KEY RISKS

Credit Risk: Risks associated with issuers of debt securities, even those with a very high rating, may not be able to make payments to investors, or the fear associated with this risk may result in a decrease in the value of their debt securities.

Derivative Risk: Risk associated with derivatives which may be subject to unexpected movements or expose the Sub-fund to losses significantly greater than the cost of the derivative.

High Yield Risk: Risks associated with investing in high-yield bonds. Some high-yield bonds, with Ba1 or BB+ ratings, and with lower ratings from Moody's or Standard and Poor's respectively, are highly speculative and involve greater risks, including price volatility, compared to high-quality bonds. As a result, their payment of capital and interest may be questionable.
