Fund Strategy

The Fund is an actively managed global portfolio focused on consumer trends driven by changes in standards of living, demographics and connectivity. The investment team believes consumer habits are rapidly changing with the introduction of new technology. Technology is changing where and how we shop, how we consume media, how we travel, and as a result: how we spend our discretionary income. These changes are global, not regional, and are driving large shifts in market share between companies, creating winners and losers and an excellent environment for bottom-up fundamental research - the keystone of our investment process. The investment team employs a three pillar approach to the investment process: 1) research-driven security selection applied through fundamental analysis, valuation and timeliness; 2) portfolio construction determined by consistent diversification practices and strict sell disciplines; 3) risk management and analysis of external thematic factors integrated at every stage of the investment process.
