

Key investor information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Global Bonds EUR 2025, a compartment of Indosuez Funds Unit: P (Accumulation) LU2100589238; Unit: PX (Distribution) LU2100589311

This document may be representative of the distribution and accumulation unit, as indicated in the "Practical information" section
This SICAV is managed by CA Indosuez Wealth (Asset Management)

OBJECTIVES AND INVESTMENT POLICY

The compartment (hereinafter "the Fund") aims to generate a return and/or to maximise the capital by 31 December 2025. After this date, the Fund will implement a new investment policy that will be duly communicated to shareholders and reflected in an updated prospectus.

The Fund will mainly apply a "buy-and-watch" investment approach and will mainly invest in Euro-denominated fixed-rate and variable-rate bonds and debt securities maturing no later than 31 December 2025.

Investments will target bonds and debt securities of any rating, and in particular, the Fund may invest without limit in high-yield debt securities, with a maximum of 10% of the net assets invested in securities of issuers that have a rating below B-. The minimum average rating for bonds and debt securities will be B-. No more than 15% of net assets may be invested in unrated securities.

The Fund may invest in convertible bonds and contingent convertible bonds. Up to 20% of the net assets may be invested in contingent convertible bonds. It may also invest up to 10% of the net assets in bond UCITS, particularly ETFs.

Within the limits of the investment restrictions as described in Chapter 4 of the prospectus, the Fund may make use of futures or options contracts, as well as interest rate and/or credit derivatives, either for hedging or asset exposure purposes.

The compartment is actively managed and does not track a benchmark index.

For each Share Class, the Fund is authorised to hedge exchange rate risk as part of its asset management approach.

The investments underlying this Fund do not take into account the European Union's criteria for environmentally sustainable economic activities.

The base currency for the Fund is the euro.

The investor may purchase or sell units of the Fund on a daily basis (full banking days in Luxembourg and France).

All the Fund's income is reinvested.

RISK AND REWARD PROFILE

This indicator represents the annual historical volatility of the Fund over a 5-year period.

In the absence of sufficient historical data, the risk indicator incorporates data simulated from a benchmark portfolio.

Risk category 4 reflects a moderate potential gain and/or loss in the value of the portfolio. The Fund's exposure to investments in bonds without geographical restriction explains its classification in this category.

Historical data, such as that used to calculate the synthetic indicator, cannot be considered as a reliable indication of the Fund's future risk profile.

The risk category associated with the Fund is not guaranteed and may change over time.

The lowest risk category does not mean "risk free".

Your initial investment is not guaranteed.

Significant risk(s) for the Fund not taken into account in this indicator include the following:

Liquidity risk: Liquidity risk exists when particular investments are difficult to purchase or sell. This can reduce the Fund's returns because the Fund may be unable to trade at advantageous times or prices. This may result from events of unprecedented intensity and severity, such as pandemics or natural disasters.

Risk linked to the use of derivatives: The Fund may use derivatives, i.e. financial instruments whose value depends on that of an underlying asset. However, even minor fluctuations in the price of the underlying asset may cause significant changes in the price of the corresponding derivative. The use of over-the-counter derivatives exposes the Fund to a risk that the counterparty will fully or partially fail to honour its contractual obligations. This may result in a financial loss for the Fund.

Impact of hedging techniques: The use of derivatives for hedging in a rising market may reduce potential gains.

Credit and interest rate risk related to investments in bonds: By investing in bonds, money market securities or other debt securities, the Fund is at risk of issuer default. The likelihood of this happening depends on the creditworthiness of the issuer. An increase in interest rates may cause the value of fixed-income securities held by the Fund to decline. Bond prices and yields have an inverse relationship: when the price of a bond falls, the yield rises.

Concentration risk: To the extent that the Fund's investments are concentrated in one particular country, market, industry or asset class, it could suffer losses due to adverse occurrences affecting that country, market, industry or asset class.

CHARGES

The charges and commissions are used to cover the Fund's operating costs, including marketing and distribution of shares. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	2.00%
Exit charge	1.00%
Conversion charge	None
The percentage shown is the maximum amount that can be paid out of your investment. You may find out the actual entry and exit charges from your financial advisor or distributor.	
Charges taken from the Fund over a year	
Ongoing charges	1.30%
Charges taken from the Fund under specific conditions	
Performance charge	None

The entry and exit charges shown are maximum rates. In certain cases, the charges paid may be lower.

The ongoing charges figure is based on charges for the previous year, ended 31 December 2021. This percentage may vary from year to year. It excludes outperformance charges and intermediation charges, with the exception of entry and exit charges paid by the Fund when it buys or sells shares of another Fund.

The dilution adjustment fee may be applied to the Fund at a maximum rate of 2.00%, upon entry and exit.

For more information on the Fund's charges, please see the section entitled "Charges borne by the company" in the prospectus, available on request at www.fundsquare.net and www.ca-indosuez-am.com.

PAST PERFORMANCE

The performance figures shown in the bar chart are not a reliable indication of future performance.

Annualised performance is calculated after deducting all charges taken from the Fund.

Date of creation of the Fund: 27 October 2020

Date of creation of the unit class: 27 October 2020

Base currency: Euro

PRACTICAL INFORMATION

Depository: CACEIS Bank, Luxembourg Branch
