* We identify two broad categories of funds to help investors think about how to construct their overall investment portfolio. We describe the following as "Core": (A) Equity funds with a global investment remit or those mainly focused on US and European markets, given the size and transparency of these markets. (B) Fixed income funds with a global investment remit or those mainly focused on US, European and UK markets and invest predominantly in investment grade debt, including government. (C) Multi asset funds with a multi asset benchmark. All other funds we describe as "Complements". Both Core and Complement funds can vary in risk level and those terms are not meant to indicate the risk level of the funds. There is no guarantee that these objectives will be met.

For regionally focused investment portfolios we understand that the categorisation may be different from the perspective of different investors. **Consult your financial adviser before investing to help determine if an investment in this fund and the amount of the investment would be suitable.**

⁽¹⁾ The Morningstar sector average figures are calculated using all open funds available in the universe at the indicated time period. The number of funds in a Morningstar sector varies over time as new funds are launched and funds close. Source: Morningstar ©2022 Morningstar, Inc. All Rights Reserved. ⁽²⁾ The ongoing charges figure is based on expenses during the previous year. See details in the Key Investor Information Document. ⁽³⁾ Fund returns are shown net of applicable ongoing fees within the portfolio, with dividends re-invested using the ex-dividend NAV. These returns are for comparison of performance against specified index. As the investor may be liable to other fees, charges and taxes, they are not meant to provide a measure of actual return to investors. The performance data do not take account of the commissions and costs incurred on the issue and redemption of shares. ⁽⁴⁾ Portfolio holdings may not represent current, future investments or all of the portfolio's holdings. Future portfolio holdings may not be profitable.

Important Risk Considerations

- **Concentration risk** this is a concentrated asset strategy that is likely to exhibit a significantly greater fluctuations in asset values than a broad investment in a wide range of shares of companies.
- **Correlation risk** the link between the value of the Portfolio and oil, gas and energy prices may vary significantly, particularly over short periods of time. An investment in the Portfolio should not be used to obtain exposure to movement in the price of oil.
- **Counterparty risk** a party that the Portfolio transacts with may fail to meet its obligations which could cause losses.
- **Custodian risk** insolvency, breaches of duty of care or misconduct of a custodian or subcustodian responsible for the safekeeping of the Portfolio's assets can result in loss to the Portfolio.
- **Derivatives risk** derivative instruments are highly sensitive to changes in the value of the underlying asset that they are based on. Certain derivatives may result in losses greater than the amount originally invested.
- **Exchange rate risk** changes in exchange rates may reduce or increase the returns an investor might expect to receive independent of the performance of such assets. If applicable, investment techniques used to attempt to reduce the risk of currency movements (hedging), may not be effective. Hedging also involves additional risks associated with derivatives.
- **Liquidity risk** the Portfolio may not always find another party willing to purchase an asset that the Portfolio wants to sell which could impact the Portfolio's ability to meet redemption requests on demand.
- **Market risk** the value of assets in the Portfolio is typically dictated by a number of factors, including the confidence levels of the market in which they are traded.
- **Operational risk** material losses to the Portfolio may arise as a result of human error, system and/or process failures, inadequate procedures or controls.

Glossary

- **Beta** – Measures the sensitivity of the fund's returns to the comparative benchmark index return (annualised). The nearer to 1.00, the closer the historical fluctuations in the value of the fund are to the benchmark. If above 1.00, then fund fluctuations have been greater than the benchmark.
- **Commissions** – Total amount paid to executing brokers in relation to dealing in buying and selling of investments in the Fund during year ending 30 November 2021.
- **Excess returns** – The return of the fund in excess of the benchmark/index return (annualised).
- **Historical tracking error** – Measure of the actual deviation of the fund's returns from the comparative benchmark index returns (annualised). A higher number means that the fund is taking greater risk against the benchmark.
- **Historical Volatility of Portfolio** – Illustrates the dispersion of the fund's realized monthly returns around the average monthly return, indicating how volatile the fund's return is over time. The higher the number the more volatile the fund's returns.
- **Net Asset Value** – Represents the net assets of the fund (ex-dividend) divided by the total number of shares issued by the fund.
- **Ongoing Charges** – The ongoing charges figure is based on the fund's expenses during the previous 12 months, on a rolling basis. It excludes transaction costs and performance fees incurred by the fund.
- **Other Expenses** – Fees deducted from the Fund's assets incurred as part of the Fund's operations, including, where applicable, costs incurred by the Fund when investing in other funds.
- **Other Costs** – Total amount of costs incurred by the Fund outside Commissions during year ending 30 November 2021. These may include, but not limited to, market fees and local taxes.
- **R²** – Measure that represents the percentage of a portfolio movement linked to movements in the benchmark index return (annualised). The nearer to [1.00], the more a fund is tracking the risk of the benchmark, and the less risk that the fund is taking against the benchmark.
- **Swing pricing** – The swing factor represents the factor in place month end and is subject to change on any Dealing Day depending on prevailing market conditions.
- **Transactions costs** – Total trading costs of transactions incurred by the fund, including Commissions during year ending 30 November 2021. Does not include trading spreads incurred on transactions.
- **Turnover ratio** – Measure of how frequently over the period assets are bought or sold in the fund (Lower of Purchases or sales by the Fund/Average net assets of the Fund).

Offering Documents: This material is provided at your request for informational purposes only and does not constitute a solicitation in any jurisdiction in which such a solicitation is unlawful or to any person to whom it is unlawful. It only contains selected information with regards to the fund and does not constitute an offer to buy shares in the fund. Prior to an investment, prospective investors should carefully read the latest Key Investor Information Document (KIID) as well as the offering documentation, including but not limited to the fund's prospectus which contains inter alia a comprehensive disclosure of applicable risks. The relevant articles of association, prospectus, supplement, KIID and latest annual/semi-annual report are available free of charge from the fund's paying and information agent and/or from your financial adviser.

Distribution of Shares: Shares of the fund may not be registered for public distribution in a number of jurisdictions (including but not limited to any Latin American, African or Asian countries). Therefore, the shares of the fund must not be marketed or offered in or to residents of any such jurisdictions unless such marketing or offering is made in compliance with applicable exemptions for the private placement of collective investment schemes and other applicable jurisdictional rules and regulations.

Investment Advice and Potential Loss: Financial advisers generally suggest a diversified portfolio of investments. The fund described herein does not represent a diversified investment by itself. This material must not be construed as investment or tax advice. Prospective investors should consult their financial and tax adviser before investing in order to determine whether an investment would be suitable for them.

An investor should only invest if he/she has the necessary financial resources to bear a complete loss of this investment.

Swing Pricing: Please note that the fund operates a swing pricing policy. Investors should be aware that from time to time this may result in the fund performing differently compared to the reference benchmark based solely on the effect of swing pricing rather than price developments of underlying instruments.

Fees are generally billed and payable at the end of each quarter and are based on average month-end market values during the quarter.
