## INFUSIVE CONSUMER ALPHA GLOBAL LEADERS FAM FUND

A SUB-FUND OF FAM SERIES UCITS ICAV

CLASS A ACC - EUR ACCUMULATING ISIN: IE00BMWWJZ56

INVESTMENT MANAGER : INFUSIVE ASSET MANAGEMENT INC.

MANAGEMENT COMPANY : FINECO ASSET MANAGEMENT DAC, WHICH IS PART OF FINECOBANK GROUP

### Objectives and Investment Policy

The investment objective of the Sub-Fund is to achieve long-term capital growth from a portfolio made up of equity securities of companies around the world. The Investment Manager will target listed companies whose products, goods and services are believed to deliver joy and happiness to individuals. This belief is based on the Investment Manager's observations of the long-term success of consumer companies. The Investment Manager refers to this concept as Consumer Alpha™ being the vision that a person's purchasing decisions are driven by one immutable and universal need, the search for pleasure. The Sub-Fund's investments will be then focused on companies believed to be "global leaders" in the delivery of Consumer Alpha™, which operate in sectors such as the luxury goods sector, the hotel and restaurant sector, media and entertainment. The Sub-Fund may use derivatives for investment purposes or for efficient portfolio management. The Sub-Fund does not aim to track the performance of a benchmark. The portfolio composition is determined based on active and discretionary investment decisions and choices of the Investment Manager and hence the Sub-Fund is actively managed. Investors can ask the Fund to buy back their Shares on any business day in Luxembourg. Investors can ask for full or partial repayment of the Shares held.

#### Recommended for retail investors

- With a basic knowledge of investing in funds and no or limited experience of investing in the Sub-Fund or similar funds.
- Who understand the risk of losing some or all of the capital invested.

*This is a non-distributing unit class. Investment income is re-invested. Investors may sell on demand on any business day in Luxembourg.*

### Risk and Reward Profile

#### Additional key risks

The risk indicator reflects market conditions of recent years and may not adequately capture the following additional key risks of the Sub-Fund:

- **Operational risk:** Losses may occur due to human error or omission, process errors, system disruptions or external events.
- **Derivatives risk:** Derivatives create leverage in the Sub-Fund and may cause movements in the value of the underlying investments to amplify gains or losses to the Sub-Fund.
- **Counterparty Risk:** Losses may occur due to the failure of derivative counterparties to the Sub-Fund and where collateral arrangements are insufficient to cover the risk.
- **Emerging market risk:** Some of the countries invested in may carry higher political, legal, economic and liquidity risks than investments in more developed countries.

#### What does this risk indicator mean?

The above risk indicator ranks potential risk and reward and is based on medium-term volatility (how sharply the Sub-Fund's actual or estimated unit price has gone up and down over five years). Historical data, such as that used in calculating this synthetic indicator, may not be a reliable indication of the future risk profile of the Sub-Fund. The lowest category does not mean a 'risk-free' investment. The Sub-Fund's risk indicator is not guaranteed and may change over time. For un-hedged currency classes, exchange rate movements may affect the risk indicator where the currency of the underlying investments differs from the currency of the unit class.
