Algebris UCITS Funds plc

Class Md USD (ISIN IE00BDCK0C02) Algebris Financial Equity Fund, a sub-fund of Algebris UCITS Funds plc

OBJECTIVES AND INVESTMENT POLICY

The Algebris Financial Equity Fund (the **Fund**) aims to achieve positive returns regardless of whether markets are falling or rising.

The Fund is considered to be actively managed in reference to MSCI World Financials Index (the **Benchmark**) by virtue of the fact that the Benchmark is used as the reference index for the purposes of calculating the global exposure of the Fund using the Relative VaR methodology and for performance comparison purposes. However, the Benchmark is not used to define the portfolio composition of the Fund or as a performance target and the Fund may be wholly invested in securities which are not constituents of the Benchmark.

Securities may be debt securities (such as government and corporate bonds with fixed and variable interest rates, which may be rated investment grade or below investment grade), equities (such as ordinary shares and common stock), equity-related securities including preference shares, convertible securities (bonds that can be converted into shares), contingent convertible instruments (**CoCo-Bonds**) (bonds that can be converted into shares or their principal amount may be written down if a pre-specified trigger event occurs), real estate investment trusts (investment structures that invest in income-producing real estate assets), exchange traded notes (**ETNs**) (a type of debt security, in order to gain exposure to an eligible index, market or asset class), exchange traded funds (**ETFs**) (securities that track an index, a commodity or a basket of assets like an index fund, but trades like a stock on an exchange), global and American depositary receipts and warrants and rights. During times of high levels of market movements (volatility), the Fund may invest substantially in deposits.

FDI are instruments that are linked to and derive their value from an underlying financial instrument or indicator. FDI include options (securities that give the right to buy or sell another asset), swaps

(an instrument that swaps the performance of one asset for another), contracts for difference (a security that returns the difference between the value of an asset at the beginning and the end of the contract), futures (contracts to exchange a predetermined quantity of another asset at a certain price on a certain future date) and forwards (contracts to exchange foreign currencies or securities at an agreed date in the future). In addition, certain financial instruments such as convertible securities, CoCo-Bonds, ETNs, ETFs may have embedded leverage or embed a derivatives component. The Fund may invest in financial instruments for the reduction of risk and/or the generation of additional capital or income.

The Fund may invest up to 50% of its net asset value in emerging markets.

The Fund's base currency is Euro and the Fund may use currency hedging (the technique of buying or selling currencies to minimise fluctuations in non-Euro currency investments resulting from foreign exchange movements). There is no guarantee that this will be successful.

Investment in the Fund may be suitable for investors with a long term investment horizon. For full investment objectives and policy details, please refer to the section entitled "Investment Objective and Policy" in the supplement for the Fund (the **Supplement**).

Dealing

You can buy or sell shares daily (but not on weekends or bank holidays in the UK or Ireland). Orders to buy and sell can be made by submitting a request by 12.00p.m. (Irish time), one business day in advance, to the administrator, HSBC Securities Services (Ireland) DAC.

Distribution Policy

The Fund may declare dividends on the following approximate dates: 1 January, 1 April, 1 July and 1 October.

RISK AND REWARD PROFILE

lower risk **higher risk**
←—————→
Typically lower rewards Typically higher rewards

1	2	3	4	5	6	7
---	---	---	---	---	---	---

The synthetic indicator shown above is calculated using historical data from a representative model for the last five years and may not be a reliable indication of the future risk profile of the Fund.

The risk and reward category shown is not guaranteed to remain unchanged and may change over time. The lowest category does not mean that a share class is risk free and your initial investment is not guaranteed. The Fund is in category 7 because of the very high range and frequency of price movements of the underlying investments.

Risk Factors

The value of your investment in the Fund may be affected by the following risks:

- The Fund can invest in equities which may be affected by market risk (the risk of an investment losing its value due to changes in economic conditions).
- As the Fund invests in debt securities (e.g. bonds) it is subject to credit risk (the risk of a bond issuer failing to pay) and

interest rate risk (the risk of changes in interest rates).

- The Fund may also invest in CoCo-Bonds, these bonds have additional risks such as the risk that following certain trigger events, including an issuer's capital ratio falling below a particular level, the bond may be converted into the issuer's equity or its principal amount may be written down, resulting in losses for the Fund.
- The Fund can invest in FDI. These instruments have additional risks such as legal risk or liquidity risk (the inability to sell the contract due to lack of buyers in the market). These risks can have adverse impacts on the overall value of the Fund.
- The Fund can invest in emerging markets. Such markets carry additional risks such as political instability, weaker auditing and financial reporting standards and less government supervision and regulation.
- The Fund's investments may be in currencies other than Euros. The impact of this is that as the value of a currency rises or falls it can have a positive or negative impact on the value of the Fund's investments.
- For a complete overview of all risks attached to this Fund, refer to the section entitled "Risk Factors" in the Supplement and Algebris UCITS Funds plc (the **Company**) prospectus (the **Prospectus**).

CHARGES

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest:	
Entry charge	0.00%
