Investment risks

For complete information on risks, refer to the legal documents. The value of investments and any income will fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested. Debt instruments are exposed to credit risk which is the ability of the borrower to repay the interest and capital on the redemption date. Changes in interest rates will result in fluctuations in the value of the fund. The fund uses derivatives (complex instruments) for investment purposes, which may result in the fund being significantly leveraged and may result in large fluctuations in the value of the fund. The fund may hold a large amount of Asset Backed Securities (ABS) (complex instruments) as well as other lower quality debt securities which may impact the liquidity of the fund under certain circumstances. The Fund may invest in a dynamic way across assets/asset classes, which may result in periodic changes in the risk profile, underperformance and/or higher transaction costs. The fund may invest in distressed securities which carry a significant risk of capital loss. The fund may invest in certain securities listed in China which can involve significant regulatory constraints that may affect the liquidity and/or the investment performance of the fund. Investments in debt instruments which are of lower credit quality may result in large fluctuations in the value of the fund. As a portion of the Fund may be exposed to less developed countries, you should be prepared to accept large fluctuations in the value of the Fund.

Fund Strategy

This fund has a flexible investment approach that can go anywhere. It is not tied to a benchmark and is not biased towards any specific fixed income sector or region. It invests across the full spectrum of the fixed income universe, with active exposures to interest rate, credit and currency markets (both long and short positions) and flexible duration management (2-9 years range). Duration is a measurement of interest rate risk. It considers a bond's maturity, yield, coupon and call features.

Past performance does not predict future returns. The performance period shown here starts on the last day of the first indicated month and ends on the last day of the last indicated month.

SFDR (Sustainable Finance Disclosure Regulation)

The Fund complies with Article 8 with respect to the EU's Sustainable Finance Disclosure Regulation*. As such, the fund promotes, among other characteristics, environmental or social characteristics or a combination of those characteristics. In addition, the companies in which the fund invests follow good governance practices. *Regulation (EU) 2019/2088 on sustainability - related disclosures in the financial services sector.

Exclusion Framework

The Fund embeds an exclusionary framework to specific activities based on UN Global Compact, severe governmental sanctions, revenue thresholds for certain activities linked to environmental and/or social criteria, as well as ensuring that companies follow good governance practices. The list of activities and their thresholds are listed below:

UN Global Compact	- Non-Compliant
Country sanctions	- Sanctioned investments are prohibited*
Controversial weapons	- 0% of revenue including companies involved in the manufacture of nuclear warheads or whole nuclear missiles outside of the Non-Proliferation Treaty (NPT)
Coal	- Thermal Coal extraction: $\geq 5\%$ of revenue - Thermal Coal Power Generation: $\geq 10\%$ of revenue
Unconventional oil & gas	- $\geq 5\%$ of revenue on each of the following: Arctic oil & gas exploration; Oil sands extraction; Shale energy extraction;
Tobacco	- Tobacco Products production: $\geq 5\%$ of revenue - Tobacco related products and services: $\geq 5\%$ of revenue
Others	- Recreational cannabis: $\geq 5\%$ of revenue
Good governance	- Ensure that companies follow good governance practices in the areas of sound management structures, employee relations, remuneration and tax compliance

*At Invesco we continuously monitor any applicable sanctions, including those imposed by the UN/US/EU and UK. These sanctions may preclude investments in the securities of various governments/regimes/entities and as such will be included in our compliance guidelines and workflows (designed to ensure compliance with such sanctions). The wording of international sanctions is something that we pay particular attention to as there are occasions where sanctions can exist in limited form, for example allowing investments in the secondary market. In addition to sanctions targeting entire countries, there are other thematic regimes, which may focus for example on human rights, cyber attacks, terrorist financing and corruption, which may apply to both individuals and/or entities/corporations.

Any investment decision should take into account all the characteristics of the fund as described in the legal documents. For sustainability related aspects, please refer to: <https://www.invescomanagementcompany.lu/lux-manco/literature>.

At Invesco we have looked to put in place minimum safeguards across multiple sub-funds of Invesco Funds (as listed above) to allow them to meet Article 8 requirements of the SFDR Regulation as of 2 November 2021. To be classified as a so-called Article 8 product, the sub-funds need to promote, among other things, environmental and/or social characteristics while also ensuring that investee companies follow good governance practices. In order to meet such requirements, it was determined that we would look to exclude certain activities based on certain thresholds, which may be updated from time to time. For further details please refer to the website of the management company at <https://www.invescomanagementcompany.lu>.

As noted above this is a proprietary framework developed by Invesco in line with Article 8 requirements of the Regulation (EU) 2019/2088 on sustainability. The framework is developed, maintained and monitored by Invesco. In order to assess companies against the noted criteria, Invesco uses a combination of Sustainalytics and ISS (Institutional Shareholder Services) to assess compliance, however, this can be supplemented with other service providers where appropriate. While there is a broad coverage across the various systems, there is no one system that has complete coverage of the entire investment universe. As a result, investment teams will be responsible for conducting an assessment of companies for which data is not available, under the appropriate supervision and oversight of our investment compliance and ESG teams.

Invesco's Commitment to ESG

Invesco has an investment-led ESG approach. We provide a comprehensive range of ESG-focused capabilities that enable clients to express their values through investing. We also integrate financially material ESG considerations across our investment platform, taking into account critical factors that help us deliver strong outcomes to clients.
