

RobecoSAM Smart Materials Equities I EUR

RobecoSAM Smart Materials Equities is an actively managed fund that invests globally in companies that provide innovative materials and process technologies. The selection of these stocks is based on fundamental analysis. The fund has sustainable investment as its objective, within the meaning of Article 9 of the Regulation (EU) 2019/2088 of 27 November 2019 on Sustainability-related disclosures in the financial sector. The strategy integrates sustainability criteria as part of the stock selection process and through a theme-specific sustainability assessment. The portfolio is built on the basis of an eligible investment universe that includes companies whose business models contribute to the thematic investment objectives. The assessment regarding relevant SDGs uses an internally developed framework, more information on which can be obtained at www.robeco.com/si. The fund also aims to achieve a better return than the index.

Performance

Indexed value (until 31-03-2024) - Source: Robeco

Performance

Based on transaction prices, the fund's return was 2.84%.

In March, the strategy was more or less in line with the general market, with strong performance from Building Efficiency names such as Owens Corning and TopBuild. Energy Storage also contributed strongly, with battery producers CATL and Samsung SDI up on positive news flow and earnings. Transition Metals remained weak as Arcadium Lithium was down, slightly mitigated by the positive performance of Boliden and Befesa on increasing commodity prices. Smart Manufacturing was below the market, with weakness in Industry 4.0 Software, with Dassault Systèmes and Arm most notably down, while PTC performed positively. Industrial automation did better with Regal Rexnord and Yaskawa up, while Keyence and Inovance were down. Advanced Equipment saw strength from Teradyne and Disco, while Onto and Universal Display were weaker.

Market development

In March, the Advanced Materials cluster was up, led mainly by the Energy Storage and Building Efficiency subclusters. Transition Metals on the other hand was weaker. Smart Manufacturing was mixed but generally up, Industry 4.0 Software was weaker, while Industrial Automation and Advanced Equipment were up.

Expectation of fund manager

Strong secular growth themes related to decreased emissions (net-zero targets) and more efficient materials and production techniques (e.g. smart manufacturing) are impacting their respective sectors. More specifically, efficient building materials, 3D software, the Internet of Things and robotics companies are presenting attractive investment opportunities. In the Recycling and Circular Systems investment cluster, which focuses on reusing, recycling and repurposing plastics, attractive opportunities are leading to more circular business models.

Top 10 largest positions

PTC (leading 3D and IoT software company), Teradyne (leading semi testing and cobot producer), TopBuild (leading building materials installer), Onto Innovation (leading semiconductor equipment producer), Owens Corning (leading building materials producer), Keyence (leading industrial automation company), SQM (lithium producer), Novonesis (leading producer of bio solutions), Regal Rexnord (leading producer of electric motors), Saint Gobain (leading producer of building materials). In Specialty Chemicals, Synthomer increased more than 70% after releasing better than expected numbers and more conviction that the worst is behind them.

Fund price

31-03-24	EUR	433.17

ESG Important information

The sustainability information in this factsheet can help investors integrate sustainability considerations in their process. This information is for informational purposes only. The reported sustainability information may not at all be used in relation to binding elements for this fund. A decision to invest should take into account all characteristics or objectives of the fund as described in the prospectus. The prospectus is available on request and free of charge on the Robeco website.

Sustainability

The fund's sustainable investment objective is to help mitigate the resource scarcity challenge within industries while supporting economic growth. Resource scarcity and sustainability considerations are incorporated in the investment process by the means of a target universe definition, exclusions, ESG integration, a carbon footprint target and voting. The fund only invests in companies that have a significant thematic fit as per Robeco's thematic universe methodology. Through screening on both Robeco's internally developed SDG Framework and Robeco's exclusion policy, the fund does not invest in issuers that have a negative impact on the SDGs, are in breach of international norms or where products have been deemed controversial. Financially material ESG factors are integrated in the bottom-up fundamental investment analysis to assess existing and potential ESG risks and opportunities. The fund's weighted carbon footprint will be equal to or better than that of its Climate Transition Benchmark. In addition, where a stock issuer is flagged for breaching international standards in the ongoing monitoring, the issuer will become subject to exclusion. Lastly, the fund makes use of shareholder rights and applies proxy voting in accordance with Robeco's proxy voting policy. The following sections display the ESG-metrics for this fund along with short descriptions. For more information please visit the sustainability-related disclosures. The index used for all sustainability visuals is based on MSCI World Index TRN.

SDG Impact Alignment

This distribution across SDG scores shows the portfolio weight allocated to companies with a positive, negative and neutral impact alignment with the Sustainable Development Goals (SDG) based on Robeco's SDG Framework. The framework utilizes a three-step approach to assess a company's impact alignment with the relevant SDGs and assign a total SDG score. The score ranges from positive to negative impact alignment with levels from high, medium or low impact alignment. This results in a 7-step scale from -3 to +3. For comparison, index figures are provided alongside that of the portfolio. Only holdings mapped as corporates are included in the figures.

Use of the United Nations Sustainable Development Goals (SDG) logos, including the colour wheel, and icons shall only serve explanatory and illustrative purposes and may not be interpreted as an endorsement by the United Nations of this entity, or the product(s) or service(s) mentioned in this document. The opinions or interpretations shown in this document hence do not reflect the opinion or interpretations of the United Nations.

Sustainalytics ESG Risk Rating

The Portfolio Sustainalytics ESG Risk Rating chart displays the portfolio's ESG Risk Rating. This is calculated by multiplying each portfolio component's Sustainalytics ESG Risk Rating by its respective portfolio weight. The Distribution across Sustainalytics ESG Risk levels chart shows the portfolio allocations broken into Sustainalytics' five ESG risk levels: negligible (0-10), low (10-20), medium (20-30), high (30-40) and severe (40+), providing an overview of portfolio exposure to the different ESG risk levels. Index scores are provided alongside the portfolio scores, highlighting the portfolio's ESG risk level compared to the index. Only holdings mapped as corporates are included in the figures.

Source: Copyright ©2024 Sustainalytics. All rights reserved.

Environmental Footprint

Environmental footprint expresses the total resource consumption of the portfolio per mUSD invested. Each assessed company's footprint is calculated by normalizing resources consumed by the company's enterprise value including cash (EVIC). We aggregate these figures to portfolio level using a weighted average, multiplying each assessed portfolio constituent's footprint by its respective position weight. For comparison, index footprints are shown besides that of the portfolio. The equivalent factors that are used for comparison between the portfolio and index represent European averages and are based on third-party sources combined with own estimates. As such, the figures presented are intended for illustrative purposes and are purely an indication. Only holdings mapped as corporates are included in the figures.

Engagement

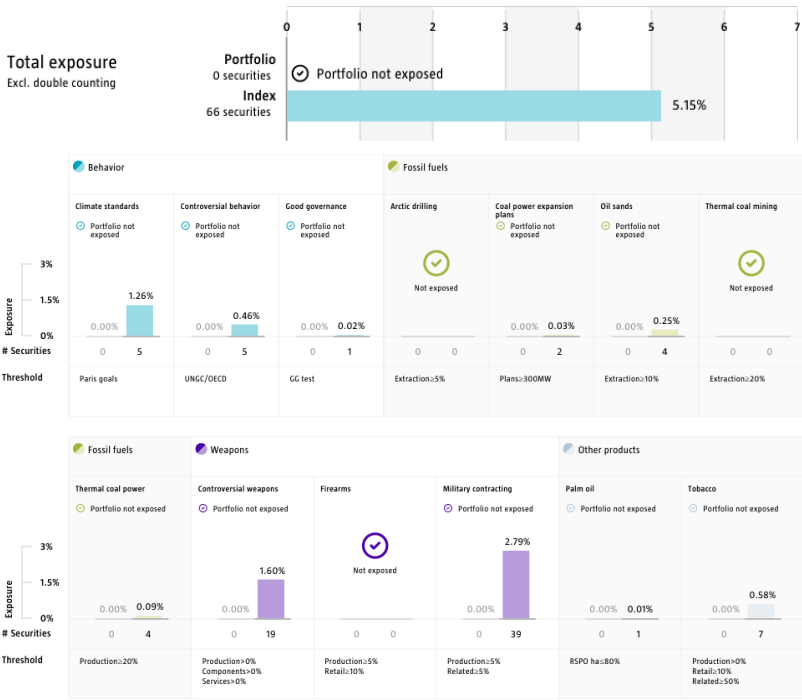

Robeco distinguishes between three types of engagement. Value Engagement focuses on long-term issues that are financially material and/or are causing adverse sustainability impacts. The themes can be broken into Environmental, Social, Governance, or Voting-related. SDG Engagement aims to drive a clear and measurable improvement in a company's SDG contribution. Enhanced engagement is triggered by misconduct and focuses on companies severely breaching international standards. The report is based on all companies in the portfolio for which engagement activities have taken place during the past 12 months. Note that companies may be under engagement in multiple categories simultaneously. While the total portfolio exposure excludes double counting, it may not equal the sum of individual category exposures.

	Portfolio exposure	# companies engaged with	# activities with companies engaged with
Total (* excluding double counting)	15.50%	7	23
Environmental	4.80%	2	4
Social	4.24%	2	8
Governance	2.36%	2	9
Sustainable Development Goals	0.00%	0	0
Voting Related	6.07%	2	2
Enhanced	0.00%	0	0

Exclusions

The Exclusions charts display the degree of adherence to exclusion applied by Robeco. For reference, index exposures are shown beside that of the portfolio. Thresholds are based on revenues unless otherwise indicated. For more information about the exclusion policy and which level applies, please refer to the Exclusion Policy and Exclusion List available on Robeco.com.

Investment policy

RobecoSAM Smart Materials Equities is an actively managed fund that invests globally in companies that provide innovative materials and process technologies. The selection of these stocks is based on fundamental analysis. The fund has sustainable investment as its objective, within the meaning of Article 9 of the Regulation (EU) 2019/2088 of 27 November 2019 on Sustainability-related disclosures in the financial sector. The strategy integrates sustainability criteria as part of the stock selection process and through a theme-specific sustainability assessment. The portfolio is built on the basis of an eligible investment universe that includes companies whose business models contribute to the thematic investment objectives. The assessment regarding relevant SDGs uses an internally developed framework, more information on which can be obtained at www.robeco.com/si. The fund also aims to achieve a better return than the index.

The fund has sustainable investment as its objective within the meaning of Article 9 of the European Sustainable Finance Disclosure Regulation. The fund fosters solutions to reduce resource intensity in the economy by investing in more efficient, scalable materials that have lower emissions over the lifetime, mainly investing in companies that advance the UN Sustainable Development Goals (SDGs): Decent Work and Economic Growth, Industry, Innovation and Infrastructure, Sustainable Cities and Communities, and Responsible Consumption and Production and Climate Action. The fund integrates ESG (Environmental, Social and Governance) factors in the investment process and applies Robeco's Good Governance policy. The fund applies sustainability indicators, including but not limited to, normative, activity-based and region-based exclusions, carbon reduction target and proxy voting.

The majority of stocks selected will be components of the Benchmark, but stocks outside the Benchmark may be selected too. The investment policy is not constrained by a benchmark but the fund may use a benchmark for comparison purposes. The fund can deviate substantially from the issuer, country and sector weightings of the Benchmark. There are no restrictions on the deviation from the Benchmark. The Benchmark is a broad market weighted index that is not consistent with the sustainable objective of the fund. The Sub-fund will use a Custom Climate Transition Benchmark to monitor the carbon profile of the Sub-fund. The Custom Climate Transition Benchmark is consistent with the low carbon sustainable investment objective of the Sub-fund. It differs from a broad market index in that the latter does not take into account in its methodology any criteria for alignment with the Paris Agreement on greenhouse gas emission reduction and related exclusions.

Fund manager's CV

Pieter Busscher is Portfolio Manager of the RobecoSAM Smart Materials Equities and RobecoSAM Smart Mobility Equities strategies and member of the Thematic Investing team. He started at Robeco in 2007 as a Deputy Portfolio Manager for the Sustainable Water strategy. Pieter became the Portfolio Manager for Smart Materials in 2009; for Smart Mobility he had been Deputy Portfolio for since strategy launch in 2018 and took over the portfolio management responsibilities in 2021. He began his career at Credit Suisse Asset Management in Zurich in 2006. He graduated from the International Business at RSM Erasmus University (Bachelor), the Banking and Finance at the University of St. Gallen (Master) and is a CFA® charterholder. Mutlu Gundogan is Co-Portfolio manager of the RobecoSAM Smart Materials strategy and member of the Thematic Investing team. Prior to joining in 2021, he worked at ABN AMRO - ODDO BHF as a sell-side equity analyst, covering the European Chemicals sector. Before that, he worked as a sell-side analyst at ABN AMRO and Royal Bank of Scotland covering the Materials, Industrials, and Health Care sectors. He started his career in 2003 at Kempen & Co., where he covered the Industrials, Consumer Staples, and Health Care sectors. Mutlu holds a Master's in Business Administration from Vrije Universiteit Amsterdam. He is a CFA® Charterholder.

Fiscal product treatment

The fund is established in Luxembourg and is subject to the Luxembourg tax laws and regulations. The fund is not liable to pay any corporation, income, dividend or capital gains tax in Luxembourg. The fund is subject to an annual subscription tax ('tax d'abonnement') in Luxembourg, which amounts to 0.01% of the net asset value of the fund. This tax is included in the net asset value of the fund. The fund can in principle use the Luxembourg treaty network to partially recover any withholding tax on its income.
