

UBS (IE) Fund Solutions - MSCI USA SF Index (hedged to CHF) A-UKdis Fund Fact Sheet

UBS Exchange Traded Funds > UBS ETFs plc

Fund description

- The investment objective is to replicate the performance of the MSCI USA Index Net Total Return.
- The fund synthetically replicates the index performance by investing in a swap.
- The swap counterparty transfers collateral to the ETF in the form of G10 government bonds, supranational bonds and cash.
- The fund is passively managed.
- The product described herein aligns to Article 6 of Regulation (EU) 2019/2088.
- The exchange rate risk between USD and CHF is largely hedged.

For further information, please see the Key Investor Information Document (KIID) available at: www.ubs.com/espanafondos.

Index description

The MSCI USA 100% hedged to CHF Index is a free float adjusted market capitalization index that is designed to measure large and mid cap US equity market performance. The Index represents the US equity portion of the global benchmark MSCI ACWI Index. The impact of currency fluctuations between any foreign currency to the index currency is reduced by selling foreign currency forwards at the one-month forward rate.

Benefits

Clients benefit from the protection offered by a fund.
Provides access to this segment of the market with a single transaction.
Optimised risk/return profile thanks to a broad diversification across a range sectors.
The fund offers a high degree of transparency and cost efficiency.
UCITS compliant fund.

Risks

The fund delivers the return of a broadly diversified equity index and may therefore be subject to high fluctuations in value. For this reason, an investment horizon of at least five years and corresponding risk tolerance and capacity are required. The returns payable on the fund are dependant on payments received by the fund from the swap counterparty under the terms of the relevant swap and, therefore, are subject to the credit risk of the swap counterparty. In the event that the swap counterparty defaults under the terms of the relevant swap, the fund may suffer a loss. Every fund has specific risks, which can significantly increase under unusual market conditions. Sustainability risks are not considered as part of the Index selection process. Therefore, sustainability risks are not systematically integrated. The fund's assets are passively managed. As a result, the net asset value of the fund's assets is materially dependent on the performance of the underlying investments. Losses that could be avoided via active management will not be offset.
