

Nordea 2 - European Responsible Enhanced Equity Fund (BI-EUR)

Any investment decision in the sub-funds should be made on the basis of the current prospectus and the Key Information Document (KID) or the Key Investor Information Document (KIID) for UK investors. Advertising Material

Investment strategy

The fund uses a proprietary, quantitative investment process, aiming to outperform its benchmark with a low tracking error, no country/regional bets and limited sector active risk. Based on a systematic return forecast method which relies on risk premia or factors, the long only equity strategy finds stocks that have moved away from their intrinsic values. The fund uses an integrated SRI (socially responsible investment) setup to achieve a high ESG (Environmental, Social and Governance) investment profile and low carbon footprint. Actively managed. Benchmark used for performance comparison only. Risk characteristics of the fund's portfolio will bear resemblance to those of the benchmark.

Environmental and Social features

- ✓ Enhanced exclusion filters and other limits
- ✓ Paris Aligned Fossil Fuel Policy (PAFF)

ESG Investment Strategy Summary

As part of the investment strategy, companies and issuers are excluded from the fund's investment universe if they are involved in certain activities that are deemed to be harmful to the environment or the society at large. Investments are also screened for adherence to OECD Guidelines for Multinational Enterprises and the UN Guiding Principles. The fund adheres to NAM's Paris-Aligned Fossil Fuel Policy that sets thresholds for companies' exposure to fossil fuel production, distribution and services. This means that the fund will not invest in companies with material involvement in fossil fuel production, distribution or services if they do not have a documented transition strategy that aligns with the Paris Agreement.

ESG Scores per pillar

Source: All data is from MSCI ESG Fund Ratings as of 28/03/2024, based on holdings as of 29/02/2024. The overall portfolio rating is calculated on an industry relative basis while the underlying individual E, S and G ratings are absolute. Hence, the overall rating cannot be seen as an average of the individual E, S and G ratings. Rated on a scale of 0 to 10, where 0 is very poor and 10 is very good.

ESG rating

Coverage Rate Fund: 100% Benchmark: 100%

Benchmark: MSCI Europe - Net Return Index

The ESG Rating assesses the resilience of a fund's aggregate holdings to long term ESG risks. Highly rated funds consist of issuers with leading or improving management of key ESG risks. ©2024 MSCI ESG Research LLC. Reproduced by permission.

Weighted average carbon intensity

(In Tons of CO2 equivalent per dollar millions of sales). Source: Data sourced from MSCI Inc. for equities and ISS Ethix for fixed Income. For sovereigns (countries) turnovers is replaced by GDP. Weighted Average Carbon Intensity, is calculated as the sum of each portfolio weight multiplied by the Co2e per \$M of Revenue of each holding. This metric provides a snapshot of the fund's exposure to carbon-intensive companies and includes scope 1 and scope 2 carbon emissions. For carbon data, the coverage of underlying securities must be over 50% for data to be shown.

ESG legend

Scope 1 refers to direct GHG emissions, Scope 2 refers to indirect GHG emissions from the consumption of purchased electricity and Scope 3 refers to other indirect emissions that occur from sources not owned or controlled by the company.

Risk & Reward Profile (RRP)

The risk indicator assumes you keep the product for 5 years. The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. We have classified this Fund as 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level, and poor market conditions could impact the Fund's capacity to pay you. Be aware of currency risk. In some circumstances you will receive payments in a different currency, so the final return you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above. For more information on risks the fund is exposed to, please refer to the section "Risk Descriptions" of the prospectus. Other risks materially relevant to the PRIIP not included in the summary risk indicator:

Derivatives risk: Small movements in the value of an underlying asset can create large changes in the value of a derivative, making derivatives highly volatile in general, and exposing the fund to potential losses significantly greater than the cost of the derivative.

This product does not include any protection from future market performance so you could lose some or all of your investment.
