Food Products sector has progressed well, particularly packaging stocks (DS Smith, International Paper) and ingredients (Symrise) whose sales volumes are recovering. Food Distribution grew moderately, with the good performance of Sprouts Farmers Market being offset by a sharp decline in Jeronimo Martins (difficult Polish market).

The deceleration of economic growth in 2024 should give preference to defensive sectors such as Food Products and Food Distribution, penalized by the good performance of the American economy in 2023. The end of destocking in food, planned for the 4th quarter 2023 and disinflation should support a rebound in sales volumes in 2024.

After reaching a peak mid-2022, grain prices have normalized, despite the war in Ukraine and due to good harvests around the world. The Agriculture sector has thus erased its 2022 outperformance. Prices of agricultural products are nevertheless in line with or above historical averages because inventories are relatively low. This should support the agriculture sector in 2024.

In Restaurants we favor contract catering. After very difficult years in 2020 and 2021 due to lockdowns, revenues and margins have rebounded strongly in 2022 and 2023. In addition, we are witnessing an expansion of this market to new customers. More and more companies, schools and hospitals are outsourcing their catering services as standards tighten and costs rise.

PORTFOLIO IMPACT REPORT

CARBON INTENSITY

Total carbon portfolio footprint (tCO2e/M€ invested)

WASTE RECYCLING RATIO

DATA COVERAGE

	Portfolio	Benchmark
Coverage rate Portfolio/Benchmark) :	98.06%	99.21%

	Portfolio	Benchmark	Universe
Water intensity	79.03%	60.71%	63.67%
Waste recycling ratio	56.45%	49.11%	47.91%

This measurement corresponds to the portion of private issuers for which we have environmental data as a percentage of all private issuers.

This indicator measures the ratio of recycled waste over total produced waste.

WATER INTENSITY

This indicator measures the portfolio's total water withdrawal in cubic meters divided by net sales in EUR. This is an indicator of the water intensity generated by the companies in this portfolio

Sources and definitions

The carbon emissions data is supplied by Trucost. It corresponds to companies' annual emissions expressed in tCO2e, which covers the six greenhouse gases defined in the Kyoto protocol whose emissions are converted into global warming potential (GWP) in CO2 equivalent

Definition of scopes:

- **Scope 1** : all emissions that arise directly from sources that are owned or controlled by the company.
- **Scope 2** : all indirect emissions generated by the purchase or production of electricity, steam or heat.
- **Scope 3** : all other indirect emissions, both upstream and downstream in the value chain. To ensure the robustness of the data, in this report we have chosen to use only part of scope 3, i.e. upstream emissions linked to first-tier suppliers. First-tier suppliers are those with which the company has a strong relationship and on which it can exercise direct influence.

OVERALL ESG RATING (source : Amundi)

Environmental, social and governance rating

Portfolio**Benchmark****Rating by E,S and G component**

	Portfolio	Benchmark
Environment	C	D
Social	C	D
Governance	C	D
Overall Rating	C	D

ESG coverage

Number of issuers in the portfolio	69
% of the portfolio with an ESG rating²	98.64%

²Outstanding securities in terms of ESG criteria excluding cash assets. The additional filter on ESG controversies allows to cover 100% of the universe's and portfolio's holdings.

ISR Label**Definitions and sources****Responsible Investment (RI)**

The SRI expresses sustainable development objectives in investment decisions by adding Environmental, Social and Governance (ESG) criteria in addition to the traditional financial criteria.

SRI thus aims to balance economic performance and social and environmental impact by financing companies and public entities which contribute to sustainable development whatever their business sector. By influencing the governance and behaviour of stakeholders, SRI promotes a responsible economy.

ESG criteria

Extra-financial criteria are used to assess the Environmental, Social and Governance practices of companies, states or local authorities:

- o "E" for Environment: energy consumption and greenhouse gas emissions, water and waste management, etc.
- o "S" for Social/Society: human rights, health and safety, etc.
- o "G" for Governance: independence of board of directors, respect of shareholders' rights, etc.

Amundi Group' ratings range issuers from A to G, with A being the highest rating and G the lowest.

Focus on Environmental, Social and Governance key performance indicators

In addition to the overall ESG assessment of the portfolio and the E, S and G dimensions, the manager uses impact indicators to assess the ESG quality of his portfolio. Four representative indicators of Environment, Social, Human Rights and Governance have been identified. The manager's minimum objective is to deliver a quality score higher than that of the index on at least two of the indicators.

Environment¹

Total carbon portfolio footprint (Portfolio/Index) : 260 / 143
Carbon intensity : carbon emissions per euro million of sales

This indicator measures the average emissions in metric tonnes of carbon equivalent per unit of a company's revenue (€ million of sales). This is an indicator of the carbon intensity of the value chain of the companies in the portfolio.

Coverage rate (Portfolio/Index) **97.91%** **99.62%**

Sources and definitions

1. Environmental indicator/Climate indicator: Carbon intensity (in metric tons of CO2 per million of revenue). This data is provided by Trucost. This corresponds to companies' annual greenhouse gas emissions expressed in metric tons of carbon dioxide equivalent. (CO2e). It covers the six greenhouse gases identified in the Kyoto Protocol with emissions converted into global warming potential (GWP) in CO2 equivalent.

Definition of scopes:

- Scope 1: All direct emissions from sources that are owned or controlled by a company.
- Scope 2: All indirect emissions arising from the purchase or production of electricity, steam or heat.
- Scope 3: All other indirect emissions, upstream and downstream in the value chain. For reasons of data robustness, in this reporting we have chosen to use only part of scope 3: upstream emissions linked to first-tier suppliers. First-tier suppliers are those with which the company has special relations and can influence directly.

2. Management diversity. Average percentage of women managers. This indicator gives a more global measure of the advancement of women within the company than the data limited to the number of women Board members. Data provider: Refinitiv

3. Human Rights Compliance Indicator. percentage of companies with policies that exclude forced or obligatory child labor or that guarantee freedom of association and which are applied universally regardless of local laws. This indicator enables better assessment of fundamental human rights issues. Data provider: Refinitiv

4. Board independence. average percentage of independent directors on the Board of Directors. Data provider: Refinitiv

For these 4 indicators, the total for the portfolio/investment universe is equal to the companies' average for these indicators adjusted for their weight in the portfolio/investment universe.

Important information

This document is provided for information purposes only and in no way constitutes a recommendation, solicitation or offer, advice or invitation to buy or sell the units or shares of the FCPs, FCPEs, SICAVs or sub-funds of SICAVs presented in this document ("the UCIs"), nor should it be interpreted as such. Sources and definitions

All data concerning carbon emissions and coal are supplied by Trucost.
Green technology data is provided by different suppliers

Carbon reserves are expressed in potential carbon emissions calculated using the methodology of the Potsdam Institute for Climate Impact Research. The various fossil fuel reserves are converted into potential emissions based on the energy value and carbon content of the different reserves. This data concerns businesses that hold this type of reserves, belonging to the materials, energy and utilities sectors.
